Finally, the momentous question of cost must be considered. It is very much cheaper to set oneself up well in some breeds than in others, and no one who means to do well by his dogs can afford to start with second-class stock. That class of animal may possibly by an accident succeed in paying its way for a time, but the day of reckoning surely comes; so the best is always cheapest, best and surest in the end.

A badly-bred dog no matter how good-looking he may be or how many prizes he may have won, is a very dangerous, unsatisfactory brute to have in a breeder's kennel. In adopting the expression badly-bred, the writer does not desire it to be inferred that he is alluding to animals which may not be fashionably bred, but rather to those whose pedigrees can be traced to ancestors which have shown bad faults. A so-called unfashionably bred dog simply possesses the misfortune of not being allied to some of the most notable winners of the day, but the blood which may run in his veins may be that of a good old strain, and may assert its presence and its power at any time. On the other hand, the animal which goes back to a dog or bitch which displayed some conspicuous bad point is quite likely to hand the blemish down to its offspring, and thus may bring disaster upon its owner. In short, both good points and bad ones in a strain, though they may lie dormant for a generation or two, are always liable to appear, and sometimes when least expected.

But to return to the question of selecting a dog, and at the same time paying proper attention to its pedigree, it may be observed that for breeding purposes the sire or the brother, the dam or the sister of the great winner may be more valuable than the crack itself.

Beyond all question a very considerable number of the great winners have proved themselves to be most successful animals at the stud; but until they have proved their quality there are excellent reasons for preferring their sires or their dams, as the case may be. There are plenty of instances moreover, in which the humble looking brother or sister of a champion have proved themselves most reliable breeders, and, consequently, when the price is a consideration and the buyer has grit in him and can afford to wait, he, if he is a beginner, and therefore inexperienced, will be wise if he refrains from investing too much capital in purchasing a champion all at once. Under all circumstances, however, in establishing a breeding kennel it should be remembered that a good pedigree is more valuable than good looks unsupported by good breeding.

It has already been pointed out that the novice will be acting unwisely if he goes in for a multiplicity of breeds at starting; and scarcely less undesirable will it be for him to commence with too many dogs in his kennel. He should feel his way step by step, beginning with a few carefully selected animals of the breed he has decided upon patronizing, and when he has satisfied himself that he can do justice by more he can increase the number. Dog breeding, like most other things, is surrounded by many difficulties, most of which will be anticipated and pretty easily overcome by an experienced person, but they are often serious matters for the beginner. What is required of the person who looks after a kennel is a certain amount of practical experience, which time alone can bring you, for it is absolutely necessary that he should know the way how to apply the advice he receives.

Then, too, in the case of a breeding kennel it is only reasonable to anticipate that puppies will make their appearance in due course, and if there are several brood bitches on the establishment the owner may find his hands far fuller than he cares for all at once. Consequently it may once more be repeated that the cautious man who intends to succeed, and at the same time conserve his resources, will obtain more pleasure and greater satisfactory results at the commencement if he starts on a far smaller scale than he ultimately intends to adopt. The strength of a kennel can always be added to, but it is not always so easy to reduce it upon an emergency without loss, and the latter most undoubted fact is one that should be laid to heart by the beginner.—*The English Stock-Keeper.*

AT THE TRAPS

The Union Gun Club's initial shoot tomorrow at Ingleside promises to attract a crowd of trap shooters. A good program is offered, all trap shooters are cordially invited and the trouble will begin at 10 A. M. sharp.

The Empire Gun Club will open the club trap season on the Alameda Point grounds tomorrow. The club program for 1904 is practically the same as last year—it embraces the Champion Race with prizes to three high guns. The Money Match, gold and silver cuff buttons are the prizes for the season's record.

The open to all races are the Sweeney Record Medal and the Special Cash Prize Race. The added money and prizes offered are \$150 in value. The receipt of the program late this week prevents a more extended notice of a very attractive shooting card.

Foggy unpleasant weather did not prevent a strong attendance of wingshots at the initial shoot of the California Wing Club at Ingleside last Sunday. Twenty-two members and guests of the club shot through a number of events. The club purse of \$150 was split up into eight moneys: \$35, \$30, \$25, \$20, \$15, \$10, \$10 and \$5 to high guns.

Two straight scores by Ed Donohoe and P. J. Walsh were made by members. Harvey McMurchy of Fulton, New York, also killed straight. The general average of shooting was very good and the birds supplied by the management lively enough to try the skill of the best. J. Birmingham, Jr., C. Sylvester, Wm. Harrison and Lester Wood were the Pinole contingent present. W. S. Wattles officiated as referee and will continue to act in that capacity at each subsequent club shoot.

After the club race was concluded, six bird races were in order. The scores and distance handicaps follow:

Club race, 20 pigeons, distance handicap, \$150 added, high guns—

The College City Gun Club program for 1904 calls for five monthly shoots, on the first Sunday of each month, beginning with March.

The arrangement of shooting at each regular monthly club shoot is as follows:

Event 1—Medal race, for members only; 25 targets, 50 cents entrance. All contestants will be handicapped, by the percentage system, into classes. High guns in each class to win. No more than two back scores to be made up during the season of five shoots. The back scores must be made up on the first regular club shoot attended by the member having back scores. There will also be a prize given by the club for second place in each class in this event.

Event 2—Cup race, for members only; 20 targets, entrance 50 cents. All contestants shoot the first 10 birds from the 16-yard mark and are handicapped as follows for the remaining 10: Contestants breaking 9—10 targets, shoot from 20 yards; 7—8, 18 yards; 5—6, 16 yards; 4 or less, 14 yards. This handicap to apply to all except winners who shall be handicapped 2 yards for each win on the first 10 birds. The cup must be won three times in order to become the property of any member. All ties to be shot off in a 10-bird race; entrance 20 cents. Continued ties to repeat. No contestant to shoot from a further distance than the 20-yard mark.

Event 3—Prize, care of loaded shells, 15 targets, 30 cents entrance, under sealed conditions.

Each shoot will commence with a special match—The Chick medal race, for members only, 15 targets, 30 cents entrance, high gun to win. This medal must be won on three successive regular club shoots, in order to become the property of any contestant.

At the closing regular shoot there will be shot the second special race for a prize consisting of a pair of rubber boots. Entrance 50 cents, 25 targets, high guns to win. This event is open only to members whose averages 60% or below for the season in Event 1 and is to be held at the regular club shoot in July.

The regular club events will start promptly at 10 o'clock A. M. each shoot. Any entrance money may be refused after the first squad has shot out in any event. All ties to be shot out in a ten bird race; entrance 20 cents. If any contestants are still tie, a miss and out race will be in order, birds extra at 2 cents each, except as provided for elsewhere. All 15 and 25 bird races in this program will be considered by the club as being contests for bars. Broken targets shot at, will not count, in any event.

The club shoots will be held at the trap grounds on the county road (extension of Spruce street), North Berkeley.

For the convenience of contestants an arrangement has been made by which those desiring may leave their guns and ammunition at Wright's Cigar Store, on Center street, Saturday evening, or before 9:45 A. M. Sunday, from which place they will be taken to the grounds free of charge.

The club cordially invites the attendance of non-member trap shooters, for whom special events will be arranged.

Tackle Notes.

The first of April being close at hand it behooves the angler to get his tackle and kit in order. Lines and leaders should be carefully examined and tested, reels put in working order and rods inspected and made ready for the trout stream.

The fly-book should be gone over and the flies for the first of the season selected—or a memorandum made of the necessary complement needed of dark, not gaudy flies.

Baits and spoons will, it is believed by the experienced anglers, be largely in vogue for the first days of the season. High water and not too clear will probably be the stream conditions—furthermore the heavy rains and stormy weather will have a tendency to retard the appearance of insect life about the trout waters, thus the "harnyard hackle," the sbrimp and mushy spawn will be the principalures used by fisherman early next month. Your true angler, however, will await the happy days when he can enjoy himself on his favorite stream, using a cast that is the right thing at the time unless, ahem! well you know how it is yourself, gentle reader, the spirit is willing but the flesh is weak when the fish are biting. Nay! nay! we mean rising.

A sight good for even a blind angler is the display of tackle and new things for the Waltonians at the sporting goods establishment of Clabrough, Golcher and Company. A new stock of the best appointed Leonard rods, in all weights, ever seen in this city. A bewildering assortment of the old standard and the latest and best in reels; straight running and multiplying, for trout, salmon and bass. As for lines, the variety is such as to satisfy any demand for silk, linen or other texture, of the best makes extant; some of these goods being specially made for the house. Among the list are the Nimshaw California Club, San Hedrin and some special bass lines, offered in 50, 100 and 200 yard lengths.

A selected and fresh stock of leaders and a complete line of new Scotch flies, also a large selection of indestructible rubber insect baits is supplemented by an unequalled assortment of creels, landing nets, tackle and reel boxes, fly-books, scales, special cutlery for anglers and the many individual conveniences and implements affected by the angler who desires a complete and high class outfit wherein quality and cost have the pleasing relation to each other that may best be illustrated by the phrase—high and low.

Striped bass are running in the straits. A number of fish have been caught during the week. Mr. Carroll hooked eight last Monday evening about as fast as he could get them into his boat. He was fishing off the end of Belvedere island.

The Fly-Casters will meet at Stow lake this afternoon and tomorrow morning. Contests No. 2 will take place.

Trade Notes.

The following interesting letter has been received by the E. I. Du Pont company:

POTSDAM, N. Y., Feb. 24, 1904.

Du Pont Powder Company,
Dear Sirs:—I have in my possession some Du Pont powder that was bought about fifty years ago by my uncle and grandfather; they owned two rifles and did lots of shooting, so they bought a considerable quantity of powder and stored it in a large stone heap on my father's farm at a safe distance from the buildings. Uncle took to fever and died; grandfather never shot much more and died not long after; my father was no gunner, so the powder or portion of it was left for about 15 years. I went and dug it out. There was a large flat stone over the box and about two dozen 4-lb. cans, round cans, I think, with an Indian's picture on each one. They were badly rusted. I picked the rusted can from around the caked powder, broke it up and sifted out the dust, leaving the powder looking quite natural but for some red grains that showed the rust. I saved four lbs. I never tried it till last fall I loaded 38-72 shells with it and some with some Du Pont bought recently. The old powder shot fully as strong as the new.

Yours truly,
W. A. CLARK.

At the live bird shoot, held at Ingleside Sunday March 6th the exclusive use of U. M. C. ammunition by both local and visiting experts, was a noticeable fact. This record stands unduplicated and without precedent.

The Columbia Rifle and Pistol Club held a shoot at Harbor View Park, San Francisco, on Sunday, March 6th. In fine rifle match at 200 yards—without rest—G. M. Barley scored 68-91 with a 32-40 rifle, using U. M. C. 32-40 cartridges and U. M. C. primers. F. Knostman scored 96 with a 25-21 rifle, using U. M. C. 25-21 cartridges and U. M. C. primers. T. L. Lewis scored 196 with a Remington No. 7 rifle, using U. M. C. 22 long rifle cartridge. In the revolver match at 50 yards—without rest—Mr. A. J. Brannagen scored 42-45-51-52 with a Smith & Wesson 32-20 revolver, using U. M. C. 32-20 cartridges. C. M. Daiss scored 44-62-63 with a Smith & Wesson revolver and 33 Smith & Wesson Russian (U. M. C.) cartridges and U. M. C. primers. In the 22-25 rifle matches at 50 yards, without rest, J. Campbell scored 46-57 with a 22 Marlin rifle using U. M. C. 22 long rifle cartridges. T. L. Lewis scored 35-77 with a Remington No. 7 rifle using U. M. C. 22 long cartridges.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

Eastern Traffic in Game Birds for Stocking.

Shipping prairie chickens caught in the far Northwest to a European game preserve is a novel industry launched recently by Dr. Cecil French, of Washington, D. C., whose exhibit of wild fowl has been displayed at the Sportsmen's Show in Madison Square Garden. He sent twenty pairs of prairie hens and chickens direct to the Paris home of the Marquis de Beauvoir, who will send them later to a large estate outside the city. The prairie hens are of the sharp-tailed grouse, while the chickens are of the sharp-tailed variety. Years ago both species were common on the western prairies, and people caught them for food in great numbers; to-day both are becoming extinct; Dr. French got \$15 a pair for the ones he shipped across the ocean.

The collector's headquarters in Washington contain many varieties of wild fowl. For three years he has been engaged in catching them for sale to owners of large estates. He has studied the tricks of encircling the different wild birds, but is not disposed to give away all of his secrets.

"No, I can't tell where I get them," he said to a questioner at the show. They were caught about a month ago in the Northwest. Yes, they are scarce, so scarce that I never had 100 during an entire year, though I've been collecting them for three seasons.

"How are they shipped to me? Well, I have devised a special crate to hold a dozen or more. It has a double floor, the lower one being the bottom wood frame of the crate, while the main floor, on which the birds stand, is formed of slats and wire netting. On one side of the cage is a water trough, and adjoining this is an automatic feed trough, which will carry enough food to last for a week's journey. The food is a mixture of sand, buckwheat and crushed wheat. The only trouble is about the water, for that has to be renewed frequently, and as it takes about a week for the birds to reach Washington from the Northwest I have to rely entirely upon the kindness and thoughtfulness of the trainmen. Upon the crates is a request to water the birds, but this is not always complied with, and sometimes the birds die."

It is against the law to take prairie chickens, dead or alive, outside of any State in the Union. But Dr. French explained:

"I do it legally. No, don't ask me how, for that is another of my secrets."

It will take two or three shipments to send the Marquis de Beauvoir his entire collection.

"As the birds arrive," said Dr. French, "they probably will be placed in a lot containing a few acres, but well fenced with wire netting. Here the early comers will await the arrival of the entire flock, and then, some fine night, the gamekeeper will carry them out in the big main preserve previously having taken the precaution to strew the ground in the immediate vicinity with the proper kind of food. By taking wild fowl out like this at night they do not become scared, but hop around a little and then settle down for the night, like obedient children. Do this in the day time, and in a twinkling the birds would be miles away. In the morning, having grown accustomed to the surroundings, they will see the food and begin eating, and thus be made peaceable on their entry into the new home."

"Perhaps for the first year the hens may not breed much, but in the second they'll be as thoroughly at home as on their native heath, and each pair should have an average increase of five birds. They seldom have more than one brood a year, but in the West they have two sometimes."

Dr. French does not confine his attention to catching prairie chickens. Last year he sent forty Virginia wild turkeys to England for a big game preserve, selling them for \$50 a pair, delivered on the other side. There is also a great demand for quail from owners of preserves, and he supplies hundreds of them every year to different estates in this country. The common quail cost from \$9 to \$10 a dozen by the hundred, but the scarcer California mountain variety are worth \$20 a pair delivered in England.

Yellow Legged Plover.

The yellow legged plover is in some portions of the United States a very abundant if not a very highly prized game bird. So common is it at certain times in some regions, that no value is attached to it at all by the shooter. It is a legitimate object of pursuit in shore bird shooting, but on the great interior marshes of the United States, where the Wilson's snipe, commonly known as jack snipe, is to be found, the yellow leg loses value by comparison, and a bag of these birds usually subjects the gunner to the smiling comment of his friends, if it be during the jack snipe season. Whereas the Wilson snipe is, for the most part, keen of faculty and sharp of wing as well as erratic in flight; the yellow leg, upon the contrary, is ordinarily dull witted, unsuspicious and unable to take good care of itself. It decoys readily, can even be induced to approach the shooter by a whistle which imitates its note, and it is so leisurely on the wing that it is easy prey for the gunner. Whereas the jack snipe is an independent soul, able to fend for himself and reliant upon his own resources; the yellow leg is sociable as well as gullible in its habits, and now and again one may hear the warning of the approach of a large flock of these birds in their high keyed whistle a sound which of itself is keen, vibrant and full of the careless enjoyment of life. There is in the call of the yellow leg the as-

surance of sunshine and the out-door air. The note is easily imitated by the gunner without the aid of any calling instrument, and one of the simplest ways of securing the yellow legs is to conceal one's self in the grass and induce them to approach by means of the imitation of their call.

The habitat of the yellow leg is a wide one. Like its shorter legged cousin, the golden plover, it reaches far to the South in its migrations as Patagonia, and upon the North it does not pause until it touches the Arctic regions. It breeds all over the northern country, from northern parts of the United States to the limit of its northern migrations. Yet while it is not known to breed to any great extent in the United States, it has been observed during the summer months in the Southern states, in Texas, in Florida, even far to the South in South America, especially in the pampas of Argentina and Uruguay. Common along the Eastern seaboard, it is found here and there pretty much all over the United States, wherever marsh or muddy flats can be found, from the Eastern to the Western sea.

Whereas the jack snipe or the woodcock prefers soft swampish ground for its feeding quarters, and whereas either of these birds may now and again be found upon grassy knolls, the yellow leg is more strictly a bird of the marsh. It is now and again found upon burned-over flats, sometimes upon the grassy marshes, frequently along the low banks of rivers, and more especially upon wet, muddy flats, where it is most fond of congregating, and its food is most abundant. While it now and again picks up little insects, its customary food is worms, small crustaceans or such little fishes as it can secure. This food sometimes gives to the flesh a fishy smell and flavor. Although edible and sometimes desirable upon the table, it is not to be compared in quality with the Wilson snipe or the woodcock, nor can we compare it with either of the former in sporting quality.

The woodcock can be pursued to best advantage with the bird dog, and many shooters think that jack snipe shooting is robbed of half its pleasures when followed without a Pointer or Setter, upon the other hand, the yellow legged plover offers no sport with the dog. Its habits although not the acme of keenness, are not such as to invite the hunter to take with him his favorite companion. In localities where it is sufficiently pursued it sometimes allows itself to be approached in plain view by the gunner. It is continually running about, never quiet, and it must be confessed that it is continually found vaunting itself. It frequently runs about with its bill under the water, and now and again one will see a file of these birds thus racing along, presenting a somewhat unusual spectacle.

Upon some of the big marshes of Wisconsin, Illinois, Indiana and other parts of the West, the yellow legged plover appear in the early fall or in the spring in immense numbers. While the bird is not thought to breed in these localities, it none the less does so, and in some numbers and it appears to be the most numerous about September 1, at which time the duck shooters usually begin their sport.

Supposing there are no jack snipe about, the shooters sometimes put in an idle hour with the yellow legs, and in this way very large bags are sometimes picked up, although little value attaches to the bird as yet in these localities. The common method of hunting them is to push one's boat close to some mud flat where the birds feed, and then to sit quietly and await for the birds to approach. It is all the better if one can imitate their call, but often this is not necessary. The writer has sat with a companion out in plain sight in a boat, upon a mud bar, in full view of the birds, yet such was the unsuspicious nature of the little fellows that they would come within easy range apparently paying no attention to the boat or its occupants. We soon wearied of shooting birds so little able to protect themselves. In localities less abounding in better birds, the yellow leg takes on greater interest as a sporting equation, and the shore bird shooter has what he considers good sport shooting them from a blind and over decoys. The upland shooters do not customarily employ decoys, and indeed in the course of a somewhat extended experience in western upland shooting, I have never seen a western shooter build a blind for the purpose of shooting yellow legged plover. At certain seasons of the year, the early spring or fall upon the northern marshes, or during the winter months along the coast marshes of Texas, I have at times seen the air full of the circling flocks of these birds. It would have been easy to kill numbers of them under such circumstances, but customarily the game in view was a better one.

The market shooters do not often concern themselves about these birds, although the greater yellow leg is sometimes killed by market hunters who shoot jack snipe along the sea marshes of Texas, and in certain conditions of the market it brings nearly as good a price as the jack snipe. The lesser yellow leg rarely brings so much as \$1.25 a dozen in the retail markets of the cities of the United States. Thus it may be seen that the bird has no great value in the eye of the sportsman, the market hunter or the epicure. As a game bird it especially commends itself to the young sportsman, the boy who is just beginning to handle the shotgun and who has not yet acquired skill sufficient to stop the zig-zagging jack snipe or the swiftly winging wild duck.

The Yellow Legged plover (*Totanus melanoleucus*, the greater yellow leg; *totanus flavipes*, the lesser yellow leg).

Common names: Of the greater yellow leg: tell tale, yelper, yellow shins, stone bird, cu cu, large cu cu, winter yellow leg. Of the lesser species: tell tale, yellow leg, summer yellow leg.

Description: There are two species of the yellow legged plover, the great yellow leg and the lesser. The great yellow leg is a bird of considerable size, reaching a length of 14 or 15 inches and a wide extent of 25 inches. The wing is 7½ inches and the bill 2½ inches in length. The body color of this bird is

blackish mixed with white and grayish markings. The crown and back of the neck are grayish white marked with dusky streaks. The upper tail coverts are white, regularly barred with darker markings. The middle tail feathers are grayish with dark bars, and the remainder of the tail is white with dusky bars. The sides of the head and neck are white, and so is the belly, but the sides and flanks are marked transversely with dusky shadings. The bill is black, the eye brown, the legs and feet a deep yellow. The lesser yellow leg has the same distinguishing markings. The color of the legs is so pronounced as to give the species its name.

Range: The greater yellow leg is known from Patagonia on the south to the Arctic regions of North America. On the pampas of the Argentine Republic it is to be found the year around, the flight from the Antarctic region appearing in that latitude to take the place of the birds which breed in the Arctic regions of the north. It is found generally along the Atlantic coast, not in so great numbers on the Pacific slope. It is fairly common on the Pacific coast so far south as Chile. Its breeding range runs from Illinois, Wisconsin and Iowa to the Arctic circle and it breeds in Labrador in considerable numbers.

The lesser yellow leg is even more abundant and widely distributed than its greater kin. It is known all over the United States between the Atlantic and the Pacific seas, from Labrador to Alaska, and up and down the Pacific coast from Sitka to the Yukon region. It is known also in Greenland. It breeds in considerable numbers in certain of the western states such as Illinois, Indiana and Wisconsin, though the reclaiming of the marsh lands lessens the numbers of birds which breed so far to the southward. Upon the north the nesting grounds of the lesser yellow leg are found about the Great Slave lake and thence southward to the northern limit of the United States. These birds are seen during their migration in great numbers on the shores of Hudson Bay and they pass regularly up and down the Mississippi valley in their migratory flight. They are not so abundant upon the Pacific coast as upon the eastern shores of the continent or in the greater interior marshes of the middle western states.

Habits: A simple bird, gregarious in habits. Its food, as above stated, is composed of insects and small crustaceans, occasionally of small fishes. Its natural feeding ground is wet marshes, burned marshes, low shores and flats or bars of mud. When it alights this bird raises its wings straight into the air and sometimes a whole flock dropping down upon a bar will be seen to execute this maneuver at the same time.

The yellow legged plover is careless in its domestic arrangements, its nest being a very rude affair, a mere depression in the ground. The eggs are usually four in number and are grayish white, with markings of lilac or light brown.—*E. Hough in Texas Field.*

Coming Events.

Rod.

March 12—Saturday Contest No. 2. Classification Series, Stow lake, 2:30 P. M.

March 13—Sunday Contest No. 2. Classification Series, Stow lake, 10 A. M.

April 1—Sept. 10. Oct. 16—Feb. 1—Open season for taking steelhead in tidewater.

Nov. 1—April 1—Trout season closed.

July 1—Jan. 1—Open season for black bass.

Aug. 15—April 1—Open season for lobsters and crawfish.

Nov. 1—Sept. 1—Open season for crabs.

Sept. 1—May 1—Open season for shrimp.

Sept. 10—Oct. 16—Close season in tidewater for steelhead.

Nov. 15—Sept. 10—Season open for taking salmon above tide water.

Gun.

March 10—Union Gun Club. Blue rocks. Ingleside.

March 17—Golden Gate Gun Club. Blue rocks. Ingleside.

March 27—Millwood Gun Club. Blue rocks. Mill Valley.

April 3—California Witz Club. Live birds. Ingleside.

April 9—College City Gun Club. Blue rocks. North Berkeley.

May 29, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.

July 1—Feb. 15—Dove season open.

Nov. 1—July 15—Deer season closed.

Sept. 1—Feb. 15—Open season for mountain quail, grouse and sage hen.

Feb. 15—Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

March 8, 9—Collie Club of America. Millwaukee, Mich. Wm. C. Hunter, Secretary, Fayetteville, Pa.

March 9, 12—Franklin-Oil City Kennel Club. Franklin, Pa. F. G. McIntosh, Secretary, Franklin, Pa.

March 10, 12—Chicago Kennel Club. Chicago, Ill. H. J. Cassidy, Secretary.

March 14, 15—St. Louis Collie Club. St. Louis, Mo. J. A. Long, Secretary.

March 15, 18—Rochester Kennel Club. Rochester, N. Y. H. H. Kingston, Secretary.

March 22, 25—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.

March 23, 30—Brantford Kennel Club. Brantford, Can. C. J. Page, Secretary.

March 30, April 2—Vancouver Kennel Club. Vancouver, B. C. P. K. L.

March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.

April 7, 9—Victoria Kennel Club. Victoria, B. C. T. P. McConnell, Secretary, Victoria, B. C. P. K. L.

April 13, 16—San Francisco Kennel Club. Eighth annual show. Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.

April 13, 15—Seattle Kennel Club. Seattle, Wash. Charles McAllister, Secretary. P. K. L.

April 20, 23—Bay State Co-operative Bench Show. New Bedford, Mass. T. Middlebrooke, Secretary.

April 21, 23, 25—Portland Kennel Club. Portland, Or. T. E. Daniels, Secretary. P. K. L.

April 27—California Collie Club. Oak Grove, Lawrence, Santa Clara Co. P. K. L.

April 28, 30, 30—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary, San Jose, Cal. P. K. L.

April—Los Angeles Kennel Club. A. K. C.

Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas. Mortimer, Superintendent.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.

THE FARM.

A Cackle From Elkhorn Stock and Poultry Farm, Farmington, Cal.

Poultry raising at the present time, and in the future, will be one of the most extensive and profitable industries of California. No other State in the United States has the favorable conditions for the little mortgage-lifting hen as is found here in California. One of the conditions, and a very good and strong one, is that *the supply does not equal the demand*. Carload after carload of live poultry is being shipped every week in the year by our Eastern breeders into our California market. Eggs are shipped into this State by carload lots, even trainloads are received and find ready sale in our markets. No class of live stock have the same favorable conditions in the markets of our State as has the little hen.

In climate we have a great advantage, one that cannot be overestimated. The long, cold Eastern winters, with their double walled, paper lined chicken houses, with all their vermin and other ills, are not necessary on this Coast.

We build our houses on runners and use as light material as we can get, always being very careful that all cracks are well fattened up so no draft can blow on the roosts of our houses during the night when our chickens are roosting. No flooring is used in our houses. We make it a practice to move our houses a few rods once a week, to insure cleanliness, and to have new ground for our chickens to work on, and also that the droppings are equally distributed over the field.

We run 2000 hens on an 80-acre field from ten to twelve months. That flock of hens will consume about \$2000 worth of hard grain feed while in that field. If you have handled them right you have that amount of the strongest fertilizer evenly distributed over your field.

In the springtime, when the oats, grass and other seeds have grown up rank and thick, we must use our horses, cattle and sheep to pasture it down, as poultry does not do well in fields of rank growth. In the months of March and April all that heavy, rank feed is quickly turned into a quick, strong fertilizer, a perfect food for your wheat plant. In May a young and tender growth will spring up all over the field and will produce great quantities of seed with a very short growth of stocker straw—the proper conditions for the little hen. Leave her in the field until the month of December. Plow and sow your field to grain and it will produce you double the amount of grain it would without the use of hiddy. She has come into your field last but she will be the first to put money in your purse, and will pay your hills while the much written-about and highly-praised horses and cattle are growing into money.

She will clear your field of all bugs, crickets, cutworms and other insects. Even the field mouse is a dainty morsel for Biddy, and she does not hesitate to peck him until he is all eaten up and has furnished his mite toward the egg supply. All wild seeds of all kinds are eagerly sought after by our little hen. In fact, all the enemies of the wheat plant are dainty morsels for Biddy, and if you will protect her a little from her natural enemies and give her a chance she will lay you the golden eggs. I make use of the word "golden" because I have sold this winter case after case of eggs (36 dozen in a case) for \$20 per case.

Pages could be written about the money-making little hen from the time she was placed as an egg in the incubator until she became a worker out in the field. And the field is where the hen belongs, both for money and for health

One of the most desirable points in a fowl is vitality and a strong constitution; weak and debilitated stock is worse than none at all. For if you had none you would be relieved of the disappointment and useless work which is always the result of trying to raise large flocks of fowls in yards. You may succeed fairly well for a time, but the vitality of the parent stock will become weak and in a short time you will meet with disappointment. ELKHORN.

Classes of Feeding Cattle.

Bulletin No. 90, issued by the Illinois Experiment Station, is full of interest to stockmen who are feeding cattle. It contains the result of feeding the various grades of steers. Six grades of market steers were placed in the feed lots.

The object of this experiment was to secure data for the accurate comparison of the six standard grades of feeding steers with respect to the following points:

1. The extent of quantity of gains.
2. The rapidity of gains.
3. The economy of gains as measured by feed consumed.

4. The nature of the gain as indicated by the different grades during the feeding period and as measured by their regrading as feed or fat cattle at the end of the experiment, the percentages of dressed beef and the percentages of fat.

5. The comparative quality of the beef as expressed by the grading of the carcasses after slaughter.

6. The relative profit to the feeder after considering all elements of outgo and income,—that is, the initial cost of the various grades of feeders, their relative extent and quality of gain, the cost of feed, and the comparative selling price of the various grades as marketed,—first under normal conditions, that is, a steady market; second, under abnormal conditions, that is, a falling market.

In the interest of brevity these various points will be alluded to throughout the text as the "extent," "rapidity," "nature," "economy," and "cost" of gain, and the "profit" or the "loss" in feeding.

The practical feeder very much desires to know the relative economy of production with these six different grades of feeders, and also the grade of finished cattle that may confidently be expected from each in order that he may calculate which will be most profitable after considering the greater initial cost and the relatively higher selling price of the better grades. It was to answer these questions that this experiment was undertaken.

It is advisable to give a brief description of the cattle in each grade at the beginning of the experiment. For convenience the various grades were given lot numbers as follows:

- Lot 1. Fancy selected feeders.
- Lot 2. Choice feeders.
- Lot 3. Good feeders.
- Lot 4. Medium feeders.
- Lot 5. Common feeders.
- Lot 6. Inferior feeders.

CONCLUSIONS.

1. More rapid and much larger gain may be secured on the better than on the more common grades.

2. The results of this experiment clearly show that when the various grades of beef cattle are put in the best marketable condition there is a very definite relation between the percentages of dressed beef and the grade of cattle involved. The better the grade of cattle the higher the percentages of dressed beef.

3. Low grade cattle carry larger percentages of internal fat than the better bred ones, while there appears to be a more abundant and more evenly distributed layer of surface fat on the better bred steers.

4. As the differences between feeders tend to disappear as the feeding process goes on, the differences in quality between the different grades of feeding cattle are more pronounced than such differences between the various grades of beef or fat

cattle. Quality is the more important in feeding cattle; condition in fat cattle.

5. Primarily this experiment was outlined to determine the relation between the grade of feeding steers and their "feeding qualities;" that is, whether the quality of a feeder determines his capacity for making gains, his ability to use food economically, and the nature of the gains made. However, both the market and slaughter tests of the various grades as finished clearly show that the packer and butcher condition is of first importance.

6. The grade of cattle the finishing of which will return to the cattle feeder the greatest profit will depend upon the following considerations:

(a) The relative ability of the various grades to use feed for the production of gain and finish as shown by the data in this bulletin. See Table No. 7.

(b) The relative cost of the various grades of feeding cattle.

(c) Cost of feed.

(d) The method of feeding and time of marketing.

(e) The range in prices between prime and common rough steers or between the highest and lowest grades of beef cattle.

7. The greater the cost of the feed used, the greater is the advantage in favor of the better grades, both because under normal market conditions, in these grades the gains and finish are put on with less relative feed consumption than in the lower ones, although this difference is less marked in the inferior than in the intermediate grades and because the cost of feed is a larger factor in the feeding of the lower than the higher grades.

8. The greater the spread in the market between the various grades of feeders, the more is the advantage in favor of the commoner grades. As a rule the price of common rough steers fluctuates less than the price for prime steers and the price of the inferior and common grades of feeders varies less than those of the choice and fancy grades.

9. A concentrated ration and shorter feeding period tend to favor the feeding of the lower grades, that is, a ration with a wide nutritive ratio like corn and timothy hay or straw without the addition of a nitrogenous concentrate or roughage and where the concentrate comprises a large percentage of the ration would favor cattle of the lower grades because they are older and the process of finishing is largely a process of fattening.

Again prices for the lower grades of fat or beef cattle are more or less affected by range and holiday competition and are usually relatively low at such seasons.

10. Older cattle of the more common grades can undoubtedly be put in marketable condition on a shorter full feed period than can younger cattle of the same weight which would grade higher, because the older the cattle the less the increase in weight required to finish them.

11. The greater the spread in the market between the various grades of fat steers the more is the advantage in favor of the better grades.

12. Opportunities for larger profits, and losses as well, lie with the better grades of feeders.

13. Steers containing high percentages of beef blood possess greater capacity for consuming large quantities of feed than steers of a more common grade, especially in the later weeks.

14. Age and condition as well as quality are important factors to be reckoned with in the management of the various grades of feeding cattle. Speaking generally of the offerings of feeding cattle at any of our leading markets it is safe to say that the better the quality and condition the younger the cattle. In securing 900 to 1000 pound feeding cattle of the more common grades one is bound to get cattle of advanced age, say three years old at least. Choice and fancy feeders of these weights can be secured in short two year old cattle.

15. Steers of all grades may be finished or put in good marketable condition without carrying them to a point of fatness

which necessitates small gains for food consumed.

16. The margins necessary to protect against loss in finishing the various grades of feeders are dependent upon:

- (a) The grade and cost of the cattle.
- (b) The price of feeds.
- (c) The initial weight of the cattle.
- (d) The length of the feeding period.

17. The lower the price at which feeding cattle are purchased, whether because of prevailing low prices for feeders or because of the low grade of cattle, the larger must be the margin between the buying and selling price in order to secure protection against loss.

18. The greater the cost of the feed necessary for finishing feeders, the larger must be the margin.

19. Feeding cattle of heavy weights can be finished profitably on a narrower margin than can light weight feeders.

20. Feeding cattle which require an extended feeding period for finishing require a larger margin than do feeders which can be matured in a shorter time.

Ideal Ration for Swine.

All who raise swine recognize the fact that they must be fed at the lowest cost possible consistent with obtaining the desired results. There is no denying the charge that swine are fed too much corn; nor is this economy, for it does not provide the proper ration and the animal takes on flesh without the proper amount of bone and muscle to sustain it. In an experience of twenty years in raising selected hogs for market the writer has found the most economical ration to consist of one part each of corn, bran and oats, with an occasional feed of oil meal, and with root crops of some kind every other day. We grow rutabagas in large quantities for this purpose and find it pays well.

Pigs that are three months old or younger have less oats in their ration and more corn and bran, but they also have the oil meal and the roots. We consider exercise and pure water as essential to success in hog raising as food, and our hogs are given both freely during cold weather. The exercise they do not like to take as they get heavy, but we force them out into a yard—a clean, dry yard—daily, and find they are all the better for it. The yard is not so large that they are tempted to run off any of their weight.—*Farm and Home.*

A sale of 41 head of Shorthorns from the herd of E. R. Stangland, of Iowa, early this month resulted in the sale of the lot for a total of \$6,785, or an average of \$165.50. Thirty two females averaged \$179, and nine bulls averaged \$118.32. The highest priced female brought \$320, and the highest priced bull \$180.

EFFECTUAL

The most effectual remedy in use for the cure of ailments of horses and cattle is

GOMBAULT'S CAUSTIC BALSAM

Used as a Blister or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Sending Your Poultry to Market.

Those who have market poultry to sell and who must depend upon shipping to market, should always be careful in the selection of the commission merchant or buyer to whom they ship. They should be equally careful in packing for shipment. When sending live poultry to market, have your coops as clean and presentable as possible. It is very easy to remove all the accumulations of dirt and scatter some dry sand or earth all over the bottom of the coops. In packing your poultry, try and have all of one size or kind in a coop. In other words, sort your poultry for shipment to market as you would your eggs. The shipping of live poultry is not so general as in former years, there being at the present time in almost every locality those who purchase and kill for market.

But in shipping dressed poultry the most care and attention should be paid. Whether packed in boxes or barrels, always have a nice, clean, fresh-looking package. If paper is used in the packing, use nice, clean, fresh paper and pack the poultry in an attractive, presentable manner. In this way the package goes into market in a clean, attractive way, and when opened the contents are pleasing, and these conditions add considerably to the selling price.

Much too often have we seen an old, soiled, dirty barrel come into the commission house, and, when opened, find therein poultry of all sizes, kinds and quality, at times old, brown paper being used, even the printed paper that has come from the grocery or dry goods stores being made use of to pack up, and in addition to this the heads, legs and bodies wedged and pushed into every kind of shape and form, no regularity or care being used in packing. No purchaser would be pleased to have the dirty package come into his place. No one would select poultry packed in this way if they wish to pay a fair price for same. The commission merchant is compelled to repack the whole thing, at a considerable cost to himself, or to sell the consignment for what he can get for it, which is usually done, and, when the returns come to the shipper, disappointment and anger are usually the result.

The commission merchant makes the largest profit from the best quality and best packed shipments. Many shippers have such a reputation that their private mark on the outside of the package is all that is necessary for the buyer to see, while others have a reputation so far from this that even the commission man himself will not risk his own reputation, but will unpack the entire box and go through it before he will recommend the goods to a customer.

Unfortunately this is true in the shipping not only of poultry, but eggs as well. No shipper of poultry or eggs should ever think for a moment that he can pack poor quality in with good quality and send all to market and obtain the best prices. None are so shrewd and careful as the retail men and poultry dealers of the city markets. They are always ready and willing to pay the best prices for the very best qualities, and they are equally as ready and willing to run down and abuse poor quality that is poorly packed and sent to market.

To the shipping of all kinds of products to the commission merchant too much care can not be given. The value of a case of eggs may go down three or four cents per dozen simply from the presence of one bad egg upon the top row. If the box of poultry is opened by mistake at the under side and some inferior or poor quality stock found there, the poor quality settles the price for the whole package. It would be very easy, indeed, for those who ship to market to have everything nice and in the very best condition if they only would. But, unfortunately for the shipper, carelessness and bad judgment often deprives them of much of the profit that they might have if they would simply be very careful in doing their work, both in selection and preparing for shipment. —*The Feather.*

Poultry Points.

The strong gizzard of fowls indicate to some extent the kind of food they should have. There should not be too much sloppy or soft food fed. A mash once a day seems to be healthful. But for the other meals there should be whole grain, or seed, or something they can grind.

It is believed that the most critical time in a young chick's life is during the first two weeks. If it is two weeks old and in good condition, it will probably live.

Probably one reason incubator chickens do not sometimes thrive is they lack exercise. The healthy hen with a healthy brood runs them around all day, and teaches them to scratch, and hunt for lugs and worms.

One reason that hens and incubators do not hatch more eggs is that the eggs are infertile or have become chilled. Nature understands her business, and will not fail to work according to her law. She can be depended upon every time. If the eggs are good, and the conditions are right, the eggs will hatch every time.

It is a waste of eggs and time and the energy of the hen to fill her nest with doubtful eggs in order to make up the number desired. It is better to wait a day or two or not to set the hen than to not set her with proper conditions.

Few persons are aware of the strength of egg shells to resist external pressure on the ends. A test was recently made where eight ordinary hen's eggs were submitted to pressure applied externally over all the surface of the shell. The breaking pressure varied from 400 to 675 pounds per square inch. When the pressure was applied internally to 12 eggs they broke at a pressure varying between 32 and 65 pounds to the square inch. The pressure required to crush a single egg varied from 40 to 75 pounds.

It has been found that profits depend not so much on feed and breed as upon individual hens from these breeds. Every hen should be watched, and her performance noted. They differ very widely in regard to when they began to lay, their disposition, the size of their eggs and how many they lay, and what kind of mother they make.

In a test made at the Maine Experiment Station, extending over four years they gave full year tests to over 1000 hens. It was found that only 35 hens yielded from 200 to 251 eggs each year. There were some that laid only 36 to 60 eggs, and three did not lay at all. About 135 eggs was the average for each hen per year.

Each strain of fowls has its admirers. The large Brown Leghorns come in for their share of praise. They are said to be good layers of large eggs; good sitters and stylish, and maintain their excellence for several years.

Women make good fanciers. They are more quiet than men, and better housekeepers. She knows how to bandle her broom, and keep things clean. She has the motherly ways and naturally loves the little chicks. She keeps up the fences and gates and makes things feel her presence.

The dust bath is as essential to egg production as feed. Ashes and road dust make an ideal bath. —*Farmer.*

A cow yielding 250 pounds a year gives a fair profit, but a 300-pound cow gives more than twice as much profit. The ordinary yield of milk should be 5500 to 6500 pounds a year. Some of the best cows produce as high as 8000 to 11000 pounds of milk in a year, containing 400 to 500 pounds of butterfat.

At a sale of Duroc-Jersey sows at Lyons, Neb., on February 12th, 59 head sold for a total of \$4,327.50, an average of \$73.34 per head. One sow brought \$375, which is the highest price ever paid for a sow of the breed. The Duroc-Jerseys are very popular in Nebraska.

Poultry Notes.

Wet food should be mixed every day.

Eggs are often ill flavored from bad food.

Always have the quarters sufficiently roomy.

Don't feed young chickens much sloppy food.

To keep down lice put coal on the roosts twice a week.

Fresh wood ashes scattered over the floor often causes sore feet.

Should disease of any kind appear always provide a dry, warm place.

Feeding regularly and liberally is necessary to the well being of fowls.

When insect powder is used to destroy lice it should be well dusted into the feathers.

If a hen lays soft shelled eggs give her plenty of gravel, oyster shells and crushed bones.

Houdans and Dorkings have fine unfeathered shanks and the distinguishing five-toed feet.

Fattening should be done in the shortest time possible in order to save time, labor and expense.

As a rule chicks of all breeds are nearly of the same size until they are of the weight of one pound.

Under average conditions ten days is long enough to get a fowl fat, and it should be reasonably closely confined.

Partridge Cochins need plenty of exercise to keep down internal fat, and much coarse food in their daily ration of grain.

Roup may generally be traced to want of cleanliness, lice, dampness or undue exposure to wet, cold weather, as roosting in the house exposed to a direct draft.

If neglected after its first stages it usually becomes contagious, and unless checked will destroy the whole flock. The best cure, of course, is prevention.

Money will buy blood, but breeding and feeding require art, or at least skill. Breeding, blood and feeding are three important factors.

If the hens get to eating eggs, make the nests very dark, to be approached by a long, narrow passage and just large enough for the hen to set in.

Poultry, if well managed, will enlarge the income of those who have run and properly care for them, besides providing a good food for the table.

It is not necessary to keep chickens fat, especially while growing, but it is very important to keep in a good, thrifty condition. A better growth will be secured, while they will be in a better condition to market any time that it may be desired.

It is best not to hurry the young chickens about mousing. Their wings are not strong enough to bear them up and down with certainty, and they are liable to injury in coming down. Besides their breast bones are likely to become curved and depressed by too early use of the perches.

One of the best remedies for the small lice that infest the bodies of chickens and turkeys is one-half pound of flour of sulphur with which has been stirred one drachm of carbolic acid. —*Texas Farmer.*

A press telegram from Columbia, Mo., states that Dr. R. E. Graham, recently bacteriologist of the Missouri University, has announced that "hog cholera may be prevented." The message then reads in substance: "He has discovered that hogs may be immunized against hog cholera by means of inoculation, after exactly the same manner that cattle on the Missouri agricultural farm are now being rendered immune from Texas fever. Dr. Graham, assisted by Dr. W. R. Shaefer, began in 1901 a system of experiments, and has since then inoculated over 1000 hogs, the work being conducted on herds in all sections of the State, and under varying conditions. A test experiment was made in Boone county on a herd of 100, the hogs being first inoculated with the preventive and then exposed to the disease."

Jackson's Napa Soda untangles the feet.

Hot Fitting of Shoes.

The practice of hot-fitting is very destructive. Burning the sole will, in time, partially destroy the sensitive laminae, and impairs the membranous lining underneath the coffin bone, as well as closing the pores of the horn, causing the hoof to become hard, dry and brittle. It also impedes, to a certain extent, as a necessary consequence, the healthy growth of the hoof.

The advocates of the hot-fitting present many reasons for the furtherance of the practice. It is alleged that shoes cannot be fitted so rapidly or so closely by any means other than that of hot-fitting; and this is generally true, for by this means, the hoof is burned to correspond with the inequalities which occur on the surface of the shoe, until the latter is thoroughly imbedded in the horn.

On the other hand, however, this fusing of the horn is in opposition to its right growth and operation, and is the prolific source of many evils and abuses. Horn being a non-conductor of heat, is slowly affected by it, and it is said that three minutes burning of the lower face of the sole is necessary to produce any indication of increase of temperature on its upper surface. This is a fallacy, as I have proven many times, by operating upon green specimens, with soles of varied thickness, in which case, the soles of ordinary depth were penetrated by the heat, when heated shoes were applied for the time specified, and the sensitive sole was found to be scorched as well as the laminae, in its connections with the sole, burned and charred.

In the living subject these effects would have wrought serious results. They have convinced me that the foot of a horse may in no sense be compared to an inanimate block of wood, which may be charred or carved as caprice may dictate. And because it is not, and because it is filled with life and feeling, the necessity which there is of thought, care and skill to be exercised in regard to it, is pointed out to us. The economy of labor attained in the process of hot-fitting than by cold, that is no argument against the expedience of the latter; as much or more might be said of any other part of the work. —C. W. Brodhead Montrose, Pa.

During the year 1903 a cow belonging to the dairy herd at the Oregon State Agricultural College produced 9756 pounds of milk. The yield of butter from this milk was 526 pounds, and at an average price of 30 cents per pound, the butter product alone was worth nearly \$160. In addition a moderate valuation of the separated milk for feeding purposes to swine has been placed at \$40, making a total revenue from this cow about \$200. The animal is a full-blooded Jersey, 4 years old, and while not a wonder proves that a herd of such cows on a well-managed dairy farm would return the proprietor a handsome income.

The dairyman who keeps no more than five cows might possibly get along without a separator, and not miss what he loses very much, but with five or more cows the separator saves too much money to be left out in making up the equipment.

Recent experiments in feeding lamb sugar beet pulp and crude sirup from the sugar factories in connection with alfalfa shows that corn can now be dispensed with. This year in the vicinity of Greeley, Colo., excellent mutton has been produced in this way.

Bran and corn meal, if fed too freely to cows, have a tendency to fatten them and injure their capacity for giving milk. If corn must be fed to the milch cows, give in connection with wheat bran, ground oats, etc.

Excessive feeding does not increase the power of circulation in a dairy cow.

Disking Alfalfa in the Spring.

Two years ago I disked part of a field of alfalfa and carefully watched the results. I had frequently read in the *Field and Farm* that such treatment would thicken the stand. The machine was thrown in full disk, a heavy man placed on the seat and instructed not to look behind at the work until he had gone over a certain part of the field. This instruction was given because I feared that if he saw how it cut up the field he would quit and come to tell me about it. As for myself, I kept out of sight for I did not want to see it either. As a result on the whole I think the stand was slightly thinned out. The severed roots did not send up quite so many shoots as those left untouched. I was, however, agreeably surprised and rewarded by the increased yield. I think on the whole the yield was about a ton more to the acre for the season—four cuttings.

Where the disk was used the hay made more rapid and ranker growth—so much so that people passing on the road frequently stopped to ask for an explanation. I account for this extra growth by the conservation of moisture with the dust blanket formed by the disk. The season was excessively dry and hot and the high winds licked the moisture from the ground at an alarming rate. Only where the dust mulch was maintained did vegetation of any kind grow and prosper. To confirm my belief in this dust mulch theory on the increased yield of alfalfa I again disked a part of another field last year. The early spring was dry and the result was the same as the year before, but the increased yield was noticeable only on the first and slightly on the second cutting.

After we had irrigated thoroughly and the rains began to fall no difference could be noticed in the field, either while the crop was standing or in handling the hay. From the results of these experiments I am led to believe that the yield can be materially increased by the use of the disk in a dry time. Of course the harrow should always follow the disk so as to leave the surface in as fine a tittle as possible. While the results of the disk have so far been very gratifying and no ill results have thus far appeared, I have some fear that the constant use of the disk will so scar and cut the roots that disease and death may result. However, the disk will be used on our farm until what is feared is proven true or groundless.—W. S. Kelley in *Field and Farm*.

Rations for Fowls.

One of the most successful farmer-poultrymen in the country says that he allows his laying hens to balance their own rations. That is, he furnishes them with the different kinds of grains, cut bone, grit and animal food in the proper quantities, each separated from the other, and permits them to eat as they will. In this way, it is claimed, each fowl's instinct will teach it to eat of the grain that its system demands.

There may be good objections to this plan, but it is advocated here as a compromise for those who are not inclined to go to the trouble of balancing the rations for the hens. The main point in this method is not to give the hens, in the several ingredients composing the rations, more, in all, than they will likely eat clean. The plan is well worth trying, for it can do no harm if care is taken not to permit the birds to overfeed.

Keweenaw county, in the upper peninsula, has an association for insuring cows. Should a member's cow die or become lost in the woods, the association, on presentation of the claim properly vouched for, pays the owner the amount of his claim, \$40. The association is a mutual one, assessments being levied to meet all expenses.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

An Age Line for Dairy Cows.

Some time ago we noticed in one of the experiment station bulletins the conclusion that after a cow has reached the age of eight years the time has come to terminate her usefulness by killing her and making what use you can of her carcass. Advice like this is a matter about which one should go slowly. The well bred dairy cow is just in her prime at eight years old; and at no time in her life does she respond more readily to feed than for the next four, or even more, years. All over the country the cows over ten years of age that are still doing as well as ever are numbered by thousands. It may be with some breeds, more noted for beef than milk, that early killing is the right thing to do; also for the young cow that did not milk well, the selling of her at once, or as soon as it was found that food would not influence her milk, is correct; but for the generous milker there is no profit in killing her at eight years old. Milk her out, even if it takes twelve or fourteen years, and then dispose of her and get another cow to take her place. A valued member of the writer's herd is a registered Jersey, a big, robust cow, eleven years old that gives when fresh about nineteen quarts rich milk daily; and appears good for several years more of heavy milk production.—*Corr. Mass. Ploughman*

It Pays to Keep Good Cows.

Nathan Mercer of Hartford, Wis., is, by the *Times* of that city, credited with being the owner of some of the choicest cows to be found in that section of the State. He has been a close student of the milk and cheese industry, and keeps a daily weight of what each cow produces from year to year. The report for his herd of nine Holsteins for 1903 shows the following results:

The amount of milk received was 60,129 pounds, of which four thoroughbreds gave 40,096 pounds—No. 1, 10,569 pounds; No. 2, 9,086 pounds; No. 3, 10,463 pounds, and No. 4, 9,978 pounds. This netted at the factory \$369.74, and with \$32 for calves sold from the same cows made a total of \$401.74. The five graded Holsteins gave 20,033 pounds, which brought at the factory \$283.32. Their calves were sold for \$26.50, making a total of \$309.82, or altogether from the nine cows, \$711.56.

Dairy cows require some bulky food with their grain; but care must be taken not to go to either extreme. If too bulky the animal must eat too much in order to secure sufficient nourishment. If not bulky enough the animal will consume more nutritive material than it can digest in order to produce the proper sense of fullness. This deranges the stomach and causes waste.

The size and shape of the udder count for a good deal, but some good milkers do not show much udder, while some very poor milkers have large, fleshy development of the mammary glands.

Tuttle's Elixir

has drawn the following expressions of endorsement from its grateful users in every state and territory in the Union.

Is valuable for man or beast. Gives immediate relief. Unequalled for Colic. Very satisfactory results. Best for Spavin. Shoe Boil removed. Wouldn't be without it. Never lost a hair. Saved a heap of money. Speedily relieves pain.

\$5000 REWARD for every one of the above endorsements that can be proven spurious.

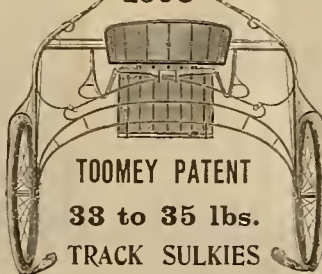

Tuttle's Elixir for use in the stable. Tuttle's Family Elixir for use in the home. Both are unequalled remedies. Fifty cents buys either at any drug store. Sample free for 6¢ in stamps to pay postage. Used and endorsed by Adams Express Co.

Tuttles Elixir Co., 437 O'Farrell St., San Francisco, Cal.

Beware of all so-called Elixirs, none genuine but Tuttle's

A market which will absorb and take care of 42,000 head of beef cattle, 500 calves, 60,000 hogs, 30,000 sheep and 800 horses in one day is no small affair, and that is what the stockyards at Chicago did on January 11, 1904.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windblows, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc. W. B. Eddy & Co., Whitehall, N. Y.

FEE - - - \$75

Reductions made for two or more mares.

Manager, WALTER SEALY.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos. Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the breeding season of 1904, either pacers or trotters. Must be three to start and race to come off on Hollister track, Fair week, 1907 (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:34, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition ¼ mile on the Hollister Race Track in 38½ seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11½), by Hopy Medium, grandsire of the dam of Lou Dillon 1:58½. His second dam is Argenta by Almont Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25¼

Sire of KELLY BRIGGS 2:10¼

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

LIMONERO

RECORD (3) 2:15¼

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10¼, Alta Vela 2:11¼, etc., etc.); dam LULANER (dam of Limonero 2:15¼, Blon 2:19¼) by Electioneer 125.

LIMONERO 2:15¼, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15¼ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15¼ will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Cal. In care of

LONGWORTH is a very high-class horse in form and disposition; is a very dark bay or brown. He has sired Alfred D. 2:12 1/4, El Moro 2:13 1/4, A. C. 2:15 1/4, Esmeralda 2:19, etc.

RINGWOOD by Sidney; dam, Alma by Dashaway, he by Belmont, son of American Bay. RINGWOOD is a dark bay.

SABLE CZAR by Sable Wilkes, he by Guy Wilkes; dam, Olivette by Whipple's Hambletonian, he by Guy Miller, he by Hambletonian 10; second dam, Belle by Easton's David Hill, he by Black Hawk; third dam, Lady Almack by Almack, he by Munmouth Eclipse, son of American Eclipse. SABLE CZAR is a black horse.

MAHOMET, color white, with bay and blue spots. His sire is Longworth, dam Sonoma Maid, said to be by Arabian horse; second dam by Whipple's Hambletonian.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$3.50 per month. No responsibility assumed for accidents or escapes.

For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTTING STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19 1/2

(Sire of Monte Carlo 2:07 1/4, Idolita 2:09 1/4, etc.); dam CRESIDA (3) 2:18 1/4 by Palo Alto 2:08 1/2; second dam Clarabel (dam of 3 in 2:30) by Abdallah Star; third dam Fairy (dam of 2 in 2:20 list) by Hambletonian 10.

CASSIAN is a high-class young stallion to every particular and one of the best bred ones ever foaled at the famous Palo Alto Farm. He has producing blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast natural trotter and has every qualification for a sire of extreme and early speed, being good gaited, level headed and game.

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:20)

1st dam BELLE Mc (dam of Worthwood (1) 2:59 and Silver Bee (2) 2:27 1/4) by Ensign Goldust Jr.

2d dam LITTLE BELLE (granddam of 2 in list) by Belmont (sire of Nutwood 2:18 1/4 and 58 more in 2:30).

3d dam Thoroughbred Mare by imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crepuscus 1:59 1/4, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:32. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes, but no liability assumed. All hills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

BREED FOR SIZE, STYLE, SPEED AND GAMENESS

HAMBLETONIAN WILKES 1679

The Only Son of the Great Geo. Wilkes in California.

Phoebe W... 2:10 1/4 Ariene Wilkes... 2:11 1/4 J. F. Hanson... 2:19 1/4
Rocker... 2:11 Sunbeam... 2:12 1/4 and 12 more in 2:30

Will Make the Season of 1904 at

GREEN MEADOW FARM

Brokaw Road, 1-4 mile from Santa Clara.

Terms for the Season, \$40. Usual return privileges. Good pasturage at \$1 per month. Best of care taken of mares, but no liability for escapes or accidents. No wire fences. Address

R. I. MOORHEAD, SANTA CLARA, CAL.

TELEPHONE: Suburban 15.

PETIGRU 2:10¹/₂

2:11¹/₂ and Lemonee 2:18¹/₂. PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. FEE \$50.

CORONADO 2:18¹/₄

Thos Rysdyk, second dam by Venture, sire of dams of Directum 2:08¹/₄ and Sidney Dillon (sire of Lou Dillon 1:59¹/₂, world's champion trotter). CORONADO is one of the handsomest of the sons of McKinney. He won five races out of seven starts. FEE \$40.

SILVER COIN 2:11¹/₄

(Record made as a three-year-old in a winning race of six heats against aged horses. Sired by the great Steinway (sire of 4 in 2:10); dam, the fast race mare Jan Mac 2:09 by McKinney 2:11¹/₄. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual. FEE \$40.

Send for card containing tabulated pedigrees and full particulars of above Stallions. Address
W. G. DUFFEE,
Box 96, University P. O., Los Angeles, Cal.

MONTESOL

(TRIAL 2:24)
Full Brother to Lady Graunard 2:23 (trial 2:13)

MONTESOL, 6 years old, stands 15¹/₂ hands, weighs about 125 pounds; is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcyone. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before looking elsewhere.
\$10 for the Season, with return privilege.

POLE STAR

The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address
P. FOLEY Race Track, Alameda.

SEYMOUR WILKES REG. NO. 0232. Race Record 2:08 1-2

The Fastest Son of Guy Wilkes
And Sire of the Sensational Trotter Monroe 2:12¹/₄
and Joe Eviston (3) 2:22
Will make the Season of 1904 at
Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 707. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

Alta Vela 22449 RECORD 2:11¹/₂

SON OF THE GREAT ELECTIONEER 125

(Sire of Arlon (4) 2:07¹/₂, Sunol 2:08¹/₄, Palo Alto 2:08¹/₂, Alta Vela 2:11¹/₂, and 9 more in the 2:15 list, etc.) Dam LORITA 2:18¹/₄ by Piedmont 904; second dam Lady Lowell (dam of Ladywell 2:16¹/₂, Lorita 2:18¹/₂, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16¹/₂.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FRELSON,
Race Track, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17¹/₄, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years); Black Jack 2:28¹/₂ (trial 2:22); The Equet (4 y. o. trial 2:17¹/₂); Majella 2:39 (4 y. o. trial 2:13¹/₂). Sired by Sahle Wilkes 2:18, sire of 33 in 2:30. Dam, Fidelia (dam of Fidelite 2:28¹/₂, dam of Mary Celeste 2:17¹/₄) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lanet, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08¹/₄, James L. 2:09¹/₄, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15¹/₂) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30¹/₂ (dam of Manzanita 2:16, Wildflower (2) 2:31 and 8 producing daughters) by St. Clair 16675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM. Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

| No. 5—\$ 2,000, Purse..... | 2:17 class pacing, 3 in 5 |

CONDITIONS.

Entries Close Friday, April 1st, when horses must be named. No combination will be liable beyond the amount paid in, provided a written notice of withdrawal is received by the Club at the time any payment falls due. The main race of the Merchants' and Manufacturers' and of the Chamber of Commerce Stakes, also Purse No. 5, will be mile heats, best three to five to harness. A horse not winning a heat, or making a dead heat in the first three, shall not start for the fourth; but horses so ruled out shall have a right to a share of the stake or purse according to their rank at the close of their last heat. The Consolation Stakes, and Purse Nos. 3 and 4, will be best two to three to harness.

The Merchants' and Manufacturers' Stake will be divided as follows: \$4500 to the first horse, \$3000 to the second, \$1500 to the third; \$2000 for a Consolation Race, open only to horses that start and win no part of the Main Race to be trotted three days from the date of the decision of the first race, and to be divided \$1000 to the first horse, \$750 to the second, \$250 to the third. In the event of there being less than three horses eligible to the Consolation Race, there will be paid to the fourth horse in the Main Race the sum of \$1000, to the fifth horse \$750, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race.

The Chamber of Commerce Stake will be divided as follows: \$2250 to the first horse, \$1000 to the second and \$750 to the third; \$1000 for a Consolation Race, open only to horses that start and win no part of the Main Race. To be paced three days from the date of the decision of the first race, and divided \$500 to the first horse, \$375 to the second and \$125 to the third. In the event of there being less than three horses eligible to the Consolation Race, there shall be paid to the fourth horse in the Main Race the sum of \$500, to the fifth horse \$375, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race.

Purse Races will be divided 50% to the first horse, 25% to the second, 15% to the third and 10% to the fourth. Entrance Fee 5% with an additional 5% from winners, excepting winners to the Consolation Races, from whom no additional fee will be charged. But should there be no Consolation Race, an additional fee of 15% will be charged to winner of fourth money. This Club is a member of the American Trotting Association, also the Grand Circuit, and the rules of those Associations will govern, except where otherwise provided.

Payments in Stake No. 1—\$20 April 1st; \$50 May 1st, \$150 June 2d and \$250 July 4th. Payments in Stake No. 2—\$25 April 1st; \$75 June 2d; \$125 July 4th. Payments in Purse Nos. 3, 4 and 5—\$10 April 1st; \$15 May 1st; \$25 June 2d; \$50 July 4th.

Remember that there are no substitutions in the Merchants' and Manufacturers', Chamber of Commerce or other races; only horses named April 1st can start in any of these events.

In addition to the foregoing events, the Club will probably offer Purse for the following classes: 2:06, 2:08, 2:10, 2:14, 2:16, 2:18, 2:20 Trotting; 2:04, 2:07, 2:11, 2:13, 2:15, 2:20 Pacing.

President.

W. J. SNYDER, Secretary,
Room 19, Campau Bldg, Detroit Mich.

CAMPBELL'S

EMOLLIO IODIFORM

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is noose superior.

The horse CAN BE WORKED AS USUAL FOR BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It In Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Fourth Payment \$10 EACH

Due and Must Be Paid by
FRIDAY, APRIL 1, 1904.
ON YEARLINGS.

Pacific Breeders Futurity Stakes No. 3, \$6000,

Guaranteed by the Pacific Coast Trotting Horse Breeders Association.

For foals of mares covered in 1902. To trot or pace at two and three years old. Entries closed December 1, 1902. NOTHING MORE TO PAY BEFORE 1905, when your foal can start in the Two-Year-Old division. Stakes divided as follows: \$3250 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for foals of the year, 1903 have advised us that, because of hardships of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams are neglected to name when entries closed, send \$33, with Color, Sex and Breeding of the Foal, on or before April 1st next, which covers payments to April 1, 1905, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

GREAT CLEARANCE SALE

Tuesday, April 5, 1904

CEDAR RAPIDS JACK FARM

Imported Catalan Spanish, Majorca and Mammoth Home-Bred Jacks
and Belgian and Percheron Stallions.

I am striving to make this, my annual sale, the largest of the kind ever held. I received the following cablegram, which signifies that the new importation of Jacks is in good condition, and in point of merit I know they cannot be equaled:

GRANOLLERS, SPAIN, Feb. 15, 1904.

DE CLOW,

Jack Farm, Cedar Rapids, Iowa.

On road. Three cars Catalan and Majorcas. Best lot
ever shipped to America. ROCKWELL.

My Mammoth Home-Bred Jacks are of the highest quality. I am conducting this sale different than any other. No animal will be offered in this sale except those of extra quality and ABSOLUTELY SURE BREEDERS and POSITIVELY QUICK PERFORMERS, and all black with white points and FIRST-CLASS IN EVERY PARTICULAR. By selling a large amount of stock in one day I can afford to sell it much cheaper than to single individuals.

My new importation of Jacks and Belgian Stallions, which are being imported especially for this sale, left Antwerp, Belgium, on February 20, 1904, on the steamer British Empire and will reach the harbor March 8th.

My two first importations of Percheron and Belgian Stallions will be offered in this sale. Appreciation the task of securing a foothold in the Draft Stallion business against older importers. I do not expect to make my first importations profitable, and in offering them in this sale I only expect them to bring from \$1000 to \$1500 each—for AS GOOD ONES AS CAN BE FOUND ANYWHERE. See them and judge for yourself.

It is an old custom in advertising a public sale to advertise that "the stock will be sold regardless of price," and that "the stock will be placed absolutely in the hands of the bidders," etc., which is always a rank falsehood and I prefer to tell you the truth. I leave for Europe April 13th, for my new importations, so as to return by June 20th in time for the St. Louis Fair, and I want to close this stock all out and shall sell it at actual cost if it will not bring more. I am making this an opportunity for that class of men who want to buy a good, honest, straight, sound, money-making animal of the best quality at a living price, to come and select such as best suits his needs and buy him at actual cost or a slight advance. I will give one and two years time to responsible purchasers at 8%. I believe the superiority of the Belgian Horse will soon be recognized by the American Horse grower and that they will soon occupy the front rank on the American farm and markets; therefore I shall make a specialty of importing and selling the Belgian Horse and carry on this business in connection with my large Jack business. Any man who is needing a Jack or a Stallion cannot afford to miss this sale. You can buy honest values at a living price in a clean, honest business way. I expect these imported Spaniards in hogs from \$800 to \$1200, and my home-bred Jacks to bring from \$300 to \$500 each, for I cannot sell this class of stock at a loss. Write for catalogue.

W. L. De CLOW, Cedar Rapids, Iowa.

THOROUGHBRED.

HEYWOOD	F. T. Hoffman, San Jose
RANESSE	Monte White, Stockton
GREEN'S RUFUS	The Baywood Stud, San Mateo

THE GRAND CIRCUIT will open as usual with the meeting at Detroit this year and of course the M. & M. Stake of \$10,000 for 2:24 class trotters, and the Chamber of Commerce \$5000 Stake for 2:24 class pacers will be the two principal attractions of the great Blue Ribbon meeting, as it is called. The other early closing stakes for this meeting are the 2:12 trot, the 2:09 pace and the 2:17 pace—all for \$2000 each. These events all close on Friday, April 1st. There will be quite a number of California stallions racing on the Grand Circuit this year and all should start in at Detroit as the Detroit Driving Club gives one of the best meetings given during the entire season and horsemen are treated most liberally. No substitutions will be allowed in any of these stakes, and when you enter your horse you can rest assured that you will not have to start him against any but those named at the same time. This new rule promises to be very popular with the majority of horsemen as it will prevent the big speculators whose horses do not trot or pace fast, from going out and buying other horses of known speed with which to win the stakes. Secretary Snyder, whose address is Room 19, Campan Building, Detroit, is the one to send entries to. Don't forget that the Blue Ribbon meeting opens the circuit on July 18th and will continue five days. Entries for the five rich early closing stakes will close Friday, April 1st.

THE OFFICIAL YEAR BOOK of the League of Amateur Driving Clubs for 1903 has been published and we are under obligations to Secretary Geo. A. Schneider for a handsomely bound copy. The book contains 214 pages, is printed on excellent paper and beautifully embellished with half tone engravings of many of the amateur drivers and their horses. It contains summaries of all the races held under the auspices of the clubs during the year, also tables of the amateur wagon records and lists of the club members. The book is so neatly gotten up and so well arranged that it is an interesting and valuable book of reference and reflects great credit on its compilers.

SECRETARY W. H. KNIGHT of the American Trotting Association, who with his wife has been spending several weeks in California for the benefit of his health returned to his home in Chicago this week, much improved by the trip and the rest from official duties. Mr. Knight is a gentleman whom it is a pleasure to meet, being not only an enthusiastic horseman and a lover of the American trotter, but one who stands for all that tends to uphold harness racing and make it the best and cleanest of American sports. He spent three weeks in Los Angeles where he had the good fortune to be present at the Washington's Birthday matinee of the Driving Club of that city. He speaks in the highest praise of the splendid racing he saw that day and of the excellent management by the club officials. Mr. Knight met quite a number of the leading horse breeders and owners of California during his sojourn in Los Angeles and San Francisco. California horsemen will have a partial claim at least on Mr. Knight as a fellow citizen as his good wife is a native daughter of this State having been born in Shasta county.

THE HARTFORD FUTURITY is a ten thousand dollar stake for foals of 1904 to trot as three-year-olds in 1907. All mares bred last year are eligible. The entrance fee is only \$5, and entrance closes Monday, March 28th, which is one week from Monday next. This is a trotting stake and \$9000 is set aside for trotters, \$1000 going to the colts that pace. First money for the trotters is \$7500, the second horse will be given \$1000, and the third horse \$500. The entire cost of carrying a colt in this stake is but \$35. It is the cheapest stake for the breeder ever devised. No entry is liable for more than the amount paid in, and if you drop out at any time that ends it. There is no other trotting stake where for a total entrance fee of \$35 one stands a chance of winning \$7500. Look over the big advertisement in this issue and send \$5 to E. M. Stalker, secretary, on or before March 28th.

THE SALE OF SHORTHORNS advertised to take place in this city April 5th, has been postponed to the 15th of April, and will be held at the State Fair Grounds at Sacramento. Mr. Maddox telegraphs that owing to the bad weather and snow storms he has been delayed in shipping the cattle from Walnut Grove Farm, Brookfield, Missouri, and that he does not think it advisable to bring the cattle through to San Francisco, but will sell them at Sacramento. They are all young pure bred stock in fine condition and just what is needed in California at the present time. Catalogues, giving the pedigree of the stock will be distributed at the sale, and forwarded to prospective buyers before that time if application is made to Fred H. Chase & Co., auctioneers.

Answers to Correspondents.

L. R. HEPPNER, Oregon.—Kindly give me the breeding of the stallion Administer.

Answer—Bay stallion foaled 1888, by Admiral 488, dam Clara D. by John M. Patchen, second dam Spec by Speculation, third dam Maggie Hopkin by St. Louis.

K. BRADLEY DYNE, Saturna, B. C.—Can you give in your paper pedigree of mare sired by My Guy, brother to Arthur Wilkes, dam Lady W. record 2:32½ by Ophir. Ophir was a thoroughbred. Can one therefore call mare standard bred?

Answer—If My Guy is a brother to Arthur Wilkes he is by Guy Wilkes, dam Gracie by Arthurton. My Guy is not registered and the mare is not standard.

J. D., Butte, Montana.—Has Edith W. a full sister called Lady Flash and what is her breeding.

Answer—Edith W. 2:05, a bay pacing mare, foaled 1893, is by Ben Lomond Jr. 3:325, her dam Mountain Maid by Martinet, her grandam May Bonner by Robert Bonner Jr., son of Robert Bonner 270. She was bred by Wm. Loheneimer, Great Falls, Montana. We cannot find a mare registered by the name Lady Flash. Probably Mr. Loheneimer, if living, will give you the desired information.

Three Weeks Racing at Portland.

Portland will have three weeks of racing in August, according to the plans of the Multnomah Fair Association, as announced by President A. R. Diamond.

The association proposes to give \$1200 a day in purses, and in addition there has been pledged \$8000 for special early-closing stakes, making a total of \$35,000 that will be offered the running horses from August 8th to 27th.

Announcements for the early-closing stakes have already been announced by the Fair Association. There will be accommodations for 500 horses in the stables. Frank D. Skinner of San Francisco will be presiding judge and Robert Leighton secretary.

A Fast Two-Year-Old.

That Neerest 2:22, the full brother to John A. McKerron 2:04½, is certain to be a great sire of early and extreme speed, is believed by every horseman who has seen the few colts by him at work at San Jose. The mare Alone 2:09½, champion four-year-old of her year in 1902, called the attention of breeders to Neerest as she was the first and only one of his produce to start. This year there is a coming two-year-old in Mr. Barstow's string at San Jose that gives every promise of being faster than Alone, who paced a half mile last year at Petaluma in 59½ seconds. This filly is called Just It and she was just twenty-one months old the first of this month when she paced an eighth in 17 seconds over the San Jose track. There is not a particle of doubt but she can go the distance at a two minute rate of speed. The engraving on the front page of this issue shows that she is a well proportioned filly very much like her sire. She has a beautiful head, with large intelligent eyes, and clean hard limbs. Her dam is a mare by Danton Moultrie, one of the best bred stallions in California, as he is by Guy Wilkes out of Carrie Malone, a full sister to Chas. Derby 2:20, Klatawah 2:05½, etc. Carrie Malone is by Steinway, dam Katy G. by Electioneer. The second dam of Just It is by Soudan, third dam by Nutwood and fourth dam by Owendale, thoroughbred son of Williamson's Belmont. Anyone who will study this pedigree for a few moments will see that Just It is related to all the living champion trotters and pacers. She has the blood of Geo. Wilkes, Director, Electioneer, Nutwood and Williamson's Belmont, which is a combination that can not be excelled.

Mr. Barstow has a gelding a month older by Neerest that has paced an eighth at a 2:30 clip and is a great prospect. Alone is being worked some preparatory to a preparation for the California circuit, and it will doubtless take three heats below 2:10 to get first money away from her this year.

Visited Santa Rosa.

Directors T. J. Crowley and Geo. W. Kingsbury of the Pacific Coast Trotting Horse Breeders Association went to Santa Rosa last Wednesday to consult with the citizens of that town as to the holding of the Breeders meeting there this summer. Mr. Crowley tells us that they found the people there quite enthusiastic over the meeting and were assured that the citizens of Santa Rosa would raise a generous sum as a bonus to secure the leading harness meeting of the Coast this year.

Among those present Wednesday morning were W. E. Hooley, Gallant Rains, M. McDonough, Charles F. Rhorer, L. W. Burris, Joseph T. Grace, Frank D. McGregor, Frank W. Brown, Dr. J. J. Summerfield, Dr. A. Button, Wm. H. Lumsden, P. H. Quinn, A. J. Compton, Charles C. Belden and Thomas L. Hehir.

Frank W. Brown was made chairman of the finance committee, Walter M. Randall, collector and secretary, and L. W. Burris treasurer. These gentlemen will be assisted in raising the subscription necessary by Joseph T. Grace, William Lumsden, C. C. Belden, Thomas L. Hehir and Frank Muther.

The finance committee will make its report to the Directors of the Breeders Association, to be held in San Francisco during the coming week. It is thought they will raise about \$1500 as a bonus for the meeting.

Mr. Crowley visited the Santa Rosa Stock Farm track while there and says that he found it in perfect condition—all the stalls clean and neatly white-washed, and both tracks in good order. The racing track was re-layed last year and will be faster and safer than ever, while the new training track is as good a winter training ground as there is in the State. It is three-fourths of a mile and can be used during rainy weather. Mr. Crowley says there is much enthusiasm over harness horses at the birthplace of Lou Dillon and he believes the best meeting held in California in years can be given there.

J. C. Bray is getting up an auction sale of horses to be held at Pleasanton, April 2d. He has about fifty trotters and pacers, including three double teams, already consigned and fourteen shetland ponies. Mr. Bray states that during the forenoon the crowd will be entertained at the track, where the regular workouts of the two hundred horses in training there will be held and that quite a sum will be distributed in prizes to the trainers driving the fastest quarters and halves. The sale will take place in the business centre of town, on the street, in the afternoon and will conclude in time for visitors from the city to catch the 5:30 train for San Francisco. Every horse offered will be guaranteed to be just as represented or no sale. Horsemen should make it a point to be in Pleasanton Saturday, April 2d, as they will have an opportunity to see all the fast trotters and pacers at the track and also attend the sale. Further particulars later.

Jackson's Napa Soda does not tangle the feet

JOTTINGS.

THE MORE the entry lists for the Pleasanton and Breeders meetings are studied the harder it is to make a forecast of the probable winners of the different events. Never in the history of California racing has a program been published which contained so many hard races to pick as the one printed last week for the Breeders meeting in August. It must be remembered that the entire program of this meeting is made up. The only races in which the entries have not been printed is the four colt stakes upon which starting payments are due until ten days before the meeting. The slow classes are, of course, always uncertain to forecast, as the green horses that are entered are unknown quantities and a crackerjack 2:10 performer may develop from among them by the time the race is called. But the fast record classes seem to be as hard to pick this year as any. Take the 2:13 trot with eight entries for instance. The horses named are Mack Mack 2:13, Tom Smith 2:13½, Forest W. 2:14½, Liege 2:12½, Princess 2:15½, Ole 2:15, Red Skin 2:16½ and Deputy 2:13½. What horseman can pick a favorite at this early date from that bunch with enough confidence to back him at even money?

The 2:10 pace is just about as hard a proposition. In this race the following have been named: Dictatress 2:09½, Cuckoo 2:13½, Jonesa Basler 2:11½, Harry J. 2:09½, Daedalion 2:11, Alone 2:09½, Ben F. 2:10, I Direct 2:12½, Delphi 2:12½, Topsy 2:10, Oma A. 2:13½, Tidal Wave 2:13½, Edwin S. 2:13½ and Kelley Briggs 2:10½. The last named on the form shown by him in his race with Miss Logan at Woodland in 1902, looks to have the best chance. But when it is remembered that he came back from the east last summer without reducing his record and carrying a leg that was twice its natural size, there are many chances that some of the younger and slower record horses will take his measure this time. The San Jose mare Alone is known to be as fast as a bullet and it will take a good one to head her. Ben F. was not beaten last year and he will be right at the wire in 2:10 about three times, which will get a part of the money. If Harry J. acts well and comes to the post in as good shape as he was when Hi Hogboom trained him in 1902, the one that beats him will think a horse race is on. Little Dictatress has reduced her record every year and must be reckoned with, while there is a contingent of horsemen from the upper San Joaquin who think the little stallion Jonesa Basler will be unbeatable by anything slower than a 2:06 pacer this year. Tidal Wave, a three year old that went against aged horses last season, won races and took a mark of 2:13½ looks as if 2:10 would be easy for him this year as a four year old, while Daedalion 2:11 after a couple of years in the stud is expected to reduce his record several seconds. Cuckoo, I Direct, Delphi, Topsy and Edwin S. are all able to pace faster than their records. The 2:10 pace gives every promise of being the best and fastest pacing race we have had on the coast for years.

The event for aged horses which will attract widest attention is the California for 2:24 class trotters. The reason of this is that it is worth the most money, \$2000. A gentleman who recently visited Los Angeles tells me that Mr. C. A. Winslip's horse Abe Miller is a very likely winner of this race, as he has worked a mile in 2:18. While 2:18 is a good mile for this time of the year, there are one or two of those entered that have shown faster time than this and the Los Angeles horse will have to show better than 2:18 to win. Horsemen here will all welcome Mr. Winslip back to the circuit. It has been several years since his colors have been seen here and as he is a true sportsman who races his horses for the pleasure and recreation racing affords him, and always has them driven to win first money, his return to the circuit will be a pleasure to all.

While the big purses for aged horses are attracting much attention, the stakes offered for the three-year-old trotters in California this year are occupying the centre of the stage just now. The Breeders Futurity, the Occident and the Stanford Stakes are all rich prizes and there will be big fields to start in each event in all probability. Pleasanton has closed its three-year-old trot for a stake of \$600 with sixteen entries and nearly every one is entered in one or more of the three big stakes above mentioned. Third payment was made on January 2d, this year, on twenty-six colts and fillies in the Occident of 1904, and fifty-four three-year-olds were paid up of those entered in the Breeders Futurity. Of this fifty-four, one, Tabitha by McKinney out of the dam of Janice 2:08½, died recently at Pleasanton. She was owned by Mr. H. W. Meek and was one of the most promising three-year-olds ever at the Pleasanton track. Of

the fifty-three remaining, eleven are by McKinney, four by Nutwood Wilkes, three each by Zombro, Direct and Bayswater Wilkes, two each by Neernut and Hambletonian Wilkes, and one each by Nearest, Stranger, Meridian, Prince Ansel, Cupid, Dagan, Mambrino Chief Jr., Demonio, Dictatus, Stoneway, Lynmont, Gaff Topsail, Strathway, Diawood, Don Marvin, Klatawab, T. C., Chas. Derby, Steinway, Arthur W., St. Whips, Rey Direct, Zolock, Black Jack and Conifer.

First money in the Pleasanton stake will be \$300; in the Breeders Futurity \$1000 with \$200 additional to the nominator of dam of winner and \$100 additional to owner of sire of winner. The Occident Stake will be worth about \$2500 to winner and the Stanford Stake in the neighborhood of \$1200. If any three-year-old is therefore fortunate enough to annex these four stakes he will enrich his owner to the tune of about \$5000, quite a snug little fortune for one three-year-old to bring home.

At present the colt that has the best chance for the money is Almaden, winner of the Breeders Futurity two-year-old division last year, when he trotted a beat in 2:22½ and showed that he was equal to a mile better than 2:20 had it been necessary for him to go that fast. Mr. Walter Mastin's colt Marvin Wilkes was the only other starter in this event and while he had had luck in the race and lost a shoe, he was not distanced and showed himself to be a colt with considerable class. It is probable that a field of eight or ten three-year-olds will compete in these stakes this year and they will be as handsome a lot of young trotters as any State can produce. The general opinion is that the three-year-old race record of the State will be lowered this year, but there are many things that may happen to enable a colt to carry away the money without beating 2:20.

A severe loss to the breeding interests of California occurred at Mr. A. B. Spreckels' Aptos Farm last week when the yearling colt by the champion trotting stallion Cresceus, out of that fast mare Czarina 2:13½ by Dexter Prince died of a bowel ailment. This was the only son of Cresceus in California, was a well formed and promising yearling, and it is a pity that he should have died before being old enough to demonstrate whether the nick was a good one for speed, or to leave any progeny. Mr. Spreckels' Cresceus filly of the same age, dam Venus II. 2:11½ by Cupid 2:18, is alive and in good health and we hope may live to fulfill all the promises of her looks (and she is much more than an ordinary yearling), but the loss of the colt is one that cannot be made good.

Up at the Napa Farm where Mr. Spreckels' thoroughbreds are kept another severe loss was met in the death of the colt by imp. Crighton out of Nellie Bell. This fellow was a full brother to Gaviota. As two colts from the same mare had been sold for a total of \$5500, and had proved winners, the colt that died was naturally considered quite a valuable one. Superintendent Geo. Berry of the Napa Farm, who gave me the information of the death of these two colts last Saturday, came down from the farm that day to see the Bell stakes run, in which Mr. Spreckels' filly Arisbe was to be a starter. Of course Mr. Berry thought she would win this event and had a bet down according to his judgment and she won in good style, ably piloted by Bullman. She was four to one in the betting. Mr. Spreckels won about four thousand dollars on the race. Arisbe is by imp. Brutus, from Annie Buckingham by Stuyvesant, second dam by Hindoo, and third dam by imp. Glenelg. The Napa Stock Farm youngsters are winning quite frequently this year at Oakland, and made good showings last season over East. No horse breeder deserves so have more good luck than Mr. Spreckels, who is an enthusiastic lover of both the thoroughbred and the barn horse and has expended large sums of money for the pleasure of breeding and owning good ones. He has met with success in both branches, in spite of considerable bad luck in the death of promising colts and fillies.

Another of the great broodmares of California is dead. On the 26th of last month Geo. H. Fox of Minkelume Stock Farm, San Joaquin county, lost his old favorite Grace by Buccaneer. She was an old mare, having been foaled in 1880, and while given the best of care, fell the victim to a severe storm which blew down the fence of her paddock and she wandered out during the night, getting chilled in the storm. She was in foal to Monterey 2:09½. Grace never had such opportunities as many of the great ones enjoyed, but she achieved greatness nevertheless. She came from a family of speed producers and her progeny will keep up the reputation of the blood. Her sire was Buccaneer 2:56, who was a broodmare sire, as no less than twenty-seven standard performers are from his daughters. Sidney's second fastest performer, Dr. Leek 2:09½, was out of a daughter of Buc-

caner. Mercury 2:21 that sired the fast mare Twinkle 2:05½ was out of one of Buccaneer's daughters. Creole 2:15, the sire of Javelin 2:08½, and Falrose 2:19, the sire of Don 2:10, were both from Buccaneer dams. Mary, the dam of Grace, was one of the great broodmares. She produced two daughters that each in turn produced two 2:15 performers. The family of Mary has produced a long list of fast ones, among them Sir Albert S. 2:03½, Kelly Briggs 2:10½ and many others. Grace was the dam of Daedalion 2:11, Creole 2:15 and Eagle 2:19½. Her daughter Ripple produced Effie Logan, dam of Sir Albert S. 2:03½, and her own sister Gazelle is the grandam of Kelly Briggs 2:10½. Grace was a large brown mare, with a blaze face and right fore foot and both hind feet white. She was a grand individual. She leaves three or four of her progeny that will yet take records. One, a bay stallion by Silver Bow, owned by Tim Judge of this city, and being trained by James Thompson of Pleasanton, has shown 2:20 speed at the trot. The stallion Stickle, owned by Geo. Stickle of Angels Camp, is also a very fast trotter and could be marked below 2:20. Mr. Fox owns a three-year-old colt, full brother to these two, that is a great prospect, and I believe he has a filly from her by his stallion Mokolume and another by Silver Bow. These fillies should be invaluable as broodmares, as they will produce speed to a certainty when bred to any good horse. It was unfortunate that Grace should die before raising her foal by Monterey. The cross was one from which much could be expected.

Big Stake for 1905.

The Special Harness Stallion Stake for foals of 1902 to trot in 1905 promises being one of the biggest stakes of next year. As will be seen by the following list of colts in which second payment of \$10 was made March 1st, there are sixty-two eligibles to the stake. These are now two-year-olds. The list sent us by Acting Secretary Miller of the State Agricultural Society is as follows:

John Arnett's ch c C. A. Owen's; br f Lucy D.
J. H. Bobon's ch c by Zolock-Boleen.
Alex Brown's br f by Nushagak-Addie W.; br f by Nushagak-Bonnie Derby; b c by Nushagak-Adalia; b c by Nushagak-Pioche.
Mrs. S. V. Barstow's ch c Victory.
T. W. Barstow's b f Just It.
Sam Bemberly's br f by Diablo-Belle Button.
John A. Cole's blk c Prince Valentine.
Cone Ranch Co.'s b c by Kinney Lou-Kitty Marvin.
S. Comisto's b f Alice C.
Ben Davis' b f Delilah.
C. A. Durfee's b c Galindo; b c Covey.
W. G. Durfee's b f by McKinney-Leonor.
M. E. Delano's b f by Stam B.-by Albert W.
J. E. Fairchild's br f Bonnie June.
C. E. Farnum's b c by Diablo-Bessie Hook.
T. J. Fallman's b c Sir Robert.
F. N. Frary's b f Electa.
Geo. W. Ford's b f by Neernut-Alcola.
E. A. Gammon's b c Capt. Clark.
Griffith & McConnell's b f by Bonnie Direct-Petrina.
J. W. Gardner's ch c by Nearest-Black Swan.
W. S. Harkey's b f Devilletta.
R. Hogboom's b c Waldstein McKinney.
J. W. Haile & Co.'s br c by Demonio-Corolla; br c by Demonio-black mare.
W. H. Lumsden's br f Bonalet; br f Bonnie Me.
C. T. Laugenour's b c Alexander Diahlo.
Wm. Morgan's blk c Kaiser.
A. H. Martin's b c by Nushagak-Boydella.
A. J. Molera's b f by McKinney-Dr. Frasse's Sister.
I. Morehouse's h f by Monterey-Magenta.
C. F. Bunch's b g Alto Down.
Owen McAleer's b f Rula Newo.
D. E. McDougal's h c by Stam B.-Lillian.
W. Parson's br f Berta Mc.
R. D. Robinson's br g Say When.
F. Raschen's b f by Iran Alto-Bell Bird.
Rosedale Stock Farm's b c by Wasb. McKinney-Bertha R.; b c by Wasb. McKinney-Dalia; b c by Wash. McKinney-Darien.
F. A. Ramsey's br c Hylock.
W. L. Spoor's br c by McKinney-Miss Peacock.
Tbos. Smith's b f by McKinney-Daisy S.
N. M. Strong's hr c Ambush.
Wm. Sinnock's blk f Santa Nette.
L. H. Todhunter's br f Zombelle; h f Zomitella.
Vendome Stock Farm's b f Miss Eva B.
W. J. Leet's b f Still Better.
Geo. L. Warlow's b f Strathlie.
A. G. Willson's b g Little Medium.
J. C. Woodrow's br f Zombelle.
P. J. Williams' h f Mary Neilson.
C. H. Williams' h c Ironwood; b c McDirect.
W. H. Young's br f Trixy McKinney.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Pleasanton Pickups.

[From Our Special Correspondent.]

On account of the rain there has not been much doing in the way of fast work at the track for over a week, but every one is satisfied that it has done them more good than harm.

Geo. Davis has picked up a very handsome young chestnut pacing mare somewhere, and given her to Ed. Parker to train. She is a very smooth going one and Mr. Davis hints that she has got speed to burn and we are all anxiously waiting to see her turned loose. Mr. Parker is also training Mr. Davis' beautiful black two-year-old filly by Ray Direct, dam Stemwinder, dam of Directum 2:05½. She is a good gaited filly and looks to be worthy of her illustrious relatives.

Charley Spencer recently stepped the 3-year-old gelding by Prince Ansel 2:20½, dam Nosegay by Laughton 2:21½, a quarter in :34½. This colt is the first of Prince Ansel's get to be trained and is learning very fast. He is out of the dam of Aristo 2:17½, and Charley expects to have another stake winner to the credit of Nosegay. By the way, Aristo is in great shape—big, strong and rugged. While he has not yet been asked to step very fast, he moves a 2:10 gait occasionally—"just huggy riding." It will take a great trotter and race horse to beat him before the season is over.

"Farmer" Bunch has three great bred 2-year-olds and all act like trotters. One is a brown filly by McKinney 2:11½, dam Atilla by Iran Alto 2:12½; next dam the good thoroughbred race mare Flirtilla. Another is a bay filly called Still Better by Iran Alto 2:12½, dam Much Better 2:07½. Last, but not least, is the "Farmer's" own colt, the bay gelding Marconi by Iran Alto, dam Elsie Downs by Boodle 2:12½; next dam Linda Oak 2:12½, dam of Dr. Frasse 2:12½, etc., by Guy Wilkes 2:15½; next dam Yedrel, dam of Thomas R. 2:15 by Nutwood 600. This little fellow went a half mile the other day in 1:20. He goes right to go fast.

Lenora 2:18½ by Mendocino 2:18½, dam Norah by Messenger Duroc, 2nd dam by American Star, is one of the very best gaited and fastest trotters in the Salisbury string. When Charley De Ryder returned to the stable one day last week after working her a mile and stepping her through the stretch, he and Mr. Salishury consulted their watches and the "King Maker" was heard to remark, with a pleased look upon his ruddy countenance, "That is faster than Monte Carlo could trot when I got him."

Mr. Ed Bowen of New York is stopping at the Rose Hotel and is a daily visitor at the track. Mr. Bowen is a great lover of a good horse and has owned, trained and driven a great many within the last twenty years; among the best he has driven are John R. Gentry 2:00½, Robert J. 2:01½ and Searchlight 2:03½. Mr. Bowen considers the latter horse one of the greatest race horses that ever scored for the word, and believes he will make as great a sire.

Budd Doble and Charley Duffee were visitors at the track last Saturday, but as the track was not in good condition for fast work did not see any quarters in 0:30 as they would have done had the track been good.

Mr. James Butler of New York, owner of the East View Stock Farm, home of the great race horse and sire, Direct 2:05½ and his great son Directum Kelly 2:08½, was a visitor here the fore part of this week. As Mr. Butler is to remain some little time in California it is expected he will be a frequent visitor to Pleasanton, as is well known he owns the majority of the horses in the Salisbury stable.

The great broodmare Bertha, dam of Don Derby 2:04½, Diablo 2:09½, Demonio 2:11½ and three others in the list, was bred on the 13th to the great Searchlight 2:03½. She has a colt at foot by him, for which an offer of \$1000 has been refused.

Sacramento Driving Club Races.

Four races were held at Agricultural Park, Sacramento, last Sunday, by the members of the Driving Club of that city, regardless of the fact that the track was wet and slippery, which made the time slow. The results were as follows:

FIRST RACE.	
F. J. Ruhstaller's h h Hans.....	1 1
John Morrison's blk h Canny Scot.....	2 3
I. H. McMullen's h h Elrose.....	4 2
Frank Wright's blk h Fritz.....	3 4
Time—2:45½, 2:49.	
SECOND RACE.	
I. H. McMullen's Rosa Gold.....	1 1
A. M. McCollum's Jennie H.....	2 2
T. E. Clark's Star Bitters.....	3 3
Time—2:39½, 2:33½.	
THIRD RACE.	
F. E. Wright's Royal Dame.....	1 1
John Norton's Light Bird.....	2 2
Time—2:37½, 2:49½.	
FOURTH RACE.	
Jay Wheeler's Bobby Dohhs.....	1 1
Chas. Silve's Queens.....	2 2
Time—2:32½, 2:28½.	

The Patchen Wilkes Family.

The following letter was received last month by Mr. Edward Mills, owner of that very handsome stallion Lecco 2:09½, who has kindly permitted us to publish it:

LAWRENCE, KAN., Feb. 9, 1904.

Edward Mills, Esq., Pleasanton, Cal.

My Dear Sir:—In the Christmas number of the BREEDER AND SPORTSMAN I saw the picture and write-up of your great horse, Lecco 2:09½, and want to know more of him than I saw in the paper; hence I take the liberty of writing you. In my own stable I have Dick Patch 37327, a half-brother to Bonnie Boy 2:25, by Patchen Wilkes 3550. The dam of Dick Patch is Lady Updegraff 2:45, as a two-year-old, though she could step in 2:20 then, but was seriously injured soon after taking the mark of 2:45; second dam Blackwood Bess 2:31, half-sister to Silkwood 2:07; third dam Bess (the dam of Roy Honor 2:17½) by Mambrino Messenger. He is coal black, three white feet and snip, 15-3, weighs 1050, trots, is perfect in every way—fast, level-headed and a great sire. Like Lecco, he never made a season until 1903 though he has seven colts—the best seven I ever saw. One mare, coming 4, 16-1 high, weighs 1200; she is a corker. Her dam is by Honor, a son of Red Wilkes. I bought her full brother, coming 2 this spring. He won first prize at the Kansas State Fair last fall; was 15 hands December 1st last and must weigh 900 or over now. Four of the others are yearlings. I forgot to say that Lady Updegraff is a daughter of Senator Updegraff 2:27½, he by Simmons 2:28. So you see I have a good bred stallion and a good one growing up. In my judgment they are the greatest family in the world. They have style, beauty and stamina as well as extreme speed. They are made of iron and so gentle and kind. Keep Lecco and he will make you a fortune as a sire of game race horses.

Years ago I lived near Cheney, Kansas, and was frequently at the Jewett Farm, where the famous Patchen Wilkes stood. I saw Bonnie Boy when he was "nursing a bottle." I cannot now recall where or who bred Lecco, though I presume Jewett did, judging from his breeding. I know he had quite a number of Rochester mares at the farm.

If I am not asking too much I would like a photo of Lecco and one of your cards. As soon as mine are ready I will mail you one of Dick. Of course, I assume you are interested in so close a relative. Then, too, I am going to mark him this season, if nothing happens.

I do not know of another son or grandson of Patchen in your State. You can make them all stare when you take the colts to your fair next fall. He cannot help but sire speed and beauty. He is one of the handsomest, best bred horses I ever saw. I am not excited or carried away on the Patchens. I know them like a book and have for fifteen years. If you want the best in the horse line, give Lecco an opportunity. Hoping you will write me at length of your horses, and that a better acquaintance may follow as well as success in your business, I am, yours very truly,

GEO. W. WILLIS.

Neernut's Colts Showing Up Well.

There is much talk in the southern part of the State about the get of Geo. W. Ford's stallion Neernut 2:12½, son of Albert W. and the mare Clythe II by Nutwood. Albert W. is a son of Electioneer and is the sire of 21 standard performers, among them the great trotter Little Albert 2:10, Russel T. 2:14½, Wyreka 2:13½, Amelia 2:13½, Flowing Tide 2:14½ and other noted race winners. The dam of Neernut is Clythe II, by Nutwood. She is the dam also of Naniwa 2:15½. The Nutwood mares have produced no less than 214 standard performers and he is by far the greatest of broodmare sires.

Neernut's first performer is the well known mare Neeretta 2:09½ that was a good race mare here and in Europe. At Santa Ana track at the present time are quite a number of Neernut's produce being worked by the well known eastern trainer Dave Raybould, who is fitting them for the salesring. Every person who visits the Santa Ana track speaks in the very highest terms of these colts and it is predicted that there will be several 2:15 performers developed by May when they start east. They are all good looking, good sized, level headed trotters and pacers, and breeders should visit the Santa Ana track and look them over to see what a uniform, nice lot of colts Neernut gets from all classes of mares.

Send the good horses you want to sell, those that can show speed and have good looks, to the Blue Ribbon sale at Cleveland. The sale will be held May 16, 17, 18, 19, 20 and 21. This is the sale that always brings the big prices.

Blue Bull Blood.

[Western Horseman]

A Chico, Cal., subscriber wants to know if Blue Bull blood in a pedigree is esteemed, and if it really is true that the Blue Bloods are quitters. There are those in the trotting horse breeding business who do not highly prize Blue Bull blood in a pedigree, just as Randolph Huntington, John Gilmore Speed, and possibly a few others, do not like Hambletonian blood in any form. But these dislikes, in both instances, come from prejudice, and not from a true measurement of merit. Indeed, we know of but few breeders, nowadays, who do not recognize, and appreciate, the value and potency of Blue Bull blood, especially if it can be secured through a good daughter of Blue Bull 75 himself. Largely because of the fact that but few sons of Blue Bull were well enough bred on their dam's side to become great speed sires, Blue Bull has lost caste, rather than gained, with succeeding generations. The fact that Blue Bull 75 himself sired some eighty odd standard trotters and pacers—notwithstanding the fact that the Year Book publishers continue to whittle his list down—and stands almost at the very top of the list as a broodmare sire, tells the story as to what a really great sire and progenitor he really was. His daughters have produced thirty 2:15 performers, seven of them better than 2:10 and fourteen better than 2:12. A granddaughter produced Fanny Dillard 2:03½, and Hal B. 2:04½, and many other granddaughters have produced extreme speed and great race horse qualities. The dam of the good race horse, Winfield Stratton 2:06½ is by a son of Blue Bull 75. Fifty sons of Blue Bull have sired standard speed, and many good speed sires have Blue Bull dams.

As to the Blue Bulls being "quitters" (on account of the Blue Bull blood they carried) that notion has long since been exploded. Of course, a number of the get of Blue Bull had more speed than racing quality, but this was due to the fact that they had no breeding on the dam's side. Most any "old thing" of a mare would produce speed when bred to Blue Bull, but naturally they could not race like horses possessing good breeding on both sides, and on back for generations. The majority of standard trotters by Blue Bull were out of common farm mares, breeding untraced, and while no one could expect trotters with such breeding to be game, and race successfully, many of them did race in the best company of their day, and that successfully. But Blue Bull himself, was an enigma. No one knows, to a certainty, anything about his breeding. But he was a fast horse, and a "breedy" looking horse, and a wonderful gait controller. It is a fact, however (unless he sired many a trotter for which he never received credit), that he got a greater percentage of speed from "cold-blooded" mares than he did from well-bred ones. Just why this was so will doubtless always remain problematical. Of course, it has been claimed that many well-bred mares shipped and bred to him produced fast performers which were credited to other sires.

Welcome 2:10 1-2 Goes to Watsonville.

When Henry Struve of Watsonville secured from W. E. Meek of Haywards a lease of his stallion Welcome 2:10½ for the season of 1904, the loss to Alameda county was a gain to the breeders of Watsonville and vicinity. For individuality Welcome stands as a peer of any trotting bred horse on the Pacific Coast. He is a beautiful seal brown, 16 hands and an inch high and weighs 1300 pounds. He has wonderful muscular development, the very best of feet and legs, a disposition that is as near perfection as a horse can possess, and imparts all these qualities to his get. His blood lines all run to speed, size and good looks. His sire, Arthur Wilkes, is a great producing son of Guy Wilkes, whose reputation as a sire of race winners is as broad as the land. The dam of Arthur Wilkes is by Artherton, son of Hambletonian 10, his second dam by David Hill Jr., one of the very best of the Morgan family, and his third dam by Williamson's Belmont. The dam of Welcome is Lettie, a great broodmare, dam of three in the list, two of which have records better than 2:15, and his grandam is that famous mare Mary by Flaxtail, that has founded one of the greatest of speed families. Welcome was a game race horse and not only has a pacing record of 2:10½ but a trotting record of 2:27½, and both are race records.

As a sire Welcome has not had a great opportunity but his produce all show speed. He is the sire of that very handsome trotter Iloilo 2:15, which is the first of his produce to be raced. The breeders who reside in the vicinity of Watsonville cannot do better than send their mares to Welcome this year.

Vinmont 2:21½, the fifteen year old son of Altamont, brought \$350 at the Portland sale.

Pony Racing at Tanforan.

The California Polo and Pony Racing Association seems to have incurred the displeasure of old Jupiter Pluvius, as a downpour of rain has thus far either prevented or marred every program it has tried to pull off at Tanforan track. Last Thursday it was announced that the pony races carded for that day would be held rain or shine and the god of the storms began pouring water on the track in the early morning and kept it up without cessation during the entire day, showing that he had no more consideration for the new silk and satin colors of the gentlemen riders than for those of the common herd who race for money at Emeryville and make a business of it.

Mr. Thos. H. Williams, president of the California Jockey Club, acted as presiding judge during the day, and Mr. Chas. D. Jeffries wielded the starters flag. Both gentlemen had the easiest day's work they ever experienced in their respective positions.

Mr. Robert Leighton, as manager and clerk of the scales, showed that he is a very efficient and active official. It is to be hoped that to-day when the final races are to be run that the sun will at least shine during the afternoon as the public are becoming greatly interested in these pony races and there will be a large attendance should good weather prevail. The results of the six races on Thursday were as follows:

Three-eighths of a mile—Won by Rudolph Spreckels' Peghome (R. M. Tobin), W. E. Pedley's Queen Rucker (F. D. Hudson) second, F. J. Grace's Maudie Swift (W. A. McCreery) third. Time, 37½ seconds. Althomer also started.

Quarter mile—Won by Rudolph Spreckels' Becky (Frank Skinner), W. A. McCreery's Sunset (W. A. McCreery) second. Time, 24 seconds. Only starters.

Three hundred yards—Won by W. A. McCreery's Prince (W. A. McCreery) second, F. J. Carolan's Romulus (P. Clagstone) third. Time, 17 seconds. Only starters.

Three-sixteenths of a mile—Won by Rudolph Spreckels' Maud H. (F. Skinner), F. J. Carolan's Floradora (J. Clagstone) second, John Parrott's Parachat (R. M. Tobin) third. Time, 18 seconds. Only starters.

Five-eighths mile—Won by W. E. Pedley's Carlotta (F. D. Hudson), L. McCreery's Lucy Glitters (C. Raoul-Duval) second, Rudolph Spreckels' Lotrix (F. Skinner) third. Time, 1:07. Cacahaute also started.

Three-eighths mile—Won by R. and W. A. McCreery's Mamie (W. A. McCreery), W. E. Pedley's Queen Rucker (F. D. Hudson) second, R. Spreckels' Fretful (R. M. Tobin) third. Time, 0:36½. Pat also started.

Many Thoroughbreds Named.

The registry department of The Jockey Club reports that a much larger percentage of names for two-year-olds has been claimed up to March 1st this year than ever before. As that date is the closing day on which names can be claimed without penalty, owners are beginning to realize the fact and take advantage of it, but at that there is a surprisingly large number of breeders that each year pay the penalty for their negligence in not claiming names at the proper date. The complete list of foals of 1902 registered and named under the Jockey Club Rules of Racing will probably be published in the Racing Calendar of March 10th or March 17th, this having been the custom in preceding years. According to Mr. Wheeler, the registrar, the total number of foals registered varies but little from that registered last year, though, as stated above, a considerably larger percentage have already been named than at this date last year.

Will Be Campaigned Again.

Prince Alert 1:57, the king of the hopped pacers, will be campaigned again next season in an endeavor to lower the record which Dan Patch 1:56½ now holds. Mart Demarest, the trainer of the famous gelding, is authority for this announcement. Prince Alert is twelve years old now, but seems to have more speed each successive year. It is hard for a horse of this age to go against such a performer as Dan Patch, who has the great advantage of youth, but there are a great many horsemen who think that Prince Alert is still able to give the son of Joe Patchen a few points in the speed line. The son of Crown Prince and Till is without doubt one of the greatest horses alive today, and it is good news to hear that the gelding will be seen on the track again this year.

Back Numbers Wanted.

To complete a file we need one copy of the BREEDER AND SPORTSMAN of April 24, 1897 and one of February 5, 1898.

Any one who can furnish us with either one or both of these back numbers will confer a favor and be paid for them, by sending them to this office.

BREEDER AND SPORTSMAN.

Elevation of Trotting Sport.

The following by a correspondent of the *American Horse Breeder* contains so much good sound common sense on the sport of trotting that we print it entire:

I note in the columns of the sporting press, that some sweeping changes and improvements (?) are contemplated, relative to the conduct of trotting races for the coming season, it being the purpose of the reformers to remodel the trotting turf as nearly as possible upon the lines and in accord with the methods and practices followed upon the running turf. There are a number of persons writing for the turf papers, who are evidently so imbued and impressed with the methods pursued by the running turf, that they seek to remodel all turf sports in accordance therewith. They seemingly regarding the methods referred to as absolutely perfect. I do not doubt for one moment but what they are perfectly sincere in their ideas, and honestly believe that if they can only apply running turf methods to the trotting turf, it will result in the elevation and popularity of the latter sport, yet it would appear to me that their ideas are more enthusiastic than either sensible or practical, and their rashness may cause them unwittingly to do the trotting turf much harm, and bring to mind the old saying, "Fools rush in where angels fear to tread."

According to their ideas trotting races at the present time are too slow and old-fashioned and long drawn out that people do not enjoy such exhibitions, and that they are not popular because there is not quick enough action, and here is where we get right at the milk in the cocoanut, namely, the betting. Of course, they would not admit such to be the fact, but it still holds true. They argue that the reason that mile heats, three in five, are still popular with a few old antiquated sports is because it permits some good consistent performer to land the race and pools after a series of heats. If they could have their way it would be all dash races and book betting.

While running races and trotting races are both horse races, they still differ essentially. On the running turf the betting is the main feature; it dominates everything, and the element of sport is almost entirely eliminated. The running turf at the present time is simply one gigantic gamble. Not one person in fifty that attends knows or cares in the least relative to breeding, form or other qualities of the performers. The only thing that interests them is "the price," and they regard the horses only as means to determine whether they shall win or lose a certain sum of money. They have no love for the horse, nor love for the sport outside its betting feature. Hundreds are in attendance that do not even see a single race, and do not care to.

On the trotting turf there is a marked difference. Here can be found all the betting a reasonable man can desire, but the element of sport is never lost sight of. The betting has always been secondary, and I trust always will be. I am not opposed to betting, but on the contrary believe a moderate amount to be for the best interests of the turf, but would confine it within reasonable limits.

Now, who are these persons advocating such sweeping reforms? Are they the owners of prominent campaigns and proprietors of the leading breeding farms of the country? Or have they on the contrary no important interests at risk and the ideas they advocate mere theories? Mr. George W. Leavitt is acknowledged to be as expert a judge and as thoroughly practical a horseman as there is in the entire land. I quote from your last issue: "He (Mr. Leavitt) believes, too, that the three in five plan will have a greater tendency to improve the endurance of trotters than the dash system or two in three plan. He also believes that some split races, which required from five to seven heats to decide the winner, have been much more interesting to the spectators than any race that was ever won in straight heats. One of the races he mentioned in support of this opinion is the \$10,000 Massachusetts, at Readville, August 23, 1899, when Tomboy 2:10½ got two heats, and Lecco 2:09½ two, but was finally won by Charley Herr 2:07. Had there been a two in three race, said Mr. Leavitt, nobody would have remembered it, but it developed into a contest that no horseman that witnessed it will ever forget."

Now here is the opinion of one of the foremost horsemen of the country, and in the minds of intelligent men that opinion carries more weight than reams of theory, or suggestions written by persons, not one of whom could compare for a single moment with Mr. Leavitt, either as an expert or a practical horseman.

There is much agitation at the present time relative to shortening races and the laying up of heats, and changes in the rules have been made and various plans tried, but so far with but partial success. As the rules now stand in races best three-in-five, with eight or more starters, there is no limit to the num-

ber of heats, and non-heat winners are sent to the stable after the fifth heat. At the present time, when heats are trotted so fast, it is perhaps asking a little too much to require horses to trot heats without limit, and my idea would be to change the rules, sending non-heat winners to the stable after the fourth heat, and terminate the race itself at the end of the sixth. This would give each horse a fair opportunity to win, and should be agreeable to the reformers, as they would know that the contest must terminate with the sixth heat.

Now with regard to the much-discussed subject of the laying up of heats. A man pays his entrance and starts his horse for what? For the purpose of winning the race. Such being his object, it is but reasonable to suppose that he will do all in his power to accomplish that end. The rules demand that every horse be driven to his full limit in every heat. Suppose a horse makes a mistake and loses a number of lengths before he recovers, how foolish to drive him to the top of his speed trying to win a heat that is clearly out of his power to win, merely to obey a rule, and thereby exhaust himself to such a degree as to kill all his chances for the race itself. In such a situation the sensible driver lays his horse up for that heat, as any sane man would do, and right here is where the absurdity of the present rule appears. You offer a purse and accept a man's entrance and he starts with the purpose of winning, and in the event of a mistake by his horse, he must, if he follows the rule, punish himself and his horse to such an extent that his chance of winning is reduced to a minimum.

You insist that he drive to win, and yet you punish him for using his best judgment to bring about that result. And right here is where the \$2 piker appears. He has a dollar or so bet on that horse for the heat, and because after his mistake he was not driven to his full limit, makes a great howl, claiming that the horse was pulled. Now who is the best judge, the driver who knows all the horse's peculiarities and weaknesses, and strong points, or some man on the bleachers who possibly may never have seen the horse before? The driver lays up that heat because he is honestly trying to win the race, and believes that by so doing he is increasing his chances of ultimate success. I certainly think there are times when a driver that is trying to win is perfectly justified in laying up. Mr. Geers and Mr. Hudson win more races than any other two drivers in the circuit, and they both frequently lay up heats when in their judgment it will increase their chances of winning the race, and I think they are perfectly right too. As long as a man's intentions are honest, and it is his determination to win the race if possible I think he is justified in doing what he can to accomplish the object. Were the pernicious practice of heat betting abolished, I think we would be spared much of the controversy over laying up.

I fancy the idea of one expert judge and two stewards to go through the Grand Circuit each season, and I hope to see it carried out. I am heartily in favor of any change that is really for the advantage and best interests of the trotting turf, but I should want to be very sure that such contemplated change would be actually beneficial. It would be safer to rush headlong into change, simply for the sake of change, and in these matters would certainly advocate mature deliberation and making haste slowly.

When Inbreeding is Advantageous.

When a breeder mates a mare with a stallion that is a near relative to her, the number of common ancestors the produce will have, will be much less than one will have that was produced by parents not related. This is one of the advantages to be obtained by inbreeding, provided the ancestors to which inbreeding is practiced are of the right kind. When one can mate two individuals of great excellence, possessing constitutional vigor and no inherited forms of weakness, knowing that they are descended from ancestors of much the same kind, tracing to a common ancestor, there need be little fear of evil effects following. Inbreeding is dangerous when animals lacking constitutional vigor or that possess undesirable traits in common or that are descended from a common ancestor, marked by some serious fault, are mated. There cannot be too few crosses to faulty ancestors, while on the other hand there may be very many crosses to ancestors of the right kind; in fact this kind of inbreeding not only fails to show any evil effects in the individuality of its product, but it gives to the breeder a greater proportion of animals possessing with uniformity the particular qualities he is desirous of getting.—*Horse World*.

James Sutherland of Pleasanton came to the city this week and purchased from the W. J. Kenney Manufacturing Co., at 531 Valencia street, a white enameled McMurray sulky and a No. 30 McMurray cart.

Notes and News.

Will it ever stop raining?

The horses are kicking the doors down.

And want to get out and show their speed.

Probably a long winter makes fewer curbs and bowed tendons.

James Sullivan has S. H. Crane's stallion Dialect by Diablo at Willows.

J. W. Zihhle shipped his string of horses to Santa Rosa on Wednesday of this week.

The late Ohio pacing stallion Rubenstein 2:05 by Baron Wilkes is king of the Worcester, Mass., speedway.

At the opening of the Grand Circuit at Detroit Lou Dillon and Prince Alert will be shown as special attractions.

Cincinnati secures the Horse Review Futurity for its grand circuit meeting at Oakley Park, the week of September 26th.

Long Don, the Chinaman who gave I. W. Roberts his record of 2:24, back in '98, now lives at Jacksonville, Ill., and is still an enthusiastic horseman.

David McClary will race his green pacer, Morning Star by Star Pointer 1:59, dam by Egthorne 2:12, this season. McClary drove this fellow a mile in 2:05 last fall.

Fifty head of Percherons are to be sold at Fred H. Chase & Co.'s salesyard on Monday, March 21st, at 11 A. M. That's day after to-morrow. Don't forget the date.

A high class roadster and a fine carriage horse are to be sold at auction at Fred H. Chase & Co.'s salesyard, 1732 Market street, day after to-morrow. Here is a chance to get a good one.

Black Percherons are the popular stallions with those who breed heavy horses. Mr. C. E. Humbert of Cloverdale has two for sale that will make ton horses at maturity. See advertisement.

The demand for good horses suitable for speedway, matinee and campaigning purposes exceeds the supply. Many who would gladly pay full value for such are unable to find animals that will fill the bill.

Did your mare named in the Breeders Futurity fail to foal in 1903, or did the colt die? You may be able to sell the nomination and get your money back. Write to Secretary Kelley before April 1st.

Fanella 2:13 by Arion 2:09, dam of the sensational Sadie Mac, 3, 2:11, and noted colt Todd, stands 15.1 hands and weighs 975 pounds. She has pulled two people in a sleigh fourteen miles in 1 hour 20 minutes.

The average of the 160 head of harness horses sold at the McCarthy sale at Portland was \$161. This included colts, old broodmares and horses without breeding which went for low prices. The sale was a success.

Mr. H. B. Gentry of Bloomington, Illinois, owner of McKinney 2:11, reports that his California bred mare Our Lady by Nearest, full brother to John A. McKerron 2:04, foaled a very handsome McKinney colt March 5th.

Cavel Rodriguez has moved to the Salinas race track with his stable of trotters and pacers, among which are two two-year-olds by Robin, one out of Anita G. and the other out of the thoroughbred mare Miss Brummell.

Goodwin's Guide for 1903, in two volumes, has been issued and is for sale at this office and at the Golden West newsstand, Palace Hotel newsstand, and at Cooper & Co.'s, Market street. The price is \$5 for the two volumes.

The Jeweler, a pacing son of the Fresno bred stallion Athanio 2:10, is one of the fast green ones in the string of Billy Andrews, the Eastern trainer. Ed Geers worked The Jeweler a half in 1:02 and the mile out in 2:09 last year.

Keep that sale of fifty head of pure Shorthorn cattle in mind if you want good ones for your farm. It will be held April 15th, at Agricultural Park, Sacramento, by Fred H. Chase & Co. The cattle are right from Missouri and a grand lot.

Going East with your string this year? If so of course you are going to Detroit and want to start a horse in the M. & M., the Chamber of Commerce or some of the other good stakes. See the advertisement in this issue. The entries close April 1st.

Kentucky Union 2:07, owned by John J. Scannell of New York, is dead at the former Fire Commissioner's breeding farm near Fishkill Landing. In 1896, the mare, as a three-year-old gave promise of great things and heat the best trotters on the Grand Circuit. Only a few weeks ago Scannell lost his champion trotter, The Abbot, in a similar way.

Mr. J. Bryson of Linden, who has had Guy McKinney in the stud there for the past two years, has secured Robert I. Orr's good stallion Oro Guy to take the place of Guy McKinney, who is making the season at Pleasanton in charge of Ben Chahoya.

The green mare Angie by Axtell that showed a mile in 2:06, last fall will be taken to Selma, Ala., for the next two months for training, and then he returned to Lexington for the finishing touches. She is entered in the great M. and M. Stake at Detroit.

Mr. Aug. Hahn, of 747 Park avenue, Montreal will match J. B. Wathen, a three-year-old trotter by Gazette 2:07 for from \$5000 to \$10,000 against any Canadian-bred three-year-old trotter. This colt Mr. Jas. Brady started working on the second of January, 1904.

Andy Welch, who manages two trotting tracks on the Grand Circuit, is thinking of giving a \$3000 stake with the entrance only one per cent. It would be popular and might get a hundred entries, in which case it would not cost Andy anything but the advertising.

A black filly by Direct out of a mare by Athadon, three years old and entered in the Breeders Futurity, showed a mile better than 2:30 as a two year old. She is for sale, with a half dozen more colts and aged horses, by M. J. Schafer of Fowler, Fresno county. See advertisement.

A curious accident occurred in the stables of the National Brewing Co. in St. Louis last week. Owing to something going wrong with the electric wiring 59 truck horses were thrown off their feet by a heavy shock and so severe was the injury that three died outright and many were seriously crippled.

Frank Rodgers of Oakland this week sold his green trotting filly Linda by Gossiper 2:14, dam by Mambrino Wilkes, to Engineer Wiley, also of Oakland, for \$450 cash. This filly has been handled a very short time by A. G. Andrews, who considers her a great prospect with a brilliant future before her if she is put to racing.

New officers for 1904 were elected at a meeting of the Empire City Trotting Club, March 1, as follows: President, James Butler; Vice-President, Brayton Ives; Treasurer, Peter MacDonald; Secretary, Alfred Reeves. It was decided to offer \$24,000 in stakes for the Grand Circuit meeting at the Empire City track in August.

Elias Williams has purchased the stable on Ninth Avenue, this city, formerly owned by Jos. Cuicello, and will handle horses for the track or road. There are fifteen neat roomy box stalls, which offer excellent accommodations for park drivers as the stable is within two hundred yards of one of the main entrances to this big pleasure ground.

Don't forget to make that fourth payment of \$10 in the Breeder Futurity No. 3. It falls due on Friday, April 1st, and is for the foals of 1903, now yearlings. There are several calls for nominations in this stake and if your colt has died notify Secretary Kelley before April 1st, that he may be able to sell your nomination for you and get your money back. Read the advertisement in this issue.

Quillaseen, an eight year old sorrel gelding by Boydell, son of Electioneer, dam Quill by Tilton Almont, will be sold at auction at Fred H. Chase & Co.'s on Monday evening. The catalogue says: "Quillaseen is 16 hands, weighs 1150 pounds. Broken with or without hind, is perfectly gentle and a square trotter; a great gentleman's road horse, and very few horses will beat him on the speed way."

Tom Smith of Vallejo has a fine pair of carriage horses for sale. They are by Grandissimo, and are both six years old. Mr. Smith secured this team from Dr. R. F. Taylor of Napa in a trade, Dr. Taylor becoming the owner of the fast mare Trilby 2:23 by Mambrino Chief Jr. The horses attract as much attention on the streets of Vallejo as they did in Napa, and Mr. Smith will probably not keep them long.

Do you want a good carriage mare? At Fred H. Chase & Co.'s salesyard next Monday evening there will be offered a six-year-old brown mare, 16 hands high, weighing 1200 pounds. She is broke single and double. Sired by Clarence Wilkes, he by Guy Wilkes; first dam Rosie by Gold Rose; Gold Rose, a full brother to Bay Rose. This mare is a beautiful seal brown. Has great style and action. Will make an excellent carriage animal as well as a grand single animal.

Over 1000 people were at the Lake of Isles ice course near Minneapolis, February 28th, and were rewarded by seeing a world's half-mile record established for pacers on a circular ice track, the trick being turned by Al Gluck's great sidwheeler Goshen Jim, who paced the second heat of the free for all in 1:00 and came back the third heat in 1:01. The zero weather of Minneapolis does not appear to congeal speed.—*American Sportsman.*

If you want good draft stock, ready to work and in good condition, attend the sale of Percherons to be held by Fred H. Chase & Co. at the salesyard, 1732 Market street, this city, next Monday evening, March 21st. There are fifty head selected by William Brockman of Susanville, Oregon, and they weigh from 1300 to 1600 pounds. All are nicely halter broke and a large proportion broke to work. The horses are now at the yards and may be inspected to-day, Sunday and Monday before the sale.

The Reedville management has decided upon one early closing event for each day of its meeting next August. They are the Massachusetts 2:10 trot, \$15,000; the Blue Hill 2:20 trot, \$5000; the Norfolk 2:24 pace, \$5000; the Ponkapoeg 2:14 trot, \$3000; the Tyro, three-year-old trot, \$3000. Entries to these will close April 11, and an entry fee will be charged on every horse named.

In the printed list of mares entered in the Breeders Futurity No. 4, on which second payment was made March 1st, this year, appeared the name of Mr. J. B. Iverson's mare 'Roseate by Guy Wilkes, bred to Iran Alto. This was an error. Mr. Iverson paid up on two mares, one of them being Ivoneer by Eugeneer, bred to Robin, the other Wilhelmine by Eugeneer, bred to Barondale. He forfeited on the mare Roseate.

The Canadian tariff on horses probably will be increased in the near future. At present the valuation is so low that a great many miserable little ponies and broncos are sent across the line from our northern ranches and sold to Canadian settlers in the new Northwest. Registered classifications also are very loose. Any kind of a tramp hard book certificate is sufficient to get a breeding horse across the line. A hill is now being prepared to raise the valuation to a minimum of \$100 per head on all horses, which would prohibit the importation of trash.

Ben Chahoya has sold his fine pair of brown roadsters to Mr. J. C. Bray, who purchased them for Mr. William Chappel, a wealthy resident of Seattle, Washington. Those who visited the Haywards and Livermore horse shows this year will remember this handsome pair of browns as they were driven in the parades by Mr. Chahoya. The horses are called Buff and Dougy, the first being by Chas. Derby from a mare by Corrector, son of Director, and the other by Monroe S., son of Monroe Chief, from a mare by Langford. They are very evenly matched, high headed, full of life and make a fine appearance. They will be shipped to Seattle early in April.

The closing out of the Percheron horses owned by the Col. Fred Pahst Stock Farm at Milwaukee on the 17th brought out an attendance of over one thousand anxious bidders and buyers from a dozen states or more. Prominent breeders were also there looking for bargains, and the only complaint registered from the sale was that there were not enough offerings to satisfy the would-be purchasers. Everything offered was quickly snapped up and at good prices, the average for the 71 head sold being \$426 each—a total of \$30,290, the 55 mares averaging \$360 each and the 16 head of stallions bringing an average of \$655 each, really a most satisfactory result in a closing out sale.

The \$15,000 Massachusetts purse, the feature of the Readville grand circuit meeting and the leading race of the turf, will be for 2:10 trotters this year. In years past this great purse has been offered for trotters eligible to the 2:12 class. This change was decided upon at a meeting of the New England Trotting Horse Breeders Association last week. It will insure a larger field of starters, at the same time adding to its quality. The change will be welcomed by many owners, as it adds a great deal to the value of all trotters with records from 2:09 to 2:11, who are to be campaigned this year. These horses heretofore have never been able to win much money, no matter how fast, owing to the lack of rich purses in their class.

Mr. Geo. W. Ford, of Santa Ana, owner of the fast trotter and good sire Neernut 2:12, sire of Neeretta 2:09, etc., writes us that there is talk of a two days' meeting at the Santa Ana track in May when a good program of races for local horses will be given and a number of broodmares and colts started for standard records. The track is in good shape and fast. About forty head are being worked there now. Mr. Ford expects to start east in May with a carload of young Neernuts to sell. They are a fine lot of colts, and eight out of the lot have already stepped miles from 2:20 to 2:30, and it is expected there will be several 2:15 trotters in the bunch by the time they are shipped. Dave Rayhould and Ed Knowles are training Mr. Ford's horses.

Mr. D. F. Oglesby, of Carpinteria, writes the BREEDER AND SPORTSMAN under date of March 14th that good rains and fine feed have made the horse business quite flourishing in that section. The colts by his fine stallion Almonada are showing up well. The Scout, in the hands of W. S. Mahen is showing "in the teens," and the lancers on claim even better. Almo and Paloma, both three year-olds, will go into the hands of Mahen and Delaney in a few days, and Mr. Oglesby says they will both trot in 2:30 as soon as conditioned and heat 2:20 by fall. He adds "I have as fine a lot of yearlings from Almonada as there is in the State. I predict a good year for the horse business."

A meeting of the organizations represented in the movement toward building a half-mile oval track, polo field, cinder path and athletic grounds, together with the necessary buildings, in Golden Gate Park, was held at the rooms of the Golden Gate Park Driving Association at the Palace Hotel on Thursday evening of this week. It was decided to raise the \$25,000 which, with a like amount appropriated by the Commissioners, will be necessary to complete the proposed plans. Mr. W. J. Simpson presided at the meeting and the sentiment of all present was that it would not be difficult to meet the condition laid down by the Park Commissioners. Authorized agents with subscription books will shortly be sent out to collect funds on behalf of the association.

Malcolm Forbes Horses to be Sold.

The sensational announcement of the week is that the executors of the late J. Malcolm Forbes have decided in the near future to sell all the trotting stock at the famous Ponkapog Farm.

Arion 2:07½ will naturally be the center of attraction. He was universally conceded to be the sensational colt of the last century. He was foaled in 1889 at the celebrated Palo Alto Farm and trained by Charles Marvin. On March 10, 1891, he astonished the world by taking a record of 2:10½. The surpassing magnitude of this performance can only be estimated by comparison. Sunol 2:08½, the queen of her time, won the three-year-old championship in 1888 with a record of 2:20½, and a week later cut it to 2:18, where it stood for three years.

The record was made to a high wheel sulky. Twelve years have elapsed since that time, but in spite of the introduction of the bicycle sulky no two-year-old trotter has ever approached this record. Every other champion record at a mile to sulky during that period has been broken again and again; it alone survives. The records of the stallion, the yearling, three, four and five-year-old champions have been reduced, but it remains.

It was natural that such a phenomenon should command an unprecedented price and when Mr. Forbes asked the late Senator Stanford to name the figure, the reply was \$125,000, and it is a well known fact that the master of Palo Alto was distinctly disappointed when the Boston millionaire accepted the terms. Arion captured the three-year-old colt championship, which he still owns, though the three-year-old filly Fantasy beat him with a record of 2:08½ for the full championship at that age. He later reduced his record to 2:07½ and was then retired. He is now fifteen years old.

The star broodmare of the farm is the ex-queen Nancy Hanks 2:04, who cost Mr. Forbes \$40,000. Nancy Hanks was foaled in 1886, made her record in 1892 and has proven to be a great broodmare. As Alix 2:03½ is dead, she is the only ex-queen of the trotting turf in the stud, and should be a great prize in the grand lottery of breeding. Bingen 2:06½ has proved himself to be a great sire.

Next to the \$125,000 paid for Arion, the highest price ever paid for a trotter and the highest price ever paid for a two year old of any breed, comes the three year old Axtell 2:12. On October 11, 1889, at Terre Haute, Ind., the three year old Axtell trotted in 2:12, which at that time gave him the three year old and also the stallion championship. That evening President Ijams gave a little dinner to a few wealthy horsemen, a syndicate was formed, C. W. Williams, the owner, was sent for and the colt was bought for \$105,000.

This was the first time in the history of the breed that six figures were reached. Axtell earned himself out in the stud. In the Williams stable, at the same time, was the great colt Allerton, who later became champion with a record of 2:09½. Mr. Williams declared he was the best of the two and is said to have refused \$150,000 for him.

The late Robert Bonner still remains the champion buyer of high-priced horses. He paid \$40,000 for Pocabontas. As far back as 1867 he bought Dexter 2:17½, the champion trotter of that time for \$35,000. When Rarus 2:13½ became the champion, he paid \$30,000 for him. William H. Vanderbilt sold him Maud S. for \$40,000, so that she should not be raced, though it is well known he could have got a higher figure. When Sunol trotted in 2:08½, beating the champion time of Maud S. by half a second, Mr. Bonner's desire to own champions again came to the front, and he bought her for \$41,000, the highest price ever paid for a mare of the breed.

The Electioneer family have been signally fortunate in securing sensational prices, as in addition to Arion and Sunol, Axtell, by the same sire, sold for \$55,000, and the great but unfortunate Bell Boy for \$51,000. Bell Boy was bought as a yearling for \$6000 by the late S. Brown, of Kalamazoo, Mich., who sold him when three years old for \$35,000. A year later he went under the hammer for \$51,000, and shortly after was the victim of a fire.

Stamboul 2:07½, certainly the most handsome of all the stallion champions, was bought by the late Mr. Hobart, of San Francisco, for \$50,000, and at his death was sold under the hammer in New York for \$41,000. He was bought by E. H. Harriman, and was the premier sire at his fine farm near Goshen, N. Y. Sultan, the sire of Stamboul, brought \$40,000, and Sldner, the sire of Sidney Dillon, the sire of Lou Dillon 1:58½, the present trotting champion, sold for \$27,000.

The two greatest dispersal farm sales in the history of the breed were those of Glenview, Ky., held on the farm, and that of L. J. Rose's Los Angeles Stud, sold at the old American Institute in New York. At the

former sale 168 head went under the hammer for a total of \$325,650, or an average of \$1932. In that sale, Nutwood sold for \$22,000, and Pancoast for \$28,000, and twelve broodmares by George Wilkes averaged \$2806 each.

Wonderful as this sale was, the Rose sale eclipsed it. There were only eighty-seven head in that sale, yet the total was \$235,995, and it averaged \$2712.50. The highest figures were \$25,800, paid for Alcazar, by Sultan, and \$24,100 for Voodoo, by Stamboul 2:07½.

The great vital question which horsemen and breeders are asking is how will prices of the present time compare with the figures of twenty years ago. The pessimists point to the fact that at the great winter Madison Square Garden sale the average was only \$325. The explanation is simple, and is a strong argument for the other side. No horses of superlative merit were offered. There was no Abbot to be sold for \$26,000; no John R. Gentry for \$19,000; no Star Pointer for \$16,500.

On the other hand, that the market is as high as it ever was for the equine stars is shown by the fact that \$40,000 was refused for The Abbot; that \$40,000 was paid for Major Delmar 1:59½; that The Hangman, a brother of Cresceus, has recently been sold for \$28,000, and that the price of \$100,000 was suggested for Cresceus. It is well known that C. K. G. Billings has stated that he would not take that figure for Lou Dillon.

Fast and high class stock is scarce.—*New York Telegraph.*

Burns & Waterhouse Horses Sell Well.

Nineteen horses, comprising the stable of Burns & Waterhouse, were sold at auction at the race track last Monday and they brought the total amount of \$19,200. The prices ranged from \$75 for Cascade to \$4500 for Rockaway.

The best horse of the bunch to be sold was Rockaway, which was rated as one of the crack three year olds. The horse has been started a number of times this season and has invariably shown himself to be a high-class horse with plenty of speed.

Toledo, another good three year old, brought \$2100, as did Homo. The two year olds, Hooligan, Eduardo, Gloomy Gus and Edgcliffe, all brought good prices. Following is a list of the horses sold, their purchasers and the prices paid for them:

Rockaway, J. J. Grant.....	\$4500
Toledo, E. Gaylord.....	2100
Homo, Charles Harrison.....	2100
Hooligan, D. S. Fountain.....	2050
Eduardo, H. Stover.....	1650
San Nicholas, H. Bell.....	1600
Gloomy Gus, Grant Edison.....	1035
Edgcliffe, S. Judge.....	950
Nunrose, Appleby & Co.....	800
Dolonius, W. H. McNames.....	500
Edrodus, A. Forbes.....	500
Storma, A. Jackson.....	450
Princess Zula, A. Forbes.....	425
Haddueus, J. Hayes.....	400
Butterick, D. S. Fountain.....	300
Dundreary, J. C. Murray.....	300
David Boland, W. Baird.....	250
Lillian Ayres, P. McAuliffe.....	225
Cascade, M. A. Harton.....	75

Ten Thousand Horses for Japan.

VANCOUVER (B. C.), March 15—Ten thousand horses for the Japanese army will be purchased within the next ten months in Eastern Washington and Oregon. The contract for the supply of these remounts has been awarded to Dr. Armstrong of Nelson, B. C., through the consulate in this city. The agreement specifies that 1000 animals per month shall be delivered.

The price is not mentioned, but the quality of the horses must be of the best; in fact, the announcement has been made here that none other will be accepted. Some of the horses will be procured from the ranges in the interior of the province, but by far the greater majority will be purchased from the breeders in Eastern Washington and Oregon, where the strain is better.

Riverside News.

RIVERSIDE, March 12—That good pacing mare Nellie J. 2:24½ died here the other day from enteritis. She was in foal to Zolock 2:10½.

Mr. J. H. Thompson, owner of the pacing gelding El Diablo 2:11½, will not race that horse this year but will use him on the road.

Mr. C. W. Farrar, that careful trainer, has just taken up a two-year-old filly owned by Mr. J. H. Thompson, who expects great things of her. She is by Monbells 2:23½, son of Mendocino 2:19½ and Beautiful Bells, and her dam is Emaline 2:27½ by Electioneer. She is entered in the Breeders Futurity.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

An All Purpose Horse.

There are a large class of people who seem to think that the only uses to which the trotter can be put are those of a turf horse or a light roadster. Nothing can be farther removed from the facts, says *Trotter and Pacer*. To be sure, a single individual cannot combine every requisite for every use to which a horse can be put, but with the single exception of a saddle no manner of work has been found which some trotting bred horse could not perform more satisfactorily than that of any other breed. The finest coachers in the world are trotting bred, and the reason that any market can be found for the imported nondescript whose presence disgrace our fashionable thoroughfares is only because the supply of the better class is entirely unequal to the demand. While not common, trotting bred horses weighing fourteen hundred pounds can be found, and with only a little judicious selection, with a view of producing horses for heavy work, would develop at once a breed superior to the elephantine animals comprising what are known as the draft breeds, and whose only recommendation outside the land of frog stew and equine steaks is their avoirdupois.

The docility of the educated American breed commands them to those who wish a family roadster behind which they can take their wife and babies for a drive with a reasonable assurance that the horse will return them safe at home, even though a few traction engines, electric cars, etc., may be encountered. The professional man wants a horse that he can depend upon to transport him swiftly and safely from place to place, night or day, and in all kinds of weather. After once owning a trotting bred horse adapted to his purpose, he will own no other. The gentleman wants a horse to drive for health or pleasure, and if he does not enjoy riding in the rear of the procession and taking everybody's dust, he, too, will buy a trotter. The ladies like to drive a kind, handsome horse, and one that can step some, at that, and once they have driven a trotter they will be contented with nothing else. The farmer wants a horse that is useful on the plow, the binder and all the lighter implements, as well as to use on the road hitched to vehicles, heavy or light. He wants a horse that can walk fast when at work and that can strike a trot on the road. The trotting bred horse of suitable size can outdo any breed on earth at this business, and his longevity is such that with the same usage he will last one-third longer than any other. Fire companies are looking for this class of horses, and express companies are doing likewise.

Death of Adirondack Murray.

An Eastern paper prints a notice of the death on March 3d at Guilford, Conn., of the Rev. William Henry Murray, better known as "Adirondack" Murray. He loved a horse, and while pastor of the Park Street church in Boston wrote a book entitled "The Perfect Horse," which was a plea for intelligent and scientific breeding. He was an admirer of the Morgan horse, and at his home in Connecticut he established a breeding farm. While pastor of the Park Street church he drove a fast horse, but when he commenced to associate intimately with race track managers and owners of campaigning stables and became a prominent feature at the race meetings the members of the old Puritanical sect in Boston asked him to vacate the pulpit. He afterward conducted an independent church, and in later years pursued a variety of occupations with varying success. He obtained considerable note as an author, and it was due to his works dealing with the Adirondacks that wealthy people became interested in the New York mountains and made them a famous summer resort.

Proper Feeding for Colts.

A foal should be taught to eat grain from the time it is three months old, and it should run with its dam until it is five months old. It should then have a roomy, comfortable, well lighted box stall, and be allowed to run in a yard that is not slippery for three or four hours each fine day. It should have as much good hay as it cares to eat three times a day, but no more should be given than is eaten clean before the next meal. The manger and feed box always should be kept clean. In addition to hay, the foal should have oats, clipped oat hay and bran, and some carrots. The morning feed should be about one quart of oat feed; the evening meal should be oats and bran, as much as the colt will clean up before morning. The quantities mentioned are for a well-grown hearty colt, but judgment must be exercised by the feeder.—*American Cultivator.*

Anselin, a bay yearling colt by Barondale 2:11½, was purchased at the McCarthy sale at Portland by J. A. Fee of Pendleton for \$260. This was the largest price brought by any yearling at the sale.

Racing on the Ice of Lake St. Croix.

Forty degrees below zero, a foot of snow, ice four feet thick, winter ore long holiday, horse racing week in week out—that is a picture of Hudson, the home of ice races. Over the glassy surface of Lake St. Croix, sheltered from the winds by the high hills of Wisconsin on one side and the abrupt bluffs of Minnesota on the other, the fleetest steeds of northern Wisconsin and eastern Minnesota contest each week in the ice races, the greatest winter sport of the farther north.

To this little city of 3500 people 8000 or 10,000 ice-racing enthusiasts flock on every Saturday during the season, throughout which a strong sheet of ice covers picturesque Lake St. Croix. Men, women and children—hundreds of them—line the straight half-mile racing course, braving the temperature that frightens the mercury into the bulb, and shout and gamble and gamble and shout. Sometime it may become too cold for these races, but a temperature of 40 degrees below zero has not been cold enough to drive the crowd to shelter. The hardy woodsmen, who make up a big part of the population of the community are as little affected by cold as are the pines they hew, and the women of the farther north are as hardy as the men.

In summer time Hudson and its rival, Stillwater, across the Minnesota line, are race horse towns. The racing circuits of the lower part of the state know the Hudson horses, and know their purse-winning abilities. It may be local pride in the ownership of this horseflesh that entices the crowd from the fires to the arctic temperature of the race course, or it may be something else, for the people here like to gamble, and they usually have the money to satisfy their desire.

There are but few places in the United States where racing is made a continuous all-winter sport. There is no place where it plays so great a part in the life of the community as it does here. The dozen or more horse owners who are responsible for the season of sport are the "leading citizens" during the winter season, for they do more to bring people to the city and maintain it as a trading center than all the other forces combined.

As soon as the waters of Lake St. Croix are frozen, preparations are made for the season of racing. This is usually in the month of December, for in this latitude the ice forms comparatively early and remains comparatively late. Close in by the Wisconsin shore, 200 yards, say, from the line where the steep hills meet the water, the course is laid out, parallel with the shore line. It begins toward the lower end of the lake and ends directly opposite the center of the town. The ice track, not more than sixty feet wide, is scraped almost, but not quite, free of snow, if snow has fallen at all, and over this speedway, day in, day out, the string of horses is trained. Racing sulkies, converted by some local blacksmith into racing cutters, are the vehicles used in the ice races. Some of the more intrepid drivers use their wheeled sulkies on the ice, but not many of them, for usually in winter hardly a wheel turns in Hudson. The place has often been dubbed a bobsled town, and the name is not a poorly given one.

To see a fleet horse hitched close in between the skeleton runners of an ice sulky reeling off a half-mile in better than a minute and thirty seconds is enough to bring out the wallets of every woodsman on the ice. There is something about ice racing that makes gambling epidemic. Some say it is in the ringing sound of the hoofs that send their clear, rhythmic music far over the hills as they clatter on the hard surface. Some say it is because occasionally an outlander horse from Stillwater creeps into a contest and tries to throw chipped ice in the eyes of his contestants. And some say it is only because ice racing would not be ice racing unless the people could bet on results.

Most of the races are stake events. There is no racing organization. If a man or woman owns a fast horse and believes it can beat another fast horse this opportunity for argument, as a rule, quickly brings about a bet, the usual amount being \$100 on each horse. Four or five of these races are arranged each week during the season, but the wagers made by the owners cut but a small figure in the total of bets made. During the days preceding and the day of the races business is half suspended while the merchants and their clerks are laying their savings on this or that animal. The traveling men who blow into the town catch the fever, and when all is over half the town is broke and half the town is doubly rich, as racing riches go.

It is a picturesque crowd that gathers on the lake on racing days. The ubiquitous small boy with his feet clad in padded moccasins and wholly devoid of money to lay upon his favorite finds his old enemy, the holiday policeman, multiplied many times. Every man who wants to be a policeman forthwith has him-

self deputized as such, for this gives him the right to stand in the inside line and get an unobstructed view of the horses as they come racking down the track. Very often it is the case that there are so many policemen that there is no one left except the small boys and the dogs to demand the touch of the policeman's whip. The whip is the badge of the Hudson policeman, and often a woodsman who is a deputized officer of the law for the first time considers it his duty to make use of the lash.

When the races are about to begin the policemen—that is, the men at the track—form into a line at the edge of the course. If the children want to see the races they can climb a hill or lie down on the ice and peer between the booted legs of the guardians of order. And the two long rows of policemen would shame anything beyond the shore line of Lake St. Croix. Closely muffled in their greatcoats of con or calf skin, they look more like a live stock exhibition than like peace preservers or peace restorers. The only thing that can make a policeman break out of that front rank is the sight of a five-dollar bill offered against his favorite.

Betting is not confined to the men alone. The women bet, too, although they are not so boisterous about it and do not make so much of a show of themselves. The men walk up and down the track flaunting their money in the faces of the onlookers and daring anyone to cover the amount. The money, as a rule, has little flaunting, for it is usually matched before it gets cold. But that the women do bet, too, is evidenced by their actions at the close of a race, when they jump out of the sleighs, wade through the knee-deep snow to other sleighs, where they declare themselves winners.

The greatest races of the year were held on Washington's Birthday. Being a national holiday, business in the town was suspended. Bankers left their counters and merchants their stores to attend the races. The principal race of the day was a matched event between a speedy little horse owned by Mrs. A. Montebriand and a somewhat speedier horse, as the race showed, owned by J. Cashman. Mrs. Montebriand drove her own horse, which was hitched to a narrow, bike-wheeled runabout. The Cashman horse was hitched to a racing cutter.

Mrs. Montebriand is the best known horsewoman of Northern Wisconsin. She drives with almost matchless skill. The slippery course, where a horse is liable to go down at any step, holds no terrors for her, for she drives under the whip and goes down between the lines of shouting thousands at breakneck speed.

On every race like that one in which Mrs. Montebriand drove the bets aggregate as much as \$5000. No pools are sold on the races. It is simply a case of hunt your own bet, and everybody hunts.

When the ice breaks up and the winter racing is at an end Hudson settles itself down and lives rather quietly within itself. The winter is one long holiday. —*Inter-Ocean.*

Fast Quarters on the Ice.

Dr. Witter K. Tingley's pacer Teddy Roosevelt made himself famous yesterday by breaking the world's ice record for a quarter of a mile. He did the trick in 28 seconds or a fraction under. Dr. Tingley caught the time at 0:28, but two other watches, one of them held by Walter H. Gallup, got in 27½ seconds. The world's record is 30 seconds.

Not finding any horses willing to meet him when he arrived on the course recently, Dr. Tingley decided to give his fleet pacer a few speed trials. A quarter of a mile was marked out on the course. Teddy Roosevelt was first sent over attached to a sleigh holding his owner and friend. The time made was 30 seconds. The performance was then repeated. The horse acting so well, he was taken out and barnessed to a bicycle road wagon weighing fifty-four pounds. Dr. Tingley then drove down to the starting line unattended, and, getting a flying start, swept over the course at amazing speed. The time was caught as described above.

Some of the spectators who had come on the ice questioned the length of the course, so it was remeasured by W. H. Gallup and John Woodmansee, and found to be four feet over the quarter. The measurements were made in the presence of A. D. Latbrop, C. E. Brady, A. N. Carpenter and others.

The horse, although somewhat tired, was sent over the course again after the measurements had been verified. All the watches timed the horse at 30 seconds.

Spectators who saw the performance say that the horse looked as if he was flying through the air, so speedily and easily did he move. Dr. Tingley said that if he could get a horse or horses fast enough to pace Teddy he would go over a mile course to try for the world's record for pacers, 2:14½. He says that not having any horses to race against, all that is left for him to do is to race his great pacer against time. —*Norwich (Conn.) Evening Record.*

No Substitutions in the M. & M.

President D. J. Campau and Secretary W. J. Snyder of the Detroit Driving Club devoted much time and thought before they concluded to abolish the clause in the conditions governing the historic \$10,000 Merchants and Manufacturers' 2:24 class trotting, and the \$5000 Chamber of Commerce 2:24 class pacing stakes, allowing a nominator to substitute another horse by paying an additional two and one-half per cent. When Mr. Campau first introduced the above, he did so believing that he was offering to borsemen a philanthropic alternative. He argued that it was an injustice to demand or ask an owner to pay a large sum of entrance money early in the season, many months before an opportunity of ascertaining if the animal still possessed the quality of the previous season, which entitled him to recognition in such stake events had presented itself. Should subsequent training show that the horse had not regained the form of the previous season the owner was a heavy loser and frequently discouraged, a circumstance which often kept him from entering in future events of this style. It was for the purpose of lightening such hardships that Mr. Campau offered the substitution clause as a compromise. Recent subsequent developments, however, give evidence of certain horsemen taking advantage of and abusing the condition. Instead of working to the end which the father of the idea had intended it should, it has furnished an incentive for many horsemen to wait until the last chance of naming a substitute arrives then search around for a horse they believe possessed with the quality to win the respective event, pay the two and one-half per cent additional charge and race some other person's nomination. The ultimate result brings it to the point where one wagers two and one-half per cent that he can produce a faster horse than any one else. This state of affairs had become very annoying to Mr. Campau and naturally he sought around to find the best way in which to rid the historic events of the abused practice. The president eventually decided the best course to pursue was to abolish the substitution clause. Still having in mind, however, his original purpose to eliminate as much as possible the burdensome expense of losses through forfeits of early large payments in entrance money, Mr. Campau decided to reduce the early payments of both the Merchants and Manufacturers' and Chamber of Commerce Stakes. In the future the initial and succeeding fee in the Merchants and Manufacturers will be but \$50 each. In the Chamber of Commerce the respective fees will be but \$25 each. By this plan an owner can carry his horse in a rich \$10,000 stake up to June 1st for \$100 and in the \$5000 pacing event for \$50. It is generally understood that by June 1st an owner and trainer has a line on his horses form, and is in a position to determine the advisability of continuing the payments in stake events. Should the horse give evidence of lacking the necessary quality at this date, the owner is not subjected to a heavy loss. Horse men in general argue in favor of the abolition of the substitution clause. The majority contend that by the present plan a 2:12 or 2:13 trotter is given an equal opportunity with the 2:10 trotter to capture the big event, for the reason that the faster animal may train off or meet with an accident which would prevent him starting. In the course of such an event occurring there could not be another horse substituted as has been the custom, but instead the slower horse would look best. A well known trainer in speaking of the new plan said, "It would not surprise me to find the Merchants and Manufacturers won in 2:15 occasionally. The new conditions are certainly an incentive for every owner to enter in the only stake events offered in the Grand Circuit."

Kansas City Matinee Statistics.

V. K. Simmons, manager of the Kansas City Driving Club's club house, has compiled some interesting statistics of the performances over the Brush Creek track, where the meetings of the club are held. During the past season 104 heats were trotted in 2:0 or better and 37 were trotted and paced in 2:20 or better. Fred C. Merry was the champion reinsman of the club, winning no less than 16 races and 39 heats. H. D. Train was second with 14 races to his credit, but was first at the wire in 85 heats. Among the horses Mayflower was the leading performer, winning 8 races and 19 heats in 15 races, although the percentage of Nancy Bell was higher, she winning 7 out of her 12 starts. The fastest mile of the season was trotted by Hal Fry in 2:13½. Mascot was king of the pacers with a heat in 2:15½.

Strike!—If they don't give you Jackson's Napa Soda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Handling Dogs in the Ring.

The following communication was received this week with a request for publication. We therefore give it to our readers without prejudice. The practice alluded to, we do not believe is of the magnitude intimated, but in the interest of Coast dogdom and bench shows we think there is a modicum of good sense suggestively. We know that the custom is not entirely local, and for that reason let the argument go for what general benefit may accrue.

As to the managers of our local shows we know they have been always enthusiastic and painstaking. If the sentiments intimated in this communication have taken root to any extent we hope the returns will be barren of result for we do not believe there is the remotest cause for anything more than a suggestion for an avoidance of undeserved criticism, and in this we know that repeatedly, the government of the S. F. K. C., has been punctilious in endeavoring to steer clear of everything that might give their motives an unfavorable coloring. In this instance we will step aside as the publisher for the time being and take up the cudgels for the judge, for in this stand we believe is the pith of the contention, the oversight referred to could place a judge in an embarrassing position—after awards had been made.

KENNEL EDITOR BREEDER AND SPORTSMAN: Will you kindly give me the space to say a few words in regard to a custom in vogue at our local shows and that is—the handling in the show ring of dogs by different club officials who do not own the animals they parade before the judge. Understand me, I am not making charges that this practice is for the purpose of influencing a judge. The reasons for handling the dogs may be prompted by the best of motives or it may be done at the request of owners, or with the desire of expediting the judging, etc.; but in the light of past events and comment this is to a great extent in bad taste and leaves good motives open to criticism on the part of spectators and other exhibitors. Of this I am sure, for I have heard comment upon the subject.

I will recall one case in particular. Several shows ago a member of the bench show committee handled one of his entries and two other of his dogs were in charge of brother officials at the same time in the ring. No doubt this was a case of good fellowship and nothing more, but it was noticed alike by other exhibitors in the ring and exhibitors and fanciers at the ring side and did create comment. The mistake was undoubtedly committed in the oversight that allowed an invidious construction, however unmerited, which could have been avoided by a moment's reflection upon the incongruity of appearance in the ring which might ensue.

Comment I have heard has been to the effect that "club officials who take dogs into a judging ring to compete against other dogs not so favored, permit themselves to be placed in the equivocal position, underserved even though it be, of being suspected of desiring to bias a judge. If two dogs come together in the ring, one handled by a 'plain' exhibitor [whatever that may be—Ed.] or an attendant and the other in charge of a well known club official and there is a close contest between these dogs, it may have an influence with the judge."

This situation has at all events had that construction placed upon it by some in the audience. That this idea is not far fetched will be borne out by past experiences and discussions over awards at our shows. Further in this connection, I have heard the remark "that judges are only human."

Again, and I will conclude, the judge should be protected from any imputation arising from any contingency growing out of a custom that should be more honored in the breach than the observance. In fact, it would be better for all concerned, if the judging ring were kept entirely clear of every one but those having actual business therein. Such is the practice at all of the large Eastern shows I have attended. In regard to handling dogs in the ring I have noticed in the keenest competitions that the custom was for owners to place their dogs in charge of handlers and not in charge of prominent fanciers or club officials.

FANCIER.

The annual meeting of the Airedale Terrier Club of America was held February 11, at Madison Square Garden. The following officers were elected for 1904: President, Mr. A. DeWitte Cochran; Vice-President, Mr. Arthur Merritt; Secretary and Treasurer, Mr. William L. Barclay. Executive committee—Mr. R. H. Johnson, Mr. Harold Gould, Mr. A. D. Cochran, Mr. Arthur Merritt and Mr. W. L. Barclay.

The report of Secretary William L. Barclay showed that the interest in the breed was increasing, and that the club was in a most prosperous condition.

The annual meeting of the Irish Setter Club of America was held in Madison Square Garden, February 11, 1904, and the following officers were elected for the coming year: President, Dr. G. G. Davis; Vice-President, J. J. Donohue; Secretary, Louis Montolt; Treasurer, James B. Blossom.

One hundred dollars was appropriated to be offered as a special prize for Irish Setters during the ensuing year.

DOINGS IN DOGDOM.

Entries for the 'Frisco show will positively close April 2nd. Since the premium list was issued a number of valuable and handsome trophies have been added to the list of specials. An effort will be made to have the best exhibit of Pointers and Setters ever benched in this city, or possibly on the Coast.

Blackthorn Kennels have been doing recently a brisk business in Irish Terrier puppies, so Mr. Ballantyne writes us. Puppies have been shipped to New York, Boston and other Eastern points. He has at present a nice litter (3 dogs) of puppies sired by the imported crack show and stud dog Red Hill Doctor. The dam is by Bolton Woods Royal. This is a combination that ought to produce winners. When they are ready to ship there will be a chance for Coast fanciers through announcement in the advertising columns.

We call attention to the announcement of Mrs. K. Bradley-Dyne of some choice Irish and Scotch Terrier bargains among the classified ads, page 19.

All of the specials offered at the S. F. K. C. show next month are for open to all competition. In compiling the premium list, by an oversight the clause used in last year's list stating that specials were for competition among Pacific Coast entries only was left in the present publication. The specials offered at the show next month comprise the largest and best collection ever offered on the Coast and are put up for the best dogs entered, bar none.

Mrs. C. G. Saxe has two young Great Danes that are more handsomely marked and colored and of better type and conformation than any young dogs she has raised for several years past. One of these youngsters is a beautiful blue and white harlequin, the colors recognized by the Great Dane Club as preferable harlequin coloring.

There is a promise of some lively Great Dane competition next month.

Several well bred and broken young Pointers—none better bred or better looking on the Pacific Coast can be had by sportsmen who want to have a good field dog for next season, by addressing Manager R. M. Dodge, Stockdale Kennels, Bakersfield.

A letter from J. Otis Fellows, ("Uncle Dick") received this week states that he will attend the Buffalo show next week and take in the circuit afterwards.

Mr. Fellows will be pleasantly remembered by a number of Coast fanciers who met the veteran fancier when he judged here in '97 and subsequently at Stockton.

W. J. Golcher had the misfortune to lose by death, a promising young Pointer last week. The dog was being trained and broken for field work and showed great aptitude and much bird sense. His sire was Clarence A. Haight's DuPont, a grandson of Champion Glenheigh. On the dam's side the blood lines were of the best.

Coast dogs will enter the lists on the Eastern field trial circuit this year to quite an extent. Among the competitors will be the English Setter strings of Jos. E. Terry and W. W. Van Arsdale in charge of W. B. Coutts. Mr. Van Arsdale's Peachmark, it will be remembered, did some winning last year and was regarded by Eastern experts as one of the classiest English Setters on the circuit. Mr. Terry's dogs will make their initial appearance among the Eastern cracks. It is believed by competent authority in field trial affairs that Kilgarif and Lady will do some phenomenal work when they are prepared for and afterwards put down on chickens or both whites.

Jos. E. Terry, of Sacramento, a popular sportsman and owner of the field trial winners Lady and Kilgarif as well as some other good ones, will follow the bent of his fancy to the extent that he will shortly have the best kennels of English Setters on the Coast and possibly second to none in the United States.

A modern and extensive kennel is now being fitted up at Bella Vista, Shasta county. The kennels will be in charge of Fred Coutts.

Mr. Terry's string has been increased by the addition of a number of Eastern bred Setters, every individual bred in the purple. W. B. Coutts will shortly transfer ten of Mr. Terry's Setters from Kenwood to the Bella Vista Kennels.

Entries for the Santa Clara Kennel Club show in San Jose close April 21st. The entry fee is \$2.50, each additional class \$1.50. The premium lists are now ready and can be obtained from Miss Della Beach, Secretary, 955 South First street, San Jose, 'Phone John 1911.

G. J. M. E. d'Aquin, who was an enthusiastic Fox Terrier fancier during his residence here a couple of years ago is at present in St. Petersburg, from whence he has written for the American press, some interesting dispatches concerning the present Russo-Japanese situation and also inside reports about the various occurrences in the Orient.

Selwonk Lucretia is now Wandee Lucretia. The sale of the best wire haired bitch of the present day

to Mr. C. K. Harley took place at Pittsburg. Coast-guard and Lucretia can be said without dispute to be the strongest brace of wires to be found from one end of dogdom to the other.

The Wandee Kennels string made their final Eastern appearance at the Chicago show last week and are now on the way home in charge of Stanley Lomas.

The kennels will shortly be installed near San Mateo where Mr. Harley has recently purchased an ideal tract of some eight acres upon which location he proposes to build one of the most completely appointed doggy homes on the Coast.

The Toy Spaniel Club are apparently very much in earnest in their desire to advance the popularity and quality of the breed. The club will give a show at the Waldorf-Astoria in New York on March 26th from 1 p. m. until 11 p. m. It will be open to members only. Application for membership may be made to Mr. S. J. Goldenberg, 221 West Fifty-seventh street, New York City, where premium lists can be had, and also from Miss H. G. Parlett, Corcoran Manor, Mt. Vernon, N. Y. The entrance fee will be \$1. A very liberal classification for Japanese and English Toy Spaniels will be offered besides nearly 40 silver cups and other trophies. The prize list is now ready and will be mailed upon request.

The American Pomeranian Club met in Madison Square Garden, New York, February 11, and elected six new members.

The club voted that a special prize be offered at any official show that gave at least one Pomeranian winners' class.

The following officers were elected for the ensuing year: President, Mrs. F. Smith; Vice-President, Mrs. C. Hartley Williamson; Secretary-Treasurer, Mrs. F. S. Stedman; delegate, F. S. Stedman.

AT THE TRAPS

The Golden Gate Gun Club opening shoot for 1904 will begin at Ingleside tomorrow morning at 10 o'clock sharp. The regular club shoots will take place at the above grounds on the third Sunday of each month, the final shoot coming off in September.

The regular schedule of club events for the season is as follows:

Event No. 1—Medal shoot, 25 targets, entrance 50 cents (No. 1 Bulkhead). In this event the club will be divided into three classes, viz: Champion, first and second. The two high scores in each class for the seven shoots will receive a gold medal. Monthly tie shoot off at 10 birds; season tie shoot off at 25 birds.

Event No. 2—\$150 cash, 25 targets, entrance 75 cents (No. 2 Bulkhead). Money to be divided into five equal purses of \$30 each. Each purse will be subdivided into 60 and 40 per cent. Members must have competed in the seven shoots in order to be eligible for this event. The club will be divided into five equal classes at the final shoot and the money awarded to the two high guns in each class. Should a tie occur on a dividing line in this contest, it shall be declared as one man, they dividing the purse. Back scores for this event cannot be made up, at a final shoot, all scores must be complete at the sixth contest.

Event No. 3—Consolation for a purse of \$25, divided at each shoot; 25 birds; entrance 75 cents (Bulkhead 1). Money divided as follows: Champion class, first \$3.00, second \$2.50, third \$2.00; first class, first \$3.00, second \$2.50, third \$2.00, fourth \$1.50, fifth \$1.00; second class, first \$3.00, second \$2.00, third \$1.50, fourth \$1.00. All ties divided.

Event No. 4—Re-entry shoot; 15 targets; entrance 50 cents; sealed conditions (Bulkhead 2). 2000 loaded cartridges. Four prizes of 500 each. Members must have competed at least seven times in this event in order to have scores count at end of season.

The club dues will be \$1.00 per month for seven months, during the trap shooting season. No member in arrears for dues shall be allowed to compete for club prizes. Schedule events commence promptly at 10 a. m. No more than two back scores can be made up in any event. The board of directors will have full power to make any changes in the classification of members that they may deem for the best interest of the club. No member can enter any club contest after the last man has fired the final shot in same.

A special high average prize will be awarded to the member making the highest average at the end of the season for the first three events. A special prize for beginners (donated by a member) will also be awarded. Non-members are cordially invited to attend and participate in all club events for prize of targets only.

The Union Gun Club shoot at Ingleside last Sunday was an auspicious beginning of the club trap shooting season. The winners in the various events and a summary of scores and handicaps here follows:

Club shoot, 25 targets, class shooting, 8 classes. J. C. F. Hall 25, C. C. Nauman 24, Fred Feudner 23, C. A. Miller 23, E. Klevesahl 23, Leo Kincannon 23, "Slade" 22, M. J. Iverson 22, W. J. Golcher 22, H. Frahm 22, Bert Pisani 21, G. Sylvester 21, S. C. Fish 21, Ed Donohoe 21, H. T. Hoyt 21, R. F. Chevalier 21, D. Daniels 21, R. V. Williams 21, F. Walpert 21, W. A. Robertson 21, C. Wollam 20, W. R. Murdoch 20, Geo. Thomas 19, J. B. Miller 19, P. Finocchio 19, Dr. W. F. Finnie 19, Dr. E. G. McConnell 19, Dr. Pitres 18, E. L. Gamble 18, A. M. Shields 17, W. Hanson 17, T. L. Lewis 16, W. J. Swartz 17, C. Sylvester 15, Jos. Masterson 15, C. McDonald 15, G. Barber 15, R. Schurtliff 15, Dr. W. Hanson 14, T. Barney 14, F. J. Moore 14, J. Scott Leary 14, J. Burns 13, J. B. B. 13, H. Klevesahl 13, Dr. J. A. D. Hutton 13, Bert Patrick 12, T. Walsh 11, J. F. Nickels 11, B. Angonett 10, W. O. Shreve 9, H. W. Tuckey 9, C. G. Creyk 7, L. W. H. Greene 4.

The winners were: Hall, first money; E. Klevesahl, Kincannon, F. Feudner and Muller divided second money; Walpert, Hoyt, Chevalier, Daniels, Pisani, G. Sylvester, Fish, Donohoe, Robertson and Williams

divided third money; Thomas, Miller, Finocchio, Finnie and McConnell divided fourth money; W. Hanson and Shields divided fifth money; C. Sylvester, Shurtleff, McDonnell, Barner and Masterson divided sixth money; Hutton, Burns, Biller and H. Klevesahl divided seventh money; eighth money, Angonett.

Medal race, handicap, 25 to 30 targets, 2 classes—handicap made from scores in club shoot, 25 possible—Burns shot at 30, broke 23, Finocchio 27-21, Wollam 26-20, Angonett 30-9, Walsh 30-17, Nickels 30-9, Biller 30-14, Schurtleff 28-26, Finne 27-9, McConnell 26-25, Robertson 26-19, Dr. W. S. Hansen 28-12, Lewis 28-23, Barney 28-26, Pitres 28-24, E. Klevesahl 25-23, Walpert 25-22, Knick 25-14, "Slade" 26-22, Kincannon 25-25, Hoyt 26-23, Iverson 26-22, C. Sylvester 28-22, Hutton 30-23, Chevalier 26-16, Masterson 28-20, Nauman 28-24, Daniels 26-23, W. Hanson 27-25, Moore 28-18, Shreve 30-18, Donohoe 26-24, Miller 25-17, Golcher 26-24, Swarts 27-15, Miller 27-17, Shields 27-22, Frahm 26-18, Westphall 28-19, Hall 22-21, Leary 28-18, Gamble 27-25, Pisani 24-15, Geo. Sylvester 26-20, Fish 26-26, Patrick 30-18, F. Feudner 25-24.

In the first class there were four shooters tied with possible straight scores—Gamble, Barney, Fish and Dr. McConnell. On the shoot-off at 10 targets Barney and Gamble tied, Gamble finally won first medal for the month in a freeze-out.

In the second class the medal was easily won by Billy Hanson of Pinole, who scored straight.

Added money race, open to all, handicap, 20 to 25 birds, high guns, 3 moneys—Kincannon 20-19, Muddock 21-15, Nauman 20-17, Lewis 25-18, Patrick 25-17, Masterson 25-17, Moore 25-16, J. Potter 23-18, C. Sylvester 22-15, Hoyt 21-18, Thomas 22-12, Robertson 20-16, Hutton 24-13, G. Sylvester 21-19, Knick 25-9, Iverson 21-18, Fish 21-13, Slade 21-16, Shields 22-17, Derby 21-13, Barney 22-18, Chevalier 21-16, Daniels 21-19, W. Hanson 22-17, Hall 20-16, McConnell 21-19, Bohannon 24-9, Golcher 21-20, Burns 24-20.

The winners were: W. J. Golcher and J. Burns, 20 breaks each, first and second money. Third money: G. Sylvester, Leo Kincannon, D. Daniels and Dr. McConnell.

Fifth event, open to all, 10 singles (16 yards) and 5 pairs (14 yards) class shooting, 3 moneys: Nauman 19, Masterson 12, Moore 12, Potter 15, C. Sylvester 16, Robertson 15, G. Sylvester 15, Iverson 16, Fish 12, Donohoe 17, Barney 15, Chevalier 11, Daniels 17, Mulier 10, W. Hanson 14, Hall 13, McConnell 14, Golcher 12.

The winners were: C. C. Nauman, 19 breaks, first money. Daniels and Donohoe, 17 breaks, second money. C. Sylvester and M. J. Iverson, 16 breaks, third money.

The Empire Gun Club opening shoot took place at the Alameda Point trap grounds last Sunday. A. J. Wehh was high gun in the club championship race, in the money match following the winners are noted below. Louis H. Allen was high gun in the special prize race. The best score in the Sweeney record medal race was made by R. C. Reed who ran 15 birds straight.

The conditions of this event are: Open to all. Entrance, 25 cents. 20 per cent of entrance money will go in side pool, and be divided 60 and 40 per cent. Winner of gold medal will not share in side pool. Birds extra, one cent each. This will be a handicap continuous break (miss and out) match. All contestants will start from the 16-yard mark, and for each five consecutive breaks will go back two yards until the 20-yard mark is reached, when doubles must be shot, and for each five pairs broken, shooter will be handicapped two yards, etc., until a bird is missed when contestant is privileged to again re-enter and start from the 16-yard mark as before. Not more than four entries will be received from any shooter in one day in this event. The medal becomes property of shooter with greatest number of consecutive breaks to his credit in this event made at any time during season. Second high gun takes 60 per cent of pool, and third high 40 per cent.

The average of shooting was excellent, special mention can be made of Dr. Clyde Payne's performance at his initial blue rock shoot when he shot into the first class, during the club championship shoot, thus placing himself in competition with A. J. Wehh in the match following.

The scores and handicaps in the regular events follow:

Event No. 1. Club champion race for 1904, 25 targets, entrance 75 cents, singles, 16 yards—

Webb, A. J.	11111 13011 1111 1111 1111 1111	24

A blue rock factory on the Coast would be a paying business. Millions of blue rocks are used at present by Coast trap shooters, and the demand is increasing annually.

The price, to local shooting clubs is about \$7.50 or \$7.25 per thousand, the price could be cut nearly in half and a profit left to manufacturer and dealer were the targets for home consumption made here.

The outlook for a lively trap season on the Coast this year is encouraging both to gun clubs and individual enthusiasts. A well known local sportsman outlines the prospective season, both for his own particular club and the general results, as follows:

"It is expected that a very large attendance of our members will assemble at the monthly club shoots, especially because of the great benefits that can be derived by always keeping in practice and striving to be better shots. All over the country interest in trap shooting is reported booming. In almost every instance clubs will use the flying targets, as with the coming of warm weather, live pigeon shooting from traps is almost entirely stopped. For that and other reasons, flying target shooting will become all the more popular. From reports in the East, 'Blue Rocks' made in Cleveland will be the most popular, with Magatrap to throw them. In the Middle West the 'Dickey Birds,' made of a tar composition, and the Markle Lead Works' target, the 'Blackbird,' will receive a small share of patronage. In the New England States the 'Blue Rock' target is the favorite, although a few clubs use the 'Huh' target, made at Wellington by O. R. Dickey. With the facilities for manufacturing these different brands of flying targets, the market is always filled and there is never a scarcity of birds. A great many different varieties of traps are offered to throw these targets and nearly every season brings forth some new invention in this line. Just now considerable money is being spent to advertise and we are told of the great wonders of various traps. An inspection of one machine, however, will show the same to be a very clumsy and awkward affair, operating much on the same principle of the old style spring traps, which have long since been shown the junk pile by the more energetic clubs and it is very doubtful if the new creation will work the wonders that are claimed for it. The Magatrap will undoubtedly still maintain the lead that it has so firmly held since its introduction.

From all appearances 1904 will have more trap shooting with flying targets than ever before. New clubs are springing up in all parts of the country and ammunition and gun factories never had such a demand for their goods. As the game shooting season is closed, the traps furnish the only means of keeping in practice with the shot gun and at the same time, allow a few hours of pleasant recreation. No form of sport has advanced in general interest and character as trap shooting at flying targets. The business man finds it a pleasant form of recreation, in which he can enter a competition of skill, free from the usual gambling element and his associates will be men of good character and respectability. Trap shooting, as conducted today by most gun clubs, is a gentleman's sport, offering a chance for the development in the art of wing shooting, affording a few hours relaxation from business cares and completely altering the channels of a professional man's thought. How many men, great in the world's battle, would be able to fight the harder if they spent but three or four hours once a week, or even fortnightly, in a hotly contested trap shooting match? There is no chance for office thoughts on a shooting ground. The constant crack of the guns, the steady call of the referee, the busy efforts of the equid hustler and the constant hum and excitement of a spirited contest, drives all else from one's mind. And who is not the better for it?"

Large Salmon Caught in the Straits.

Last Tuesday afternoon, Mr. G. W. Miller, of Tiburon, a well known striped bass angler of that picturesque water-side town, was out in his boat trolling for bass. He rowed round and about the Tiburon cove and whilst on a course midway in a direct line between the end of Belvedere island and the ferry slip, just on the edge of the bar running parallel to the straits channel he hooked on to a twenty-three pound quinnat salmon. The fish was fresh run from the ocean and put up quite a lively fight before Mr. Miller, who is well along in years, could gaff and get Mr. Salmon into his boat. The fish was taken on a No. 5 Wilson spoon.

Salmon have fairly often been taken by the bass fishermen whilst trolling in Raccoon straits and about or near the "fog hell" course at Angel Island. Some day, we believe, the "open sesame" for salmon trolling in these waters, when the fish are running, will be found and then there will be fun. It is argued that after the salmon leave the feeding waters, Monterey bay, etc., where the sardines upon which they feed are found, they stop feeding entirely and make a bee line for the spawning grounds. Many fish have been taken and examined at different points on the Sacramento and the further up, in brackish and fresh water, they have been taken, the smaller and more

shrunken were the fishes' stomachs. However that may be, in the clear green salt waters of the straits, about Sausalito and even in other sections of the bay many salmon have been caught on hook and line often enough to kindle a spark of hope in the bosom of many ardent anglers that the sport may eventually become as well developed as the fishing for striped bass is. Grilse, up to three and four pounds in weight are frequently caught at many points about the bay, the run of these young salmon generally begins in November.

Striped bass fishing in the straits and at Lake Merritt is enticing enough to coax out many anglers daily. Last Sunday Al Wilson took six fish, other anglers were equally lucky.

Unconstitutionality of Game Laws.

The game law of California makes it unlawful for any dealer to have in his possession fish or game of certain kinds during the closed season, whether taken in this or any other State. But a decision recently rendered in New York, by Supreme Court Justice Kellogg, declares a similar law of that State to be in violation of the constitution of the United States, because an interference with the property rights and liberty of the citizen. In this case an action was brought to recover penalties for having in possession and transporting brook trout out of season, which were brought from Canada.

Formerly the New York law containing the prohibition in question was decided by the Court of Appeals not to apply to fish or game imported from another State or from a foreign country but the Legislature added, in view of that decision, a provision making the statute applicable to imported fish or game. It is this latter provision which Justice Kellogg declares to be unconstitutional.

The principle of this decision should apply in California as well as in New York, although there have been, we understand, some decisions to the contrary. It has always seemed to *The Bee* that the Legislature, in undertaking to make it a crime to bring into the State during the close season fish or game from any other State, greatly exceeded its authority. Such a law seems to be a direct interference with interstate commerce, which by the constitution of the United States is under the sole control of Congress.—*Sacramento Bee*.

Our State game laws would be all right if we had a Society for the Suppression of Tinkers and Game Protection Fakers.

Capercailzie for British Columbia.

The sportsmen of Vancouver and Victoria, B. C., are much interested in the proposed introduction of the capercailzie to British Columbia, a country it is claimed that is peculiarly adapted to this member of the grouse family. The habitat of the bird is in Northern Europe, it was formerly plentiful in Scotland. After the "cock of the woods" was almost exterminated in Scotland, the species was, after considerable effort, re-introduced. The capercailzie is a game bird of fine flavor and is much extolled by those sportsmen who have had the good fortune to bag them.

Mr. Kenneth Roberts, a member of the Game Protection Association of Vancouver, is in receipt of a letter from Lord Breadalbane, who, with his predecessor in title, successfully re-introduced capercailzie into Scotland, says the *Victoria Colonist*. The letter received by Mr. Roberts is as follows:

"Taymouth Castle, Aherfeldy, Perthshire,
11th January, 1904.

Dear Sir:—In reply to your letter of the 7th December, with regard to the young capercailzie, etc., going out to Vancouver, I am afraid that there will be considerable difficulty in getting birds transported, and that it would be a very expensive undertaking.

When the capercailzie were imported into this country by my predecessor, and re-established in Scotland, I believe the first attempt was made with young birds and this utterly failed. Then the eggs were tried and this was successful. I last year sent out some eggs to the Canadian government, with instructions as to how they were to be treated, and also how the young birds were to be fed. This latter is a very difficult job, and my own keeper was the first to hand-rear capercailzie.

I believe the mode adopted when my predecessor imported the original eggs from Sweden was, that blackgame's nests were marked down, the eggs then taken out and the capercailzie eggs put in. The eggs were thus hatched by the grey hens.

I should say it would be better if there was a government department which could be induced to take up the importation of the capercailzie that it should do so, than if it be done by private enterprise. No doubt when the birds come to maturity, unless they are protected by some act, they will be shot, and therefore all the expense of the importation and rearing will go for nothing."

At the Oakland Revolver Club prize shoot, held in that city at No. 412 14th street, on Saturday March 5th, Mr. William Proll scored 48 out of a possible 50 at twenty yards—without rest—with a Remington target pistol shooting U. M. C. 22 short smokeless cartridges. This was the best score. The next highest score was made by Mr. J. F. Trego with a Smith & Wesson revolver, 46 out of 50, using a 32-20 U. M. C. smokeless cartridges.

A subscriber writes us that he desires to sell or trade a handsome oil painting beautifully framed. The subject is an artistically colored and life-like study of a pair of mallard ducks.

San Francisco Fly-Casting Club.

"Sport" in China.

The attendance at the second contests of the Fly-Casters at Stow lake was somewhat ahead of the same event last year. The Saturday work averages were better than the Sunday casting in the scores given below, for the reason that on the latter day a wind right in the teeth of the casters kept the long distance averages down, and worked against good scores in the other events as well. The lowest score in Sunday's long distance, made by Mr. Achilles Roos, who participated in the contests for the first time in many moons, was higher than some records that took prizes several years ago. This will illustrate the general excellency of the casting at the lake among the present class of casters.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

Coming Events.

Rod.

March 26—Saturday Contest No. 3. Classification Series, Stow lake, 2:30 P. M.

Mar. 27—Sunday Contest No. 4. Classification Series, Stow lake, 10 A. M.

April 1—Sept. 10. Oct. 16—Feb. 1—Open season for taking steelhead in tidewater.

Ap. 11—Nov. 1—Trout season open

July 1—Jan. 1—Open season for black bass.

Aug. 15—April 1—Open season for lobsters and crawfish.

Nov. 1—Sept. 1—Open season for crabs.

Sept. 1—May 1—Open season for shrimp.

Sept. 10—Oct. 16—Close season in tidewater for steelhead.

Nov. 15—Sept. 10—Season open for taking salmon above tide water.

Gun.

March 17—Golden Gate Gun Club. Blue rocks. Ingleside.

March 27—Millwood Gun Club. Blue rocks. Mill Valley.

April 3—California Wing Club. Live birds. Ingleside.

April 3—College City Gun Club. Blue rocks. North Berkeley.

April 10—Union Gun Club. Blue rocks. Ingleside.

April 10—Empire Gun Club. Blue rocks. Alameda Point.

May 23, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.

July 1—Feb. 15—Dove season open.

Nov. 1—July 15—Deer season closed.

Sept. 1—Feb. 15—Open season for mountain quail, grouse and sage hen.

Feb. 15—Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

March 14, 15—St. Louis Collie Club. St. Louis, Mo. J. A. Long, Secretary.

March 15, 18—Rochester Kennel Club. Rochester, N. Y. H. H. Kingston, Secretary.

March 22, 25—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.

March 28, 30—Brantford Kennel Club. Brantford, Can. C. J. Page, Secretary.

March 30, April 2—Vancouver Kennel Club. Vancouver, B. C. P. K. L.

March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.

April 7, 9—Victoria Kennel Club. Victoria, B. C. T. P. Mc Connell, Secretary.

April 13, 16—San Francisco Kennel Club. Eighth annual show. Macanthes Pavilion. J. L. Cunningham, Secretary-Treasurer.

April 13, 15—Seattle Kennel Club. Seattle, Wash. Charles McAllister, Secretary. P. K. L.

April 20, 22—Bay State Co-operative Bench Show. New Bedford, Mass. T. Middlebrook, Secretary.

April 21, 23—Portland Kennel Club. Portland, Or. T. E. Daniels, Secretary. P. K. L.

April 27—California Collie Club. Oak Grove, Lawrence, Santa Clara Co. P. K. L.

April 28, 29—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary. San Jose, Oal. P. K. L.

April —Los Angeles Kennel Club. A. K. C.

Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas. Lortimer, Superintendent.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.

It was early in 1901, that I found myself in command of the small post at R—with the knowledge too that my sojourn there would not be less than three or four months. It behoved me, therefore, to think how I was to amuse myself for the next few weeks in this abode of solitude, in which it had been my lot to be cast. As we were a long day's ride from the nearest station, I only sent in for my mail twice a week, so that I was not likely to be harried by much official correspondence. The place chosen for the detachment was an excellent one, being an old inn, with a walled enclosure, having two gates, the front one leading out into the main road, just outside one of the city gates, and the back entrance opening into the small river which ran through the city. Well I felt that it would be bad luck if I didn't get some sport out of the place, as I had my gun with some 100 odd cartridges, and my small rod with a slender stock of tackle. I soon discovered that the only game to shoot in the surrounding country were hares, and they were so exceeding wild, that I soon gave up hopes of getting even a shot at one.

There only remained the large flocks of pigeons, which in the early morning flew away to the fields, returning at evening to two large joss-houses, one at the North and the other at South gate of the city. At first I rather scorned to shoot these, but it was the scorn of ignorance, and after the first trial I was forced to own that the pigeons were quite clever enough to take care of themselves.

The best fun was to go at about four in the afternoon and take up a position on a small bridge that spanned the canal, in the centre square of the city, previously having sent two of my men accompanied by half a dozen Chinese volunteers to each of the two joss-houses. As soon as the pigeons came in from the fields, they settled on one or the other of the joss-houses, and the men would drive them off with stones and shouts, when they would usually make a bee-line for the other joss-house. Then came my chance and it was no easy shooting, as after the second time the pigeons grew wily, and flying high, showed an amazing aptitude, for keeping just out of range.

Still it was great fun, and I generally managed to bag one or two each journey, though after about six flights the pigeons would usually betake themselves off altogether to some joss-house in one of the surrounding villages. The Chinese took the greatest interest in the shooting and my appearance with a gun was the signal for enormous crowds to gather in the square. And they were a most cheery, even if a slightly odoriferous, crowd, and greeted a good shot with hoots of glee. They roared with laughter too, when after firing at an overhead bird the shot came pattering down on their bare craniums.

But the summit of their bliss was reached when a good fat pigeon would come plump on some respectable old gentleman's head; indeed, then their delight exceeded all bounds, particularly if the recipient of the bird resented its unceremonious appearance, though I must say that, as a rule, the victim when he had recovered his dazed wits, and picked the feathers out of his pigtail, entered into the joke as fully as anyone. I never had any bother either in retrieving the birds, the little boys in their thousands fell over one another in their frantic desire to earn the reward for each bird retrieved; said reward being the empty cartridge case, indeed, empty cartridge cases and empty sparklet bulbs were immensely prized both by adults as well as the children. In fact, I often saw some small urchin when retreating joyfully with his prize, fallen upon and robbed, after which howling vigorously he would dart back to where I was, and watch his opportunity to fall on and rob some smaller urchin.

Well, having exploited the shooting, I determined to try the fishing; this was more difficult, as the Chinese didn't seem to know whether or no there were any fish in the river, or how to catch them if there were. Spinning was out of the question as the water was too thick, and the fly I also discarded as useless, as never a rise was there to be seen on the river. But the humble worm is usually to be relied upon to catch something, if only the weeds at the bottom. So, after having got a tin of good fat worms procured for me, I embarked on my houseboat, said houseboat being an old barge which I'd got the river Mandarin to place at the disposal of the detachment, and which was kept tied up outside our back gate.

Having moored the boat at a convenient place, and adjusted my float, etc., I fixed my rod against the edge and sat down to await events. The river was only some fifteen yards broad, so that my boat blocked the whole channel, and soon large and interested crowds gathered on each bank, to watch this new and exhilarating form of sport. This style of fishing suited the Chinese, they loved to sit and watch the float. If nothing was caught, so much the better, there was no reason then for them to trouble about moving. Well, soon the float began to bob, and there was great excitement among the audience, amounting to positive enthusiasm when I struck, and landed a diminutive carp of about four ounces weight. A few more small fish, and a few abortive strikes, when the abrupt disappearance of the float, and a sudden wrench at the rod tip showed me that I was into something good. My tackle was too light to check the fish, so I lowered my tip a bit, and out rushed the line.

The audience now felt that they were really getting a run for their money, and the excitement rose apace. When all but five yards of my line were out, the fish at last came up, and for the first time I got a pull on him, winding him in steadily till he neared the boat, when again he dashed off, to the intense enjoyment of

the onlookers. Indeed so overcome by their feelings were the crowd that an old man must needs go and fall head foremost into the river, only to be saved from a watery grave by the prompt use of my improvised gaff. In the commotion caused by this incident my line suddenly came back to me slack, and I sadly realized that my big fish was gone, and with him one book and half a precious cast.

And to pour halm on my troubled spirit, the old man saw fit to hoard my boat to show me his nether garments, and ask what recompense I proposed making him for the damage done by the gaff. Luckily, I am possessed of an angelic temper, and he was basely removed by his friends before I could lay hands on any lethal weapon. Another hook on the end of my broken cast, as the water is so thick that a lot of gut appears unnecessary, and in goes my bait for one more try. After about two minutes I got another strike, and this time the fish takes out line slowly but steadily. I beck him and he makes for the bank, under which he apparently tries to burrow. A hasty dash by an energetic Chinaman, and a plunge into the shallow water under the bank, then loud cheers from the spectators inform me that something has been brought to bag this time, so laying down my rod and springing ashore I ran to see what I'd caught.

To my disgust it turns out to be an eel about two feet long, and I takes an exciting five minutes, with much expenditure of bad language from the young Chinaman, and merriment from the spectators, before the hook is got out of him, and then on my declining to take him to eat, his immediate captor stalks off with him in triumph, his progress lacking dignity, however, owing to the frequent escapes of the eel, who tries to wriggle away, with all the energy of which he is possessed.—*The Asian.*

Trade Notes.

Clabrough, Golcher & Co. announce that they have in connection with their business opened a factory for the manufacturing of uniforms of all kinds, such as base ball and foot ball, white duck pants, Khaki suits, riding pants, etc., band uniforms, and suits for political clubs. If interested send for samples and prices.

At the U. M. C. Coast depot, 86-88 First street, there is an interesting display of metallic and paper shells, hundreds of them in handsome show cases, of all the lines of small ammunition manufactured by the company.

The paper shells range from the smallest to the largest gauges in use and embrace everything the company has made from the earliest makes down to date.

The metallic cartridge collection both for rifle and pistol is complete in every respect. Here can be seen the modern, high power, smokeless powder cartridge for the heaviest sporting and target rifles and the old style black powder rim fire copper cased cartridges as well as an assortment of cartridges for shooting shot from rifles.

The display is a study in the progressive manufacture and design of small arm ammunition.

Billy did and Billy didn't—"Billy" Crosby and "Billy" Heer, the King Williams of the shooting world, shot a match at Vicksburg, Miss., February 28th, for the possession of the Schmelzer Cup, emblematic of the World's Flying Target Championship at reversed angles. "Billy" Crosby won by a score of 45 out of 50 to Heer's 40. "Billy" Crosby had a better load. He shot, as he always does, Winchester "Leader" shells, and "Billy" Heer didn't. Winchester shells are the shells the champions shoot, they are the shells that hold every world and American championship trophy at live birds and inanimate targets, namely: Schmelzer Cup, "E. C." Cup, Du Pont Cup, Hazard Cup and the famous Cast Iron Medal; they are the shells that were used by the members of the American team who did the best shooting while abroad; they are the shells that won the last two and biggest Grand American Handicaps at live birds; and they are the shells that won practically every important event at the traps in 1900, 1901, 1902 and 1903.

Fred Gilbert is easily champion for 1903, as may be demonstrated by the records. His averages at targets have been:

Gowrie, Ia., Jan. 20, 21	309	.966%
Pocahontas Ia., Jan. 27, 28	305	.964%
Redfield, Ia., Feb. 3, 4	320	.940%
Detroit, Mich., Feb. 10, 11 (21 yds)	330	.850%
Davenport, Ia., March 4, 5	400	.950%
Des Moines, Ia., April 2, 3 (20 yds)	400	.880%
St. Joseph, Mo., April 7, 8, 9 (22 yds)	600	.960%
Kansas City, Mo., April 14, 15, 16, 17	340	.944%
Concordia, Kansas, April 21, 22, 23	600	.968%
St. Louis, Mo., April 26	100	.990%
Natchez, Miss., May 8	125	.984%

THE FARM.

The Optimist.

There was once a man who smiled
Because the day was bright;
Because he slept at night;
Because God gave him sight
To gaze upon his child!
Because his little one
Could leap and laugh and run;
Because the distant sun
Smiled on the earth, he smiled.

He smiled because the sky
Was high above his head;
Because the rose was red;
Because the past was dead!
He never wondered why
The Lord had blundered so
That all things have to go
The wrong way here below
That overarching sky.

He tolled and still was glad
Because the air was free;
Because he loved, and she
That claimed his love and he
Shared all the joys they had!
Because the grasses grew,
Because the sweet winds blew;
Because that he could hew
And hammer, he was glad.

Because he lived he smiled
And did not look ahead
With bitterness or dread,
But nightly sought his bed
As calmly as a child!
And people called him mad
For being always glad
With such things as he had
And shook their heads and smiled.

—E. S. Kiser, in *Implement Age*.

Some Things I Have Learned.

Paper read before the State Dairymen's Association by J. A. Harris of Shickley, Neb.

First—That the dairy business can not be learned in one day, one month or one year, even if one does read all he can about the business. Reading about the dairy and running the dairy are two different things. There are things we must practice before we can learn them. Milking is one of these things. We become experts only by actual practice. One that can start and milk a steady gait will have better results than the one that milks fast, then slow, then fast again. We must learn to milk a steady gait and as fast as it is possible for us to keep it up until the cow is milked dry.

Feeding is another thing we must experience before we can feed successfully. The amount each cow wants and the quantity she wants, we must learn by actual practice.

Second—It is impossible, or almost so, to buy a No. 1 dairy cow. She is seldom if ever for sale, and if she is for sale a friend or neighbor will get her. We can not tell the value of a dairy cow until we have milked her through one period of lactation, and used the scales and tester in determining the quantity and quality of her milk. She may have a perfectly shaped body and udder, and yet be defective in some way. She may have the salt-milking habit, be a kicker, be brucy or hold her milk and not let it down as she should or have some other habit that would make her an unprofitable cow.

The safest way is to raise the dairy herd by careful selection of dam and sire, and by using only the very best milk strain to be had.

Third—A cow will fail to yield to her owner a profit on an empty stomach, or when she has shady side of a barbed wire fence for shelter. She must be satisfied with both feed and shelter for twenty-four hours a day, seven days in a week and fifty-two weeks in a year in order to be profitable. Comfort means profit with a cow. If she is satisfied, she will not need an iron yoke or a crotch of a cottonwood limb to keep her from going through the fence.

Fourth—By keeping a record of both quantity and quality of each cow's milk I have learned that better care and feeding will produce better cows. The time it takes to do this amounts to but very

little and will detect the robbers in the herd.

Fifth—I have learned in the past season that my cows running in the pasture would fall off gradually for four or five weeks. Then, after a good shower they would go back to their former yield per day. If I had supplied them with feed during that time my profit would have been greater.

Sixth—It pays to get a good dairy breed. They are generally of a kinder disposition and when you feed a dairy cow she will show it in the milk part, and not in the laying on of flesh. With the beef breed it is just the reverse.

Seventh—It pays better to run a dairy without a dog; the cows are quieter. A dog that nips their heels will cause kicky cows. The moment one touches the cow's leg while milking she will kick, thinking the dog is after her. I used to think it was impossible to get along without a dog to drive the cows, but since we have been without one the cows are much quieter and do not offer to kick. I have no fault to find with a dog for stock cattle.

Eighth—It pays to keep the cows and also the stable clean by having a floor of some kind and a gutter six or eight inches wide behind the cows. It is then an easy matter to keep the cows and stable clean. The barn should be cleaned both morning and night. The heifer calf that is kept in a clean and dry place till she becomes a cow will not lay in filth if she can help it. Also, if a heifer calf is provided with clean water and not allowed to drink out of a mud puddle it will be hard to get her to drink filthy water. I have five Jersey cows and one heifer that were kept and raised in a pasture that had only a mud puddle for them to drink out of and after I got them they would drink out of a mud puddle before they would drink out of a tank. None of the other cows would do this.

Ninth—By feeding the cows after milking, the milk will not have any disagreeable odor from the feed we may give them. In my part of the country we are bothered very much with wild onions or garlic in the pastures, and for a few weeks in the spring we can hardly use either milk or butter. But when we take the cows off the pasture three or four hours before milking the smell of the onions cannot be detected in the butter or milk.

Tenth—Sugar beets and sugar beet leaves or tops may be very good feed, but must be fed carefully or they will cause the milk to have a peculiar smell. They should not be fed heavily if cows are kept in a barn all the time on account of the strange odor they cause. Tops make much better feed if cured, but if fed very heavy it will take a long time to churn the cream.

Eleventh—I have learned that a calf given alfalfa hay as soon as it will eat it will make a better calf than if fed any other roughness I have ever fed. I have raised as good calves on separator milk, oil cake and alfalfa hay as can be raised running with the cow. Oil cake and alfalfa hay are cheaper than butter fat.

Twelfth—I have learned that it will take years to build up a very good dairy herd and that we must be very careful in breeding or purchasing our herd. My plan in starting out would be to purchase good heifers, just a little before they become fresh. By careful selection and care one can build up a good herd in a few years.

Thirteenth—I have learned a great deal in the past years, no doubt, only what others in the dairy business have learned years ago. I expect to learn a great deal more if I stay in the business. I intend to stay at it, too. I find that it requires our attention every day. We have no days off. We do not have to wait till the end of the year for a harvest. It comes every day. It is a very good teacher to teach one to attend strictly to business. When we are working by the month or day and stop, our pay stops, too. We would lay off a great many days if we could make the dairy pay and lay off too.

In the dairy business, if we neglect our work for one day we do not only suffer loss that day, but for days to come. I find it is a very good business for one that has a family growing up. One can teach the children to be industrious and helpful. I have learned that I cannot tell the boys to go and do this, but when I am with the boys and say come, let's do this or that thing, we can accomplish something. My wife and I expect to have a day off once in a while by and by, and know that the work will not be neglected. It is an occupation that is healthful because you have the pure articles for food, pure milk, pure butter and good veal and plenty of exercise. These will make the doctors wish they had a few cows to milk. It beats all the drug establishments in the world for health. Neither do we need the drugs to keep the pure article sweet. We draw it fresh every twelve hours. What better do you want for you and your family?

The air in the milk room, unlike that in the living room, does not require to be constantly or even frequently changed, and it exerts a better influence if left undisturbed, especially in warm weather. Milk rooms should therefore be only ventilated from above, and one opening is generally sufficient for all purposes. A quantity of water or ice upon the floor exerts a cooling influence just in proportion to the evaporation produced by the current of air, but it is not desirable to cool one portion of air and at once drive it off to be replaced by another drier and warmer portion. The moisture of the air in the milk room is not in any respect unfavorable to the production of cream and butter.

The cheesy taste in butter is largely due to the imperfect cleansing of the butter from the buttermilk. If the churning is stopped when the butter is in small grains and before it is collected in a compact mass and the buttermilk is then drawn off from the churn and water poured in and changed until it is no longer colored by the buttermilk and the butter is then salted and mixed, so as to get rid of all excess of water above that which is needed to keep moist enough to dissolve the salt, there will be no cheesy taste.

One advantage of a good creamery in a neighborhood is an improvement in the quality of the cows kept by the patrons. It provides an outlet for all the milk that can be produced in the section. It also encourages the keeping of all of the cows that the ranches can carry and also increasing the number as they improve. This means more manure, more feed and richness and more productive farms.

Beets or beet tops should always be fed immediately after milking but not before. If fed within two or three hours of milking time disagreeable odors in the milk and butter will result and the same may be said of many other feeds. If fed in large quantities in the barn beets have a bad effect on the atmosphere which will taint the milk unless the place is well cleaned and aired after feeding.

Hay tea is an excellent preparation for calves and is prepared by running alfalfa through a feed mill, filling a pail full of the cut hay, pouring water upon it and allowing it to steep for twelve hours. If some bran or a little cottonseed meal is stirred in, an excellent gruel results. This can take the place of milk after the calf is a month or two old and some people are using it as a substitute for whole milk.

An important decision has been made by the Federal court at Salt Lake City, in which it is held that the wool of mortgaged sheep must not be sold. This is contrary to a decision handed down a few years ago, in which it was held that the wool from mortgaged sheep might be sold prior to the maturing of the debt.

Sheep Benefit Pastures.

We are convinced that the addition of five or six head of sheep for each cow will tend to increase the productiveness of a very weedy pasture, nearly if not quite to the extent of the amount consumed by the sheep. After a few years when the weeds have been exterminated, the relative number of cows may be increased, but of course the proportion of cows to sheep, as well as the total amount of stock that can be profitably kept upon a given area, will depend upon the nature of the soil and the vegetation, the locality, the climatic conditions, and so forth.

We will not attempt to lay down any hard and fast rule as to how many sheep should be kept upon any farm, but we are firmly of the opinion that some sheep could be profitably kept upon nearly all farms in the state. They will not only serve to keep the pasture free from weeds, but they will also prove excellent scavengers for clearing up the stubble fields after harvest and the odd corners on the farm. And, moreover, they will yield a handsome profit on the investment, as well as providing the most wholesome kind of fresh meat for the farmer's family whenever it is desired.

A mistake often made by farmers who start in with a small flock of sheep to act as scavengers is to buy anything that anyone may choose to call a sheep, bas a little wool on its back and will eat weeds, and then to treat them as meanly as their appearance seems to deserve. This does not pay. Good blood, individual merit and good care are as necessary for profitable sheep raising as with any other kind of stock.

Buy a few good, pure bred, registered sheep of anyone of half dozen of the standard breeds, treat them right, and they will do the handsome thing by you. They will earn their keep during the summer by destroying weeds, but they must have good care and feed during the winter. Where a considerable number of sheep are required and pure breeds cannot be obtained at satisfactory prices, good grades ewes will do, but nothing but registered rams of high individual merit should ever be used.

Such a flock of sheep of appropriate size will in a few years exterminate the weeds and greatly improve the grass of any good native pasture. Top dressing with manure and sowing blue grass upon the bare spots will also be found beneficial. If however, the native grasses are too badly run out, it may pay better to break the sod up, crop it for two or three years, and then seed it down again.—*South Dakota Bulletin*.

Jackson's Nana Soda untangles the feet.

Gombault's Caustic Balsam

The Great French
Veterinary Remedy.

A Safe, Speedy and Positive cure
for ailments of

HORSES and CATTLE.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Breeding Beef Cattle.

"When we consider that a first class beef animal has about 35 per cent of his dressed weight in the three cuts along the back known as ribs, porterhouse and sirloin, and that these three cuts represent about 55 per cent of the value of the entire carcass, we see how important it is that we should have a correct knowledge of what constitutes a good animal. The hair, hide and handling qualities are important, not so much for what they are as for what they indicate. With a good, thick, mossy coat of long, soft hair, growing out of a hide not too thick, and yet not too thin or papery; a hide that you can gather up in handfuls and find it pliable and soft, and at the same time elastic in its touch; overlaying a depth of firm, yet not hard flesh, you have almost invariably a good doer and feeder.

"We would emphasize once more the great importance of selection. One animal will feed at a loss, another barely pay for food and care, while still another will return a large margin of profit. Do not be tempted to sell your best heifers because some enterprising breeder offers you a few dollars more than market value for them. Select the choicest for the purpose of improving the standard of your herd, and you will soon find that you are on the right track. If the selection of the female breeding stock is important, the selection of the sires is of incomparably greater importance. The old saying that the bull is one-half the herd is as true and forcible as ever. It is a short-sighted and ruinous policy to use anything but high class sires. The Dominion of Canada is losing millions annually by using inferior sires in the breeding of farm stock. By the continuous use of high class sires almost any herd in the land may be brought up to a high standard of excellence. Show me the breeders throughout our dominion that have gained eminence as breeders and I will show you men that have been very discriminating in the class of sires they used.

"While good blood, wise selection and careful breeding is necessary to success, they must be associated with good management, good care and intelligent feeding. It is rather difficult to say much along this line when cattle are kept entirely under range conditions. One thing essential to success would be to keep the bulls separated from the herd until such time as to have the calves come in the spring when grass would be nicely started and danger of heavy storms well past, allowing the calves to run with their dams, say up to the latter part of September or early in October, when they should be placed in a field by themselves, where they could have access to abundant water and plenty of good pasture, or the choicest of hay. This should be supplemented by a little oatmeal or whole oats and pulped roots. Whole roots, such as mangels or sugar beets, make excellent food for young calves at weaning time.

"I believe the question of profit and loss in the breeding of cattle depends largely on how the calves are handled from weaning time until reaching grass the following spring. The object should be to retain as far as possible the calf flesh, and keep them moving right along. Succeeding in this, we are well advanced towards success; failing in this, we lose about a year's growth." — Andrew Graham in *Farmer's Advocate*.

The best remedy for scours in calves is not to have it. Begin with the cow. If she is a persistent milker, that is one that will give milk ten months, some milk naturally remains in the udder all the time. Milk the cow dry and see to it that no milk is left in the udder, for this is often a source of poison to the calf. If a calf is attacked when young it is probably from that source and it might as well be killed for it will never amount to anything. Never take a calf away from a cow until it has had the first milk for the

cow is healthy it is necessary to the health of the calf. Then do not wean it too soon. Feed from a clean pail and scours will not come on. When a calf is afflicted a good remedy is the white of eggs, but it is all in the feeding. If this is carefully done no trouble will occur. Keep things clean around the premises and use a little hulled judgment.

The cow is naturally a poor walker. Generally she walks only when she must. She never walks or runs for exercise. Sometimes she frolics, but only for a few moments. The dairy cow's business is eating, dozing and chewing her cud. Any cow that is compelled to travel over the parched and short-cropped pasture day and night in search of the straggling, crisp and browned blades of grass cannot be expected to return even a small profit. A few armfuls of succulent, luscious green corn will help amazingly to keep up the milk flow. It makes June conditions in September.

The Department of Agriculture has set as a standard of milk, "that it must contain not less than 8 per cent of milk fat, 8 per cent of solids not fats, which have an equivalent of not more than 2.10 per cent of lactic acid.

Many object to the taste of scalded milk. If heated to about 150 degrees and kept there for thirty minutes, it will be pasteurized. If then cooled rapidly the scalded taste will scarcely be discovered.

Good digestion is the result of feeding enough to sustain the animal, but not enough to keep the stomach in an overloaded condition all the time.

Under what may be termed average conditions one bushel of corn is worth nearly three bushels of oats as food for fattening hogs.

A man may be a number one breeder and still have poor success bringing his stock to the attention of the public and selling it.

INFORMATION BUREAU

613 Market Street, San Francisco

SAFETY IMPREGNATOR OUTFIT

A practical, durable, and easily used Impregnating Outfit, with which you can get in for a lot of money you breed, and greatly increase the income from your stallion. GUARANTEED to give satisfaction. A necessity in every breeding stable. Write for descriptive circular. Price of Impregnator, \$5.00. Outfit, complete, \$7.50. I. O. CRITTENDEN, 2 FOX BLDG., ELIZABETH, O.

The ability to obtain high prices for fowls depends very much upon one's locality. The early bird catches the prize. High-priced chickens are those which are out of season. As soon as every one has them, no difference how fine they are, they will be cheap. This is true, also, where there is no market. If one expects to deal in fancy-priced fowls he must be near the place where he expects to dispose of them, otherwise the express will need to be deducted from his price.

A healthy flock at the commencement of the breeding season is an important item, and in securing this much depends upon the treatment given to cleanliness in the quarters; pure water and wholesome, nutritious food are important items in maintaining good health.

Judging from the reports of cows injured by being stepped upon, the plan of tying them in stalls, unseparated, is not a good plan. There should be a partition between them.

Milk can be kept cool by filling a box with four or five inches of clean coarse salt. Keep the salt damp and set the milk on the salt, or have the box so arranged that salt may be all around the milk vessel.

One is hardly prepared for the news that since the building of the new railway more than \$10,000,000 worth of hutter is being shipped annually from Siberia.

The average crop of wheat removes from the soil 658 pounds of nitrogen, while the orchard producing a crop of apples removes 900 pounds.

Young calves do best if left with their mothers for the first twenty-four hours and then turned to the mother three times a day for the first week.

With pigs it is of more importance that the dams be more mature than the sires, yet a full grown sire is preferable.

BIG AUCTION SALE AT PLEASANTON

SATURDAY, APRIL 2, 1904.

THERE ARE ALREADY CONSIGNED ABOUT
FIFTY HEAD OF TROTTERS AND PACERS AND FOURTEEN
SHETLAND PONIES.

All the great horses at the famous Pleasanton track will be worked out in the forenoon, money prizes being given for fast quarters and halves.
SALE WILL TAKE PLACE IN THE AFTERNOON.

J. C. BRAY, Manager.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the **FINEST IN THE WORLD**.

The EMPIRE PARLOR—the PALM ROOM, furnished in Corise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

NEERNUT 19810

Record 2:12 (Sixth Heat) 2:14
Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:08 1/4 to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 11333 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana.

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

PACING DIVISION—\$700 to First Horse, \$200 to Second Horse, \$100 to Third Horse.

CHARTER OAK PARK, HARTFORD, CONN., offers the above purse for Colts, Fillies and Geldings (foals of 1904). The produce of mares nominated to be trotted and paced in 1907. Rules of the National Trotting Association (of which this Association is a member) to govern. Color and sex of foal must be given on date of second payment, November 1, 1904, and name and gait of entry must be given with last payment, March 1, 1907. Owners must notify Secretary by 7 o'clock of night before race of their intention to start, or they will be declared out of the race. In making entries the name, color, and breeding of each mare, and the name of the stallion to which she was bred in 1903, must be given.

MAIL ENTRIES ON OR BEFORE MARCH 28, 1904, TO

E. M. STALKER, SECRETARY,

MADISON SQUARE GARDEN
NEW YORK.

NO SUBSTITUTION IN ANY EVENT.
NO ENTRY LIABLE FOR MORE THAN AMOUNT PAID IN.

New Correspondence Course Meets Success.

BERKELEY, March 11—Responses from twenty different localities in different parts of the State demonstrate the instant success of the proposed correspondence offered by the Department of University Extension in Agriculture at the University of California. Already a domestic science club has been formed at Don Palos with twenty members. This is the first correspondence club formed under the new plan, and it has the distinction of being the first women's club of the kind in the State.

By means of the correspondence course outlined by the college officials these women in outlying farming districts will be enabled to get the latest and best thought in domestic and household science. Standard works on the values of food dieting in sickness and health, the care and feeding of children, home-making from a sanitary and an ornamental standpoint, and allied topics will be read in club session, and these volumes will be supplemented by a large number of bulletins from experiment stations and from the United States Department of Agriculture. Furthermore, the club will be assisted in its studies by frequent visits from members of the University staff, particularly Miss Meta Woodworth, special lecturer in domestic sciences, and Professor Myer E. Jaffa, the expert on agricultural chemistry and dietetics.

Although the course in domestic science is proving extremely popular, a large demand has come in to Superintendent Warren T. Clarke of the extension department from all sections for instruction in the other three courses offered—general horticulture, animal industries and economic entomology. The districts asking for enrollment in the correspondence school include Shasta, Los Angeles, Santa Cruz, Santa Clara, San Bernardino, Sonoma, Napa, San Joaquin, Alameda, San Francisco, Fresno, Mendocino and Yuba counties. As other communities take an interest in the movement they will be given the opportunity to choose other courses. The University of California is the only institution west of Illinois that has such an agricultural correspondence course. Cornell's admirable system is the model which the Berkeley scientists are following.

Profitable Cows.

There is a certain type of cow exhibiting marks that indicate dairy excellence. This is so well established as to make the decisions in the show ring and to enter in as an important factor in the buying and selling of dairy animals. This matter of type is illustrated in our station herd the tendency being for the animals scoring highest in the judging ring to be the largest and most economical producers of milk and butter. The animal scoring the highest in the station herd has made a

yield of ten times her weight in butter in one year. Taking the whole herd into consideration the type will not always follow the yield, the exceptions to the rule being sometimes quite marked.

Bogdanow, a German authority, made measurements on 80 cows whereby they were formed into groups of types. From the results, knowing the records of the animals, he concludes that there is an unmistakable relation between external form and production of milk and butter. Beach, from the result of experiments and observation states that the type of the cow is more essential than the breed as indicating the ability to produce milk and butter economically.

The final test of any dairy cow is the amount of milk and butter fat she will yield for the food consumed. The difference in cows in this respect is quite marked. With the scales and the Babcock test it is easy to learn what each individual cow is doing. While some animals in the dairy may be making profits others may be losing to such an extent as to even wipe out the profits of the better cows. During the year under experiment our best cow gave an amount of milk and butter more than twice that of one of the poorer cows. The difference in the gross receipts for the milk during the first eight months following calving were \$84.80 in favor of the better cow. Waters and Hees found a difference of \$33.10 in the profits of two cows for 150 days. Between two others of accepted dairy form the difference was \$14.99, and between two of similar type \$12.48.—D. W. May, State College, Ky.

Dairy Notes.

A really good dairy cow will earn an annual sum equal to her entire value.

To have of the best quality, butter should be consumed within two weeks after it is made.

Butter color may give color to butter, but it cannot give flavor or quality or disguise defects.

In the dairy cow we want milk and only milk, as it is out of the milk that the profit must come.

The cheesy taste in butter is wholly due to imperfect cleaning of the buttermilk in the butter.

One reason why the butter is long in coming is because the cream is churned at too low temperature.

No care, feeding or forcing can make a heifer that naturally gives poor milk give rich milk abundant in solids.

The aim should be not only to develop the flow of milk, but this flow should always be limited by the quality.

Fine made, high flavored butter does not have long keeping properties and must be consumed soon after being made.

To a considerable extent the young sow proves her future ability by the way she manages her first litter.

Upland for Hogs.

For the greatest success with hogs a dry, elevated winter protection is absolutely necessary. Hogs suffer from dampness much more than they do from cold. Dampness and unsuitable feed is responsible for much of so-called hog cholera. Hogs and fruit trees do better on high ground. A steep hillside, sloping to the south is of great value to the herd in winter. With a location of this kind and alfalfa or clover hay and roots for winter feed, disease is seldom known.

In addition to the immunity from disease the cost of wintering is much reduced. A ton of alfalfa or good clover is worth as much as a ton of bran for hogs. Farmers in the corn belt often make the statement that hogs cannot be made profitable without plenty of corn. But the experience of those on high altitudes where corn does not succeed well, is that other feeds may be made to take the place of corn and the profits increased at the same time.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

FIFTY HEAD

—OF—

Pure Shorthorn Cattle AT AUCTION

24 BULLS, coming 2 years, 26 HEIFERS, 2 and 3 year olds (heifers bred to Imp Master Walton 159,856). Property of Walnut Grove Herd Shorthorns, Brookfield, Mo., Sam. J. Maddox Prop. Sale takes place at 11 a m.

FRIDAY, APRIL 15, 1904,

At State Fair Grounds,
SACRAMENTO.

Send to FRED. H. CHASE & CO., 1732 Market St., San Francisco, for Catalogues.

THE GREATEST SALE OF THE SEASON Auction Sale of FIFTY HEAD of PERCHERON HORSES

These horses were carefully selected by one of the greatest breeders of Norman Percheron horses in California, WILLIAM BROCKMAN, Susanville, Lassen County, and consist of pure-bred Mares and Geldings, weighing from 1800 to 1900. At the same time will be sold one great Trotter and one beautiful Carriage Horse. This is the grandest lot of all-purpose horses ever brought to San Francisco. All are nicely halter broke and a great many of them broke to harness. They are all fat and ready to go right to work. A careful inspection of this lot is earnestly requested. To be sold on

MONDAY EVENING, MARCH 21, 1904.

At 7:45 o'clock, at SALEYARD, 1732 Market St., cor. Van Ness Ave.

Write for Catalogues. Horses at yard March 17th.

FRED. H. CHASE & CO., Livestock Auctioneers.

Quinn's Ointment

Will Make A Horse Dyer;

will put sound legs under him and will save him from the cheap hawk and trader. It is the standard cure for Spavins, Curbs, Splints, Windpuffs and all the various lumps and bunions of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail.

Write for circulars, testimonials, etc.

GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1904

FEE - - - \$75

Reductions made for two or more mares.

Manager, WALTER SEALY.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility assumed for accidents or escapes. Prompt and careful attention in all cases. Pasture furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the breeding season of 1904, either pacers or trotters. Must be three to start and race to come off on Hollister track, Fair week, 1907 (Exact date to be hereafter announced) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 38 1/2 seconds, a 2:33 gait. This colt has great promise. DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grand sire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightening, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Bred to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Doty Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venus (dam of Adonis 2:11 1/4, Leah 2:24 1/4, Cupid 2:18 and Juvo, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27 1/4, sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasture, \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15 1/4

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By **PIEDMONT 904** (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.); dam **LULANEER** (dam of Limonero 2:15 1/4, Bion 2:19 1/4) by Electinnee 1:35.

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and horses and big class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a big class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shyluck 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:30)

1st dam BELLE Mc (dam of Worthwood (1) 2:59 and Silver Bee (2) 2:27½) by Ensign Goldust Jr.

2d dam LITTLE BELLE (grand-dam of 2 in list) by Belmont (sire of Nutwood 2:18¾ and 88 more in 2:30).

3d dam Thoroughbred Mare by Imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crescens 1:59¾, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:32. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

PETIGRU 2:10¹/₂

Son of Klogward by Onward (sire of 11 in 2:10) and Lemonade (dam of Bessie Wilton 2:09¹/₂). PETIGRU 2:10¹/₂, Lady Wilton winning race of six heats. His dam's for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. FEE \$50.

CORONADO 2:18¹/₄

By the great McKinney 2:11¹/₄ (sire of 8 in 2:10 and 27 in 2:15); dam Johanna Treat (three-year-old trial 2:17) by Thos Rysdyk; second dam by Venture, sire of dams of Directum 2:05¹/₄ and Sidney Dillon (sire of Lou Dillon 1:58¹/₄, world's champion trotter). CORONADO is one of the handsomest of the sons of McKinney. He won five races out of seven starts. FEE \$40.

SILVER COIN 2:11¹/₄

(Record made as a three-year-old in a winning race of six heats against a good horse. Sired by the great Steinway (sire of 4 in 2:10); dam, the fast mare Jenny Mac 2:09 by McKinney 2:11¹/₄. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual. FEE \$40.

Send for card containing tabulated pedigrees and full particulars of above Stallions. Address
W. G. DUFEE,
Box 96, University P. O., Los Angeles, Cal.

MONTESOL

(TRIAL 2:24)

Full Brother to Lady Grannard 2:23 (trial 2:13)

MONTESOL, 6 years old, stands 15¹/₂ hands, weighs about 1125 pounds: Is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcyon. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege.

POLE STAR

The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address

Sire McKinney 2:11¹/₄ (only sire of five 2:10 trotters), Sire of 8 in 2:10, 27 in 2:15 and 57 in the 2:30 list.
Dam IGO (registered) by Antevolo 2:19; 2d dam Daisy May by Nutwood 600; 3d dam Ralston Mare by Alexander's Abdallah.
4 years old, by McKINNEY, dam MOUNTAIN HARE by Young Venture; 2d dam Rose Clark by Nigger Baby; 3d dam by imp. Trustee. Will be permitted to serve 10 approved mares at \$40 for season.
P. FOLEY Race Track, Alameda.

SEYMOUR WILKES

REG. NO. 0232.
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12¹/₄ and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmate; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

Alta Vela

22449
RECORD 2:11¹/₄

SON OF THE GREAT ELECTIONEER 125

(Sire of Arlon (4) 2:07¹/₄, Sunol 2:08¹/₄, Palo Alto 2:08¹/₄, Alta Vela 2:11¹/₄, and 9 more in the 2:15 list, etc.). Dam LORITA 2:18¹/₄ by Piedmont 904; second dam Lady Lowell (dam of Ladywell 2:16¹/₄, Loretta 2:18¹/₄, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16¹/₄.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FRELLSON,
Race Track, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17¹/₄, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years); Black Jack 2:28¹/₄ (trial 2:22); The Boquet (4 y. o. trial 2:17¹/₄); Majella 2:29 (4 y. o. trial 2:13¹/₄). Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Fidella (dam of Fidette 2:38¹/₄, dam of Mary Celeste 2:17¹/₄) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancet, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08¹/₄, James L. 2:09¹/₄, Edith 2:10, etc.); dam Woodflower (dam of Saylex 2:15¹/₄) by Ansel 2:20, son of Electioneer second dam Mayflower 2:30¹/₄ (dam of Manzanita 2:16, Wildflower (2) 2:21 and 8 producing daughters) by St. Clair 16675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM.
Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

 No. 3—\$5000—ELECTRIC CITY (3 heats).....2:11 Class

- No. 4—\$1000—THE INTRODUCTION, for Three-Year-Olds (2 heats)
 No. 5—\$2000—IROQUOIS HOTEL.....2:14 Class
 No. 6—\$5000—EMPIRE STATE.....2:08 Class

—CONDITIONS.—

ENTRANCE FEE, five per cent. Nothing additional from money winners.

ENTRIES to the above events close April 7th when horses must be named, first payment accompanying the entry.

PURSES Numbers 1 and 4 for three-year-olds will end at the conclusion of the second heat.

IN PURSES NUMBERS 2, 3, 5 and 6 the race will end at the conclusion of the third heat.

TEN PER CENT of each purse will be reserved for the horse standing best in the summary at the end of race. In case of a tie the horse winning the fastest heat will receive the extra ten per cent.

AFTER DEDUCTING the ten per cent from the purse, the balance of the purse will be divided into three equal amounts.

EACH HEAT will constitute a race.

THE MONEY DIVISION will be 60 per cent to horse winning the heat; 25 per cent to the horse finishing second, and 15 per cent to the horse finishing third.

As an illustration:—In the \$5000—2:11 trot, \$500 will be set aside as noted above to the horse standing best in the summary at the conclusion of the third heat. This will leave \$1500 to be contested for in each of the three heats. The horse winning the heat will by getting 60 per cent receive \$900, the horse finishing second will receive \$375, the horse coming third \$225. This makes it possible for nine horses to win money in the event, and also makes it possible for one horse to win \$3200 out of the \$5000 purse.

NO LIABILITY for entries beyond the amount paid in if the secretary is notified in writing on or before the time next payment falls due.

BUT NO ENTRY will be declared out unless the amount is paid in full to date.

MEMBERS of the National Trotting Association and its rules will govern, excepting hoppers will not be harred.

RIGHTS RESERVED to declare off and refund first payment in any class if it does not fill satisfactorily.

NOMINATORS may name two horses in a class and the same will be carried as one entry until the date of last payment, when starter must be named.

FORFEITS due April 7th, May 7th, June 7th, July 7th and July 28th in amounts as follows: Classes numbers 1 and 4, \$10 will be due on each of the dates named. In classes numbers 2 and 5, \$20 will be due on the dates named. In classes numbers 3 and 6, \$50 will be due on the dates named.

For information and Entry Blanks address the Secretary, 505 Mooney-Brisbane Building, Buffalo, New York. (Horse World Office.)
 Make all drafts or money orders payable to order of Secretary.
 W. P. TAYLOR, President.

C. R. BENTLEY, Secretary and Treasurer.

---------------	-----------------------------

ADDITIONAL STAKES AND PURSES for two-year-old trotters and pacers are being asked for by the small breeders all over the State. One of our patrons, Mr. Geo. L. Warlow of Fresno, makes this demand the subject of a very interesting communication which appears in another part of this paper. Mr. Warlow wants the BREEDER AND SPORTSMAN to keep up an agitation in favor of more two-year-old purses and stakes in California, and suggests to the small breeders that they join in the demand. There is no doubt but colt racing arouses more interest in the breeding and racing of trotters and pacers than anything else, especially local stakes, where the colts bred in a county or district meet in speed contests on local tracks. But we think the thing most needed just now in this State is more meetings. We are fully alive to the fact that the cutting off of State aid to the district fairs has so discouraged the directors of those organizations that they do not feel like arranging for fairs that will cost them considerable money out of their pockets. But there is nothing to prevent the breeders and others interested forming clubs and advertising race meetings as Pleasanton has done. Fresno, for instance, has one of the best appointed tracks on the Pacific Coast, and it is owned by the county. Fresno is quite a breeding centre and some of the best and fastest trotters and pacers ever bred in California were foaled there. Fresno should have a harness racing association which should hold a meeting this year. There is not a particle of doubt but such a meeting would pay, and would not cost the organization giving the same one cent. Three or four enterprising and energetic men could attend to the entire arrangements. There are a half dozen other towns where such meetings would also be successful. Stockton, San Jose, Woodland, Napa and many more we might mention could give meetings with but little effort that would not only afford the horse owners opportunity to race, but would attract many people to their towns and prove financially profitable. At all these meetings colt stakes and purses could be given and would doubtless be very

popular with owners as well as the public. It is the trotting horse breeders and owners who must get together and organize associations to give these meetings. There is no use waiting for the district fair boards to get together again, and we actually believe it would be better for the trotting horse breeders if they should cut loose from the fairs and hold harness meetings without the fair adjunct. The P. C. T. H. B. A. holds profitable meetings each year without any State appropriation, one was given by Mr. Tom Smith at Vallejo last year that also paid a profit, and Pleasanton will have a surplus after its meeting this year to a certainty. What Pleasanton can do, can also be done in Fresno, Stockton, San Jose and many other places. Get the meetings and the colt races will be given.

Answers to Correspondents.

SUBSCRIBER, Phoenix, Ar.—Please give breeding of the stallion Boxwood by Nutwood. Is he standard and if so give number. Has he a record?

Answer—Boxwood is by Nutwood 600, and his dam is Belle Patterson by Williamson's Belmont, grandam by Hiatoga 497, and great grandam by Grey Eagle. He is not registered. His record is 2:35 3/4.

R. L. T., Stockton.—Please inform me if there are two horses named Monaco that have sired horses called Monte Carlo?

Answer—Yes. The Palo Alto bred horse Mendocino by Electioneer is the sire of Monte Carlo 2:07 1/4 and was first called Monaco. He took a record of 2:19 1/4 under that name. When it came to registering him it was found the name Monaco had already been taken so he was registered as Mendocino. The late A. J. Alexander of Spring Station, Kentucky, bred a horse that he called Monaco and registered him by that name, the number being 1862. He was by Belmont 64. This horse is the sire of Monte Carlo 2429.

C. S. St. Helena.—Will you in your valuable paper publish the extended pedigree and performances, as well as age of chestnut stallion Goldheater.

Answer—Goldheater is a chestnut horse, foaled 1896. He was bred by Burns & Waterhouse. His sire is imp. Goldfinch, first dam Elsie S. by imp. Glenelg, second dam Myriad by imp. King Ban, third dam Myra by Marion, fourth dam Florac by imported Mickey Free, fifth dam Dixie by imp. Sovereign. He started once as a four year old, carried 101 pounds in a five furlong race and was outside the money. As a five year old he started three times. In February that year he carried 115 pounds in a six furlong race and finished sixth. His next start was in March in a selling race. He carried 118 pounds and finished second. The time was 1:02 and the track fast. A few days later he carried 113 pounds in a selling race at seven furlongs. He was eighth at the finish. The time was 1:29 1/4. He has not started since.

A. G. H., Red Bluff.—Can you give me the breeding of Gen. Reno 4764.

Answer—Gen. Reno was by Tyler's Black Hawk, son of Gen. Stark. His dam's breeding is unknown.

ENQUIRER, San Jose.—Does Adhell still hold the yearling trotting record, and where was it made?

Answer—Yes; Adhell's record of 2:23 is still the world's trotting record for yearlings. It was made at the San Jose track, September 27, 1894.

P. M. L., Davisville.—Please publish rules for laying out a mile track. Also give breeding of the roan horse Copperbottom.

Answer.—For a mile track draw a line through an oblong center 440 yards in length, setting a stake at each end. Then draw a line on either side of the first line, exactly parallel with and 417 feet and 2 inches from it, setting a stake at either end of them. You will then have an oblong square 440 yards long and 834 feet and 4 inches wide. At each end of these three lines set stakes. Now fasten a cord or wire 417 feet and 2 inches long to the center stake of your parallelogram and describe a half circle, driving stakes as often as you wish to set a fence post. When the circle is made at both ends of your parallelogram you will have two straight sides and two half circles, which, measured three feet from the fence will be exactly a mile. The turns should be thrown up an inch and an eighth to the foot.

We have no record of the breeding of the California horse mentioned. The Kentucky Copperbottom, known as old Old Copperbottom, was a roan pacer foaled about 1820. He was got by Brutus, a son of the Canadian horse Copperbottom, and his dam was a fine saddle mare called Snip by Pitt's Ball, son of imp. Royalist, grandam by Celer. His progeny were nearly all pacers.

Indica by Nutwood 2:18 1/4, dam Iona 2:17 1/4 by Alecyone, second dam Jessie Pepper by Mambrino Chief, is in foal to McKinney 2:11 1/4.

Meets the Approval of Horse Owners.

The announcement of Secretary Snyder that the Detroit Driving Club had decided to abandon the substitution clause which has been a part of the \$10,000 Merchants & Manufacturers' Stake for 2:24 class trotters and the \$5000 Chamber of Commerce Stake for 2:25 class pacers for so many years, has met the approval of horsemen in general. All agree it is a step in the right direction. The feeling among the majority of horsemen is, that they are benefited more than the club by the change. A certain trainer who is wintering a number of horses at one of the southern tracks expressed the views of his fellow horsemen in the following language: We had quite a debate over the abandoning of the substitution clause in the M. & M. and C. of C. and all agreed it was a good idea and at least favored the horsemen more than it did the association.

Driftwood (C. R. Bentley) wrote recently on the change: No one will get a chance to bet \$250 this year that he can pick a horse by July 1st, that can beat anything named by some other owner when the M. & M. entries close April 1st. The Detroit Association has taken a step in the right direction. Let every man's chance be equal with that of the other fellow. In these words Mr. Bentley, whose experience is second to no one's who has followed the light harness interest, embodies exactly the sentiment of every fair minded owner or trainer. The present conditions of both the M. & M. and C. of C. offer to the poor owner who has a good horse an equal chance with the rich, and to the trainer with but one horse an equal chance to the trainer with a large stable to select from. Everybody is placed on an equal basis. Should a poor owner's entry develop form which appeared suspicious to the remainder of the field, he is in a good position to sell his horse for a high price to some wealthy man who seeks the honor attached to winning either event, more than the value of the purse. It is to every owner's advantage to name his horse in either event to which he is eligible, if the animal has shown during the previous season's work that he possessed any quality at all. It costs but \$50 to name your horse and but \$100 to carry him in the M. & M. up to the date of the third payment, June 23, and but \$25 to name in the C. of C. and but \$50 to carry him to the date of third payment, June 24. By the new innovation, the small breeders are the beneficiaries, and should appreciate the advantage which the change will give them. Speed developed just before the opening of the season cannot be taken advantage of any more through the purchase of entries and the result will be the harring of every horse on which the payments have not been made from the time the stakes close. It will make the event slower, perhaps, but it will certainly bring out more inspiring competition, and it would not be surprising to see it won some year in 2:15 or even slower. It gives the man with the small stable a much better chance, and should bring a lot more horses to face the starter.

The easy payments in the early closing purses, the 2:09 and 2:17 pacing and 2:12 trotting, are equally as liberal. The entries to all the events close April 1st, when horses must be named. Address W. J. Snyder, Secretary, Room 19, Campau Building, Detroit, Mich.

Seattle and Portland.

There are to be two great running meetings at Seattle and Portland this year, and a hundred thousand dollars will be given in stakes and purses. The Seattle meeting will open at The Meadows, the beautiful new track there, on July 11th and continue until August 6th. The Portland meeting is to be at the popular Irvington track, will open August 8th and close on the 27th of the same month. There are ten rich stakes for the Seattle meeting and six for the one at Portland. Entries to the stakes for both places will close Saturday April 24, one week from today. Mr. A. T. Van De Vanter is Secretary at Seattle and Mr. L. H. Adams Secretary at Portland. All the particulars of these stakes will be found on page 9 of this issue of the BREEDER AND SPORTSMAN

To Mature Colts Quickly.

For many years I have had great success in maturing colts and preparing them for the market. I feed grain to any colt when in its fourth month, but I invariably feed Manhattan Stock Food mixed in with the oats. This not only assists in digesting the grain food, but it also expels the pin worms and prevents scouring and colic. It is the greatest and surest cure for colic I have ever used on colts, mares and horses. I consider it such a grand remedy for cramps in the stomach that I use it on my own person when flatulence and pains in the stomach are present.

Yours very truly, JAMES O'NEILL

W. S. Frazier, Sr., ex-Mayor of Aurora, Ill., and senior member of W. S. Frazier & Co., died at his home in Aurora, on Thursday, March 3d. Mr. Frazier was the founder of the above firm, whose manufactory of sulkies, carts, etc., is one of the largest in the world. He was interested also in the breeding of trotting horses, and met with very fair success.

JOTTINGS.

BUDD DOBLE when at the San Jose track one day last week, concluded that the shoes on his great trotting stallion Kinney Lou 2:07½ needed re-setting and instructed his man to take the horse up town and have the work attended to. Kinney Lou within the last few weeks has been growing wider and bigger in every way, and at the same time feeling so good that he has been getting playful and full of life. During all his campaign on the Grand Circuit last year Kinney Lou was never a good feeling horse, and even the day he made his record showed the effects of the catarrhal fever from which he suffered so severely. When he came back to California Kinney Lou looked badly, his eyes were dull and his coat rough and dead. It has only been in the last two months that the son of McKinney began to show that he is getting back into shape again and he is now a different looking horse. In fact, his condition is such that he acts like a colt, and as the weather has prevented much exercise being given him, Mr. Doble was particularly anxious for fear the horse might get too playful and injure himself while on the way to the shoeing shop. So he cautioned his man again and again about being careful, and then left to attend to some business up town before he took the train for San Francisco. On the train he met Mr. James Butler of New York, who had been out to the San Jose track after Doble left and had seen the man leading Kinney Lou to the blacksmith.

"I saw your stallion being led up the street," he said to Doble, "and he was simply raising Cain. He is doubtless feeling as well as he looks."

Doble admitted that the horse was in condition, but told me afterwards that he worried a good deal for fear something had happened him until he learned that the trip to the shoeing shop and return was made in safety. "Kinney Lou is improving so much, and putting on so much good hard flesh and muscle that I am not going to work on him as soon as I expected to, and I have concluded to allow him to remain in the stud another month and not close his season until the 1st of June, instead of the 1st of May as I originally advertised. I have come to the conclusion now that his sickness last year was a good deal more severe than I thought it was at the time, and the fact that the horse is filling out and looking so well convinces me that it is better not to begin training him again for a few months. If I should not race him this year it will probably be all the better for him, and one year off the track will not hurt him. I can afford to wait a year as Kinney Lou is not an old horse and (here the great reinsman smiled while his eyes twinkled) I am not an old man. So you can say that Kinney Lou will be in the stud at San Jose until the 1st of June."

I received a letter from Mr. Geo. A. Davis of Ranchodel Valle, Pleasanton, last Monday, and the following is an extract therefrom:

"I notice in this week's BREEDER AND SPORTSMAN an item that Ed Parker is training my sorrel mare San Lucas Maid. This is an error I am anxious to correct for the reason that Parker is under salary to Mr. J. B. Iverson of Salinas and is not training any outside horses, except that, through the courtesy of Mr. Iverson, Parker is handling for me the filly Reina Directum (Rey Direct-Stemwinder). In regard to San Lucas Maid I am doing the training myself and from the showing the mare is making, I am encouraged to think some of the money of the purses she is entered in, will be coming her way."

I am glad to print the above and congratulate Mr. Davis on having such a good one to train as San Lucas Maid. Some of the boys from up Pleasanton way have been telling me that San Lucas Maid is a coming 2:08 mare sure. I hope so, and that Mr. Davis can find time to do much of her training. There should be more owners able to handle their own horses and to find time to give them some of their work. Ask James Butler of New York, or Col. J. C. Kirkpatrick of this city if there is any pleasure or recreation to be found in working a trotter or pacer. Both these gentlemen have business affairs that would make too great a load for some men to carry. Mr. Butler owns over a hundred grocery stores in New York and Brooklyn besides being interested heavily in many big enterprises of different characters. The cares of business are trying. They tire the mind and body as well. They consume the energy and vitality, but work with the horses builds up and restores. Mr. Butler would not enjoy such rugged health were it not for the pleasure and recreation he gets out of his trotters and pacers. Col. Kirkpatrick is one of the busiest business men in San Francisco. He manages the immense Sharon estate, which the Palace Hotel is but a small part. He is a Harbor Commissioner and attends strictly to the duties of that office which require much time and

thought. He is active in all sorts of enterprises, and his political party friends are always after him for advice and making demands upon his time. He keeps his head cool and is always good natured, however, and the cause of it is out-of-door life with the trotters. He rarely misses a drive through the park and down the speedway in the afternoon. He visits Pleasanton one or two days in each week and while there drives his own horses, although he employs one of the most competent trainers at the track. He has built a handsome hangar close to the Pleasanton track where he can entertain his friends and takes much delight in acting the host to Eastern visitors and showing them the delights of California climate and the speed of California horses. It is this outdoor life a part of the week that enables Col. Kirkpatrick to expend so much energy and thought on business the remainder of the time. Mr. Butler and Col. Kirkpatrick and hundreds of other business men in this country find their work with the horses a healthful nerve tonic that keeps the brain clear and the muscles strong, and leaves no bad effect. A celebrated physician of New York, the late Dr. Hammond, once remarked that horseback riding and road driving never caused a case of dyspepsia, but that they have cured many.

There is nothing that would help trotting interests on this Coast as much as the organization of a circuit. The haphazard plan of racing that has prevailed since the appropriations for district fairs aroused the rapacity of the politicians must be changed if there is to be a real and genuine revival of harness racing all over the Coast. We have some pretty good racing in California every year, thanks to the Pacific Coast Trotting Horse Breeders Association and a few other organizations that hold meetings, but a circuit is needed so that owners and trainers can have some certainty as to where and when they can race during the summer months. There was at one time a regular circuit of fairs in California with racing programs, but times and conditions have changed and there is nothing to be gained by harping on "the good old days." There is not a horseman in California that can make any money or have any sport out of the races that were held years ago. It is the races to come off this year and next that are interesting him. There are some of the best tracks in the whole country here in California and the public will patronize good racing held on them. A circuit of a half dozen meetings could be arranged with very little labor that would put twice as many horses into training each year as are now worked in this State. Los Angeles, Fresno, Stockton, San Jose, Pleasanton, Santa Rosa, Woodland and Sacramento all have good tracks that are used almost exclusively for the training of trotters and pacers and good crowds can be drawn in those places for well conducted meetings. But organization is absolutely necessary to the success of a circuit. There must be a unity of action in the arranging of dates and conditions of stakes just as there is on the Grand Circuit over east. No circuit will ever be a success where dates are picked out without regard to the date of any other meeting, and where purses and classes have no more relationship than exists between the conditions of a pony race in Japan and a chicken fight in Mexico. The managers of these trotting tracks should meet together in January each year, arrange a circuit, select and announce dates and advertise early closing stakes and purses. There is no reason why harness racing should be dependent upon a district fair appropriation. While it is true that it has been the custom in this State to hold harness meetings in connection with the district fairs, it is none the less true that the races have drawn four-fifths of the gate receipts and had to shoulder the blame for all the deficiencies and had management. It is time that harness horse breeders, owners and trainers branched out for themselves. They are perfectly able to paddle their own canoe.

Among the mares hooked to the great Joe Patchen 2:01½ this year I notice the name of Altacora 2:13, daughter of Altamont and the great broodmare Tecora. A foal that "can pace your eye out" should result from this union. Joe Patchen is himself one of the greatest pacing stallions ever foaled and sire of the champion Dan Patch 1:56½. Tecora was a wonderful broodmare, and the dam of eight in the list, four of which are 2:15 performers, and two in the 2:10 list—Chehalis 2:04½ and Del Norte 2:08. Chehalis and Del Norte are both producers, and two of Tecora's daughters have also produced standard speed. When Altacora's colt makes its appearance next year it will have a speed inheritance that should put it in the 2:10 list by the time it is two years old. Its sire has two minute speed and has a son that has held a much faster rate of speed for a full mile. Altacora has paced many quarters in 30 seconds, and her sire and dam have each produced several foals that have two minute speed. According to the rule

which says "Breed to the winners and record holders" Altacora's prospective foal should be a wonder, but it will not be a very surprising thing if it is beaten by some colt by an unmarked sire and out of a mare that can't pace fast enough to keep warm. These things do happen in the breeding business and it is the glorious uncertainty of what will happen that makes it so fascinating.

In reading the letters sent over to the daily press by their war correspondents from Japan I have noticed statements made by three different writers that the Japanese cavalry is poorly mounted and the little brown men are particularly awkward horsemen. This being a correct tip play Russia to win even though you have to give odds. The Japs have shown themselves to be good sailors as is natural, and their navy has been handled well. Their infantry is said by the military experts to be particularly well drilled and very effective, but if they are short on cavalry and poor horsemen they will be "up against it" when actual warfare begins on land. The Russians are born horsemen and the nation of Russia owns more horses than any other nation in the world. The Cossack warriors have a world wide reputation for daring horsemanship and when summer opens and actual fighting begins they will be able to move quickly in large bodies and transport their munitions of war without much trouble. When the English started in to whip a few Boers in South Africa, they found to their sorrow that the followers of Oom Paul all knew how to ride and had good mounts. There were about six Englishmen in the field to one Boer, but they had a mighty hard time to conquer the Dutchmen until they secured many thousand horses and mules from the United States and mounted their troops. For centuries the horse has been the main factor in the wars of nations and any people who are not horsemen are seriously handicapped when fighting against people that are. The Japs have no cavalry to speak of and consequently they will not be able to conquer a race of centaurs like the Russians. The horse is so necessary to making a good fight as gunpowder and modern guns.

Do It Now!

Enter your mare in the Hartford Futurity.

Only a \$5 nomination fee for a \$10,000 purse, with \$7,500 to the winner.

The Hartford Futurity is for foals of 1904, to start in 1907, with no substitution, and the Association forfeits all right to sell any nomination, or substitute after March 28, 1904.

Futurity events enhance the value of the progeny.

At the Old Glory sale, three yearlings nominated in the Hartford Futurity were sold for \$1000 each.

It is a matter of history that Sadie Mc., last year's winner of the Hartford Futurity, sold for \$20,000 immediately after the race. Remember—No entry is liable for more than the amount paid in and that entries close with E. M. Stelker, Secretary, Madison Square Garden, N. Y., March 28th.

Imported Jacks and Stallions to Be Sold.

A letter received by the BREEDER AND SPORTSMAN from Mr. W. L. DeClow, of Cedar Rapids, states that his big importation of jacks and stallions landed at Cedar Rapids March 15th, and are being put in shape for the sale which is to be held April 5th. This is Mr. DeClow's first importation this year and his fourth since a year ago last December. In this consignment there are three carloads of Catalans and Majorcas jacks and two carloads of Belgian stallions direct from Antwerp. A large number of first-class Percherons expressly imported for the demands of the American market will also be offered. Any person who needs a jack or a draft stallion cannot afford to miss this sale. See advertisement.

Ashland Park Stock Farm, for thirty-five years one of the most famous of Kentucky studs, ceased to exist as a breeding establishment March 1st, and the historic old place will be leased for a tobacco farm. The farm first came into prominence early in the seventies, when it was leased by W. L. & Z. E. Simmons, who had just brought on from New York stallions George Wilkes and Honest Allen, and it was at Ashland Park that these two sires achieved their early fame, remaining there until 1877, when they were transferred to Ash Grove. In 1877 Ashland Park was leased by the late B. J. Treacy, and for nearly twenty years he bred trotters with much success, and so improved the farm in the way of new stabling, fencing, tracks and paddocks that it was considered the most perfect establishment of its kind in America, and in the heyday of its glory thousands of people visited it every year. After Mr. Treacy's death Ashland Park was leased successively by Miller & Gihley, C. W. Williams and Charles Marvin. The farm is owned by R. Wickliffe Preston, son of the late Gen. William Preston, and its passing was decided on by him, as he has retired from the horse business. The stables will be used as tobacco barns.

Two Stories of War Horses.

James F. Lyon of the First Wisconsin Cavalry, told this story about a good horse in battle—a story which General O. H. LaGrange of that regiment, now Governor of the National Home for Soldiers in California, confirms:

"We had in our company a young German named Schultz. His horse was his especial pride. Sometimes Schultz went to sleep without rations, but his horse never. No matter how scarce or how hard it was to get forage, the young German's horse always had an evening feed, a thorough rubbing-down, a loving pat and a 'Good-night, Frank,' in two languages—broken English and German. Many a time have I seen Schultz skirmish for a lunch for his horse when we halted to make coffee, instead of preparing his own lunch. While the rest of us stayed in our tents and read or played cards, Schultz would keep Frank's company for hours, sometimes talking German to him and sometimes English. Some of our horses showed lack of care; Frank showed overcare; was always in good order; in camp he glistened like a new plug hat, and seemed as fond of his master as his master of him. When the Atlanta campaign opened in May 1864, there was not a prouder soldier or a prettier horse than Schultz and Frank in the First.

"Our first fight of note in that campaign was at Varnell's Station, May 9th. Somebody—never mind who—made a mess of it. First Cavalry Division, consisting of the Second and Fourth Indiana and the First Wisconsin, commanded by Colonel O. H. LaGrange, was thrown against General Joe Wheeler's entire command, and we fought it all day. We started to charge, but were halted in a piece of woods and were ordered to fight on foot. We were already under fire and in considerable confusion, and only a portion of the command heard the order, so it happened that some fought as cavalry and some as infantry. Schultz remained mounted, and did heroic service.

Early in the fight his pet was shot. As the animal made but little fuss over it and steadied down quickly, his rider thought it was only a slight wound and remained in battle all day, having traveled many miles in the performance of important and dangerous tasks, the wounded animal seeming to enter into the spirit of the work as completely as his master. That night, at nine o'clock, the brigade camped. The moment Frank was unsaddled, he laid down. Schultz thought it was because the horse, like himself was tired, and after patting him and telling him in both languages what a splendid fellow he had been that day, and thanking him for carrying him safely through one of the hottest battles, he busied himself with supper-getting. In the forage bag were several extra ears of corn. After his own repast of black crackers and uncooked white pork, such a banquet as many a soldier has been more thankful for than he was for the feast of last Thanksgiving. Schultz shelled the corn and took it to Frank. The horse did not welcome him as usual; did not rest his head on his master's shoulder and look, if he did not speak, thanks for such a master. He didn't hear Schultz announce in German that he was coming with a double ration. Frank was dead and stiffening, showing that soon after lying down life had departed.

"When Schultz realized that his pet was dead he threw the corn down, dropped by the side of the animal, tenderly laid one hand on his neck, and with the other gently rubbed his head, as he had done many times before, and sobbed like a child. In talking about his loss the next day he said:

"My poor Frank could not tell me he was badly hurt and ask to go to the hospital, as I would have done had I been shot. He carried me all day as if he thought it was his duty, and that things would go wrong if he didn't, and when the battle was over and I was getting supper he lay down and died. That horse was a better soldier than I am—than any man in the regiment. Not one of us would have fought all day with such a hurt as that. No one would have expected it of us, yet I expected it of Frank, and he did not fail me. I shall never think as much of anything again as long as I live." With this outburst the poor fellow broke down again, and none of his comrades made light of the young German's sorrow; they knew it was sincere."

That was a story about a good horse and a good soldier. Now let me tell you about one of the trials of a good soldier with a bad horse. The late General John A. Kellogg, who fought his way from Lieutenant of a company to commander of a brigade, fought a magnificent roan a few days before General Grant began the closing campaign. It was a high-spirited creature, tall, powerfully built and speedy. Kellogg was greatly pleased with his new possession. His staff had to do a great deal of fast riding for a week before the closing scenes of the great contest began. The General seemed to want everyone in the Fifth

corps to see his handsome roan, so he rode from camp to camp making social calls, his staff, made up largely of new riders, bobbing and jolting behind him. There was not a man of Kellogg's military family but regretted the birth of that roan. He was jolting their young lives away.

The day of reckoning came at the battle of Gravelly Run, or, as some call it, White Oak Road, March 31, 1865. Kellogg massed his brigade in a piece of woods. About 10 o'clock it became necessary to move quickly to a better position and get into line of battle for immediate business, for a division of the other folks was coming that way practicing on their famous "Yell" song. Just as the brigade was in line, and almost before it had got its beating heart well under foot, the enemy poured a vast sheet of lead at us. "Stand fast, men; hold your ground!" commanded Kellogg, from his roan. Then came another volley. That, with the roar and the rattle of the Union guns, was too much for the roan. He bounded into the air and seemed to turn around, facing the rear, before he struck the ground. In spite of Kellogg's weight on the bits and his frantic "whoas," the roan "limbered" to the rear at a greater speed than he had ever traveled while churning the staff into a side ache. Away they dashed, horse and rider, and at a most critical time. It was a hot fight, and no time for the General to limber to the rear. Just as the Chief of Staff ordered an orderly to go to the General's rescue and give him a safe horse, I saw Kellogg slide down to the tail of the flying roan and start on a dead run for the line of battle. The hot comments General Kellogg made on his roan that and the next day would make a thick book wholly unfit for family and church use.

It is due to the equine population to say that it was a very uncommon thing for a horse to try to get away from a battle. A thousand men longingly looked for a chance to "limber" to the rear and "cool coffee" during a fight where one horse even tried to escape bullets. The man reasoned and the horse didn't. Most horses in battle, unless wounded, were as unconcerned, apparently, as if they had been pulling plows or reapers. The man in battle who was as unconcerned as one holding a plow or driving a reaper was a fool. Men who say they were as happy and contented in a battle as while at home on the farm or eating a Christmas dinner lie. Such a thing is impossible, unless, as stated, the man is a fool; and fools didn't enlist.—*Exchange.*

The Trotting Standard.

We have received so many letters of inquiry recently asking if certain horses were eligible to registration that the publication of the rules of the trotting standard at the present time will not be amiss.

When an animal meets these requirements and is duly registered it shall be accepted as a standard-bred trotter:

1. The progeny of a registered standard trotting horse and a registered standard trotting mare.

2. A stallion sired by a registered standard trotting horse, provided his dam and grandam were sired by registered standard trotting horses, and he himself has a trotting record of 2:30 and is the sire of three trotters with records of 2:30, from different mares.

3. A mare whose sire is a registered standard trotting horse, and whose dam and grandam were sired by registered standard trotting horses, provided she herself has a trotting record of 2:30 or is the dam of one trotter with a record of 2:30.

4. A mare sired by a registered standard trotting horse, provided she is the dam of two trotters with records of 2:30.

5. A mare sired by a registered standard trotting horse, provided her first, second, and third dams are each sired by a registered standard trotting horse.

THE PACING STANDARD.

When an animal meets the following requirements and is duly registered it shall be accepted as a standard-bred pacer:

1—The progeny of a registered standard pacing horse and a registered standard pacing mare.

2—A stallion sired by a registered standard pacing horse, provided his dam and grandam were sired by registered standard pacing horses, and he himself has a pacing record of 2:25, and is the sire of three pacers with records of 2:25 from different mares.

3—A mare whose sire is a registered standard pacing horse and whose dam and grandam were sired by registered standard pacing horses, provided she herself has a pacing record of 2:25, or is the dam of one pacer with a record of 2:25.

4—A mare sired by a registered standard pacing horse, provided she is the dam of two pacers with records of 2:25.

5—A mare sired by a registered standard pacing horse, provided her first, second, and third dams are each sired by a registered standard pacing horse.

6—The progeny of a registered standard trotting horse out of a registered standard pacing mare, or of a registered standard pacing horse out of a registered standard trotting mare.

Strike!—If they don't give you Jackson's Napa Soda when you ask for it.

Smathers on the Wind Shield.

E. E. Smathers on his return from Europe had the following to say to a New York reporter about wind fields and Major Delmar:

"There seems to be a great difference of opinion as to how much a horse gains by trotting in the wake of a runner instead of breasting the wind for himself," said Mr. Smathers, "and I mean to put the matter to a fair test by starting Major Delmar with and without the front runner. Nobody in the world wants to know worse than I do just how much advantage there is in the new scheme we tried for the first time last summer. If the Major cannot beat 2:0.½ without a runner to break the natural resistance of the atmosphere for him then I will have to admit that he is not as fast as Cresceus. Of course, I do not give any consideration to that alleged mile in 1:59½, which was claimed for Cresceus at Wichita, Kan., last fall. The mark we shall try to beat is 2:02½."

"What are your plans for Major Delmar this year?" Mr. Smathers was asked.

"There is nothing for him to do except to trot against the records I suppose," was the reply. "But I mean to give him a better opportunity than he had last year. I have instructed his trainer, Alta McDonald, to go slow with him and to give him no miles faster than 2:10 over that Albany track, which is a very good one for slow work, but too loose for fast work. When it comes to starting him in public we shall not make much use of him as we did last year. By that I mean he will not be asked to trot two exhibitions a week on widely separated tracks, as he did on several occasions last season. Why, at the Empire track, in September, he made two attempts in two days to beat the record and trotted the last mile in 2:00. All this was too much for him. He became jaded and tbin, and was not at his best at the close of the season."

"From your own observations last year at how many seconds do you estimate the advantage of driving a trotter in the wake of a runner?"

"Two or three seconds at least, Mr. Smathers answered. "I came to this conclusion when I saw old Prince Alert pace in 1:59, cutting three seconds off his record in one day at the Empire track. And this opinion was confirmed at the Memphis meeting, where Onward Silver and Darrel and a lot of other horses made performances altogether beyond their true form."

"What do you think of the ruling of the Board of Presidents, which places all records made by the aid of runners in front in a class by themselves?"

"I think it was the right thing to do. I have no complaint to make. As I saw before, if my horse cannot trot faster than Cresceus has trotted, without any aid from the runner, I am not going to claim that he is faster than Cresceus."

Matinee Racing at Phoenix, Arizona.

Phoenix, Arizona, is getting to be quite a matinee town and a thousand people turned out there March 17th to see the races under auspices of the Phoenix Driving Club. The officers of the day were Cbas. Eikel, Tbos. McGinnis and C. A. Smith, judges; the timers were Ezra Thayer and A. H. Davidson; W. N. Tiffany did the starting, assisted by F. E. Viles, and Cbas. McCoy acted as marshal.

Seven races were decided during the afternoon. The first race was won by M. McAlister's trotting mare Wench, her best time being 2:36½. The second race was for pacers and went to Mr. J. K. Wheats' gelding Bystander by Zolock. He won in straight heats and the best time was 2:30½. The third race was also a pacing event and went to Mr. J. C. Adams' bay mare May Boydello by Boydello 2:14½. The mare smashed the track record in the third heat, taking a mark of 2:18½. Mr. G. V. Klotzbach's sorrel horse Cobre Grande won the first heat of this race in 2:26. Mr. Adams drove another daughter of Boydello to victory in the next race which was a mile dash for trotters. He landed the filly Lady Boydello first at the wire in 3:07½. This filly is a two-year-old and a trotter. The fifth race was also a trotting event. Mayor Bennett's black gelding Tom by Durango Chief was the winner, after Arizona Bess owned by W. M. Mayers had taken the first heat. The time was good—2:25, 2:26½ and 2:24.

Mr. G. V. Klotzbach won the sixth race with B. B. Packard in straight heats, best time 2:40. The seventh and last race was a mile dash. A. F. Moosan's bay mare Nellie Briggs by Brignoll was the winner in 3:01½.

The directors of the driving club are so well pleased with the result of Thursday's meeting that they are planning to have three other matinees during the next few months. The first will be about April 12th. There will be another on May day and this will be followed by a third meeting Decoration day.

Purses and Stakes Desired for Colts.

FRESNO, CAL., March 24, 1904.

ED. BREEDER AND SPORTSMAN:—I wish you would try through your paper to induce racing associations to offer purses for two and three-year-olds, so as to encourage the training of colts. The only two-year-old race to be trotted in 1904 in California that I know of is the Breeders Futurity Stake No. 2 for foals of mares bred in 1901. The Stanford, Occident and Special Stallion stakes are all to be trotted by colts when three years old. So far, only the Pleasanton Association has made or intimated that it would make a race for three-year-olds outside the stakes which are all futurities.

It does not pay to work a two-year-old for one race, taking the average chances that one cannot win any part of the money. By the number of three-year-olds entered at Pleasanton I judge there are a goodly number in training and some of the other associations should make purse races for three-year-olds. In fact each and every association giving harness races should offer purses of this character as they are frequently as good contests as they have at the meetings. And there certainly should be more than one race given in the whole State for two-year-olds. If there are none given, there is no encouragement for working foals of this age and if not worked at two years you can depend on there being slow time made by the three year olds in their stake engagements. This has been one reason why California for the last few years has had no crack three-year-olds, judging by the time made.

The reason the east has had so many three-year-olds to obtain low records in recent years is because all the associations make races for two-year-olds and they are trained and raced, and are able to earn something toward paying the expenses incurred in their training.

California is fast losing its prestige for sensationally fast two and three-year-old records, since the dispersals of the large breeding farms have taken them out of breeding and racing. If this condition of affairs continues long, eastern buyers will cease looking to California for young trotting bred stock. The small breeder cannot afford to train colts when no races are offered for them, and the producing of California bred trotters and pacers is now almost entirely dependent upon the small breeder. Nearly all of the large breeding establishments of which California was so justly proud have passed out of existence, and her reputation in the future must depend on the small breeder, unless the wealthy men should again join their ranks which is not very likely.

The work of inducing racing associations to offer colt stakes must be taken up by every small breeder of trotting horses, and we must keep up a continuous firing all along the line until every association will have a two-year-old and a three-year-old purse or stake race at its annual meeting. I trust you will make frequent reference to this subject in your paper and get the associations back to colt raising. If this is not done great loss will result to the breeders of trotting horses in California. Yours truly,

GEO. L. WARLOW.

Good Purses at Tulare.

TULARE, Mar. 22, 1904.

BREEDER AND SPORTSMAN—I thought I would drop you a line to let you know that we had a meeting here the other evening and decided to hold a three days' race meeting the first part of next October, or the week before the Los Angeles meeting, if one is held at that place. We will give five colt stakes and five purses for aged horses. The latter will probably be for the following classes:

2:17 pace, \$1000; 2:24 trot, \$1000; 2:28 pace, \$500; 2:18 trot, \$500; 2:10 pace, \$500.

I was in Fresno last week and I found a good many horsemen that have made no entry for any of the meetings thus far for the reason that they will wait till later and take their chances in buying a substitution. I think if the associations would charge the full amount of the entrance for substitutions, they would have received larger lists of entries.

I am working on our program and may have it completed in time for publication next week.

Yours truly, W. F. INGWERSON.

Back Numbers Wanted.

To complete a file we need one copy of the BREEDER AND SPORTSMAN of April 24, 1897 and one of February 5, 1898.

Any one who can furnish us with either one or both of these back numbers will confer a favor and be paid for them, by sending them to this office.

BREEDER AND SPORTSMAN.

Jackson's Napa Soda does not tangle the feet.

Sally Benton and Her Last Foal.

On the front page of this issue are photo engravings of the grand old mare Sallie Benton and her yearling colt by Mendocino taken a few weeks ago at Palo Alto Farm. Sallie Benton is now twenty-four years old and as she did not get in foal last year, has probably passed the years of usefulness. She is one of the small band of old mares that will be kept at the farm until death carries them off. Her companion, Beautiful Bells, whose death was recently chronicled was the last one to pass away, but the "Old Lady's Home" will soon be empty as the old matrons are getting fewer each year. Sally Benton has been a great broodmare. As a four-year-old she took a record of 2:17½. In 1887 when she was seven, she was mated with Electioneer and produced the gray colt Commerce which died. The next foal was by the same horse and was a filly called Starlight, that took a record of 2:15½ and was sold. Her next foal died and as Electioneer died that year she was bred to Electricity and produced the brown colt Edison. Her next foal was Nordica by Advertiser that took a three-year-old record of 2:19½ and was a stake winner. Bred to Electricity again she produced the gray colt Serpol that was sold in the east and took a record of 2:10. Her daughter Serpolita by Mendocino trotted to a record of 2:25½ as a three-year-old. Besides these she produced to Advertiser, Whips, Mendocino and Adbell, and several of these are expected to take records this year on eastern tracks.

Sally Benton's last foal by Mendocino is, as the picture shows, a very handsome yearling. He is a big brown colt, and the best looking of last year's crop of colts at Palo Alto farm. He was purchased when a few weeks old by Mr. Henry Hahn of this city, who recently placed him in the hands of the well known trainer John Phippen, who has him at the San Jose track. The colt will be nicely broken this year and then turned out. He is entered in several rich stakes and it is his owner's intention not to start him until he is three years old. He should make a great stock horse when matured.

Rich Stakes at New York's Double Meeting.

New York steps to the front this summer with the most important double meeting in the chain of Grand Circuit events. The Empire City track holds its meeting on August 8th to 12th, and Brighton Beach follows the week after, giving horsemen the advantage of two weeks' racing in America's metropolis at the best season of the year for outdoor sport. It is due to the untiring and unselfish efforts of Mr. James Butler, president of the Empire City track, that this has been brought about. He has taken hold of the Brighton Beach racing plant for the Grand Circuit meeting, and this is a guarantee that everything will be conducted on a high plane and in the best interests of racing men. Classes and conditions will be the same at both tracks. Six early closing stakes are arranged for each meeting, aggregating \$48,000. They are as follows: \$5000 for 2:20 trotters, \$5000 for 2:10 trotters, \$2000 for three-year-old trotters eligible to the 2:30 class, \$5000 for 2:10 pacers, \$5000 for 2:08 pacers, and \$2000 for three-year-old pacers eligible to the 2:25 class, a total of \$24,000 at each track. It means \$20,000 for trotters, \$20,000 for pacers in the several classes, and \$8000 for the green three-year-olds at the two meetings—rich prizes worth competing for.

The three-year-old stakes are for the encouragement of breeders and should be well filled. The sire of the colt or filly that wins them will be in the front rank of public favor. Every winner will increase the sire's earning capacity many thousands of dollars. The entrance is five per cent, in five installments—the first payments only \$10 and \$15, a nominal sum to enter for such valuable stakes. No owner can afford to stay out. The races will be on the Empire City plan which everybody liked so well last year, trainers, owners, spectators and speculators, best two in three, and no race can be very long. Races are generally finished in two or three heats. This makes the racing short, sharp and decisive, saves the horses, increases their earning capacity as they can start afresh twice a week, please owners and trainers and draw the crowds.

New York City is the best market for speed in the world. Nowhere else are the opportunities so good for selling a top-sawyer at a fancy figure. It was at the Empire City track last year that Billy Buch sold for \$15,000, and Major Delmar for \$40,000. The matinee, speedway and road horse demand far exceeds that of any other city. If an owner wants to bring a winner or a first class road horse before the largest number of good buyers, always looking for a good horse, he makes his own opportunity by shipping his stable to Empire City and Brighton Beach tracks. This is a most important consideration.

The enjoyable feature of a two weeks' sojourn in New York will not be lost sight of by owners and trainers. Empire City track is handy to or from the Grand Central depot, and is delightfully situated on high ground, giving a view of Long Island Sound on one side, and the Hudson River Palisades on the other. Brighton Beach has the finest surf bathing in the world, and the track is within a stone's throw of the breakers. The bathing season is at its height during the week of the meeting—and Coney Island only half a mile away. The appointments and stabling of both tracks are modern and up-to-date, and the horses enjoy themselves as well as their attendants. The horsemen who wish to combine profit with pleasure and get the most of both, will take his stable to New York this summer if nowhere else.

Alfred Reeves is secretary of both meetings, and entries should be made with him before April 4th.

Why Punish a Game Horse?

"Columbus," the very entertaining editor of "The Western Department" of the *Western Horseman*, says in the last issue of that paper:

When a trotter or pacer that races on his courage shows signs of distress and acts as though he would quit trying, it is far better to take him back and lose that heat than punish the horse and then fail to win. By this method the horse is prevented from quitting of his own accord and is taught to believe that his driver was anxious that he should slow up. A horse treated in this manner will try again, as he has gained confidence in his driver. Nothing will make a game horse quit like punishment when he is racing courageously. Many a good race horse has been ruined by severe punishment at the wrong time. If a heretofore game horse acts tired and threatens to stop, it is an intimation that the rate is too fast. No horse can carry his extreme hush of speed far, and the horse knows this better than do many men who sit on his tail. Why punish a game horse? Conditions are not alike in every heat of a race. Perhaps the first heat will be "a corker" and the next much easier. While the pace may be too fast in one heat, it may not be so furious in the next, and the horse that acted like he was anxious to quit the first time round may be able to finish as he is expected to in the second mile. Many a horse that has shown signs of distress during the first heat of a race is a better horse the second mile, if driven judiciously and cared for properly. The horse that was willing to give it up at the three-quarter pole in one heat, unless severely punished, often races the latter portion of a subsequent mile in a cheerful manner and right up to his limit.

In the name of all that is good and holy of section 5, rule 27, of the N. T. A. rules, (and it is considered heresy to doubt the divine inspiration of any part of it) what does "Columbus" mean? Would he have a driver lay up a heat just because to drive him out would kill the horse? Perish the thought. "Columbus" must have been dreaming when he wrote the above. Horses are not "dumb driven cattle" and the "public," in other words, those who have placed bets on a horse, must be protected, even though the poor animal drops dead. We are surprised at the temerity of Dr. Battey in printing such suggestions. He is laying himself liable to a torrent of abuse from the sticklers for enforcement of section 5, and they will call him all the bad names in their vocabulary before they get through with him. You are right Doctor, but you are reckless.

Big Stakes at Buffalo.

There are \$16,000 worth of stakes for the big Buffalo meeting to close Thursday, April 7th, and the stake announcement has just been issued by Secretary C. R. Bentley. The meeting is to be held August 1st to 5th. A total of \$16,000 is offered for six early closing events, and an innovation in the division of purses is outlined which is novel and will prove quite acceptable. The classes are as follows: Electric City, 2:11 trotting, \$5000; Empire State, 2:08 pacing, \$5000; Queen City, 2:19 trotting, \$2000; Iroquois Hotel, 2:14 pacing, \$2000; The Introduction, for three-year-old trotters, \$1000, and The Preparation, for three-year-old pacers, \$1000. The colt races will end at the conclusion of the second heat, but the other events will go three heats and each heat will be a race.

The money division will be: 60 per cent to horse winning the heat, 25 per cent to horse finishing second and 15 per cent to the horse finishing third. As an illustration: In the \$5000, 2:11 trot, \$500 will be set aside as noted above to the horse standing best in the summary at the conclusion of the third heat. This will leave \$1500 to be contested for in each of the three heats. The horse winning a heat will, by getting 60 per cent, receive \$900, the horse finishing second will receive \$375, the horse coming third \$225. This makes it possible for nine horses to win money in the event, and also makes it possible for one horse to win \$3200 out of the \$5000 purse. Entries to these stakes will close Thursday, April 7th, and entry blanks should be addressed to Secretary C. R. Bentley, Buffalo, N. Y.

Notes and News.

Volume 19 of Wallace's Year Book is out.

Kinney Lou 2:07½ is the fastest new comer to the standard list of 1903 or any other year.

James Hanley of Providence, R. I., is contemplating breeding his great mare Eleata 2:08½ to Bingen.

Keep in the big stakes when once you have entered. It pays to stay in. You can't win unless you do.

The half-mile track at Riverside has recently been covered with a new coating of clay and is now in first class shape.

Fourth payment of \$10 each on foals of 1903 entered in Breeders Futurity No. 3 must be paid on or before Friday next, April 1st.

There are several colts by Zolock 2:10½ in the vicinity of Riverside that are showing up well for the little work they have had.

The management of the Lake Erie Circuit have decided to do away with stakes and will offer nothing but purse races this season.

The new catalogue of the McMurray Sulky Company is a thing of beauty. Get one from the Kenney Manufacturing Company, 531 Valencia street.

The weather at this writing (Friday morning) looks as if it had cleared at last. There should be some stepping at Pleasanton to-day if it remains so.

Bellflower 2:12½, the fastest of the Beautiful Bells family, has just foaled a very fine colt by Ashland Wilkes 2:17½ at the Hillside Farm, Reading, Pa.

The second number of Goodwin's Guide, containing all the races run in the United States from January 1st to March 15th has been issued. Price 25 cents.

A payment of \$10 is due on foals of 1903 in the Breeders \$6000 Futurity, No. 3. Pay up on or before April 1st or your colt can't win that stake or any part of it.

Gen. B. F. Tracy has decided to close out all his trotting stock and definitely retire. He has attempted to do this twice before, but the love of the horse was too strong for him.

There is \$100,000 offered in stakes and purses for the running meetings at Seattle and Portland. A full page advertisement on page 9 of this issue will give you all the particulars.

Chas. Fox of San Jose, Cal., has purchased from C. O. Stanton, representative of the firm of Singmaster & Sons, a fine imported Percheron stallion, the price paid being \$1800.

An advertiser wants to purchase a pony to match one he already owns. He wants one weighing about 700 pounds, that is a bay and twelve hands high. See advertisement and answer care of this office.

It is reported that Thomas W. Lawson, of Boston, will be elected vice-president of the New England Trotting Horse Breeders Association to fill the vacancy caused by the death of J. Malcolm Forbes.

The performance of Cresceus at Wichita last year is not in the new volume of the Year Book, and his record remains in that publication as 2:02½. An official ruling will not be had on the matter until next May.

Aristo 2:17½, the five-year-old by Nushagak can show two-minute speed at Pleasanton any time Charley Spencer turns him loose for an eighth or a sixteenth. He will be one of the 2:10 trotters of 1904, harring accidents.

April 1st is the last date for you to transfer a nomination in Stake No. 3 Breeders Futurity. If your mare did not foal or your colt died, send in a transfer to this office and get your money back. There are demands for them.

There is a two-year-old colt in this State than can trot a quarter in 35 seconds now, but he is not entered in any stakes. What is the difference in his present value and the price that could be had for him were he entered in a few good stakes?

Midnight 2:11½ and Nancy 2:24½, owned by members of the Riverside Driving Club will be shipped to Los Angeles for the matinee races on the 26th instant to start in events in which owners are to drive. Both are in form and should make a good showing.

An error on the front page of the BREEDER AND SPORTSMAN last week made T. W. Barstow's two-year-old Just It pace a quarter in 17 seconds. The distance was an eighth instead of a quarter and the filly will cover it in 15 seconds before summer is over.

The very best investment at present before the trotting horse breeders of the country is the \$10,000 Hartford Futurity. It only costs \$35 to enter and start or a total of one-third of one per cent. The colt that wins the trotting section gets \$7500 at a coat of \$35.

Nearly twenty 2:10 list trotters have been exported from the United States, the greater portion to Europe.

A big sale of imported jacks and Percheron stallions will be held at Cedar Rapids, April 5th. See advertisement.

If you want to win the \$10,000 M. & M., or the \$5000 C. of C. you must enter in them by Friday next, April 1st. There will be no substitutions this year.

There is over twenty thousand dollars in stakes and purses to be won by horses that are entered at the Detroit Blue Ribbon meeting. Entries close next Friday.

Attend the big auction sale of horses at Pleasanton, Saturday, April 2nd. There will be sport in the morning at the track and the sale will take place in the afternoon.

The Hartford Futurity closes March 28th, which is Monday next. Better get in this stake. \$7500 is first money for trotting three-year-olds and the entire entrance fee is only \$35.

The Blue Ribbon Sale will be held at Cleveland, beginning May 16th. Write Fasig-Tipton Company for an entry blank and particulars. This is the sale where the high prices are obtained.

Consuela S. 2:12½ trotted a quarter in 30½ seconds last Wednesday. A three-year-old in the same stable trotted an eighth in 14½ seconds. They are both in the Monroe Salisbury string and driven by Charles De Ryder.

Kinney Lou's stud season at San Jose will not end May 1st as first intended by his owner, Budd Dohle, but will remain in the stud until July 1st. Quite a number of mares have already been bred to Kinney Lou, and are kept on about the finest piece of pasture in the State at James W. Rea's farm near San Jose.

The handsome bay pacing mare Volita 2:15½ by Beau B., bred at Santa Rosa Stock Farm and now owned by James Hickox of Bowling Green, O., will be shipped to Greenfield, O., and bred to R. Ontime 2:07½. This mare raced successfully in the Northeastern Ohio Circuit last year but was seriously injured in a collision.

Thomas Ronan, owner of the Pleasanton race track, recently purchased the fifty acre tract belonging to the Henry Pierce estate, situated on the Santa Rita road about a mile and a half from Pleasanton. Mr. Ronan will bring a carload or so of horses from his Dayton, Washington, ranch, mostly young horses that will be fitted for sale.

Millard Sanders will drive Tuna 2:16½ in her races over East this year and will appear in an all white suit when piloting her, wearing a white cap, jacket, trousers, shoes and gloves, carry a white whip and sit in a white enameled sulky. Mr. James De LaMontanya, owner of Tuna, will go East to witness the races in which she will be entered.

Lou Dillon's high wheel record is in the New Year Book all right. On page 325 appears the report of the meeting at Cleveland, September 12, 1903, of which the following is a portion of the record: "To heat 2:08½ to high wheel sulky. Lou Dillon ch m by Sidney Dillon won. Time 2:05." Now, will someone please tell all we horse paper editors what we have been kicking about.

Secretary W. H. Knight gives notice that the next regular meeting of the Board of Appeals of the American Trotting Association will be held at the Auditorium Hotel, Chicago, Tuesday, May 3, 1904, at 10 o'clock A. M. for the transaction of such business as may properly be presented to the Board for its consideration. All new applications and written evidence must be received at the Chicago office not later than April 18, 1904.

Dave Raybould writes us that he is very much pleased with the young horses by Neernut 2:12½ that he is working for Mr. Geo. W. Ford at Santa Ana. He says: "I think they are the best bunch I have ever had. There are several in the lot that can heat 2:20, and one that I think will make a very fast horse. I worked him a mile in middle of a heavy track last Friday in 2:19½ and he could have gone in 2:16. I think he will go a mile in 2:10 this year.

The Amateur Driving and Athletic Association that has taken in hand the task to raise \$25,000 to aid the Park Commissioners in building a half mile track and polo and athletic grounds in Golden Gate Park, met at the Palace Hotel on Thursday evening of this week. The Cycle Board of Trade and the Harness Dealers Association sent representatives to the meeting, who were seated. There are eight organizations now affiliated in the movement and invitations have been extended to several others. It was decided to make no effort to collect subscriptions until complete organization is effected, which will be done probably at the next meeting.

Mr. Geo. F. Lattimer, one of the prominent amateur horsemen of Buffalo, who has been visiting different parts of California for the past two months will return home tomorrow. Mr. Lattimer took part in the matinee of the Los Angeles Driving Club on Washington's Birthday, and drove Geo. Becker's little horse Tee Dee Cee a winning race. While in Los Angeles Mr. Lattimer purchased a yearling colt by Zombro 2:11. There is no more enthusiastic amateur horseman than Mr. Lattimer and he proposes coming to California again next winter. He has made many friends while here who will be glad to welcome him again when the weather gets too cold for comfort in Buffalo.

Al McDonald of Pleasanton writes the BREEDER AND SPORTSMAN under date of March 22d, as follows: "I wish to claim name Radium for brown colt three-years-old, by McKinney 2:11½, dam Altilla by Altamont." That's a good name and Mac is the first one to claim it on this Coast.

The sires of stake winners are patronized by the breeders, which is correct and natural. Last year a daughter of James Madison won the Occident and Stanford stakes, but as that stallion is dead, California breeders could not send their mares to him this season. Two sons of Stem B 2:11½ won first and second money in those stakes, however, and the breeders are very wisely sending many mares to him this season. Breed to the winners and the sires of winners is a pretty good rule to follow.

T. C. Cabney, the well known trainer of Eureka, Humboldt county, writes us that he expects to come down the latter part of this month with a string of five or six horses which he will train at the Pleasanton track. He says it has been raining so steadily at Eureka that he has not had a horse out of the barn for a week. Quite a number of horses will be worked at the Eureka track as soon as the weather clears up. Mr. Cabney has picked up a new trotter that he would like to secure a nomination for in the 2:24 trot at the Breeders meeting.

Dan Leiginger had a stroke of very bad luck this week. His fast pacing horse Dorsey died from an affection of the bowels. This horse was an own brother to Ottinger 2:09½ and gave every promise of being one of the fastest pacers on the coast. He was a green horse, seven years old, as sound as a new dollar, and with the little training that Mr. Leiginger has been able to give him since getting him a few months ago, could show 2:10 speed. Dorsey was entered in the Pacific Slope \$1500 stake for 2:20 class pacers, and his death is a severe loss to his owner.

While the weather has not permitted much fast work to be done this year by the trotters and pacers in training at San Jose track, every visitor to that place returns with words of praise about the Nutwood Wilkes youngsters that William Cecil is handling. It seems as if all the get of this horse inherit speed of a high order. There are no better looking colts to be found anywhere, and they have size and excellent dispositions. Don't overlook him this year when mating your mares, as he will have a two minute son this year according to predictions of several Cleveland, Ohio, horsemen.

Ben Chaboya is making quite a trotter of the little horse Erosmont at the Pleasanton track. Ben got the horse in a trade and he does not stand him a very large amount of money. He was a stallion when he got him, and had three or four different gaiters and did not do very well. Ben castrated him and began working him along at the trot a few weeks ago and one day last week stepped him a mile in 2:25 rather handily. Erosmont is filling out into a good, strong horse and Ben thinks he will beat 2:20 with him this summer. He is a half brother to I Direct 2:12½ and Sahle Francis 2:15½, being by Eros out of Francieca by Almont. He is a nice horse to drive and is worth about five times as much as he was when Ben got him.

Jack Bray's auction sale which he is arranging for Pleasanton on the 2d of April gives every promise of being a big success. He has about fifty horses engaged besides sixteen shetland ponies. There are a half dozen trotters and pacers that can heat 2:20, and a pair of carriage horses that cannot be beat in the State. Those who want heavy horses will find quite a number at this sale, there being four teams of drafters weighing from 1400 to 1700 pounds. Those who go to Pleasanton from this city on Saturday, April 2d, the day of the sale, should take the 7:30 S. P. boat from the foot of Market street, which connects with the Pleasanton train at the Oakland mole. This train will reach Pleasanton at 9 o'clock. Over a hundred dollars was raised yesterday for the trotters and pacers in training at the track to compete for the morning of the sale. This money will be hung up for the horses making the fastest quarters and some stepping will surely be seen. The sale will take place in front of the Rose Hotel immediately after the noon hour. Every horse is to be just as represented or no sale.

C. L. Jones of Modesto was in town this week, and reports that everything has a most prosperous look in his section. The rains have been well distributed and the prospects are for excellent crops. Mr. Jones states that there is a movement among a number of those interested in horse breeding in his county to purchase the race track and fair grounds at Modesto, with the idea of holding a fair and race meeting once a year. The price asked for the property which consists of 100 acres of good land is only \$8000 which makes it a good investment as it can be sold for that for farming purposes. It is proposed that sixteen residents of Stanislaus county subscribe \$500 each and purchase the property. We understand that eight of the sixteen have already been secured. Mr. Jones' colt by McKinney out of Carlotta Wilkes by Charley Wilkes, that he purchased last fall as a two year old is working splendidly in the hands of H. Hogoboom at Woodland, and will be a contender for first money in the Breeders Futurity this year if no accident happens him. Mr. Jones has a two year old filly called Lady Rea that is an own sister to Thos. R. 2:15 that he thinks much of. She is now being handled a little by Free Haney at Modesto, and shows every sign of being a fast trotter. After she is broke gentle Mr. Jones will have her turned out as she is not entered in any stakes. She promises to be a much faster trotter than her brother, that would have been a 2:10 performer had he stayed sound.

Useful Hints and Opinions.

The following suggestions in regard to training and conditioning trotting horses are taken from the published writings of some of the leading trainers of America from the days of Hiram Woodruff to the present time:

"No man is fit to handle colts or horses unless he has perfect control of his temper, for you can do much more with coaxing than you can with harsh treatment; for, when an animal becomes afraid of his trainer, he loses confidence and will not improve in that man's hands. This applies to aged horses as well as colts."—A. J. Peck.

"Further than halter-breaking I have never thought necessary during the first year. The fall and winter after weaning, they should have all they will eat, and on every dry day they should run out in the fields and take all the exercise they will; for plenty of food and plenty of exercise are equally necessary to accomplish the best results.

"There is no process, not even the starving process, that I think more injurious to the colt than over-feeding, with little or no exercise. The legs cannot grow and develop without plenty of galloping, and if well fed and turned out in the fields in good weather, they will run and play."—A. J. McKimmin.

"The first thing in training a horse is to make a careful study of the animal, learning all his peculiarities, faults, weakness, habits, etc. I think one vital mistake made by men training horses is that they do not seem to think that horses are made of flesh and blood, and very nearly human in all their ways."—John Splan.

"Two-thirds of the promising and fashionably-bred colts are ruined through mismanagement, which includes over-conditioning, bad shoeing, excessive use of boots, weights and ointments, which incite and weaken, through increased growth, the hoof, one of the most fruitful sources of malformation."—Alexander Dunbar.

"It used to be a custom to send a three-year-old colt, half-balter broken, and give him one month to complete his education, and return it fit and safe for any use. This was a great mistake; the man had either to half kill the colt or return him half broken, or perhaps both. It takes a bright, intelligent boy ten or fifteen years to complete a good education, and it can hardly be called fair to expect a dumb beast to be fit to graduate at the end of a month. A colt, when thoroughly broke, should have a graceful, easy carriage, a pleasant mouth, be obedient, and yield promptly to every requirement. He should go at his work cheerfully, and with as much apparent pleasure as his driver takes in riding after him. By such behavior he would indicate at once that he was an educated horse, and not an abused and half-killed brute. To take a green colt and return him in this condition requires considerable time—at least three months."—H. C. Woodnutt.

"The commencement of Lady Suffolk's history interested those who remembered her performance five-and-twenty years before, and revived the discussion about the forcing system and early maturity. It was admitted that David Bryant trotted the mare too much in her first season; but some still held that early maturity was a good thing, and predicted that it will be hereafter one of the chief aims of the breeders. I am somewhat afraid that it will; and being convinced that it will be mischievous, and end in the premature decay of many good horses, I have protested against it. The argument is this: If a colt can be made as good at three years old as another will be at five or six, there is a great saving of time and expense. Now, this is not the proper way to state the question; for a colt may be as fast at three as another is at five or six, and still be an inferior horse; and it is my opinion that the method adopted to make him at three equal to what the other will be at six is almost certain to render him an inferior animal as regards duration."—Hiram Woodruff.

"In regard to colts, I have previously observed that the forcing system in the raising of trotters was not advisable. I am satisfied that it is not only expense laid out to no use, but for a purpose which is likely to be mischievous. Very early maturity is only to be attained accompanied with the liability, the almost certainty, of corresponding early decay; and, to achieve such excellence as that to which Dutchman attained, the trotting horse must have all his powers long after the period at which most running horses have left the turf. The reason is obvious. The trotter has to be educated up to his best and strongest rate, and the education takes many years. Dutchman improved until he was ten or eleven years old, and it may be questioned whether his very best capabilities were ever brought out; for the change into new hands just when he had come to the highest pitch that we know of was not altogether favorable to continued advance. Therefore, when a trotting horse has

attained the age of seven, and is aged, or arrived at natural maturity, he has only just reached that stage when we may begin to expect the development of his finest powers; and that development, according to my experience, is likely to be gradual, and to continue for a long time. No doubt many horses never improve after they are seven; and in some cases the speed comes to them all at once, as the saying is. In the former, the constitution, breeding or form is probably defective. A century of work would not improve some horses. They get to their best early, and only because their best is very bad."—Hiram Woodruff.

"Many trainers ought never to be allowed to get into a sulky in possession of a whip. They are so constituted that they cannot control their temper, and they often whip when there is no better reason for it than the gratification which the doing so yields their ill-nature. One single cut with the whip at the wrong time will not be forgotten by some horses during a whole season, and may cause the horse to become timid and irritable—may, in fact, ultimately ruin him—causing him to prove unreliable, both as regards gait and everything else considered as exceptionally valuable."—Farmers' Home Journal.

"Drivers are born, not made, and it is impossible to teach a man so that he can get up behind a horse and drive him well unless he has the natural gift; and only this, with experience, makes a good driver. You want a steady, firm hand, and yet a light one. You want a firm hand, but not a rigid, unyielding one, for a certain ease is necessary to give the horse confidence. If the driver be nervous and unsteady, the horse will soon know it, and his steadiness will be affected by it. Never take more hold on the horse than is necessary to give him confidence, and to hold him steady and safe. A good driver must be a good judge of pace and of distance, cool-headed, with presence of mind, and able to take in a situation at a glance and act upon it instantly. He must be ready to see an advantage the moment it presents itself, and seize it the moment he sees it. All this, as I have said, cannot be learned; there are certain qualities of the brain and the hand that must in a degree be natural to the man, though they may be perfected by acquirement. A driver may be good when going at a 2:40 gait, but the same man may be all at sea when going at a 2:16 gait. The difference in results that will follow a move at 2:40 gait and that which may follow a move at 2:20 gait is marvellous."—Charles Marvin.

"In order that a fast horse should be under circumstances to do his best, he should be as much at his ease in his harness and general rig as possible. If he is not, he is placed at almost as much disadvantage as if sore or stiff, or suffering from some bodily ailment. You may see horses brought out of the stable to trot, with a very tight check to keep their heads up, and a tight martingale to keep it down. Such a horse is in irons; and when to this is added a dead drag at the reins, and no movement of the bit from end to end, I cannot see how he should do his best. People talk about a steady, bracing pull; but, in my opinion, that is not the right way to drive a trotter. There is a great difference between letting go of your horse's head and keeping up one dull, deadening pull all the time."—Hiram Woodruff.

"Bits are often kept in places to which the frost penetrates in very cold weather. The bits become frosted; and, without a thought of what he is doing, the man claps a frosted steel bit into the horse's mouth. The consequence is a sore mouth, just about as certainly as if the bit had been nearly at a red heat; and then the man bothers his brains to find out what caused it. If he had put the frozen bit into his own mouth, it would have brought the inner skin of the lips away with it, and then he would have felt the mischief. In very cold weather, take your bits to the fire, and be sure that there is no frost in the steel when the bit is placed in your horse's mouth."—Hiram Woodruff.

"My experience has been that no horse can be successfully driven with anything like a severe bit. I never saw one that was even broken of the habit of pulling in that way. If you put a severe bit in the horse's mouth and pull on it it makes the horse mad and irritates him; the further you drive him and the harder you pull him, the more he will pull against it. When I was a boy, almost every trotter I saw would pull in a disagreeable manner when being driven at top speed. At the present time I cannot think of one horse that is anything like first class, that pulls enough to make it disagreeable for a man at any time. A great many people think that every horse should be driven with an overcheck. I can remember when I had the same opinion myself. I am now satisfied that it is a serious mistake. There are a great many horses that will not take kindly to an overcheck, and if you insist on using it on them it will sooner or later spoil the horse's disposition to a great extent."—John Splan.

"The mouth is now fine and sensitive; and it ought to be kept so, because this is the great organ of communication between a good driver and the trotter, when he is cultivated and improved into a fast horse. What you want the trotter to do when he is at speed is to be got into him through his mouth. You may encourage him by speaking to him, or sting him into a greater effort with the whip; but neither of these is half as good as the play upon the reins, with which you let him know what you want through his lively sensitive mouth. You are then to keep in constant mind the necessity of not impairing the colt's mouth by rough handling of the reins. If you pull and lug at the bit, the colt, in his efforts to resist what hurts him, will very soon pull too, for he will find out that this numbs and deadens the jaws; but this is at the expense of ruination to the mouth. It will become hard and insensible; and the first and the largest part of the mischief which goes towards the making of a hard puller is done."—Hiram Woodruff.

"Checks and hits have a good deal to do with balancing the horse, and the less restraint or annoyance these appliances give the horse the better. I like plain hits. If you cannot control a horse with a plain hit, you have small chance of making a trotter of him at all. Such hits as the 'Perfection,' 'Rockwell,' etc., I consider pernicious contrivances. There are cases where a horse has improved with a severe hit, but they are exceptional. With what extreme measures have achieved I do not quarrel, but I do argue against using artificial and unusual appliances unnecessarily, and this applies not only to bits, checks, shoes, weights, etc., but to everything connected with training."—Charles Marvin.

"The stallion (Kemble Jackson) was then sent to me to be handled; and, in order to prevent him from throwing down his head between his knees when he broke, the well known Kemble-Jackson check, since in use all over this country, and introduced in England also, was invented. It answered well in this case, and must always be of great use in similar ones; but I think it is often applied in cases where it is not only unnecessary, but does harm instead of good."—Hiram Woodruff.

"I would teach every colt or horse to drive with and without blinds or winkers."—A. J. Peck.

"How far to work a colt, I cannot tell you any more than I can how big a lump of chalk is. Colts differ in size, stamina, disposition and strength. Some have got to indulge in a little foolishness before they are ready to do right—play with the birds along the fence, or the shadows of the poles—while others are strict business all the time. It is safe enough to figure not to exceed four miles with any colt and not less than two and one-half. With the proper care, such as walking and turning out, colts do not need much jogging. They are ready to speed very soon after getting to the track."—Thomas J. Dunbar.

"I think it is a mistake to jog horses too far. From three to five miles a day is ordinarily sufficient for most horses, except that on one day in each week it is best to jog seven or eight miles, so the horse will get a little leg weary. Some days three miles and some four and five miles; but I do not believe in slow jogging for more than one mile. After going the first mile, it is best to let them jog along good and strong, as I am satisfied that from three to five miles stiff jogging will do a horse more good than twenty miles at a slow, poky gait. I also think a great many horses are jogged so far and slow that it takes away their speed; besides, it gets monotonous to the horse, and he does not take his work as cheerfully as a horse that is jogged short and lively."—Edward F. Geers.

"The object of the driver should then be to support him with as little pull as possible, but still to support him. The horse with a good mouth will always feel the driver's hand; and, when the latter is as skillful as he ought to be for the handling of the first rate, fast trotter, he may play upon the rein with a touch like that of a harper upon the strings, and the horse will answer every touch with the music of the feet and wheels."—Hiram Woodruff.

"It will be remembered that I have spoken of three prime qualities in the trotting horse; viz., speed, bottom and the power to pull weight. I was already confident that little Flora Temple possessed the last, as well as the other two. People are apt to think that great size is demanded for a weight-puller, but there are plenty of notable instances to show that this is a mistake. Still, though there need not be great size, and though some big horses are the very worst of weight-pullers, coming right back as soon as they are required to take along a wagon and a heavy man, strength is certainly demanded. This strength in small horses is the result of a nice adaptation of parts, together with particular power in the loin and hind-quarters. If a little horse of that sort be particularly examined, it will commonly be found that they are long in all the moving parts; and their quarters are generally as big, and sometimes a deal bigger, than those of many much larger horses."—Hiram Woodruff.

SIX RACES DAILY \$100,000 IN STAKES AND PURSES

SUMMER RUNNING MEETINGS AT SEATTLE and PORTLAND

ALL RACES TO BE GOVERNED BY THE RULES OF THE PACIFIC JOCKEY CLUB

Entries to Stakes, Both Meetings, Close Saturday, April 2, 1904
KING COUNTY FAIR ASSOCIATION, SEATTLE MULTNOMAH FAIR ASS'N, PORTLAND.

THE MEADOWS

GEO. W. DICKINSON, President.
A. T. VAN DE VANTER, Sec'y and Mgr.

E. E. CAINE, Vice-President.
ROBT. LEIGHTON, Racing Sec'y

SEATTLE, WASH.

JUNE 11th to AUGUST 6th, inclusive.

THE MEADOWS, SEATTLE, WASH.

PURSES, \$1500 DAILY, TWO OF \$300 EACH, TWO OF \$250 EACH,
TWO OF \$200 EACH.

THE MEADOWS.

At The Meadows, the beautiful track in the bend of the Duwamish river, there are stabling accommodations for 600 horses. Fresh grass is plentiful and the water agrees splendidly with horses. No better place in the country can be found for the recuperation of thoroughbreds that have had a hard season's racing. The improvements are modern and complete, and the track itself this year, by reason of improvements and repairs, will be better and faster than last season. There is a galloping path along the banks of the river, where horses may be exercised under the shade of trees, and there is a fine beach where horses may wade and roll.

STAKES.

No. 1—THE OPENING HANDICAP—\$600.—For three-year-olds and upward; \$5 to accompany the nomination; \$25 additional to start. The King County Fair Association to add an amount to make the value of the stake \$600, of which \$100 to the second and \$50 to the third. Weights announced Wednesday, June 8th. Acceptances to be made through the entry box the day before the race at 11 a. m. To be run Saturday, June 11th. Distance, one mile.

No. 2—THE LADIES' PLATE—\$700.—For two-year-olds (foals of 1902); \$5 to accompany the nomination; \$25 additional from starters. The King County Fair Association to add an amount sufficient to make the value of the stake \$700, of which \$125 to the second and \$50 to the third. Colts to carry 115 pounds; fillies and geldings 112 lbs. Allowances: Non-winners of three races allowed 3 lbs.; of 2 races 2 lbs.; maidens 10 lbs.; beaten maidens 12 lbs. To be run on Saturday, June 18th. Distance, five furlongs.

No. 3—THE SEATTLE DERBY—\$1200.—For three-year-olds (foals of 1901); \$10 to accompany the nomination; \$20 additional if not declared out by June 1st; \$30 additional from starters. The King County Fair Association to add an amount sufficient to make the value of the stake \$1200, of which \$200 to the second and \$100 to the third. Colts to carry 122 lbs.; geldings 114 lbs.; fillies 117 lbs. Allowances: Non-winners of a race in 1903 allowed 5 lbs.; maidens 10 lbs.; beaten maidens 12 lbs. Starters to be named through the entry box the day preceding the race before 11 a. m. To be run on Saturday, June 25th. Distance, one mile and a quarter.

No. 4—THE KING COUNTY SELLING STAKES—\$600.—For three-year-olds and upward; \$5 to accompany the nomination; \$25 additional to start. The King County Fair Association to add an amount sufficient to make the value of the stake \$600, of which \$100 to the second and \$50 to the third. The winner to be sold by auction. If entered to be sold for \$2000, to carry weight for age; if for less 1 lb. allowed for each \$100 to \$1000, then 2 lbs. allowed for each \$100 to \$400. Starters with selling price to be named through the entry box the day before the race before 11 a. m. To be run Saturday, July 2nd. Distance, six furlongs.

No. 5—THE CELEBRATION HANDICAP—\$1200.—For all ages; \$10 to accompany the nomination; \$20 additional to start. The King County Fair Association to add an amount sufficient to make the value of the stake \$1200, of which \$200 to the second and \$100 to the third. Weights announced Friday, July 1st. Winners of other than selling races after the weights appear to carry 5 lbs. extra. Starters to be named through the entry box the day before the race at 11 a. m. To be run Monday, July 4th. Distance, one mile and one-quarter.

No. 6—THE KINDERGARTEN HANDICAP—\$700.—For two-year-olds (foals of 1902); \$5 to accompany the nomination; \$25 additional to start. The King County Fair Association to add an amount sufficient to make the value of the stake \$700, of which \$125 to the second and \$50 to the third. Weights announced Wednesday, July 6th. Winners after the weights appear (selling races excepted) to carry 5 lbs. extra. Acceptances to be made through the entry box the day preceding the race before 11 a. m. To be run on Saturday, July 9th. Distance, four and a half furlongs.

No. 7—THE SISKIYOU HANDICAP—\$600.—For all ages; \$5 to accompany the nomination; \$25 additional to start. The King County Fair Association to add an amount to make the value of the stake \$600, of which \$100 to the second and \$50 to the third. Weights announced Wednesday, July 13th. Winners of other than a selling race after the weights are announced to carry 5 lbs. extra. Acceptances to be made through the entry box the day before the race before 11 a. m. To be run Saturday, July 16th. Distance, four furlongs.

No. 8—THE INTERURBAN HANDICAP—\$600.—For three-year-olds and upward; \$5 to accompany the nomination; \$25 additional to start. The King County Fair Association to add an amount sufficient to make the value of the stake \$600, of which \$100 to the second and \$50 to the third. Weights to be announced Wednesday, July 20th. Winners of other than a selling race after the weights appear to carry 5 lbs. extra. Starters to be named through the entry box the day before the race before 11 a. m. To be run Saturday, July 23rd. Distance, six furlongs.

No. 9—THE CLUB MEMBERS' HANDICAP—\$1000.—For three-year-olds and upward; \$10 to accompany the nomination; \$10 additional to start. The King County Fair Association to add an amount sufficient to make the value of the stake \$1000, of which \$175 to the second and \$75 to the third. The owner of the winner will be presented with a silver loving cup, the gift of the members of the Seattle Driving Club. Weights to be announced Wednesday, July 27th. Winners after the weights appear (selling races excepted) to carry 5 lbs. extra. Starters to be named through the entry box the day before the race before 11 a. m. To be run Saturday, July 30th. Distance, one mile and one-eighth.

No. 10—THE FAREWELL HANDICAP—\$600.—For three-year-olds and upward. Entrance free for all three-year-olds and upward nominated in other stakes at this meeting; \$30 to start. The King County Fair Association to add an amount to make the value of the stake \$600, of which \$100 to the second and \$50 to the third. Weights to be announced Wednesday, August 3rd. Winners of a race, other than a selling purse, after the announcement of weights to carry 5 lbs. extra. To be run Saturday, August 6th. Distance, one mile.

NOTICE TO NOMINATORS.

Entries to these Stakes will be accepted only with the understanding and upon the agreement of each nominator that the decision of the judges or the officers of this association, with respect to all questions relating to the racing or the interpretation of the conditions of these stakes, shall be final.

The King County Fair Association reserves the right to declare off, amend or extend the date of closing of any stake not filling satisfactorily. Five or more overnight closing races, with liberal purses for handicaps, selling and class races, to suit the horses in attendance, with absolutely NO ENTRANCE FEES, will be given daily. If there are horses enough to fill we will give one or more hurdle races each week.

In the selling stakes, more than two horses can be named by the nominator, but only two horses in the same interest can start. No selling stakes or purse is a claiming race unless so specified in the conditions. All applications for stabling must be made to the Secretary, stating the number of horses to arrive. After application has been made, in case of any subsequent change in the movement of the stable, or any part thereof, a prompt notice is earnestly requested.

Horses should be shipped care of the KING COUNTY FAIR ASSOCIATION, SEATTLE. Arrangements will then be made for their unloading at the race track. THE DATE FOR THE CLOSING OF THESE STAKES IS SATURDAY, APRIL 2d.

Address all communications

To A. T. VAN DE VANTER,
Sec'y and Gen'l Manager King Co. Fair Assn.,
SEATTLE, WASH.

IRVINGTON PARK

A. R. DIAMOND, President.
L. H. ADAMS, Secretary.

CAPT. E. W. SPENCER, Vice-President.
ROBT. LEIGHTON, Racing Secretary.

PORTLAND, ORE.

AUGUST 8th to AUGUST 27th, inclusive.

IRVINGTON PARK, PORTLAND, ORE.

PURSES, \$1200 DAILY, TWO OF \$250 EACH, TWO OF \$200 EACH,
TWO OF \$150 EACH.

The Multnomah Fair Association.

The Multnomah Fair Association last season expended \$10,000 upon the complete alteration and improvement of their premises at Irvington Park. This year a large additional sum will be spent upon erecting additional stalls, etc. The Association is composed of business men of that city, who have a long lease upon this course at Irvington. Last season the initial meeting was the most successful one ever given in that city. The course is easily reached by three lines of electric cars, and the shipping facilities to and from Portland are unexcelled.

STAKES.

STAKE NO. 1—THE OREGON STAKES—\$500.—A handicap of all ages; \$5 to accompany the nomination; \$20 additional to start. The Multnomah Fair Association to add an amount to make the value of the stake \$500, of which \$70 to the second and \$30 to the third. Weights to be announced Monday, August 8th. Acceptances to be made through the entry box before 11 a. m. on the day preceding the race. Winners of other than a selling purse after the weights are announced to carry 5 lbs. extra. To be run Wednesday, August 10th. Distance, five furlongs.

STAKE NO. 2—THE WEBFOOT SELLING STAKES—\$600.—For three-year-olds and upward; \$5 to accompany the nomination and \$25 additional to start. The Multnomah Fair Association to add an amount to make the value of the stake \$600, of which \$100 to the second and \$50 to the third. Weight for age. Each to be entered to be sold for \$1200; if for less, 3 lbs. allowed for each \$100 less, to \$800. Then 2 lbs. allowed for each \$100 less to \$500. Starters with selling price to be named through the entry box the day before the race at 11 a. m. Distance, six furlongs.

STAKE NO. 3—MULTNOMAH HANDICAP—\$500.—A handicap for three-year-olds and upward; \$5 to accompany the nomination; \$20 additional to start. The Multnomah Fair Association to add an amount to make the value of the stake \$500, of which \$70 to the second and \$30 to the third. Weights to be announced Monday, August 15th. Acceptances to be made through the entry box the day previous to the race before 11 a. m. Winners of other than a selling race after the weights are announced to carry 5 lbs. extra. To be run Wednesday, August 17th. Distance, seven furlongs.

STAKE NO. 4—THE IRVINGTON HANDICAP—\$1000.—A handicap for three-year-olds and upward; \$10 to accompany the nomination; \$10 additional to start. The Multnomah Fair Association to add an amount to make the value of the stake \$1000, of which \$150 to the second and \$50 to the third. Weights to be announced Wednesday, August 17th. Acceptances to be made through the entry box the day preceding the race before 11 a. m. Winners of other than a selling race after the weights are announced to carry 5 lbs. extra. To be run Saturday, August 20th. One mile and a quarter.

STAKE NO. 5—THE JUVENILE HANDICAP—\$500.—A handicap for two-year-olds (foals of 1902); \$5 to accompany the nomination; \$20 additional to start. The Multnomah Fair Association to add an amount to make the value of the stake \$500, of which \$70 to the second and \$30 to the third. Weights to be announced Monday, August 22nd. Acceptances to be made through the entry box the day preceding the race before 11 a. m. Winners of other than a selling race after the weights are announced to carry 5 lbs. extra. To be run Wednesday, August 24th. Distance, five furlongs.

STAKE NO. 6—THE EXPOSITION HANDICAP—\$600.—A handicap for three-year-olds and upward; \$5 to accompany the nomination; \$25 additional to start. The Multnomah Fair Association to add an amount to make the value of the stake \$600, of which \$100 to the second and \$50 to the third. Weights to be announced Wednesday, August 24th. Acceptances to be made through the entry box the day preceding the race before 11 a. m. Winners of other than a selling race after the announcement of weights, 5 lbs. extra. To be run Saturday, August 27th. Distance, one mile.

NOTICE TO NOMINATORS.

Entries to these Stakes will be accepted only with the understanding and upon the agreement of each nominator that the decision of the judges or the officers of this association, with respect to all questions, disputes, claims or objections relating to the racing or the interpretation of the conditions of these Stakes, shall be final.

The Multnomah Fair Association reserves the right to declare off, amend or extend the date of closing of any or all stakes not filling satisfactorily. Five or more overnight closing races, with liberal purses for handicaps, selling and class races, to suit the horses in attendance, will be given daily. NO ENTRANCE FEES or deductions will be made from those purses. If there are enough horses in attendance at the meetings to fill, we will give one or more hurdle races each week.

In the "Webfoot Selling Stakes" (Stake No. 2) more than two horses may be named by the same nominator, but only two horses in the same interest can start. No selling stakes or purse is a claiming race unless so specified in the conditions. All applications for stabling must be made to the Secretary, stating the number of horses to arrive. After application has been made, in case of any subsequent change in the movement of the stable, or any part thereof, a prompt notice is earnestly requested.

Horses should be shipped to Station B. Northern Pacific Ry. Co., Portland. By giving notice of the probable time and date of their arrival, owners and trainers will save themselves much trouble and delay.

Should conditions justify, the meeting will probably be extended to Saturday, Sept. 10th. Transportation from Seattle is easily secured, the run between the two cities being usually accomplished in less than ten hours, and the rate is very reasonable.

Secretary, Multnomah Fair Association,
PORTLAND, ORE.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

San Francisco Show.

Entries for the Spring show have been coming in during the week in a pleasing and encouraging ratio, the list so far is way ahead of the entries made at a corresponding time last year.

Commencing this evening the club's office at 630 Market street will be kept open every evening until 10 o'clock till date of closing of entries Saturday, April 2d.

The exhibit of specials in the window of Sbreve and Co. on Market Street is the most extensive and valuable ever made in this city for a bench show. The value of the Pointer and Setter specials alone is over \$600.

The premium list and rules for the Pacific Cat Club annual show has been issued. The cat show will be held in the gallery of the Mechanics Pavilion, April 15th and 16th in connection with the S. F. K. C. show. The officers of the club are Mrs. W. A. Deane, President; Mrs. Geo. E. Bates, Vice-President; Mrs. Caroline Hildebrand, Treasurer; Mrs. Allan Abbott, Corresponding Secretary; Mrs. A. H. Brod, Recording Secretary and Show Superintendent.

San Jose Show.

The premium list for the Santa Clara Kennel Club's first annual show contains a list of 322 classes—the usual four classes are supplemented with an additional class for local dogs. The regular awards are silver medal to first, bronze medal to second, diploma to third and letters. Entries close April 21st.

The list of specials is a substantial one, embracing over eighty cups, trophies and prizes of various kinds, in fact the best yet given for a Garden City show. This list is, we regret, too voluminous for publication this week, the premium lists have been received too late for a more elaborated notice. All breeds have been generously provided for—the array of specials will be greatly increased before the show opens.

The entry fees are \$2.50 and \$1.50 for each additional class. Medals and diplomas will be ready for the winners at the close of the show, Saturday evening, April 30th.

In all breeds, entries of bitches with whelps at side will be accepted for exhibition only, for which an entry fee of \$2.50 for each bitch and litter will be charged.

Parties wishing to place dogs at the show for sale only, and not for competition, can do so by paying \$2.50 entry fee to cover cost of benching and feeding. Such entries must be made on regular entry blanks.

The officers of the club are: President, P. H. Dobie; First Vice-President, Chas. W. Coe; Second Vice-President, Hugh Center; Secretary, Miss Della Beach. Bench Show Committee—N. J. Stewart, Miss Beach, W. C. Bogen, M. Perry, W. H. Carmichael. Auxiliary Committee—Miss Beach, Miss T. L. Howard, Miss Livingston, Miss Buck, Miss Katherine Wright. Veterinary Surgeon, P. H. Browning, M. D. C. Superintendent, J. C. Berret. Judges, Mr. Frank T. Turner, Victoria, B. C. All other breeds; Mr. John Bradshaw, San Francisco, Fox Terriers.

The show will be benching, fed and disinfected under the direction of Tbos. Banks, Pacific Coast Manager Spratt's Patent Limited.

Premium lists and all other information can be obtained by addressing the Secretary, Miss Della Beach, 955 So. First St., San Jose. Phone John 1911.

Portland Show.

From the ready response that has been received from those who have been solicited to offer cups and specials for the coming show of the Portland Kennel Club, it is apparent that the number of prizes will exceed that of any past show in that city. At present, there have been offered thirty-four cups and more are expected. The board of directors has not decided how the cups will be distributed among the various breeds and classes, but this will be taken up at a future meeting of the officers.

Following is a list of those who have offered cups: J. C. Ainsworth, Peaslee Brothers, Pickett & Vigneaux, Woodard, Clarke & Co., Knight Shoe Co., Olds, Wortman & King, Honelman Hardware Co., G. Heitkemper, Portland Cocker Kennels, Hudson Arms Co., A. & C. Feldenheimer, L. C. Henriksen, Dr. Tucker, J. A. Taylor, Frank Fleming, Frank E. Watkins, Tull & Gibbs, J. Wesley Ladd, Walter F. Burrell, Butterfield Brothers, The Journal, Portland Club, Portland Railway Co., Grant Scott, Dr. Allen W. Smith, August Erickson, Lou Coulter, Rothschild Brothers, E. Schiller, John H. Manning, Jeff Nye, W. A. Stotey, Jaeger Brothers and Mr. Moore.

Spokane Show.

Advices from Spokane are to the effect that there will be more prizes, more dogs and a greater amount of interest shown than Spokane has ever had before for the coming Spokane Kennel Club fall bench show, to take place there on October 5, 6, 7 and 8.

John Bradshaw of San Francisco, has been secured to judge all breeds at this show. Efforts have been made by the club to make the show the best the city

has ever seen, and pains will not be spared to make it a grand success.

A goodly list of cups and special prizes has already been donated, among them the following solid silver cups, the value of each cup being placed at about \$25: Wheat Manna cup, Anderson Brothers cup, Hotel Pedicor cup, Crystal Laundry cup, Sapolio cup, T. F. Spencer, Crescent Dry Goods Company cup, Spokane Drug Company cup, Wentworth Clothing Company cup, Quick Print cup, Washington Cracker Company cup, John W. Gramam Company cup, A. B. Jackson cup, Howell W. Peel cup, Spokane Traction Company cup, Jones & Dillingham cup, Crane Shoe Company cup, "Old Ironsides," A. L. White cup, President's cup, T. S. Griffith and Log Cabin Syrup cup.

Besides the above cups there will be a number more offered by the time the bench show starts. The club has not spared pains to make the show a success and at this early date has secured all the cups mentioned for the bench show.

During the next two months there will be a number of shows on the coast, at which Spokane dogs will be exhibited. The owners confidently expect to bring back prizes. The first show will take place at Vancouver, B. C., then at Victoria, B. C., then at Seattle, Tacoma, Portland, San Francisco, San Jose and Los Angeles. The Spokane show will be a P. K. L. show.

Los Angeles Show.

The Southwestern Kennel Club of Los Angeles has now been fully organized and has completed most all arrangements for the bench show which will be held next month.

The charter members are as follows: Dr. F. W. Steddom, Arthur Letts, Dr. H. D. Fennimore, C. M. Leach, H. S. Huff, F. H. Kirby, George R. Albers, C. P. Schreiner, W. E. Loneragan, J. R. Huddleston, T. H. Broadhead, Mrs. T. H. Broadhead, D. F. Martin and G. L. Waring, of Santa Monica.

The officers elected were the following: Count Von Schmidt, President; Dr. F. W. Steddom, First Vice-President; W. W. Sweeney, Second Vice-President; G. R. Albers, Third Vice-President; Arthur Letts, Director; F. H. Kirby, Secretary and Treasurer; Dr. F. R. Fennimore, Veterinary Surgeon and C. P. Schreiner, Superintendent of the club.

After considerable discussion it was determined to fix the initiation fee at \$5 and the quarterly dues at \$1. By placing the entrance fee at the figure named it was thought a more representative class of members would be secured and a more active interest taken in the workings of the club. The new club, which is known as the Southwestern Kennel Club, will affiliate with the Pacific Kennel League.

It has been decided that the first show of the club will be given April 23, 29 and 30, these dates follow the show at San Francisco, but clashes with the show at San Jose.

The following bench show committee was appointed: D. F. Martin, Chairman; C. N. Leach, Mr. and Mrs. T. H. Broadhead, F. H. Kirby and Dr. F. R. Fennimore.

James Cole, of Kansas City, has been selected to judge all classes. Messrs. Letts, Steddom and Kirby were appointed a committee on prizes.

Mr. Letts has announced that he would offer a silver cup for any class of Collies, and that a friend also had offered to donate a cup. He thought two cups would be enough for a beginning, and he will not enter his champion Collie Ravenswood, if anybody thinks this entry would debar any other Collie.

It was also decided to give ribbons and certificates for each class. The first award will be a silver medal with red ribbon, the second a bronze medal and blue ribbon, the third a diploma. There also will be a gold medal as a special prize.

The enthusiasm down south is commendable, but why not conform to the usual custom in the ribbon awards. The conflict of dates with San Jose will also cut out a string of outside entries.

DOINGS IN DOGDOM.

Mr. H. M. Papst's first venture in Bulldogs has turned out very well. The bitch True Blue (Ch. Ivel Rustic-Baby Jean) is a brood bitch, and that in itself, is something. She whelped last week two fine strong puppies, a dog and a bitch. The bitch puppy was accidentally killed by its dam, the survivor is coming on finely. Being born on the 17th of March the youngster was appropriately named Pat.

Jack Bradshaw left to-day with the intention of taking in the northern circuit—Vancouver and Victoria B. C., Seattle and Portland. He will take a string of dogs north including the following: H. M. Papst's Bulldog King Commando, Norman J. Stewart's Bull bitch Her Majesty of Charlcombe, W. R. Whittier's Irish Terrier Irisl, Woodlawn Kennels' Bull Terrier bitch Newmarket Queen, wire haired Fox Terrier Dolly Varden and several smooths, probably fifteen dogs altogether.

His first stop will be at Portland, where he will take charge of E. F. Willis' Portland Kennels Cocker Spaniel string. Mr. Willis, by the way, has recently brought out a good one from the East, possibly the best that was ever sent to the West. The purchase

was made by Bradshaw when he was East at the W. K. C. show. Frank E. Watkin's Bull Terriers Newmarket Baby (just out from the East) and Bonnybred Stiletto. Dr. Zar's two Boston Terriers. Two Portland Pointers, a string of fifteen Portland dogs all told. At Seattle he will take charge of J. G. Morgan's Fox Terriers, including several new purchases.

Returning, after the Portland show, Mr. Bradshaw will bring down for the San Jose show about twenty-five dogs.

If it were not for the clashing of dates the northern dogs would be shown here next month.

The Spring show here will be the first one Bradshaw has missed in twelve years, the inducements for his northern trip were, however, too seductive to decline.

Top Notch Mason's King is announced for stud service on page 14. This Pointer was bred by M. T. Mason, a Pointer breeder well known in the East. Mason's King is by King of Lynn out of Quicksand. Both Mason's King and Young Lynn, his litter brother, have a good bench record. Mason's King is a well broken field dog and a classy and stylish Pointer. He is owned by Mr. W. R. Whittier and will be in charge of Woodlawn Kennels during his stud career.

Bonnybred Kennels, Brooklyn, New York, is the biggest Bull Terrier kennels in the world. Over 200 stud dogs and brood bitches are to be seen at this noted establishment. Mr. Pegg, the well known English fancier and the breeder of Ch. Woodcote Wonder visited the kennels after the New York show and after being made acquainted with the correspondence and other details, prices, etc., pertaining to the largest Bull Terrier business in the world, was absolutely astounded at its scope, the prices realized for stock, and the steady demand for puppies.

The matrons are the best foundation for brood bitches in America and the stud dogs are irreproachable and from the best strains. Among the studs are Ch. Woodcote Wonder, Captain Woodcote, Fire Chief, General Custer, the recently imported English dog Ch. Bloomsbury Burge and others. Fire Belle, Ch. Yorkville Belle, Western Belle, American Belle and many other good ones make up a stock of unparalleled brood bitches.

These dogs and bitches are all proven producers and represent the best blood lines extant. The kennels have a steady demand and ready sale for everything they can produce. A branch kennels will be established at Staten Island this spring.

Stock from Bonnybred Kennels have been constant winners at bench shows since the kennels have been in business. A young Capt. Woodcote-Fire Belle pup, Hero by name, a winner at the recent New York show, changed ownership the first day for \$150.

A mention of Woodcote Wonder reminds us that a daily contemporary in an article descriptive of the coming Spring show mentions that a litter of Ch. Woodcote Wonder puppies was recently whelped in this city. There has not been a Woodcote Wonder litter whelped on the Coast for about nine months and the statement referred to was misleading.

Attractions for the Angler at the World's Fair.

Exhibits for the Forestry, Fish and Game Building are now on the way from Brazil, Argentina, Peru, Germany, Great Britain, France, Mexico, Japan and several states of the Union.

Several of the states are constructing tanks for their live fish exhibits, those of Missouri, Minnesota and Pennsylvania being the furthest advanced. New Jersey is at work on her fresh water fish tank in the building, and her salt water tank, being now made in St. Louis, is almost finished. The latter tank is forty feet in diameter and will have a pool of water five feet deep for salt water fish.

A lake where fishermen may angle for rainbow and river trout amid rustic surroundings, although World's Fair crowds will be only a few yards away on all sides, will be a feature of the fish and game exhibit which Missouri will have at the Fair. It is the plan of J. H. Ridgway, superintendent of forestry, fish and game for the Missouri commission. The lake will be just west of the Forestry, Fish and Game building, and near the Administration building. It will be 200 feet long and fifty feet wide, surrounded by a wooded park, which will shut out a view of adjoining grounds and buildings. A clubhouse will be erected on the shore and Missouri game will roam through the woods. A fleet of skiffs will be placed on the lake for the benefit of fishermen. Mr. Ridgway proposes to stock the lake with so many rainbow and lake trout that the sport will be first class. He believes that as a result many Fair visitors will bring fishing tackle, and, when they are tired of sightseeing, spend a few hours angling on the lake.

Dr. Carleton H. Bean, Chief of Forestry, Fish and Game, received word that the aquarium of Pennsylvania's live fish exhibit had been shipped and would soon arrive in St. Louis. This exhibit will cover a space of 275 feet long by 34 feet wide.

There will be two sets of tanks for the live fish, storage tanks under the main floor and pressure tanks up near the roof. The latter have been finished and the former soon will be. The water is kept cold in the storage tanks and pumped when needed up into the pressure tanks from which it flows into the aquariums.

W. L. Crighton, advertising manager of the Intercolonial & Prince Edward Island Ry. of Canada, the government road, visited St. Louis recently to let the contract for the installation of the exhibit of the railroad company in the Palace of Forestry, Fish and Game. The railroad has two big allotments of space, close to those of Minnesota and Missouri. Here are to be shown in tanks the Restigouche salmon and the Bras d'Or lake trout, for which Canadian streams are famous. The latter fish reaches a weight of thirty pounds, while the former has been taken as heavy as

fifty pounds. It is proposed to show some large specimens of these fish.

Among the California exhibits will be seen a large case of flies sent by the San Francisco Fly-Casting Club. This collection will be a better one than took first prize at the last Paris Exposition.

This exhibit of flies is practically a work of art and was made by John Benn, than whom there is probably no better or more artistic fly-tier living today. Mr. Benn's productions are the prized selections of Coast anglers—many of his patterns being looked upon as second to none. Mr. Benn is a skilled angler and his flies are the combined product of experience, tradition and a naturally artistic intuition.

AT THE TRAPS

The Vallejo Gun Club will tomorrow hold the initial club trap shoot for the year.

The College City Gun Club, weather permitting, will hold the postponed first regular club shoot for 1904 tomorrow.

The second regular club shoot will follow, as per schedule, on Sunday, April 8rd.

The Millwood Gun Club initial shoot for this season will take place on the Mill Valley trap grounds tomorrow.

Fred Gilbert is certainly a wonder with the shotgun. At Seneca, Kansas, he won high average by breaking 349 out of 365 targets. Then not content with that he defeated Mr. Clayton, the challenger for the Wyeth Trophy, by killing 98 out of 100 live birds from the 33-yard mark, Clayton killing 96.

The Seattle (Wash.) Rod and Gun Club recently elected officers for the coming year, as follows: President, Wm. Stewart; Vice-President, Dr. P. A. Purdy; Secretary and Treasurer, Bige Hall; Field Captain, E. E. Ellis. The organization held its first medal shoot March 20th.

The Capital City Blue Rock Club, reorganized and with increased membership, will hold its first shoot of the season at the Kimball & Upson Company grounds at Agricultural Park, Sacramento, tomorrow.

Interest in blue rock shooting has greatly revived. Clubs have been or are forming at Auburn, Newcastle, Ophir, Rocklin, Live Oak, Marysville, Gridley and other interior points.

The Kimball-Upson Co. northern championship medal and trophy for the best team is now held by Gridley, and shooters of that burg will defend the honor for 1904 against all comers.

Rocklin will have about fifty members in its gun club, some of them superior trap shooters, and it expects to develop several more.

The following is a list of the shooters enrolled with the Capital City Club as recorded to this time at 609 K street, where further names can be enrolled:

Dr. Atkinson, F. B. and E. D. Adams, J. M. Blair, J. C. Burr, J. Frank Brown, Thomas Berkey, H. Blomdell, Al Booth, C. Bungartel, J. C. Cotton, Robert Callahan, James Contell, C. C. Cotter, Captain Cooke, J. Casey, George Chapman, H. Davis, Dr. E. C. Duell, J. H. Durst, C. C. DeMerritt, Harry Den, E. C. Englehardt, L. Faure, James Friel, Al Folger, W. Flint, E. Fessiel, W. E. Geary, J. Guisto, B. H. Gallup, J. R. Grubbs, J. Grubler, E. C. Griffin, W. Glacken, W. Grieves, John Haley, W. H. Harrison, J. R. Hughes, J. W. Hughes, T. B. Hall, O. Heilbron, W. C. Hendricks, E. W. and G. Jones, A. Just, A. Kaufman, Joseph Horn, F. F. Lusk, H. McWilliams, C. Matthews, C. E. Maxwell, W. E. Mathews, C. Morgan, Joseph Marty, F. W. Newbert, D. E. Newbert, W. E. Newbert, George Neale, William Northing, F. O'Brien, C. A. Palm, C. L. Phillips, W. Peck, J. N. Phillips, F. J. Ruhlster, Fred Raschen, F. D. Ryan, John Russen, Dr. Shaw, T. Shore, P. S. Sanders, G. Sherman, E. Skinner, O. L. Stephenson, G. Strover, Sam Smith, L. H. Stummiller, C. Shaffer, H. Trumpler, L. S. Upson, Mr. Vetter, John Wunder, Dr. Weldon, W. D. Wyatt, A. Wolf, F. Wright, W. Washburn, L. T. Weber, George Wittenhrock, G. Watson, W. Weisman, Dr. Tebbets, H. L. Yardley, F. C. Yoerk, George Zentcroft.

Despite rather unfavorable weather conditions prevailing during the Golden Gate Gun Club shoot at Ingleside last Sunday, two score of shooters lined up for participation in the club card of regular events.

Among the straight scores in the 25 target races were those of M. J. Iverson (2), C. C. Nauman and M. O. Feudner. In the 15 target race, Nauman, Sheard and Wilson made the only clean strings. The winners in the various races were:

Medal shoot—Champion class, Nauman first money, A. J. Webb second money. Otto Feudner tied Webb for second money but left the grounds without shooting off the tie. First class, M. J. Iverson, first money. E. D. Gamble, second money. Second class E. Bowen, first money. H. Klevesahl, second money.

Consolation race—Champion class, M. O. Feudner, first money. Nauman, Webb, Wilson and Ed Schultz divided second money. First class, Iverson, first money. W. S. Wattles, second money. J. Birmingham, Jr., R. C. Reed and E. Klevesahl divided balance of purse. Second class, H. Klevesahl, first money. Jacobson, second money. B. Patrick and Dr. Sylvester divided balance.

In the second event, for \$150 purse, the winners will be determined at the end of the seven club shoots. The amount will be divided in five equal purses—\$30 for each shoot, 2 moneys, 60 and 40 per cent.

The Re-entry race is shot under sealed conditions. The prize is 2000 loaded shells—four lots of 500 each. Competition must be in all of the seven club shoots for a chance to win one of the prizes. Winning scores will be announced at the end of the season.

Six contestants entered in the Hibbard trophy shoot, open to last year's club members only. Ed.

Schultz, a new member made the highest score, 45 out of 50 targets. The other scores were E. J. Forster 44; M. J. Iverson 41; E. Klevesahl 42; G. Gibson 36. Forster won on the shoot off.

Harvey McMurchy, of Fulton, New York, J. Magistrini of Sacramento and F. W. Sheard, shot as guests of the club. Among the other out of town shooters were: J. Birmingham, Jr.; J. C. F. Hall and Leo Kincannon of Pinole.

The summary of scores in the different events follows:

Champion class—	Medal Shoot 25 birds	\$150 Purse 25 birds	Consolation Race 25 birds	Re-Entry Race 15 birds
Nauman.....	55	21	23	15
Webb.....	54	21	23	14

The Grand Prix du Casino at Monte Carlo, the greatest event of the trap shooting world, was won this year by an Italian, Signor Schianini, making the ninth victory for Italian representatives since the institution of the event. The winner killed 12 straight, while Watson, the best of the English competitors, missed his 12th bird. Besides a handsome silver center piece and two end pieces for the table, the winner received a little less than \$5000 in cash. Second, third and fourth money, totalling about \$4750, was divided between Marquis Villaviciosa, a Spaniard, and M. M. Tavernost and Gilles, Frenchman. Watson missed another bird in the shoot-off and got nothing. Conditions of the shoot and previous winners:

Grand Prix du Casino of 8 sovs. each, with 800 added to a work of art; second receives 160 sovs. and 25 per cent of the entries, third 80 sovs. and 20 per cent, fourth 40 sovs. and 15 per cent, the balance to the winner; 12 birds—3 at 26 metres (about 28 1/2 yards), 9 at 27 meters; last year's winner stands back 2 metres, previous winners stand back 1 metre. Winners of the Grand Prix:

- 1872—Mr. G. L. Lorillard (American).
- 1873—Mr. J. Lee, V. C. C. B. (English).
- 1874—Sir Wm. Call, Bart. (English).
- 1875—Capt. Aubrey L. Patton (English).
- 1876—Capt. Aubrey L. Patton (English).
- 1877—Mr. W. Arundel Yeo (English).
- 1878—Mr. H. Cholmondeley Pennel (English).
- 1879—Mr. E. R. G. Hopwood (English).
- 1880—Count Michel Esterhazy (Hungarian).
- 1881—M. Godfrey Camaner (Belgian).
- 1882—Count de St. Quentin (French).
- 1883—Mr. H. J. Roberts (English).
- 1884—Count Caserta (Italian).
- 1885—M. Leon de Dorlodot (Belgian).
- 1886—Signor Guidicini (Italian).
- 1887—Count Saline (Italian).
- 1888—Mr. Seaton (English).
- 1889—Mr. Valentine Dicks (English).
- 1890—Signor Guidicini (Italian).
- 1891—Count Luca Gajoli (Italian).
- 1892—Count Trauttmansdorff (Austrian).
- 1893—Signor Guidicini (Italian).
- 1894—Count Zichy (Austrian).
- 1895—Signor Beauvanti (Italian).
- 1896—M. Jaurnu ("M. Galfond") (French).
- 1897—Signor G. Grasselli (Italian).
- 1898—Mr. Curling (English).
- 1899—Mr. Mongorge (French).
- 1900—Count O'Brien (Spanish).
- 1901—M. Gugnt (French).
- 1902—Signor Grasselli (Italian).
- 1903—Mr. Le Pellier Johnson (English).
- 1904—Signor Schianini (Italian).

The Big Basin Park.

The Commissioners for the Big Basin Park have received returns concerning the recent rainfall in the Big Basin and these reports amply justify the name that has been attached to the region. In a period of ten days the clouds poured forty-eight inches of water into the basin. In fact, as the rain gauges were overflowing every time when a record was taken, it is certain that the total rainfall exceeded four feet in less than a fortnight. This may explain how the great trees the sempervirens, have retained their thrifty growth, some of them having more than 4000 years of existence it is claimed. Now the soil is in

prime condition to nourish the mighty roots of the sempervirens trees for the coming season, the first year when their full enjoyment has been thrown open to the public since originally they fell into private ownership.

The several creeks that run through the Big Basin Park are hankful and scores of miniature waterfalls are adding picturesqueness to the scene. Last week W. H. Mills, one of the Big Basin Park Commissioners, made the announcement that only the backward season and the wet condition of the parks are in the way of anyone who wishes to go in and enjoy camp life. Certain sections have been set aside as camping grounds, so situated that danger from fire will be obviated. In anticipation of the early opening of the season the Commissioners have authorized the warden to construct a log cabin for his own use at the entrance to the park. Here every visitor must register. At the next meeting of the Commission it is probable that rules will be considered for the regulation of visitors.

Santa Cruz county has authorized the construction of a good carriage road, with easy grades, into the Big Basin and this will be completed by the middle of the coming summer. The Commissioners will have dams placed on the east fork of the Waddell Creek to make a space half a mile long of slack water, upon which boats may be rowed for a distance of half a mile in a beautiful and cool natural arbor under trees. This may lead to the construction of dams on the other streams. Such a method of providing room for canoeing is common in the great parks of Europe. It will be incumbent upon the Commission, however, to place fish ladders at each of the dams so constructed. At what is known as the "Governor's camp" there will be established a large stable. As much as possible of the dead and dry timber in the Big Basin Park will be cut and the underbrush will all be cleared out and disposed of safely this season.

Duck Hunting with an Automobile.

Some very unsportsmanlike work was done on a frozen flat near McPherson, Kan., last month with the aid of an automobile. A report states that a party consisting of three gunners and the chauffeur went duck hunting in the machine. They rode to a duck haunt on a flat near the city. On the flat, extending some three or four miles, could be seen large bunches of ducks sunning themselves upon the ice. A few days of cold weather had frozen the shallow water to the bottom, so there was no danger of breaking through and getting stuck in the mud and damaging the costly auto. The adventurers steered on a half circle toward the nearest flock of ducks (spring) sitting on the ice, dotted with bunches of dead rushes. At slow speed, a distance of not over one hundred yards from the ducks without disturbing the unalarmed flock. Heading then directly toward the game, and giving the machine all the speed possible, a thunderous rush was effected right into the midst of a thousand ducks, which, bewildered and seemingly baffled by the sudden approach, scattered like a heavy of quail in all directions. Bringing the auto to rather too quick a stop had the effect of making it slide and twist uncomfortably until the momentum had been spent; but, nevertheless, three guns spoke quickly six times and four fine spring were gathered. The same tactics were repeated a number of times during the afternoon on the same pond, and the count at the end of the adventure footed up forty-three. There may have been some excitement in this shoot, but sportsmen generally will condemn it.

Herman F. Muller, one of the charter members of the San Francisco Fly-Casting Club and a popular and enthusiastic comrade among his fellow sportsmen, passed away last Saturday. Mr. Muller had been ill for some time past, and had to retire from active business. The end while not unexpected was somewhat sudden. The funeral ceremonies were conducted from the Masonic Temple, where there was a large attendance of business associates and fellow anglers who gathered to pay their last respects to one who had in life been a sterling business man, a genial companion and an enthusiastic angler.

A story in an Eastern exchange descriptive of the possibilities of the sport of bear hunting within a comparatively short distance of New York reminds us that we are not a whit behind the Empire city in that respect. For black bear hunting near Cloverdale has been a popular amusement of late with some of the sportsmen who reside in the north end of Sonoma county.

Recently Charles and William Adams of Cloverdale succeeded, after a hot chase through the hills of that county, in dispatching a large black bear and two cubs. In referring to the story of the hunt Charles Adams said that a laborer who lives on the Tyler place, near the headwaters of the Pieta creek, informed him that there were some "blacks" in the vicinity which were doing some damage to hogs and sheep and that their biding place could be found in a large gulch on the Tyler place. The Adams brothers with Mike Tyler started out with a small pack of hounds, trained to the chase, for the canyon where bruin was in biding, and the dogs were not long in cover when they gave tongue. The bears, after a run of about two miles, were "treed" and then the fun began. Charles Adams put the old she bear out of commission on the first shot and Tyler managed to kill both the cubs which weighed fifty pounds each. The mother of the youngsters scaled 220 pounds. On the day following the hunt the sportsmen went after another bear which had taken up its residence in an adjoining ranch, but although they found several fresh tracks, bruin managed to keep out of range of rifle shot.

An all this not more than six hours journey from this city.

The Mountain Quail.

Here we have another strikingly handsome game bird, not so numerous as the valley quail and presenting no greater attractions to the lover of the dog and gun, yet even handsomer and more imposing in its appearance. In size the mountain quail is a trifle greater than the Bob White quail, that is to say, it stands taller and has a racier outline, though in reality the two are about the same in actual bulk of body if the larger specimens of the Bob White quail be used in comparison. The mountain quail again offers the same symphonies in slates and blues, and blues and reds and cinnamons which we have noted in valley quail, and its long, backward sweeping double plume gives it a yet more stately air. It is very well worth pursuit, even though that pursuit means hard climbing and indeed, perhaps, hard running.

Just as the valley quail is frequently found up in the mountains, so is the mountain quail often found in the lower or valley districts, these, however, more often at the northern extremity of its range.

In the southern portions of its habitat it rarely descends to the lower levels, but keeps well up on the sides of the mountains. In the more humid regions of Oregon or the northern coast ranges it comes down into the heavier cover. Customarily it is found in the sort of cover where one is more apt to be hunting with a rifle than with a shotgun, far up on the mountains towards the timber line, where one is looking for elk or deer rather than the painted little bipeds with twinkling legs.

The mountain quail does not assemble in large bands as the valley quail, and one is more apt to find two or three coveys together than several hundreds or thousands of birds, as might literally have been true regarding the bands of the valley quail in the early times. The species is to-day more numerous in upper California and in Oregon, but it does not constitute so great and constant a factor of sport as the valley quail.

The pursuit of this bird is similar to that of the valley quail, although it may lead one into even rougher country and offer him shooting with even a greater multiplicity of difficult angles. The mountain quail does not lie readily to the dog, and if the latter is able to secure a point it is more a matter of chance or good luck than to the fact due to the habit of the bird itself. When a number of these birds are discovered they may wait for a few moments to determine the intentions of the observer, but once having made up their minds in that regard, they take to their heels as blithely as any denizen of the dry Southwest, and merry enough is the chase they will lead through sage or manzanita. It rises wild, is restless and noisy after once being put up, and even in good cover does not often lie to the dog. In general terms it is a sprinter and not a flier. On the wings its problem would not prove difficult of mastery for the steady wing shot were it not for the fact that its flight is rarely upon the level, but nearly always up or down hill. The bird is hard and tough, being in continual good physical training from its pedestrian exercises, and it requires to be well centered before it is knocked down. A modified choke with a regular distribution is a good gun, although many prefer the open cylinder. No. 8 shot will serve. It should be remembered that a quail, be it Bob White or California quail, is never so far away from the gun as it seems to be, and the main thing is to use the proper load and to get the load upon the bird, the distance rarely being so great that the loads will not have abundant striking quality left and a close enough grouping of shot to account for the bird. For the rest, the gunner who wishes a good bag of the mountain quail or plumed partridge, must resort to much the same methods as those enacted in the pursuit of the valley quail. So far from being cautious and deliberate in his approach, he should hustle up as fast as possible, harry the birds hard as he can, fire over and scare them as much as he can, and then trust to luck that a few of them may lie close enough to give him a point, or if not a point at least a shot or so. This is sport almost as exasperating as gratifying until one gets into the way of it and learns to like it, and for a time at least the sportsman is apt to look upon the trophies of this literal chase with a feeling in his soul rather of revenge than of content. It is harder work, this pursuit of the California birds, than the leisurely walking across the broad fields on the northern timberlands or riding horseback across the piney woods or cotton plantations of the south.

It is keener shooting and harder work, and since these two qualities are not in the least to be despised, neither should the mountain quail be held in anything but respect. The species is not so abundant as formerly, but it is more prized now than formerly, better protected, better understood and more properly appreciated.

The mountain quail. Common names: The plumed partridge, the mountain quail. Description: Head marked with a crest of two long feathers, extending backward. The front portions of the body color grayish, the upper portion olive with rufous shades, the latter extending up the neck into the crest of the head; beneath the eyes and on the throat color deep orange chestnut, bordered around the orbits by black; the dark chestnut color of the throat is bounded anteriorly by white, and there is a short white line back of the eye. The posterior half of the body beneath, white. A patch of orange chestnut marks the anterior portion of the lower body color. The flanks show the same chestnut brown. The sides of the body are marked with black and white bands, the black tinged with chestnut. The under tail feathers are black, streaked with orange chestnut.

The female differs in having the crest slightly shorter.

Length, 10.50; wing, 5.00; tail, 3.25; weight, 8 oz.

There are ten varieties which practically merge.

The special features of the variety pictus are: Pure ash confined to the pectoral region; the russet-brown or rusty olivaceous of the upper parts covering the whole neck and crown; forehead entirely ashy. Habitat Washington, Oregon and upper coast region of California. Special features of the variety plumiferus are: Pure ash covering whole pectoral region and crown, nape and upper part of back; the grayish-olivaceous above confined to the posterior parts. Forehead distinctly whitish. Habitat, the Sierra Nevada and Southern California, to Cape St. Lucas.

Range: The mountain ranges of Nevada, California and Oregon, and eastern slopes of the foothills of the Sierra Nevada. Occasionally met with in Washington. Formerly abundant in the Willamette valley, where the bird was introduced. Is found in parts of Nevada. The species is much more rare than the California or valley quail.

Habits: In habits this bird resembles the valley partridge, yet it is not so much disposed to band up in large flocks as is the California or valley quail, and it is shy by habit, resorting principally to the dense chapparal and confining its range to the hills and mountains. The assembly call of this bird, when its bevy has been scattered, resembles that of the hen turkey. Its alarm call something like that of the Virginia quail. The male bird has a crowing note which sounds something like "Koo-koo-koo." The egg is a pronounced oval, larger than the egg of the Bob White. Color, rich cream with reddish shade. Not spotted.—E. Hough in *Texas Field*.

The season for wild goose shooting is now in full blast in Colusa, Glenn and Sutter counties and will last until April 25th or about May 1st, when the birds take their departure for the far north. The best locations, say the north counties sportsmen, are on the plain lands where bogs of 200 or 250 have been made in a day by a single gun.

The sportsman is placed in a "hole" dug in the open land with several live decoys about him, in addition to numerous dead stools. The flight shooting of these birds, says Willows sportsmen, gives the greatest sport in the world, as well as having the utility of reducing the marshes of a pest to the wheat grower.

The entire expense of a day's shoot as described is from \$10 to \$15, says a card issued by sportsmen at Willows, who are inviting everyone to come up and engage in goose hunting.

Coming Events.

Rod.

March 26—Saturday Contest No. 3. Classification Series, Stow lake, 2:30 P. M.

March 27—Sunday Contest No. 3. Classification Series, Stow lake, 10 A. M.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 1-May 1—Open season for shrimps.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun

March 27—Millwood Gun Club. Blue rocks. Mill Valley.

March 27—College City Gun Club. Blue rocks. North Berkeley

March 27—Capital City Blue Rock Club. Agricultural Park, Sacramento.

April 3—California Wing Club. Live birds. Ingleside.

April 3—College City Gun Club. Blue rocks. North Berkeley.

April 10—Union Gun Club. Blue rocks. Ingleside.

April 10—Empire Gun Club. Blue rocks. Alameda Point.

April 17—Golden Gate Gun Club. Blue rocks. Ingleside.

May 23, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.

July 1-Feb. 15—Dove season open.

Nov. 1-July 15—Deer season closed.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

March 22, 25—Buffalo Kennel Club. Buffalo, N. Y. S. P. White, Secretary.

March 23, 30—Brantford Kennel Club. Brantford, Can. C. J. Page, Secretary.

March 30, April 2—Vancouver Kennel Club. Vancouver, B. C. P. J. Shields, Secretary.

March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.

April 7, 9—Victoria Kennel Club. Victoria, B. C. T. P. McConnell, Secretary, Victoria, B. C. P. K. L.

April 13, 16—San Francisco Kennel Club. Eighth annual show. Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.

April 13, 15—Seattle Kennel Club. Seattle, Wash. Charles McAllister, Secretary. P. K. L.

April 20, 23—Bay State Co-operative Bench Show. New Bedford, Mass. T. Middlebrooke, Secretary.

April 21, 22, 23—Portland Kennel Club. Portland, Or. T. E. Daniels, Secretary. P. K. L.

April 27—California Collie Club. Oak Grove, Lawrence, Santa Clara Co. P. K. L.

April 28, 29, 30—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary. San Jose, Cal. P. K. L.

April 1—Los Angeles Kennel Club. A. K. C.

Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas. Mortimer, Superintendent.

Oct. 5, 8—Spokane Kennel Club. Spokane, Wash. P. K. L.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. J. Roger McSherry, Secretary.

Trade Notes.

We direct the attention of our readers to the Ladin and Rand Powder Company's announcement on page 20. Jack Fanning and W. A. Robertson are two shooters who are well known to the sportsmen of the Pacific Coast, their performances with L. & R. have been notable ones.

For spring shooting no arm appeals to the sportsman more than the 22 caliber rifle. Among arms of this type the Savage 22 Caliber Repeater is different from any other rifle of its kind. It is a clean cut little

gun using the best of the 22 caliber ammunition—the short, long and long rifle cartridges all in the same arm. Its beauty of outline and finish will always be a source of pleasure to the owner. Perhaps the two strong points of the Savage are accuracy and the smooth and easy manner in which it works. This arm has met with a great success and there is no reason why it should not. Savage rifles, the 22 in particular, are well exemplified in the phrase used by the makers. "Savage Quality" is a commonplace term but means everything to a shooter. Being honestly made Savage products are sold by the manufacturers under the strongest guarantee.

Mention the BREEDER AND SPORTSMAN and write the Savage Arms Company, P. O. Utica, N. Y., today for catalogue. See page 14.

Fred Gilbert, the champion trap shot of 1902 and 1903 is doing wonderful shooting this year. Out of 1000 targets shot at in nine events he broke 962 or 96.2-10%. Shooting the "Old Reliable" Parker.

The Sunny South Handicap Amateur Average was won by M. E. Atchison with his Parker gun.

Dr. T. W. Morfrey holds the championship of New Jersey at live birds won with the Parker.

Walter Huff shooting at 100 targets at Macon, Ga., broke 96. At Columbus, Ga., broke 94 and at Americus, Ga., broke 96. Such scores as these speak volumes for the Parker gun.

Out of 1000 targets shot at, 962 (96.2%) were broken. Mr. Fred Gilbert of Spirit Lake, Ia., shooting Winchester "Leader" shells, has done some wonderful shooting at the inanimate target tournaments he has attended so far this year. The story reads thus:

	Shot at	Broke
Houston, Texas.....	January 26, 1904.....	125 133
Dallas, Texas.....	January 27, 1904.....	100 94
Texaskana, Texas.....	January 29, 1904.....	100 97
Shreveport, La.....	February 1, 1904.....	100 92
Shreveport, La.....	February 2, 1904.....	100 94
Camden, Ark.....	February 3, 1904.....	125 122
Pine Bluff, Ark.....	February 4, 1904.....	100 96
Pine Bluff, Ark.....	February 5, 1904.....	125 122
Little Rock, Ark.....	February 7, 1904.....	125 122

At the Union Gun Club shoot held Sunday, March 13, '04, at Ingleside, the only straight run of 25 in the club match was made with U. M. C. "Magic" shells, by J. C. F. Hall, of Pinole, Cal. In the medal event the possible 25 was made with U. M. C. "Magic" shells by the following shooters: Thos. R. Barney, E. L. Gamble and Dr. E. G. McConnell, of San Francisco; C. Stanley Fish, of Martinez, and W. Hanson of Pinole. In a five-pace double and ten-single race, Clarence Nauman scored straight on doubles and missed one in single birds, using U. M. C. shells. A list of the shooters participating with guns, shells, powders and loads used in the following:

Out of 57 contestants, 42 used U. M. C. shells.

The Jerseys at St. Louis.

There has been much said recently in the newspapers and elsewhere about the Jersey cows that have been sent to St. Louis, preparatory to the great dairy cow demonstration there this year: the fabulous prices at which they are held by their owners; how they were shipped in padded palace cars, with attendants; how they were being trained and pampered for the occasion; and a lot of other misleading nonsense, all calculated to do the breed an injustice, writes W. Gettys of Tennessee to the *Country Gentleman*. The only object the American Jersey Cattle Club had in this enterprise was again to demonstrate, in a public way, the superiority of the Jersey cow for dairy purposes, and to do it with such cows and along such practical lines that it would be an object lesson to the intelligent dairymen of the country. The selection of the cows and their treatment since they were sent to St. Louis have been with this end in view. Having assisted in the selection and assembling of these cows, and having recently inspected each of them carefully in their barns at St. Louis, I am presumed to have a fair knowledge of the merits of the cows themselves and of their present treatment while awaiting the test. The object of this letter is to disabuse to some extent the mind of the reading public of the false impressions made by the exaggerated statements regarding them, and to temper somewhat, if possible, the high expectations of some of the over-zealous friends and breeders of the Jersey cow, as to what she is likely to do in this great dairy demonstration.

The cows were selected by a committee appointed by the club for that purpose. That committee, ignoring all question of pedigree, ownership, families, and all else but intrinsic merit, sought such cows as would in its opinion do the best work under the trying conditions that would surround them during the test. The cows, having been found, were shipped by the ordinary freight and express cars commonly used for such purposes. There are now in the St. Louis barn, furnished by the exposition authorities, 40 Jersey cows, candidates for the dairy test, which begins May 15, 1904, and lasts 120 days. They are nearly all dry now, but will drop their calves in the barn before the test begins. Out of this whole bunch of cows, 25 of the best will be selected by the club's committee and be entered for the test. They are temporarily lent to the club for this purpose by the breeders of all sections

of the country, except that the committee was, by order of the club and the United States authorities at Washington, limited to the territory lying above the quarantine or "fever line," although there are a few there from Northern Texas.

The selecting committee found no scarcity of worthy cows in the country, but it did find that it was no easy task to pick up 50 such cows as it needed—that were of the right age, and bred to freshen at the proper time. No pretensions are made that those selected are the best cows of the breed in the country or that they will prove themselves "record-breakers" in the test; but it is believed that they are average representatives of the good herds furnishing them—plain, practical, working cows—such cows as are capable of doing creditably a great deal of hard work under adverse surroundings. They are just the kind of cows that the breeders and dairymen of the country need and are capable of huying.

There is only one imported cow in the lot, the others being home-bred. Aside from this imported cow, a good one, but no better than many of the others that were sold at one of Mr. Cooper's sales for about \$1600, none of them have changed owners lately at fancy prices. It is doubtful if there is a single cow in the barn that would bring, at a public sale today, more than \$500—the majority of them perhaps not over \$200 to \$300—prices that conservative breeders are in the habit of paying for first class cows from well known breeding establishments. One or more such cows may be found in nearly every working dairy herd in the country.

The Jersey Cattle Club and the breeders who are acquainted with the unnatural environments of these public tests do not look for any phenomenal records to be made at St. Louis. The opportunities that will be afforded are all against such expectations. The cows will be tied by the neck and stand on the barn floor for six months, without any outdoor life or exercise; with no grass, and probably without other green food than corn ensilage, which itself may prove a dangerous food except in very limited quantities, during the hottest weather, annoyed by swarms of flies and thoughtless visitors, and enervated by strenuous work and intense heat. However, the same hard lot will fall to the other breeds alike, and the Jersey will have to take her chances with the others. The cows at the St. Louis barns are being fed and cared for just as any up-to-date breeder and dairyman should treat his cows—no better, no worse. The barns provided by the exposition authorities are not all they should be, but are as good as could be expected under the circumstances. Some improvements for the comfort of the cows and the convenience of the test are needed, and doubtless will be made. While the Jersey Cattle Club, which bears the expense, and the breeders who furnish the cows, do not anticipate any phenomenal records to be made at St. Louis, in comparison with the work the same cows could do at home, they do expect the Jersey cow to repeat there that which she demonstrated clearly at Chicago ten years ago, namely, the fact that she is the most economical dairy cow in the world.

A Girl Who Breaks Calves.

Miss Ethel Akin, twelve years old, has chosen her profession and is making a success of it. Also she is amusing herself, her little sister Josephine, six years old, and Miser.

Miser is the dog in the case. Miss Akin breaks calves to harness, and drives them until they get to be too big. She used to break Shetland ponies, but now, not having any Shetland ponies to break, she has turned her attention to calves.

Three years ago Miss Akin moved, with her parents, from Los Angeles to a ranch,

two miles from Downey. Previous to that time she had broken several ponies to drive and be ridden, and has had remarkable success with them. There were no ponies there that needed breaking, so Miss Akin began to grow restless and occasionally had ennui. Then she happened to think that she might try breaking a calf to harness.

She got the men folks to fix her a cart and harness and started in on a calf that had been given to her and whom she named Johnnie Dunaway Akin, which is a funny name for a heifer calf, of course.

Johnny Dunaway Akin was only two months old at the time. Now she is twenty months old and one of the best roadsters in that section of the country. Every day, except Sundays, Ethel hitches her up to the cart and drives her to town and back for the mail and groceries. Sister Josephine and Miser go along for company and the fun. With these three in the cart Johnny Dunaway Akin goes trotting along at a good gait.—*Los Angeles Herald*.

All Horse Owners

who have, or fear trouble from Spavins, Ringbones, Curbs, Splints and all other forms of Lameness should buy and keep constantly on hand a supply of Kendall's Spavin Cure. It never fails in such cases.

Humboldt, Ill., Feb. 16, '03.

Dr. B. J. Kendall Co.,
Gentlemen—I will say that I am a great friend of Kendall's Spavin Cure and am scarcely ever without it, also that I have used it with greater results than any medicine I ever used. No man ever spoke so highly of it. Enclosed find a two cent stamp for which please send me your book, "A Treatise on the Horse and his Diseases."

Faithfully yours,
F. W. ROBERTS.

Price \$1; six for \$5. As a liniment for family use it has no equal. Ask your druggist for KENDALL'S SPAIN CURE, also "A Treatise on the Horse," the book free, or address

DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

NEW ENGLAND

Trotting Horse Breeders Association BOSTON, MASS.

(Member of National Trotting Association.)

GRAND CIRCUIT MEETING AUGUST 22-26, 1904.

READVILLE TROTTER PARK

EARLY CLOSING PURSES:

No. 1.	\$ 5,000.	The Blue Hill, 2:30 Class, Trotting.
No. 2.	15,000.	The Massachusetts, 2:10 Class, Trotting.
No. 3.	3,000.	The Ponkapoag, 2:14 Class, Trotting.
No. 4.	3,000.	The Tyro, Three-year-olds, 2:25 Class, Trotting.
No. 5.	5,000.	The Norfolk, 2:24 Class, Pacing.

Conditions National Trotting Association Rules to govern, except that in three-in-five races, unfinished in three heats, all horses not standing for any part of the purse, will be ruled out. Hopples barred.

Entrance. Five per cent of purse and five per cent additional from the winners of each division of the purse, but nominators will not be held for forfeit falling due after they have declared out in writing.

Forfeits will be due April 11, May 11, June 11, July 11 and August 8, and in amounts as follow:

Classes Nos. 1 and 5, \$20, \$30, \$45, \$75, \$80.

Class No. 2, \$150, \$150, \$150, \$150, \$150

Classes Nos. 3 and 4, \$15, \$25, \$30, \$35, \$45.

Terms of Entry. Except in Class No. 2, the Massachusetts event, horses to be named at time of first payment. In Class No. 2, to be named August 11, and have been eligible April 11.

In compliance with the rules of the National Trotting Association, an entrance fee will be required for each horse named.

ENTRIES CLOSE WEDNESDAY, APRIL 11, 1904.

Applications for Entry Blanks, requests for information, and all entries to be made to the Secretary.

JOHN E. THAYER,
President.

C. M. JEWETT, Secretary.
READVILLE, MASS.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Carise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windruffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried. Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

W. B. Eddy & Co., Whitehall, N.Y.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Gombault's Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

How to Care for the Dairy Cow.

We must recollect that our cow is an artificial creature, which takes our rough feeds and transforms them into a palatable finished product, so we must see that she has plenty of raw material with which to do our work. She must be fed and watered regularly, so that she will not waste time and energy worrying when her next feed will come. She should always be treated with kindness. The dairyman should never carry the cow with the pitchfork nor pound the milk out of her with the milk stool. Whenever the attendant is in a swearing mood he is not a fit companion for the dairy cow, and he should at once "go back and sit down" until he is in a better humor. He should never swear in the cow stable any more than in the kitchen in the presence of his wife.

There are many men who still follow the old time custom of haying all their cows becoming fresh in the spring. In our own work we find that we can secure at least 1000 pounds of milk per cow more by having them become fresh late in September or October. We can then carry a good flow of milk through the winter into spring with its green feed, giving a very even continuous flow nine or ten months. Then the cow has a much needed rest just when heat, flies and short pasturage cuts the milk flow most.

As to feeds and how to feed, each person should study a little for himself. If we are after the greatest flow of milk, irrespective of cost, we would say wet or steam all dry feed and grind all grain. It is a matter of doubt with us as to whether it pays to grind feed for a healthy, active cow. The returns, however, may not be quite so large when the feed is not ground.

The cow has a good sized dioner basket and we prefer to feed only twice a day, leaving her free to rest and rechew the food already given her. She soon learns when to expect her food and is content until near the time.

As to her care before calving. Her food should be somewhat reduced in quantity, and of a cooling, laxative nature. Roots, silage, alfalfa hay and shredded corn fodder are excellent for roughage. Oats, bran or a little oil meal are good as concentrates. After calving only tepid water should be given for at least a couple of days. Keep her in a dry, warm, boxed stall and see that she gets no sudden chill for several days.

When the dairyman has gone to the expense of cows, stables, land, utensils, etc., for dairy work, he must keep one principle well in mind. That is, that about sixty per cent of all the feed the cow can eat goes to her maintenance, and that he must make his profit on the balance of what she eats. With this in view, he can very readily see that he must be liberal with his feed if he will make the most from his investment. He should watch his feeding very carefully and know of a certainty that he is feeding all his cows well stand. By carefully weighing his milk at every milking, then by carefully weighing or measuring the feed, he can increase his feed just so long as there is a corresponding increase in milk, but he should watch closely for the dangerous point of over-feeding and drop off a little. He will soon surprise himself with results.—L. D. Stillson.

John D. Meyenberg of the State of Washington, through the inducement of the California Promotion Committee, will shortly begin the erection of a \$20,000 condensed milk plant at Hollister, in San Benito county. Through R. P. Lathrop, a member of the Promotion Committee, the Board of Trade of Hollister gave Meyenberg an ample tract and agreed to sink a well on the site on condition that he started work on the factory within fifteen days. Meyenberg is an expert in the condensed milk business, and the \$2,000 Hollister plant may be the nucleus of a much larger one.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Poultry Pointers.

If the poultry shows have made you dissatisfied with what poultry you have or determined you that you will have fine, thoroughbred poultry or none at all, then be wise and seek quality above quantity.

If you have say \$15 to \$25 to invest put this amount into a pair or a trio and not into a dozen or half a dozen birds.

The one way to buy these is to satisfy yourself that the breeder you propose to give your order to is honest and is a breeder rather than a buyer of the fine show birds he owns.

Then write a letter something like this: "Find enclosed—dollars, send me so many birds. I wish good breeding birds and leave the mating and selection entirely to you."

Now stick to what you write, accept the birds sent, in faith breed them, raise and feed and house the chicks right and after these have reached maturity is time enough to pass judgment.

You won't gain anything at all by writing a longer letter. Yea, what is the sense of writing out the standard description and mailing it along with your order, to a breeder who not only knows said standard in detail, but is fully as well acquainted with many side wrinkles you never even dreamed of.

Put the breeder on his honor, don't tire him with your superior (?) wisdom as evidenced by a lengthy description of what you think you want (and let me whisper, nine times out of ten you would not recognize when you see it), but trust him entirely. You are doing it anyhow, then do it fully and freely and you are almost sure to get the fullest value possible for your money.

If you simply want thoroughbred poultry for eggs and for table purposes, you will be entirely safe by following the same business method of buying.

In a lesser degree the quality versus quantity also applies here. You cannot buy a good milker, nor a good working horse, or a thrifty growing shoat cheap. Neither can you, or should you try, to buy utility poultry "cheap."

In the early fall \$1.00 and \$1.50 each may buy good birds especially of the smaller varieties, of the larger heavier birds, and after two years for all varieties, you cannot get desirable birds usually for less than double these prices.

But as against common dung-hill stock it is money well invested.

But a good start is not the whole thing by any means. Half is the breed, the other half is the feed. "Feed" covers many things: Water, air, room, exercise, grit, shell, food, attention, etc.

If you have no decent room for poultry, don't make a start. Decent room means one hundred square feet for every chicken you propose to keep or raise, three hundred square feet is better, five hundred is not too much.

Chickens kept in a small, usually filthy nearly always so, place and fed on table scraps, etc., are never healthy. Are not fit for food, nor are the eggs they will lay.—Poultry Advocate.

The Panama Canal.

The Panama Canal Commission is preparing for work. The salaries have been fixed at \$12,000 per annum for each Commissioner and \$15 per day additional while on the Isthmus. The canal as planned by the Commission is a lock canal, 150 feet wide on the bottom and 269 feet on top with a minimum depth of water of 35 feet. The length between shore lines is 44 miles and the estimated cost of the work in round numbers is \$150,000,000, not including the \$50,000,000 paid to the French Company and \$10,000,000 to Panama. The distance between San Francisco and New York by way of Cape Horn is 14,840 miles; by way of the Panama Canal it is 5299, a saving of 9541 miles. It is estimated that it will take ten or twelve years to complete the canal.

SAVAGE RIFLES

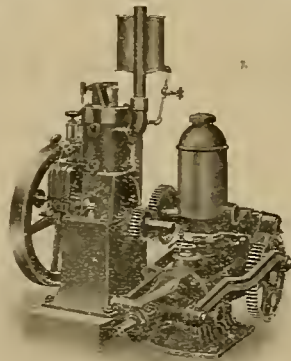

THE 22 caliber is a seven shot repeater, taking the short, long and long rifle cartridge all in the same arm. This model is original in design, reliable in action and shoots with the well-known accuracy of all Savage rifles. Our rifles are made in all desirable sizes from the 22 caliber to the heavy game loads. Catalogue No. 10 is of unusual interest to all sportsmen. Mailed free. Mention this paper.

SAVAGE ARMS CO., Utica, N. Y., U. S. A.
Write BAKER & HAMILTON, Pacific Coast Agents for prices.

Energetic work has been carried on by the Department of Agriculture with the object of controlling as effectually as possible the contagious disease of sheep known as scab. It was determined to co-operate with some of the worst infected States and stamp out the contagion on the premises where it exists and propagates from year to year. Over 16,000,000 head of sheep have been inspected by the department officials, and of these 2,167,002 have been dipped. Results so far have been highly encouraging.

The value of all animals exported from this country during the year 1903 was \$42,551,174. The includes cattle to the value of \$37,725,452, hogs to the value of \$53,180, horses to the value of \$3,142,731, mules to the value of \$354,776, sheep to the value of \$1,153,770, and all others, including fowls, to the value of \$121,265.

This Combination consists of a Hercules 1 1/2 H.P. Engine; a 5x5 in. brass lined double acting suction and force pump with machine cut gears; engine and pump are set on wood platform and securely bolted, making engine and pump self-contained. Equipment includes gasoline tank, gasoline and water pipes and connections, sparking magnet, spark coil, oiler and wrench; capacity, 1,000 to 1,500 gallons per hour raised 75 ft.; net weight 800 lbs.; shipping weight 930 lbs.

THE DETROIT DRIVING CLUB

Announces the Following Early Closing Events
to be competed for at the

GREAT BLUE RIBBON MEETING

JULY 18, 19, 20, 21, 22, 1904.

Entries Close Friday, April 1st

- No. 1—\$10,000, Merchants' and Manufacturers' Stake... 2:24 class trotting, 3 in 5
- No. 2—\$ 5,000, Chamber of Commerce Stake..... 2:24 class pacing, 3 in 5
- No. 3—\$ 2,000, Purse..... 2:12 class trotting, 2 in 3
- No. 4—\$ 2,000, Purse..... 2:09 class pacing, 2 in 3
- No. 5—\$ 2,000, Purse..... 2:17 class pacing, 3 in 5

CONDITIONS.

Entries Close Friday, April 1st, when horses must be named. No nomination will be liable beyond the amount paid in, provided a written notice of withdrawal is received by the Club at the time any payment falls due. The main race of the Merchants' and Manufacturers' and of the Chamber of Commerce Stakes, also Purse No. 5, will be mile heats, best three in five to harness. A horse not winning a heat, or making a dead heat in the first three, shall not start for the fourth; but horses so ruled out shall have a right to a share of the stake or purse according to their rank at the close of their last heat. The Consolation Stakes, and Purse Nos. 3 and 4, will be best two in three to harness.

The Merchants' and Manufacturers' Stake will be divided as follows: \$1500 to the first horse, \$3000 to the second, \$1500 to the third; \$2000 for a Consolation Race, open only to horses that start and win no part of the Main Race to be trotted three days from the date of the decision of the first race, and to be divided \$1000 to the first horse, \$750 to the second, \$250 to the third. In the event of there being less than three horses eligible to the Consolation Race, there will be paid to the fourth horse in the Main Race the sum of \$1000, to the fifth horse \$750, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race.

The Chamber of Commerce Stake will be divided as follows: \$2500 to the first horse, \$1000 to the second and \$750 to the third; \$1000 for a Consolation Race, open only to horses that start and win no part of the Main Race. To be paced three days from the date of the decision of the first race, and divided \$500 to the first horse, \$375 to the second and \$125 to the third. In the event of there being less than three horses eligible to the Consolation Race, there shall be paid to the fourth horse in the Main Race the sum of \$500, to the fifth \$375, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race.

Purse Races will be divided 50% to the first horse, 25% to the second, 15% to the third and 10% to the fourth.

Entrance Fee 5% with an additional 5% from winners, excepting winners in the Consolation Races, from whom no additional fee will be charged. But should there be no Consolation Races, an additional fee of 5% will be charged to winner of fourth money. This Club is a member of the American Trotting Association, also the Grand Circuit, and the rules of those Associations will govern, except where otherwise provided.

Payments in Stake No. 1—\$50 April 1st; \$50 May 1st, \$150 June 2d and \$250 July 4th.
Payments in Stake No. 2—\$25 April 1st; \$25 May 1st; \$75 June 2d; \$125 July 4th.
Payments in Purse No. 3, 4 and 5—\$10 April 1st; \$15 May 1st; \$25 June 2d; \$50 July 4th.

Remember that there are no substitutions in the Merchants' and Manufacturers', Chamber of Commerce or other races; only horses named April 1st can start in any of these events.

In addition to the foregoing events, the Club will probably offer Purse for the following classes: 2:06, 2:08, 2:10, 2:14, 2:16, 2:18, 2:20 Trotting; 2:04, 2:07, 2:11, 2:13, 2:15, 2:20 Pacing.

For Entry Blanks and all information address

DANIEL J. CAMPAU,
President.

W. J. SNYDER, Secretary,
Room 19, Campau Bldg, Detroit Mich.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS AND NEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLINESS quickly disappears.

QUARTER CRACKS AND SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE FOR CORNS, CONTRACTED FEET AND NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND AND GROWS A TOUGH, STRONG, ELASTIC WALL AND HEALTHY FLESH—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CURE FOR THIRUSH AND SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 12½ Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.
Sold by all Dealers in Harness and Tack Goods. If not in stock ask them to write any Jobber for it.

Fourth Payment \$10 EACH

Due and Must Be Paid by

FRIDAY, APRIL 1, 1904.

ON YEARLINGS.

Pacific Breeders Futurity Stakes No. 3, \$6000,
Guaranteed by the Pacific Coast Trotting Horse Breeders Association.

For foals of mares covered in 1903. To trot or pace at two and three years old. Entries closed December 1, 1903. NOTHING MORE TO PAY BEFORE 1905, when your foal can start in the Two-Year-Old division. Stakes divided as follows: \$3250 for Trotting-Foals, \$1750 for Pacing-Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for foals of 1903 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you neglected to name when entries closed, send \$23, with Color, Sex and Breeding of the Foal, on or before April 1st next, which covers payments to April 1, 1905, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

E. P. HEALD, President.

GREAT CLEARANCE SALE

Tuesday, April 5, 1904

CEDAR RAPIDS JACK FARM

Imported Catalan Spanish, Majorca and Mammoth Home-Bred Jacks
and Belgian and Percheron Stallions.

I am striving to make this, my annual sale, the largest one of the kind ever held. I received the following cablegram, which signifies that the new importation of Jacks is in good condition, and in point of merit I know they cannot be equaled:

GRANOLLERS, SPAIN, Feb. 18, 1904.

DE CLOW,
Jack Farm, Cedar Rapids, Iowa.

On road. Three cars Catalan and Majorcas. Best lot
ever shipped to America. ROCKWELL.

My Mammoth Home-Bred Jacks are of the highest quality. I am conducting this sale different than any other. No animal will be offered in this sale except those of extra quality and ABSOLUTELY SURE BREEDERS and POSITIVELY QUICK PERFORMERS, and all black with white points and FIRST-CLASS IN EVERY PARTICULAR. By selling a large amount of stock in one day I can afford to sell it much cheaper than to single individuals.

My new importation of Jacks and Belgian Stallions are being imported especially for this sale, left Antwerp, Belgium, on February 20, 1904, on the steamer British Empire and will reach the harbor March 8th.

My two first importations of Percheron and Belgian Stallions will be offered in this sale. Appreciating the task of securing a foothold in the Draft Stallion business against other importers, I do not expect to make my first importations profitable, and in offering them in this sale I only expect them to bring from \$1000 to \$1500 each—for AS GOOD ONES AS CAN BE FOUND ANYWHERE. See them and judge for yourself.

It is an old custom in advertising a public sale to advertise that "the stock will be sold regardless of price," and that "the stock will be placed absolutely in the hands of the bidders," etc., which is always a rank falsehood and I prefer to tell you the truth. I leave for Europe April 13th, for my new importations, so as to return by June 20th in time for the St. Louis Fair, and I want to close this stock all out and shall sell it at actual cost if it will not bring more. I am making this an opportunity for that class of men who want to buy a good, honest straight, sound, money-making animal of the best quality at a living price, to come and select such as best suits his needs and buy him at actual cost or a slight advance. I will give one and two years time to responsible purchasers at 8%.

I believe the superiority of the Belgian Horse will soon be recognized by the American Horse growers, and that they will soon occupy the front rank on the American farm and markets; therefore I shall make a specialty of importing and selling the Belgian Horse and carry on this business in connection with my large Jack business. Any man who is needing a Jack or a Stallion cannot afford to miss this sale. You can buy honest values at a living price in a clean, honest business way. I expect these imported Spanish Jacks to bring from \$800 to \$1200, and my home-bred Jacks to bring from \$300 to \$800 each, for I cannot sell this class of stock at a loss. Write for catalogue.

W. L. De CLOW, Cedar Rapids, Iowa.

FOR SALE. Stallion JUSTINIAN

Sire ELECTOR 2170 by Electioneer
Dam LILY LANGTRY (Dam of Ed B Young
2:11½ and Dudley 2:14) by Nephew.

A magnificent individual, standing a trifle over 17 hands and weighing 1300 lbs. A rich seal brown; perfect trotting action; a model of symmetry, beautifully proportioned, gentle and perfectly sound. Was the property of a man of means and never given a record, although at an early age he showed extraordinary speed. For a horse-man wishing to breed for profitable looks as well as possible speed, this horse cannot be equaled. As the owner is disposing of his country property he wishes to sell.

Inquire at this office or of J. H. KING, 1029 Sixth Avenue, East Oakland, Cal.

Thoroughbred Colts FOR SALE.

Bay Filly (two years old March, 1904.) by George F. Smith, dam Allie Hill by Wild Idler; second dam, Mary Wade by Woodburn; third dam, Viola by Imp. Some excellent prospects for stake winners entered in the Occident, Stanford and Breeders Futurity stakes. A fine carriage team, also the great broodmare Daisy S. (dam of Tom Smith 2:13½, General Vallejo 2:30½, Sweet Rose 2:28 (trial 2:21) and Little Mac (3:27). The driving horses and colts can be seen at my stable in Vallejo, and the broodmares, etc., at the race track. Apply to or address

THOMAS SMITH, Vallejo, Cal.

BROOD MARE FOR SALE.

THE GRANDLY BRED TROTTER MARE, LAUREL 2:13½ by Nephew 1920 (sire of 25 in 2:30 and 14 producing daughters); dam, Laura C. 2:20½ (dam of Langton 2:24, Laurel 2:13½ and Lauretta 2:14½) by Electioneer 125; second dam the thoroughbred mare Fanny Lewis by Imp. Buckden. Laurel has a four-year-old filly by Stam B. 2:11½, which can be seen at my place, and is expected to foal again to that horse in a few days. Laurel is offered at a very reasonable figure. She is 14 years old, sound, and a regular breeder. For further particulars apply to

F. J. YANDEL, Santa Rosa, Cal.

HOW TO KEEP A CAREFUL RECORD

OF STALLION SERVICE: BUY MY SERVICE Book. It will bring success to you this season, making all outstanding accounts collectable and hankable. It records all the facts you want and none that you don't want, and each service is secured by bankable note. Price of book only 50c. My horse bills and stationery are best and cheapest. Send to-day for free advertisement, offer and sample pages. Address F. H. ENO, 509 Mulberry St., Des Moines, Ia.

EXPORT NOTICE.

At a recent meeting of the New Zealand Trotting Association the following notice was adopted: "Horses imported from America to New Zealand must in future be accompanied by certificates of either of the above Associations (referring to the National Trotting Association and the American Trotting Association). The disqualifications of these bodies will be enforced by New Zealand Trotting Association and the latter's disqualifications, penalties, etc., will be recognized in the United States and Canada."

The American Trotting Association does not issue export certificates. The National Trotting Association will issue export certificates from the port of San Francisco and the undersigned has been appointed export certificate agent for said port and will notify those interested of what will be required before exporting horses to New Zealand and furnish export certificates for that and other foreign countries.

PETIGRU 2:10½

Son of Kingward by Onward (sire of 11 in 2:10) and Lemonade (dam of Bessie Wilton 2:02½, Petigru 2:10½, Lady Wilton 2:11½ and Lemonee 2:18½). PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. FEE \$50.

CORONADO 2:18½

By the great McKinney 2:11½ (sire of 8 in 2:10 and 27 in 2:15); dam Johanna Treat (three-year-old trial 2:17) by Thos. Rysdyk; second dam by Venture, sire of dams of Directum 2:05¼ and Sidney Dillon (sire of Lou Dillon 1:58½, world's champion trotter). CORONADO is one of the handsomest of the sons of McKinney. He won five races out of seven starts. FEE \$40.

SILVER COIN 2:11½

(Record made as a four-year-old in a winning race of five heats against aged horses. Sired by the great Steinyard (sire of 4 in 2:10); dam, the fast mare Jenny Mac 2:03 by McKinney 2:11½. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual. FEE \$40.

Send for card containing tabulated pedigrees and full particulars of above Stallions. Address

GREEN'S RUFUS 63 (4291)
Will serve a limited number of Approved Mares, Season 1904
FEE - - - \$75
Reductions made for two or more mares.
Manager, WALTER SEALY.

Dictatus Medium 32499
Will make the coming season at
Race Track, Hollister, Cal.
Jos. Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasture furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from three to start and race to come off on Hollister track, Fair week, 1907. (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned hay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and heat. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 34 seconds, a 2:23 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightning, sire of the dam of Zomro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4 Son of Sable Wilkes 2:18
and Fanny Bayswater
Sire of KELLY BRIGGS 2:10 1/4
WILL MAKE THE SEASON OF 1904 AT
WOODLAND, CAL. Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices. For cards containing full pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venus (dam of Adonis 2:11 1/4, Leah 2:24 1/4, Cupid 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27 1/4. Sire of dam of Dictatus 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasture; \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,

Supt. Santa Rosa Stock Farm, Santa Rosa, Cal.
Or IRA PIERCE, 725 Montgomery St., S. F.

A Colt Trotter Himself, and His Progeny Perform Early, and the Blood of the Two-Minute Trotters, Futurity and Horse Show Winners can be found in his Veins
WILL MAKE THE SEASON From Feb. 15 to June 1, 1904, at PLEASANTON
AFTER THAT DATE (by request) AT SALEM, OR.
At \$40 the Season, or \$60 to insure.
For further particulars address
SAMUEL GAMBLE, Pleasanton Cal.
Or TUTTLE BROS., Rocklin, Cal.

NEERNUT 19810 Record 2:12 1/4 (Sixth Heat) 2:14
Sire of Neeretta 2:09 1/4-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09 1/4 to 2:30. Neerut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neerut is by Albert W. 1:33 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907
Record 2:20. THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:04 1/4, MUCH BETTER 2:07 1/4, DERBY PRINCESS 2:08 1/4, DIABLO 2:09 1/4, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All hills to be paid before the animal is removed. Pasture, \$5 per month. Hay and grain \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO **RECORD (3) 2:15 1/4**
REG. No. 33389
(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:30 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.); dam LULANEER (dam of Limonero 2:15 1/4, Blon 2:19 1/4) by Electioneer 135.

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Astute and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,
Owner.

J. H. WILLIAMS,
University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney
KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high-class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horse Skylock 2:15 1/4 and Ned Winslow 2:13 1/4. Mary Lou is by Tom Benton son of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 755. Kinney Lou's lastest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree address

BUDD DOBLE, 1030 Pacific Ave. Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST Reg. No. 35562. Record 2:22 1-2.
Sire of ALONE 2:09 1/4, champion 4 y. o. of 1903 (half mile 59 3/4), OUR LADY (trial 2:20 3/4), and full brother to JOHN A. McKERRON 2:04 1/4 (the fastest trotter of the Wilkes family).

Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16 1/4, sire of John A. McKerron 2:04 1/4, Who Is It 2:10 1/4, Stanton Wilkes 2:10 1/4, Claudius 2:13 1/4, Georgie B. 2:12 1/4, Boh Ingersoll 2:14 1/4, Tidal Wave 2:13 1/4 and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04 1/4, Nearest 2:22 1/4 and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05 1/4, Direct 2:05 1/4, Direction 2:10 1/4, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 463, sire of Echora 2:23 1/4 (dam of Direct 2:05 1/4) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:22 1/4, sire of Our Dick 2:10 1/4, Homestake 2:14 1/4 and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season. Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All hills to be settled before mares are removed. For further particulars address

Mahomet, \$20

LONGWORTH 2:19 (Reg. No. 18432), sired by Sidney, grandsire of the champion Lou Dillon 1:58¼. Dam, Gray Dale by American Boy Jr., he by American Boy, sire of William's Belmont; second dam by Windell Scott; third dam, So-rel Pol by Sir Henry. LONGWORTH is a very big-class horse in form and disposition; is a very dark bay or brown. He has sired Alfred D 2:12¼, El Moro 2:13¼, A. C. 2:15¼, Esmeralda 2:19, etc.

RINGWOOD by Sidney, dam, Alma by Dashaway, he by Belmont, son of American Boy. RINGWOOD is a dark bay.

SABLE CZAR by Sable Wilkes, he by Guy Wilkes; dam, Olivette by Whipple's Hambletonian, he by Guy Miller, he by Hambletonian 10; second dam, Belle by Easton's David Hill, he by Blackhawk; third dam, Lady Almack by Almack, he by Monmouth Eclipse, son of American Eclipse. SABLE CZAR is a black horse.

MAHOMET, color white, with bay and blue spots. His sire is Longworth, dam Souma Mald, said to be by Arabian horse; second dam by Whipple's Hambletonian.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$2.50 per month. No responsibility assumed for accidents or escapes. For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTTER STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19¼

(Sire of Monte Carlo 2:07¼, Idolita 2:09¼, etc.); dam CREIDA (3) 2:18¼ by Palo Alto 2:08¼; second dam Clarabel (dam of 3 in 2:30) by Adalab Star; third dam Fairy (dam of 2 in 2:20 list) by Hambletonian 10.

CASSIAN is a high-class young stallion in every particular and one of the best bred ones ever foaled at the famous Palo Alto Farm. He has producing blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast natural trotter and has

every qualification for a sire of 'extreme and early' speed, being good galter, level beaded and game

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best of care taken of mares in any manner that owners may desire, at reasonable rates

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:0)

1st dam BELLE MC (dam of Worthwood (1) 2:59 and Silver Bee (3) 2:27¼) by Ensign Goldust Jr.

2d dam LITTLE BELLE (grandam of 2 in 1st) by Belmont (sire of Nutwood 2:18¼ and 58 more in 2:30).

3d dam Thoroughbred Mare by Imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 15 hands high and weighs about 1300 pounds. He is a model symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grand-sire Robert McGregor sired that wonderful horse Cresceus 1:59¼, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

MONTESOL

(TRIAL 2:24)
Foil Brother to Lady Granoard 2:23 (trial 2:13)

MONTESOL, 6 years old, stands 15 1/2 hands, weighs about 1125 pounds; is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcibiades. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege.

POLE STAR

The above Stallions will stand at Alameda, Danville, Concord and Poinoie.
For further information address

4 years old, by McKINNEY, dam MOUNTAIN
HAKE by Young Venture; 3d dam Rose Clark by
Nigger Baby; 3d dam by Imp. Trustee. Will be per-
mitted to serve 10 approved mares at \$40 for season.
P. FOLEY Race Track, Alameda.

SEYMOUR WILKES

REG. NO. 0232.
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And sire of the Sensational Trotter Monroe 2:12 1/4
and Joe Evelyn (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought
race and was a game racehorse. No horse in California can show
a greater proportion of large, handsome, strongly built and well-
boned colts. They all look alike, and in nearly every instance are
square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird
by Playmate; second dam by Odd Fellow, third dam by a son of
Williamson's Belmont, fourth dam by Blackhawk 787. He weighs 1200 pounds, stands 16 hands high
and is one of the most symmetrical horses in California. Several of his get are in San Francisco and
will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch
via steamer Gold. Pasturage \$3 per month. For further
particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George
Stables, 408 Bush street San Francisco.

Alta Vela

22449

RECORD 2:11 1/4

SON OF THE GREAT ELECTIONEER 125

(Sire of Arlon (4) 2:07 1/4, Sunol 2:08 1/4, Palo Alto 2:08 1/4, Alta Vela 2:11 1/4, and 9 more in the 2:15 list, etc.).
Dam LORITA 2:18 1/4 by Piedmont 904; second dam Lady Lowell (dam of Ladywell 2:16 1/4, Lorita
18 1/4, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16 1/4.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no
responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of
service and must be settled before removal of mare. Address

HANS FRELLSON,
Race Track, San Jose, Cal.

NUSHAGAK

25939

Sire of Aristo (3) 2:17 1/4, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years);
Black Jack 2:28 1/4 (trial 2:32); The Boquet (4 y. o. trial 2:17 1/4); Majella 2:29 (4 y. o. trial 2:13 1/4).
Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Fidelia (dam of Fidette 2:28 1/4, dam of Mary
Celeste 2:17 1/4) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancet, son of
McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL

2-year-old record
2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08 1/4, James L. 2:09 1/4, Edith 2:10, etc.); dam Woodflower
(dam of Seylex 2:15 1/4) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30 1/4 (dam of Man-
zanita 2:16, Wildflower (3) 2:21 and 3 producing daughters) by St. Clair 18875. Prince Ansel's oldest
colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is
in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM.
Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed
for accidents or escapes.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

TROTGING.

No. 1—\$1000—THE PREPARATION, for Three-Year-olds (2 heats).
No. 2—\$2000—QUEEN CITY (3 heats).....2:19 Class
No. 3—\$5000—ELECTRIC CITY (3 heats).....2:11 Class

No. 4—\$1000—THE INTRODUCTION, for Three-Year-Olds (2 heats)
No. 5—\$2000—IROQUOIS HOTEL.....2:14 Class
No. 6—\$5000—EMPIRE STATE.....2:08 Class

CONDITIONS

ENTRANCE FEE, five per cent. Nothing additional from money winners.

ENTRIES to the above events close April 7th when horses must be named, first payment accompanying the entry.

PURSES Numbers 1 and 4 for three-year-olds will end at the conclusion of the second heat.

IN PURSES NUMBERS 2, 3, 5 and 6 the race will end at the conclusion of the third heat.

TEN PER CENT of each purse will be reserved for the horse standing best in the summary at the end of race. In case of a tie the horse winning the fastest heat will receive the extra ten per cent.

AFTER DEDUCTING the ten per cent from the purse, the balance of the purse will be divided into three equal amounts.

For information and Entry Blanks address the Secretary, 505 Mooney-Brishane Building, Buffalo, New York.
Make all drafts or money orders payable to order of Secretary.

W. P. TAYLOR, President.

EACH HEAT will constitute a race.

THE MONEY DIVISION will be 67 per cent to horse winning the heat; 25 per cent to the horse finishing second, and 15 per cent to the horse finishing third.

As an illustration:—In the \$5000—2:11 trot, \$500 will be set aside as noted above to the horse standing best in the summary at the conclusion of the third heat. This will leave \$1500 to be contested for in each of the three heats. The horse winning the heat will by getting 60 per cent receive \$900, the horse finishing second will receive \$375, the horse coming third \$225. This makes it possible for nice horses to win money in the event, and also makes it possible for one horse to win \$3200 out of the \$5000 purse.

NO LIABILITY for entries beyond the amount paid to if the secretary is notified in writing on or before the time next payment falls due.

BUT NO ENTRY will be declared out unless the amount is paid in full to date.

MEMBERS of the National Trotting Association and its rules will govern, excepting hoppers will not be harred.

RIGHTS RESERVED to declare off and refund first payment in any class if it does not fill satisfactorily.

NOMINATORS may name two horses in a class and the same will be carried as one entry until the date of last payment, when starter must be named.

FORFEITS due April 7th, May 7th, June 7th, July 7th and July 28 in amounts as follows: Classes numbers 1 and 4, \$10 will be due on each of the dates named. In classes numbers 2 and 5, \$20 will be due on the dates named. In classes numbers 3 and 6, \$50 will be due on the dates named.

C. R. BENTLEY, Secretary and Treasurer.

STANDING STARTS are to be tried in some of the races at the Brighton Beach trotting meeting this year and the innovation will be watched with much interest. In Europe and Australia nearly all the starts are effecting from a standing position, and in the distance handicaps, which are so numerous in the programs of foreign meetings, the horses can be started in no other way. The probability is that standing starts will not prove satisfactory in America as they will not be any fairer or more equable than the flying starts which are the rule here. When width of tracks, number of starters, and the difference in the manners of horses are all considered the starting on the tracks in this country are very good. By the use of the starting gate and high-priced professional starters, the running associations are supposed to have got the starting of race horses down to a fine point and yet any unprejudiced and fair-minded observer will admit that the average start on the running track is no better than the average start on the trotting track. In a field of twelve or fifteen runners, which can be placed in one row on the track, there are in nine cases out of ten several horses that are not on their stride when the flag drops, no matter how near to a straight line their heads may be at the time, and before a hundred yards have been covered by them they are strung out with varying distances between them. Seven or eight trotters will occupy the entire width of most tracks, and in fields of that size the present average flying start is a fair one, and where the horses are any where near of equal speed they will be hunched until the quarter pole is reached unless some leave their feet. The intelligent starter of trotters and pacers aims to get his horses away when all are in their stride, and if there is twenty yards difference between the first and last horse in a field of seven or eight horses he lets them go if all are trotting or pacing as the case may be. This is much fairer to all than a standing start could possibly be, as some horses can not start quickly from a standing position while others can get going at speed within fifty yards. The writer has never seen a standing start in a harness race, but the pictures of some of

them as published in Australia and New Zealand papers, show that they are more straggling than the vast majority of flying starts on American tracks. However, the Brighton Beach management is to be commended for giving the foreign method a trial, and if it proves to have any advantages over the American method they will soon be manifest to the live managers of harness meetings in this country, and be quickly adopted by them.

TULARE IS ON THE MAP of the harness racing circuit that is gradually being arranged by the California associations this season. The Tulare Fair Association is out of debt and in good financial shape. It pays its purses always and wants the horsemen to know that all who come and race fair will be welcome and entitled to the best of everything in that section. President Whaley and Secretary Ingwerson have arranged a program for the three days meeting which is printed in our advertising columns this week. There are two \$1000 stakes, one for the 2:17 class pacers, the other for the 2:24 class trotters. The entries will close April 23d, and entrance is ten percent. There are also four stakes of \$500 each as follows: 2:18 trot, 2:28 pace, 2:13 trot and 2:10 pace. Besides there are colt stakes for trotters and pacers. The meeting is to be held in the first part of October, or the week before the Los Angeles meeting.

THE ANNUAL STALLION NUMBER of the *Kentucky Stock Farm* was issued on the 17th of March with an appropriate green cover page. The number is a splendid one, full of business and much interesting reading.

Buffalo's Grand Circuit Meeting.

The Buffalo Driving Club, in presenting to horsemen its early-closing announcement for the meeting Aug. 1 to 5, does so, believing it will meet with approval from a majority of Grand Circuit followers. The aim has been to arrange the events so they will be best for the greatest number interested, and that means the public as well as owners and trainers, whether the spectator be one who likes to bet a little, or simply to see the race purely from the point of contest that it is productive of. There is never any interest in a race in which the field does not class. In other words, no enthusiasm can be incited unless there is a contest.

It is a well known fact that when winter closed in last fall there were three or four trotters that could beat 2:10 away off, and as many pacers that could go in 2:05 or 2:03. That they will effectually bar other horses eligible to the slow classes is a condition to be looked for.

The history of the Bonner Memorial and of the Massachusetts shows that owners and trainers who have horses without records that possess class, do not hesitate to name them in the faster classes, providing there is a purse that is attractive in size, and where the amount to be won is worth the penalty of record. This is a point that the Buffalo Association has tried to make strongest, as will be noted by reading the conditions. They may suffer some in the number of entries received, but when the day of racing comes, the means used to bring out a field that will be productive of a contest will be justified. Briefly, the three points to be gained or aimed at are high class fields, consequently better betting, and a contest that will please the public.

How They Do It in New York.

The annual speedway parade is one of the big features each year among the many horse events that come off in that city. On that day special prizes are awarded as follows, judged solely as the horses pass the reviewing stand, and without reference to records or any other conditions that usually count in horse shows:

To the best looking horse drawing a one-man speed wagon.

To the best looking team drawing a one-man speed wagon.

To the best looking horse drawing a two-man road wagon.

To the best looking team drawing a two-man road wagon.

To the best looking short-tailed horse in regulation cob harness, drawing a high-wheeled runabout.

To the best looking short-tailed team of horses in regulation cob harness, drawing a high-wheeled runabout.

To the best looking team hitched to a surry. Three ribbons will be given in each of the special classes to be contested on speedway day.

Every owner of a horse is invited to participate in the parade, and special provision is made for visiting horsemen.

Why Horsemen Should Enter at New York.

Succinctly stated, the following are a few of the excellent arguments advanced for the entering of horses in the stakes at the two great trotting meetings to be held in New York in August, under the auspices of the Empire City Trotting Club and the New York Trotting Association:

The stakes are made for the greatest number of horses in training.

The classes are the same at both tracks, thereby giving owners a double chance to win.

The purse races will be made so as to provide for almost every horse in training.

Both the Empire and Brighton Beach tracks are excellent for the trotters and pacers.

New York is the place where good prices are paid for good material. Billy Bush sold there for \$15,000 and Major Delmar for \$40,000.

The speedway in New York creates a demand for good light harness horses and a good performer can always be sold for a good price.

Under the Empire plan, which will be in force at both places, a horse can race in a stake and subsequently compete in a class race, without taking the edge off his speed.

Horses can be entered in any of the \$5000 stakes, upon a first payment of \$15 and in three-year-old stakes upon a first payment of \$10.

The transportation from the State Circuit and the Grand Circuit meetings in New York is excellent to the Empire track and from there the horses can be shipped by boat to within a short distance of the Brighton Beach track.

Those interested in the New York meetings guarantee that courteous treatment will be given to owners, trainers and everyone else.

New York, during August, offers many opportunities for enjoyment that out-of-town horsemen appreciate.

Good Roads.

At the annual convention of the New York and Chicago Road Association, held at Erie, Pa., last week, Col. Albert A. Pope, the president, made the opening address and said in part:

"There is nothing that helps to build up a country so much as proper highways—roads that can be used throughout the entire year. And if this is true there is no public improvement where money can be spent to better advantage. The highways are the natural feeders to railways, and improvements on them materially increase both interstate and international commerce. If our government has seen fit to be liberal in river and harbor work it is reasonable to expect that the building and maintenance of public highways should demand the same attention.

"All the States in the Union should adopt some effective plan, so that, under skilled supervision, the public highways could be put into a condition that would insure their being passable for traffic throughout the entire year.

"I think it can be fairly said that after the agitation of the past ten years the people of this country are thoroughly awake to the importance of good roads, and that all we need to secure the desired end is a united effort. The Congress of the United States should make liberal appropriations, to be expended in different regions of the country where the inhabitants are willing to pay a part of the expense, and where the work can be carried on under skilled supervision, so that every section of a highway properly constructed would serve as an example and an inspiration for fine road building."

"Something Good to Say."

John Splan not long ago, when conversing with some friends regarding the sentiment which prevails in the trotting horse business, told the following story by way of illustration: "Back in Orange County, N. Y., there lived a man who so truly loved horses that no matter how disreputable his appearance none ever passed before the old gentleman's eye without eliciting some compliment. The kind words never failed. The time came, however, when the boys thought they had him. A horse was led into the local livery barn, which, of course, was horsemen's headquarters—who seemingly was past all possible opportunity for compliment. He was a hind, ancient and decrepit gelding, sway-backed and with every unsoundness described in the veterinary books. Altogether, he was a striking and dejected picture of age and decay, and it seemed but a question of hours when his troubled life would be snuffed out. The true horse lover's eye ran in quick survey over the gaunt carcass, while the boys winked knowingly at the old gentleman's evident discomfiture. Finally, he asked the horse's age and was told that he was twenty. It seemed all over but the laughing when suddenly the old gentleman opened the ancient beast's mouth and at once a look of pleased surprise passed over his features. 'Boys,' he said, 'this horse has the best set of teeth I ever saw in the mouth of a horse of his age.' There never was a horse so bad," added Splan, "that a man who really loves them can't find something good to say for him."

JOTTINGS.

THE YEAR BOOK of 1903 is a very disappointing volume. Of course, the increasing size of the book with each succeeding year has made it absolutely necessary that much of the matter heretofore published be curtailed, but the compilers of volume 19 have gone too far and made too many omissions. The new book is smaller by 325 pages than the last volume. The most vital omission is the alphabetical list of 2:30 trotters and 2:25 pacers which has heretofore appeared in each volume and which simply gave the name, color, sex and record of each horse, and the number of the volume in which his breeding and date of making record could be found. This table has been an indispensable one to those who use the Year Book and as it occupied less than a hundred pages could have been added to the present volume and still kept it more than two hundred pages smaller than the previous one. The list of trotters and pacers getting records in standard time during the year are given as usual, and also the different tables of champion trotters and pacers and the 2:10 lists. In the Great Table of producing stallions, only the new performers of 1903 are given under each sire together with the figures showing the total number of standard performers to the credit of the stallion and the number of producing sons and daughters. Much space is saved here by omitting the names of each sire's performers whose records were made prior to 1903, but it necessitates a reference to previous volumes to find the names of the standard get of any horse.

The "distinguishing marks" which have aroused so much discussion and which designate whether dirt shields were used in making records appear only in the "Tables of Champion Trotters" and are placed opposite the name of Lou Dillon. In all the other tables there are no distinguishing marks opposite the name of any horse. Lou Dillon is given credit for her mile in 2:05 to high wheel at Cleveland in the regular report of the Cleveland meeting held on that date, but it is not in any of the tables as no table of high wheel performances has ever been in the Year Book. Outside the eliminations which have been too numerous the new Year Book is as usual a very valuable and necessary publication.

If an honest confession is good for the soul, there are a lot of turf writers (myself among them) who can do their "spiritual, rational and important part" a world of good by acknowledging without delay that many of the criticisms written in regard to the rejection of Lou Dillon's record of 2:05 to a high wheel sulky were wrong. The great mare's record has not been rejected, but appears in the new Year Book on page 325, and it is there stated that she started to heat 2:05 to high wheel sulky and won in 2:05. If this is not a record, there was never one published. It is very evident to me after looking over the Year Book and reading the captions over the various tables written therein, that the Advisory Board probably knew a little more than some of us turf writers have been giving them credit for. The gentlemen comprising that body saw a distinction and a difference between "a record" and "the record" and it was this very point over which all the trouble originated. The Board did not deny that she had a record of 2:05 to high wheels, but that it was her best record they denied as that was several seconds faster. As it appears to me now, the only question before them was as to whether Lou Dillon's name should be given two places in the champion table. She had one place already and that was at the very head, she being the undisputed champion. There was no place in that table for her record of 2:05 to high wheels and the Board so decided, but that record appears in its proper place in the Year Book. In the "Table of 2:10 Trotters" in this book Lou Dillon is head of the list with no distinguishing mark. In the "Table of Fastest Records" Lou Dillon's name is given also without those marks. In the table of "Fastest Records at Different Decades since 1800," it also appears without anything to designate that a dirt shield was used. In the table of "Champions" however the two asterisks precede her name to show that the record was made against time and with a dirt shield. There is nothing unfair in this and in my humble opinion many of us who have criticised the Advisory Board owe them an apology. Their only mistake was in the manner of stating the case, but any one who will try to state it better will find he has a very hard job on his hands.

Ten of the fourteen fastest trotters in the world carry no Wilkes blood in their veins.

The Old Brood Mare.

There she is, and there she'll stay.
No, sir; she can't be bought to-day;
Beg pardon, mister; your offer's fair,
But money won't buy that old gray mare.
Times may be hard, and crops may fail,
But that old lady ain't for sale.

Foundered: Yes, sir, I'll grant you that
She's had bangin' enough to kill a cat;
So you'd be if you'd gone through
One-half the work she's had to do.
Two hundred's all she's worth, maybe;
But you offer ten, and she stops with me.

You see the house, you see the barn,
And look around and you'll see the farm;
And every bit of it fresh and fair,
And all of it bought by that old mare.
Guess, if the honest truth were known,
She's got a right to feel quite at home.

Fifteen years ago this spring
She was six, and as clean a thing
As ever answered the judge's bell—
Fast as a bullet, sound and well;
Good for three heats in twenty-two,
Or a trifle better, 'twixt me and you.

Dad had been dead a year or more;
Mother'd been called in long before;
And I was running things all alone,
With the farm and everything my own,
And the mare a-going like all possessed,
And me a sucker—you know the rest.

The gang got around me and turned my head;
I got to forgetting the time for hed,
And playing poker, and soaking rye,
And making the old man's money dry;
Till at last we started a campaign tear,
Me and the gang and that old mare.

We took in the circuit. How it went
I never can tell, but the cash was spent;
And I turned up in York State one fine day
With pretty near everything fooled away,
With the old place mortgaged all 'round hear,
And me with eight hundred and the mare.

I put it all up—fifteen to one,
And got full, as usual, before I'd done;
And when we scored I got playing smart,
Till the judges ordered me off the cart,
And put up some fellow to drive the mare;
I couldn't see who, and I didn't care.

Well, she won. They marked her twenty-five,
And I drew \$12,000, as you're alive.
Some way or other I shipped her home,
And got to the station all alone;
Hooked her up and drove out to the farm,
Drunk yet, and didn't know the harm.

Thirteen miles I put her through,
Like any drunken fool would do;
Got home after awhile, somehow,
And left the mare as you see her now;
She spilled me at the gate, kersmash,
She broke my arm, but I had the cash.

Just enough to leave me square;
And it taught me a lesson, but it spoiled the mare.
Just fifteen years ago this spring
I learned the value of this one thing:
No more whisky and no more spree;
Farming's quite good enough for me;
Yonder's the mare, and that's her tale,
I'll sell the colt—but she's not for sale!

—Err'ange.

Shying Habit—Cause and Cure.

A driving or riding horse which forms the habit of shying is a constant menace to safety, whether he is by nature vicious or kind. Shying is nearly always a growing habit which if not overcome gets to be chronic and difficult of cure. The animal affected will often seem to go out of his way searching for or inventing hughahos to furnish an excuse for shying or holting.

The well-bred and high-spirited animal of mixed breeding is more liable to form the shying habit, but there are occasional cases where veritable deadheads under ordinary circumstances become the most unmanageable of shyers and holters after they have developed an unreasoning fear of some commonplace object, as a certain shaped or colored stone or plant, the drooping leaves of the mullein or plumes of the goldenrod.

Whatever the cause of the shying, it nearly always has its beginning in improper or careless handling when the animal is feeling very fit and "toppy." Sometimes the habit originates through some imperfection of sight which causes objects to look distorted and terrifying. Again, a colt will form the habit of shying at some particular object, simply because he feels disturbed and lonesome from being kept from his companions and accustomed surroundings. In some cases among older animals it is not fear, but simply a nervous condition, which prompts them to wish to get into a mix-up; and if persisted in, and an advantage is gained over the driver occasionally, the chance for a tilt and a bolt gets to be enjoyed.

As to remedies, the best is prevention or overcoming as soon as possible after the trait shows. First

ascertain that it is not a result of defective eyesight. If the animal is a colt, nervous and timid, hook him double with a well-mannered horse until he gets away-wise. Should he continue to show fear of some object, induce him to get a satisfying knowledge of its harmlessness through both his senses of sight and smell. Do not attempt to force his acquaintance of it suddenly. Lead the way yourself and handle it; do not force him to it under the whip.

It is more often the colts that are entirely country reared and broken which give the most trouble from shying. When driven in town or city from the start their attention is divided and diverted by so many sights and sounds as to cause little notice to be paid to anything but their driver's wishes.

There are occasional cases among older horses where the shying is caused by none of the causes mentioned, but is simply a headstrong challenge to try conclusions with the driver. Where such a condition is proved, it will be advisable to have a reliable and expert horseman try heroic measures by using strong harness and rigging and a bit that will afford complete mastery over the animal. Then when an attempt is made to shy and halt, let a convincing introduction to a first-class whalebone be judiciously, but not brutally and blindly, applied. A treacherous, unsafe animal can thus be sometimes made to see the un wisdom of his ways when kindness alone fails entirely. The best cure for the generality of early and slight attacks of the shying habit is sufficient and regular road work to keep the animal's nervous and muscular tension down to a normal condition.—*Spirit of the West.*

Los Angeles Driving Club Matinee, March 26.

First race, 2:40 class, Mixed.
G. L. Pierce's h f Laura G..... 3 1 2 1
C. G. Willis' h g Roy K..... 2 2 1 2
C. W. Winter's s g Tripoli..... 1 3 3 3
L. P. Keller's br g Clay..... 4 4 4 dr
Time—2:31½, 2:31½, 2:30, 2:30.

Second race, 2:35 class, Pacing.
J. W. Snowden's h m Nell..... 2 1 1
J. J. Myer's s g Charlie Dunn..... 1 3 2
P. B. Michel's blk g Riverside Wood..... 2 2 3
Time—2:30½, 2:28, 2:29.

Third race, 2:30 class, Trotting.
J. C. Newron's blk h Dauhe..... 1 1
M. B. Mosher's b m Athelene..... 2 2
Alex Wilson's s m Nancy W..... 3 3
Time—2:20, 2:20.

Fourth race, 2:30 class, Pacing.

A. Solano's Honolulu Maid..... 1 2 2
William Garland's blk g Black Arrow..... 2 3 dr
Time—2:30, 2:28, 2:26.

Seventh race, free for all, Pacing.
W. M. Barte's blk h Midnight..... 2 1 1
Dr. C. W. Bryson's b g George B..... 1 3 3
W. L. Heller's hr m Eleotra..... 3 2 2
Time—2:16, 2:24, 2:24.

Polo Pony race, Quarter-Mile Dash.—E. L. Hildebrand's gr g Sea Foam won, E. N. Smith's s g Crescut second, Dr. J. A. Edmonds' s m Lady of Quality third. Miss Hinks, Jarrox and Bobby Dohs also ran. Time, 0:27.

King Direct 2:09½, whose picture adorns the front page of this issue, is owned by Mr. James Butler of New York, proprietor of the East View Farm, who is now visiting California and spending considerable of his time watching his string of thirty horses that are in charge of Monroe Salishury at Pleasanton. King Direct is in Ed Geers' string at Memphis, and is considered the star of the lot. He is by Direct 2:05½, his dam Welcome Bunker by Mambrino King and his second dam Lady Bunker, the dam of Guy Wilkes. He made his record at Hartford last year. He started fifteen times during the season, but only won three races as he was not right the largest part of the season. He is a smooth gaited pacer that when in shape will be able to secure a mark of 2:05 or better and Geers will doubtless give him a record close to that figure before the summer is over. He is one of the best bred young stallions in America and as the picture shows a grand individual.

Of the many California breeders who have been unfortunate this year Mr. J. H. Bohon of Los Angeles has had more than his share of bad luck. He had three mares named in the Pacific Breeders Futurity No. 4, of which one failed to get in foal. Another, Boellen by Happy Prince bred to Zomhro, died March 24th, before foaling and another, Cleon by Happy Prince, bred to Zomhro, foaled a dead colt March 29th. This is getting bad luck in bitter and frequent doses and Mr. Bohon has our sympathy.

Notes and News.

Some fast quarters will be paced and trotted at Pleasanton to-day.

The biggest money winning trotter in California this year will probably be a three-year-old.

J. L. McCarthy & Sons of Portland, Oregon, will hold another sale at that place April 26th to 28th.

They are talking of trying a few races with standing starts at the Brighton Beach meeting this year.

Frank Frazier, who owned and campaigned the fast pacer Chehalis 2:04½, will be out this year with two or three good horses.

More horses are arriving at San Jose every day and all the stalls will soon be occupied. Over one hundred trotters and pacers are now stabled there.

John Kelly, who will race the Mendocino stallion Idolita 2:09½ this year, believes that he can step him to a record of about 2:06 before the end of the season.

Read the advertisement of the Readville meeting to be given by the New England Trotting Horse Breeders Association in August. Entries close Wednesday, April 11th.

Bendocino is the appropriate and euphonious name selected by Henry Hahn for his yearling colt by Mendocino, dam Sallie Benton, whose picture appeared on our front page last week.

At Readville one of the greatest meetings of the Grand Circuit is always held. The Massachusetts is a \$15,000 stake for 2:10 class trotters this year. It should result in a great race.

The Spokane Inter State Fair will offer \$1200 for 2:17 class pacers and \$1200 for 2:20 class trotters at its meeting this year. The stakes are advertised in this issue of the BREEDER AND SPORTSMAN.

W. L. Snow will again race the heretofore unlucky but wonderfully fast little pacer Charles Hayt 2:06½. If the little fellow's luck has changed he will win when the time is around 2:03, as he is fast enough.

About fifty head of trotters and pacers are being wintered at the Walla Walla race track. William Hogboom has eighteen including the stallions Caution by Electioneer and Lynmont by Almont Medium.

The Sacramento Driving Club is arranging to give another of the enjoyable matinees at Agricultural Park in that city to-morrow (Sunday) afternoon if the weather is favorable. Five or six races will be on the program.

Primrose 2:13 by Falrose was recently sold by Mr. Fred Roberts of Denver, to J. J. Stevenson of Oshkosh, Wisconsin. The price paid for her was \$1500. Primrose can pace a half mile in a minute almost any time she is feeling right.

Ezra Thompson of Salt Lake, Utah, has purchased the handsome and fast pacing stallion Robert I 2:05½ by Hambletonian Wilkes, dam Anna Belle by Dawn. Mr. Thompson will ship his purchase to Salt Lake and will probably race him this season.

Adebel 2:29½ (own sister to Adhell (1) 2:23) by Advertiser, dam Beautiful Bells (dam of eleven), is now heavy in foal to Laharie the Great (3) 2:12½, and will again visit that horse this season. This mare was the eleventh performer for her great dam.

William Sinnock of Santa Ana writes us that his mare Santa 2:25½ by Ellerslie Wilkes, dam by Hylas, lost her foal to Petigru 2:10½. The foal was a jet black filly and measured 43 inches in height. Santa was nominated in the Breeders Futurity No. 4.

Kinney Lou's hook is getting pretty well filled and a very choice lot of mares will be mated with him. Among those bred last week were Mr. S. Christenson's black mare Simone by Simmons, dam Milady by Baron Wilkes, that is one of the best bred mares in California.

During the recent high water in the Sacramento and San Joaquin valleys, horses and cattle that reached the levees during the overflow, were in some cases marooned without feed and becoming too weak to swim out had to be shot to prevent them from starving to death.

The stakes for the 2:30 class trotters and the 2:24 class pacers are \$5000 each at Readville this year. See the advertisement of the New England Trotting Horse Breeders Association in another part of this issue. The entries to the five big stakes offered will close Wednesday, August 11th.

Work has already begun on the race track at the Spokane Interstate Fair Grounds and will be continued until the track is in perfect condition. The entire track will no doubt be re-covered, which will give the Interstate Fair people one of the best tracks in the west. Another improvement at the grounds will be a new street railway connection which will be a great help in handling the crowds during fair week.

After an absence of several years the Du Bois brothers, of Denver, Col., will re-enter the racing game, having recently purchased nine high-class horses, including Carbonate 2:09, Beulah 2:14½ and Carbonetta, a two-year-old which showed a mile last season in 2:19½. The stable will make its first start at the Overland Park meeting in June.

Every county in California that makes any pretensions as a horse breeding locality should have stakes for two-year-olds and three-year-olds. These stakes should be limited to colts foaled in the county. By making a stake of \$20 from each entry with a sum added by the managers of the tracks much interest could be worked up and some good contests arranged.

The record of Edwin S., chestnut gelding by Dr. Hicks, is 2:14½ instead of 2:13½ as often stated. His record was made in the \$500 purse for green pacers, at the Breeders meeting in Petaluma, August 29th, last year. Colonel C. won the first heat in 2:13½, and Edwin S. the next three in 2:17½, 2:14½ and 2:14½. Consequently Edwin S. is still eligible to the 2:15 class races.

Baywater Wilkes is doing well at Woodland this year and will have a large number of well bred mares booked to him. The son of Sable Wilkes never looked better and the colts and fillies by him are meeting with much favor all through that section of the State. They are invariably good looking youngsters and have size and natural speed, the majority being trotters.

Owner W. M. Savage is having a gorgeous special car made for the transportation of Dan Patch 1:56½, the coming season from place to place where he will try to break his record. It is related by those who have seen the plans that this car will be much more elaborate and ornate in design and equipment than any other ever built for the comfort of a horse in the United States.

George Peringer of Portland, Oregon, will have a good string on the northern circuit this year. His yearling colt by Monbells out of Manzanita 2:16 by Electioneer, that he purchased at the final sale of Palo Alto horses in this city last January, is growing fast and will be a splendid looking horse when matured. This colt should be a great stock horse and a producer of a very high rate of speed, as he is bred that way.

One of the novel features at the Spokane Interstate Fair this fall will be a ladies relay running race. The plan is to have each lady ride four miles each day, changing horses every mile, and riding five days in all. The time of each rider will be kept and the lady riding the twenty miles in the best time will win the race. \$500 will be offered for this race and the management hope that a number of entries will be received from outside points.

W. E. Bridges' mare Menlo Bell by Menlo 1302S, dam Molly, is one of the fastest trotting roadsters driven through the park and on the speed way in this city. Her white face will be missed from the drive ways this year, however, as she has been bred to Kinney Lou 2:07½. Menlo, the sire of this mare was by Nutwood out of a mare by the thoroughbred horse imported Hercules. The cross with Kinney Lou should be a good one.

The stable of Richardson & Stetson is at Denver in charge of Mr. Stetson, who will train and drive the horses this season. The string consists of the trotters Swift B. 2:16½ by Stam B. and Getaway 2:24½ by Strathway, and the pacers Monroe S. 2:13½ by Dictator Wilkes and Oregon Maid 2:14½ by Del Norte. They also have several green trotters and pacers and a few colts. Swift B. is looking fine and will certainly reduce his record this year.

The great broodmare Lady Yeiser by Garrard Chief, dam Jewell by Vermont, died at Cecilian Park, Danville, Ky., a few days ago at the age of 28 years. Lady Yeiser was the dam of the well known performers Lottie Loraine 2:05½, Don Cozine 2:10, Don Pizarro 2:14½, Don Lorenzo 2:17½ and six others better than 2:30, and her son, Don Pizarro, has sired one trotter and sixteen pacers in the list. Her daughters have also produced three trotters and two pacers in the charmed circle.

Mr. P. W. Bellingall owes a mare by Secretary that he has driven from Oakland to San Jose and back in one day hitched to a surrey in which were seated four persons. The distance between the two points is about 41 miles and the roads are good. The mare covered the 82 miles without seeming to tire and had to be restrained the last part of the home journey. Mr. Bellingall drove this mare down to San Jose this week in a little over four hours and left her there to be bred to Kinney Lou 2:07½.

Axtell, if we have not erred in the calculation, now has the greater number of "grandchildren" in the standard list than any sire ever had at his present age, says the *Western Horseman*. This hears out our prediction of some years ago that Axtell would prove a "family founder" in a most marked degree. Indeed Axtell is a sire of the period in which he lives—a most distinctive honor. Not only is he a marvelously successful sire and speed progenitor, but he is a characteristic sire. Not only do his colts and the colts of his sons, daughters and granddaughters have speed, but they are distinguished for their good-headedness, pure gait, natural speed and race horse qualities. The older the Axtell family grows the greater it will grow in public estimation, and in years to come W. P. Jams will be accorded due credit for his foresight and good judgment in paying a record-breaking price for the son of William L. and Lou by Mambrino Boy.

Henry Helman of Portland, Oregon, has sent his fast pacing mare Myrtha Whips 2:09 down to Pleasanton to be bred to Searchlight 2:03½. This union should be productive of good results—a two minute pacer perhaps. Myrtha Whips has been a good race mare in her day, and was not only faster than her record, but a game finisher. She is by the Palo Alto bred stallion Whips (sire of Azote 2:04½) and her dam is Myrtha, dam of Azmont 2:22½ by Contractor, second dam McCa, dam of Quality 2:13½ by Almont 33. She took a record of 2:10½ in 1899 at Stockton, where she was beaten by Kelly Briggs 2:10½. Her present mark of 2:09 was made at Salem, Oregon, in 1902.

Better get some of that Sidney Dillon blood now while you may. Two weeks ago, Mr. J. H. Brown of Detroit went down to Memphis to see his horses Marengo King and Stanley Dillon, both of which he purchased from among the Santa Rosa Stock Farm horses sold at the Blue Ribbon sale last year. Murray Howe writes the *Horse Review* that Mr. Brown was offered \$7000 for Stanley Dillon while he was at the Memphis track, so the son of Sidney Dillon must be afflicted with the same speed disease that Lou Dillon has. The Sidney Dillons all trot fast and the way to get a good one is to breed a good mare to him this year.

The Ten Broeck race course near Savannah, one of the most celebrated tracks in the South in ante bellum days, may be revived and again used for racing and training purposes. For some time negotiations have been pending between prominent horsemen and the owners of the property, and if an agreement is reached the track may again be made the scene of daily exercise and races of famous thoroughbreds. Mr. Shultz, the millionaire horse owner of New York, is interested in the matter, and with others desires to establish a winter training track. The Ten Broeck track was in its glory fifty years ago, but no racing has been held there for twenty years or more.

The Salinas race track has shown during the present month, when rain has fallen twelve days out of the twenty-four, that it is one of the best winter tracks in the State. On Tuesday last we experienced one of the heaviest rainfalls of the winter, and on Wednesday Charles Whitehead was jogging his horses on the track. The county road from the track to Salinas and to the Dela Torre hill beyond Santa Rita is one of the best roads in the State to jog on during the rainy weather. Mr. Whitehead tells us that he is delighted with the track and furthermore says that he will have his horses Topsy 2:10, Deputy 2:13½, Delphi 2:12½ and The Mrs., in shape for campaigning quite as early as the entries trained on any of the other tracks in the State.—*Salinas Journal*.

Things look a little more promising for the followers of the trotters and pacers in Ohio, for the Chisholm pool bill passed the House of Representatives by a very large majority—in fact, there was practically no opposition—and therefore the prospects look very bright for its equally smooth passage through the Senate, besides which it is generally understood that the Governor is in favor of the measure and will sign it as soon as it passes the Senate. If the bill becomes a law, as it seems very probable that it will, there will be no further trouble about pool selling at the Cleveland meeting. The bill is a very strict one and limits the number of days of racing, limits the pool selling to the events occurring at the track, and the selling to the track grounds itself—in fact, is a protective measure that will prevent anything that would tend to bring the sport into disrepute.

F. Gomett of this city has five horses it training this year. Three, Verona 2:18½ by Nutwood Wilkes, the two-year-old Ray McGregor by Rey Direct, and a McKinney colt, are in Al McDonald's string at Pleasanton. Rey McGregor is one of the greatest trotting prospects in California among the two-year-olds. At San Jose Hans Frellson is training Mr. Gomett's pacer Little Jib by Nutwood Wilkes, and colt by Sidney Dillon. He also has the Electioneer stallion Alta Vela 2:11½ in charge. This horse will make the season at San Jose this year. He is the fastest son of Electioneer standing for service with the exception of Arion 2:07½, and as his colts are all very handsome well formed and large, he should command a good patronage. Alta Vela is without doubt one of the purest and best gaited trotters ever seen on a race track, and is as game as a pebble.

Ed Benyon is an exceptionally well posted man on pedigree and on the traits and prominent characteristics of noted sires and famous dams. He believes that blood will tell ninety times in a hundred and does not hesitate to pass judgment on any young trotter after he has thoroughly analyzed his pedigree. A colt goes by stepping a 2:10 shot. The boys on the bench say "he'll get all the money." Ed says "No, he will not; he had a soft sire and a soft mammy and a hard gait will not be to his liking." Ed says: "Isn't that grey colt by some son of Chimbarazo?" Yes. "I thought so, he rides on the gaiting pole like his grandpa and cuffs his ear boot with the same foot." When a handsome youngster stops to bark at the gold ball on the seven eights pole, Ed says, "I am not surprised, his dam was by old Kickapoo and he used to do the same thing."—Murray Howe in *Horse Review*.

Scott Hudson expects Gail Hamilton, winner of the Hartford Futurity and Kentucky Stakes and De Soto purse in 1902, when she made a three-year-old record of 2:11½, to be the Hawthorne of his great stable this year. The famous daughter of Oakland Baron was handled and driven slowly but steadily by her noted trainer last year, who had no intention of racing her, as he really laid her over for this season, so that she would be in the best of condition for racing as a five-year-old. She is eligible to all the big 2:12 class races

this season, and having wintered in the best possible fettle, she looks like a prospect in races of her class, fully as promising as her stable companion, Hawthorne 2:06½, was in 1903. Gail Hamilton bids fair to ultimately far overshadow Nellie Jay 2:10½, which filly defeated her in the three-year-old Kentucky Futurity, as it is stated upon good authority that it is questionable about the latter ever appearing on the track again, she having developed a vicious temper in harness, which makes it risky to even drive her in training, to say nothing of attempting to start her in a race.

Chas. S. Frost, of Pasadena, has had the had luck to lose his mare I C. Cassack by Don Cassack, dam Mollie by Ben Patchen. This mare was in final to Zomhro 2:11, and the foal was entered in the Pacific Breeders Futurity, also in the Western Horsemen's Futurity. The mare and foal died March 24th.

Jepson Bros. are now established in their new quarters at 110-112 Market street, within a block of the big ferry building and have the biggest and most imposing harness and saddle emporium in the city. They have four big show windows in which are displayed all sorts of high class horse goods, including harness, (heavy and light), saddles of all descriptions, from the jockey saddle weighing little over a pound to the big Mexican saddle weighted down with silver mountings and heavy carved leather. They also carry robes, whips, spurs, etc., etc., and have a list of prices that are right.

Lafayette Funk, of Farmington, has sent his good mare Lizzette down to San Jose to be bred to Kinney Lou, record 2:07½ in second heat of race. Lizzette is by Lottery Ticket 20247 record 2:19. Lizzette's first dam the good race mare Lizzie F. 2:16½, second dam Lady Mac by Duke McClellan, third dam Mattie Howard, fastest twenty-mile mare in the world.

Mr. R. J. Logie of Los Angeles claims the name of Vivian Neernut for a chestnut yearling filly by Neernut, dam Daisy Wonder by Ashwood.

Mamie Griffin 2:12, formerly owned by Col. Park Henshaw of Chico, and campaigned successfully by James Sullivan several seasons, will be bred to John A. McKerron 2:04½ this year.

Midnight 2:11½ by Nutford 2:15½ captured the Erkenbrecher cup in the free for all race at the Los Angeles Driving Club matinee last Saturday. Midnight is owned by W. M. Bartee of Riverside.

Lady Nutford, a pacing mare by Nutford 2:15½, foaled a fine filly by Stanton Wilkes 2:10½ last week. The filly measured 38 inches tall and looks to be the real article. The owner of Lady Nutford and filly is Mr. C. R. John, one of Riverside's best citizens, and he is very proud of the youngster.

The Kenney Manufacturing Company at 531 Valencia street has a good second-hand Frazier cart that cost \$125 for sale for \$65. A big consignment of McMurray sulkies, carts and wagons has also been received.

"Raymond" of the *Horse World* says that the latest report regarding the horses belonging to the estate of the late J. Malcolm Forbes is that they will not be sold this spring but that the administrator of the estate will, for this season, at least, carry on the farm in accordance with the plans formulated by Mr. Forbes. It is said that Arion 2:07½ will be left in Kentucky for the season and that the mares at Forbes Farm will be mated with the stallions there just as they would have been had Mr. Forbes lived. According to report, several parties have endeavored to buy Blngen 2:06½, but none of the offers for him was considered. It would be very pleasing for horsemen generally if the celebrated stud which Mr. Forbes formed could be kept intact long enough to bring about the results which the dead breeder had in mind when he established it and which were in so fair a way to be realized when death intervened.

The *American Horse Breeder* of Boston appears with a new heading and looks like a pretty girl with a new Easter bonnet.

The Los Angeles horse, Stipulator 2:11½ by Titus, son of Director, from Grace Kaiser (dam of Coney 2:02) by Kaiser 2:28½, won the Dallas Club matinee cup at Fort Worth, Tex., on the 10th inst. The time for the two heats was 1:03½, 1:03—the half-mile pacing record of that state.

Sable Wilkes (3) 2:18, who has been standing for some time past at Stevens Farm, Barre, Mass., has been sold by Mr. F. E. Stevens to A. H. Arnold of the Arnoldade Stock Farm, Millerton, N. Y. Sable Wilkes was a world's champion at three and four years, and is the sire of Freedom 2:29½, the first yearling to trot in better than 2:30. The price Sable Wilkes brought was not announced. Mr. Stevens also sold to the same party Red Wilk, by Red Wilkes, dam Isabella (dam of three and one sire) by Wedgewood 2:19.—*Am. Horse Breeder*.

The Monterey colts are being talked about as having speed and being the kind that will develop into race horses like their sire. This is a good year to send a mare to Monterey 2:09½.

The fee of \$25 asked for the services of the Los Angeles stallion Limonero 2:15½ is very low for a stallion of his breeding. He is by Piedmont 904 out of the producing mare Lulaneer by Electioneer. The Piedmont-Electioneer cross is a good one and Limonero's get show evidence that he will be a most successful sire.

Ferndale Stock Farm, at Santa Paula, has two stallions that carry much of the blood that made the champion Lou Dillon 1:58½. These stallions are Longworth 2:19 by Sidney, dam Grey Dale by American Boy, Jr., and Ringwood by Sidney, dam Alma by Dashaway son of Williamson's Belmont. Longworth has sired several in the 2:15 list and gets speed and good looks with great uniformity.

Silver Bee 2:27½ by Silver Bow 2:17 is siring some very handsome colts in Sacramento county. If you want something that will be high class in looks, size and style and with speed, send a good mare to him.

The Bell Derby by Bow Bells 2:19½, dam Bertha Derby by Chas. Derby, second dam Bertha (dam of Don Derby 2:04½, Diablo 2:09½, etc.) by Alcantara, was one of the young stallions paraded at a recent stallion show at Lexington, Kentucky. A pretty well bred one, we should say.

Some high class mares have been bred to Mr. James Coffin's Mendocino colt Cassian this year. Among them are Carrie Malone, own sister to Chas. Derby 2:20 and Klatawah 2:05½, also a very handsome mare by Guy Wilkes out of a mare by Nutwood, Lillith 2:22½ by Secretary, and several others.

Harry Wilkes 2:13½, the fastest trotter got by George Wilkes 2:22, and now 28 years old, is still in active use on the speedway of a New Jersey town. He held his own bravely on the ice the past winter.

Much interest is being taken in the establishment of the Professional Drivers' Beneficial Association, which of late held a meeting in Philadelphia to adopt by-laws. It was decided among other things that the dues should be \$5 annually with assessment death benefit of \$3, while each member is to pay into the treasury \$1 on the death of another member. In case of accident while driving on the track in the regular course of his duty a member shall receive a weekly benefit of \$25 for the first twelve weeks and \$10 per week for fourteen weeks more. Any driver who drives horses for purses or stakes is to be considered a professional and is therefore eligible. Colored men are not eligible.

One of the handsomest four-year-old Percheron stallions that ever arrived in San Francisco is at the Occidental Horse Exchange. He weighs over 1700 pounds and is black as a raven, is called Dewey and was sired by Jumbo, a four-time blue ribbon winner.

A dispatch from Salt Lake City says: "Local racing men have secured an option on sixty acres of ground near this city and are making preparations to establish a first-class track. A racing association will be formed, capitalized at \$100,000. It is expected to place the track on the California circuit. Automobile races and polo tournaments will be arranged, and a horse show will be an annual feature."

J. B. Rohrer of Montague has purchased for the Little Shasta Valley Company a two-year-old Percheron stallion weighing 1400 pounds. The purchase was made from C. O. Stanton of San Jose, agent on this coast for Singmaster & Sons of Keota, Ohio. The company which Mr. Rohrer represents is doing much to improve the breed of heavy horses in northern California.

Messrs. McCreary & Carey, of South Omaha, Nebraska, shipped eighteen draft geldings to Wm. G. Layng, of the Occidental Horse Exchange, on the 21st of last month, and in less than a week sold sixteen of them at private sale at an average of \$250. Competent horsemen say that a more uniform lot has not been offered in this city for years. Their ages ranged from 5 to 7; their weight averaged 1565 pounds, they were solid in color and were thoroughly broken. Another shipment is expected within ten days. It pays to breed and feed draft stock.

The Stevens County Producers Association, which owns a good half mile track at Colville, Washington, will hold a race meeting on July 4th, 5th and 6th this year, at which \$1000 will be offered for two stake races and minor events. The officers of the association are M. W. Teeples, President, Meyers Falls; C. W. Winter, Vice-President; G. B. Ide, Treasurer and H. R. Crozier, Secretary, all of Colville.

Enter at Readville.

The grand circuit meeting of the old reliable New England Trotting Horse Breeders Association will be held during the latter part of August this year and the usual lot of rich stakes are announced to close Monday, April 11th.

The Blue Hill is \$5000 for trotters eligible to the 2:30 class.

The Massachusetts is worth \$15,000 and for trotters of the 2:10 class. It will be one of the greatest events of the year.

Three thousand dollars is the amount of The Ponkapog for 2:14 class trotters.

Three thousand dollars is also hung up in The Tyr which is for three-year-old trotters eligible to the 2:25 class.

The Norfolk is the only pacing event of these early closing stakes and amounts to \$5000. It is the 2:24 class pacers.

The full particulars will be found in the advertisement on another page.

The Neernuts are Going Fast.

SANTA ANA, March 27, 1904.

BREEDER AND SPORTSMAN—While attending the matinee of the Driving Club at Agricultural Park in Los Angeles yesterday I saw two Neernuts win their races very easily—in fact they both won pulling up. Neerbird went in 2:26 and Toughnut in 2:20. They are both out of the commonest kind of mares. Now it strikes me that if Neernut can sire such speed from that sort of mares, he should do much better with good first class mares. I know of at least 26 or 27 colts and horses by Neernut that have gone better than 2:30, and for the number of colts he has it is quite a showlog.

Rayhould is working about eighteen head at the track and they all improve with each workout. Burnut, a hay gelding, has shown his ability to heat 2:15 and has been miles better than 2:20 already. He stepped an eighth yesterday in 15½ seconds and did it like a trotter. Goldnut, a chestnut stallion, four years old, has been a mile in 2:29½ and a half in 1:13½. Neerellie, a hay mare, six years old, has had but very little work but has shown a mile in 2:28, with a quarter in 34 seconds. Rednut, another green trotter, has been a mile in 2:28½. The hay gelding Pete trotted in 2:29½ this spring, which is no measure of his speed. The pacer Cocanut has been several miles in 2:20 with a quarter in 31 seconds, and the pacer Brownnut has also shown a wonderful amount of speed. In fact, they all show remarkably well for the work they have had.

The stallion Neernut is looking better this spring than ever, and seems to enjoy life with the best of them. If given an opportunity he could surely trot a mile in 2:07 or 2:08. Respectfully,

C. W. FORD.

Endorses County Colt Stakes.

SANTA ROSA, March 29, 1904.

ED. BREEDER AND SPORTSMAN—Reading Mr. Geo. L. Warlow's letter in your last issue reminded me of something I have thought over for some time; that is, to encourage colt training. It seems to me it would be a step in the right direction if every person owning a stallion standing for public service in a county would give the price of one service fee, or say one-half the price, towards a stake for the get of the stallions named and paid on. The colts to be eligible by paying suitable entrance fees to start for the said stake to be contested for at some track in the county when they were two or three years old. It does seem as if this would encourage the small breeders (of which I am one) to work his colts, knowing he would only have the colts in his own county to fight. I believe it would be the means of bringing out more three-year-olds than we have seen on the circuit for some time. It would be a futurity on a county scale—that's all. They could then enter in purse races if the colts prove worthy. I now have but one colt and as there is but one two-year old race to start him in, the chances to win money with him as Mr. Warlow says are not many, but training expenses are just the same. Respectfully,

R. HOGBOOM.

Made a Good Start.

The Amateur Driving and Athletic Association made a good start Thursday evening in the direction of raising the \$25,000 needed for the building of the proposed circular track, polo field and athletic grounds in Golden Gate Park. At the weekly meeting of the association A. B. Spreckels subscribed \$1000 toward the project, and announced that he could get \$2500 more from others interested in the undertaking. Subscription books were distributed to the representatives present, and the work of raising funds will now be undertaken in real earnest. It is believed that the full amount needed can be raised within thirty days.

The following were elected to constitute the board of directors of the association: F. G. O'Kane, James Coffin, E. H. Aigeltinger, I. L. Borden, T. J. Crowley, W. J. Kenney, Ira B. Dalziel, E. R. Pease, E. J. Lynch, Thomas Driscoll, T. J. Douglas and William Blackwell. The board chose the following executive committee to take charge of the work of raising the needed funds: W. J. Simpson, F. G. O'Kane, James Coffin, E. H. Aigeltinger and L. L. Borden.

The Santa Rosa Democrat of March 29th says Dick Ahles of Pierce Bros. track will train R. Hogboom's Waldstein McKinney. The colt is entered in the Breeders Futurity. He is a horn pacer, and a fine looking colt. If breeding counts for anything the colt is all right. His dam was a granddaughter of the great Director, and her sire Waldstein, who holds the five-mile stallion record of the world. The colt is sired by Washington McKinney, son of the noble McKinney. Up to the present time Mr. Hogboom has broken and trained him.

America's Largest Winning Stallions.

Below is given the record made by America's largest winning thoroughbred sire each year since 1870. But five stallions have had their names in this exclusive table more than once. The immortal Lexington has headed the winning sires seven times, no other sire having approached this record by three years. Gleoelg, Leamington and the mighty Hanover each have appeared at the head of the list four times, while Bonnie Scotland has stood first in two years. It is worthy of note that beginning with 1870, Lexington took top rank for five successive seasons, giving away the next season to Leamington, being first again the next and again giving away to Leamington the following season but following this up with his name at the top again the next year. In other words, the first ten years shown in the table are divided between Lexington and Leamington, the former standing first in seven and the latter in three. Hanover's four winning years were also made in succession—from 1895 to 1898, inclusive, while Glenelg held the record four seasons, three of which were successive. In the seven seasons that Lexington's name heads the list his get won a total of \$565,189; in Glenelg's four years his get won \$463,277; in Hanover's four years his get won \$434,725, and in Bonnie Scotland's two years his get won \$239,175. In amount of money won in a single year, Himyar has the honor, his get winning in 1893 \$259,252. His great son Domino was responsible for the major portion of this vast sum. No other stallion has reached the \$200,000 mark, except Sir Dixon, whose get, in 1901, won a grand total of \$206,925, but about \$40,000 of this sum was won by his representatives in England and France. The table follows:

Year.	Name.	Amt. Won.
1870—	Lexington.....	\$120,360
1871—	Lexington.....	109,095
1872—	Lexington.....	71,515
1873—	Lexington.....	71,565
1874—	Lexington.....	51,880
1875—	Leamington (Imp.).....	64,518
1876—	Lexington.....	90,570
1877—	Leamington (Imp.).....	41,170
1878—	Lexington.....	50,195
1879—	Leamington (Imp.).....	70,837
1880—	Bonnie Scotland (Imp.).....	135,700
1881—	Leamington (Imp.).....	139,219
1882—	Billet (Imp.).....	89,998
1883—	Bonnie Scotland (Imp.).....	103,476
1884—	Glenelg (Imp.).....	98,862
1885—	Virgil.....	73,235
1886—	Glenelg (Imp.).....	113,638
1887—	Glenelg (Imp.).....	120,031
1888—	Glenelg (Imp.).....	130,746
1889—	Rayon d'Or (Imp.).....	175,877
1890—	St. Blaise (Imp.).....	189,005
1891—	Longfellow.....	189,324
1892—	Iroquois.....	183,026
1893—	Himyar.....	259,252
1894—	Sir Modred (Imp.).....	134,318
1895—	Hanover.....	106,908
1896—	Hanover.....	86,853
1897—	Hanover.....	122,374
1898—	Hanover.....	118,590
1899—	Albert (Imp.).....	95,965
1900—	Kingston.....	116,368
1901—	Sir Dixon.....	206,925
1902—	Hastings.....	111,855
1903—	Ben Strome (Imp.).....	106,965

But once in this period of thirty-four years has a sire whose get won less than \$50,000 stood at the top and that was in 1877 when Leamington took honors with \$41,170. Imported stallions have ranked first in sixteen out of the thirty-four years. Four of the stallions that occur in the above table were themselves winners of more than \$100,000. Kingston won on the turf \$142,562; Rayon d'Or won \$122,140; Hanover won \$121,732, and Iroquois won \$101,613.

In the last ten years, with but one exception, the largest winning stallion was located in Kentucky.—*Ky. Farmer and Breeder.*

Why Horses Crib.

Every one who has owned a horse which is constantly gnawing at the manger and at any bit of wood into which it can get its teeth knows how troublesome the habit is. It can be broken up, but it will require considerable time and effort. The cause of this habit is, in the majority of cases, due to indigestion or bad teeth, so when the horse has the habit it should be turned over to a veterinary surgeon to have its teeth put in order. If this does not break up the habit, then treat the animal for indigestion.

Give the animal a dose consisting of a mixture of two ounces of turpentine and one pint of raw linseed oil, and repeat in a week. See that the animal has plenty of exercise, and keep a lump of rock salt in its manger all the time. For a while let the ration consist of bran and cornmeal night and morning, with cut-hay as roughage; at noon let the ration be of whole oats, with a small allowance of hay. Under this treatment the animal will show a marked improvement in a short time, and if it is persisted in the treatment will probably break up the habit of cribbing.

Some Trainers Best with Entire Families.

[Trotter and Pacer]

Ever stop to think that some of our great trotting families were "made" by some trainers? Well, let us look it over and see. All know, or should by now, what Ed Geers was to the Hals as a family. He knew just how to rig one, how to work one, how to race one and how to win races with all. Later he studied the families at Village Farm—for undoubtedly 'tis a study—and the get of Chimes, Mambrino King and the few by Almont, Jr., that he had did exceedingly well with him as mentor.

Doug Thomas was always at home with the Baron Wilkesses; to-day he is drilling the Wiggins family, and, safe to say, knows more of them because of having raced Wiggins than any trainer we have. Ryan understands the Boreals and Ed Beynon can take up a Noko and go to the front in short order. Crit Davis knew the Red Wilkesses thoroughly, just as did Marvin the Electioneers and Johnny Goldsmith the Guy Wilkesses. James H. Goldsmith could team a Volunteer, and the family of Number 55 would have been almost lost to view but for his offices.

You will find that Charlie Baldwin knew the Lambert family root and branch and could nurse one's speed till he had a winner; also with those from mares of the family; he knew just what they could and were liable to do, and get the best results. Al Thomas, perhaps better than Willie Wylie, understood the Cossacks, and yet Willie Wylie was a boy at his heels, learning all he could, to profit by when he became head trainer at Caton Farm. James Burlew knew the hotheaded (claimed to have been) Champions and did well with each member, near or remote, that he handled and raced.

James Golden had a light hand, was a delightfully proficient reinsman and knew the Kentucky Wilkesses to a T. He was among America's best team drivers and had a knack of hooking a pair correctly, then getting them to very fast miles at the pole. George Hayes handled more young Onwards than any leading trainer of his day but raced very few. He did well with Catchfly, the Administrator mare, and was a skilled fitter. Working for Col. Pepper, as he did, he was not in a position to gain as great renown as a Marvin or Geers.

Give Dick Wilson a horse bred in Indiana and see how much of the family peculiarities he could tell you if asked. He is posted from end to end. Every leading handler knows, seemingly, that family traits are handed down. Ask Charlie Thompson any day about the Nutwoods, and I think he could tell you how best to handle and equip one. Mr. Williams could take anything by either Axtell or Allerton, go right at it and make a 2:30 trotter in far less time than one who had never broken and waywised a number of the get of each.

John Kelly would doubtless do better with either a Directum or Direct than any of our very great handlers, because he knew their sires thoroughly, watched every youngster by either he had to do with very carefully, and would be prepared to intelligently deal with any fine point precipitating itself. And, too, see how Dave McClary always gets on, where others fail, with that "Star Pointer family" of brothers. Take Henry Titer. Don't you think he would be the one man over all others to whom to send a fast Bingen? He started with Bingen as a two-year-old, knows him all the way from his awkward colt strides to the free-for-all stallion class and has given his get their experiencing drives successfully.

John Splan never had families to deal with. Gen. Turner took all that were winning timber and raced them without studying for future reference. Hickok wanted only wage earners and threw sentiment to the winds. Ed Bither did great work with the champion Dictators of 1883-4—Jay Eye See and Phallas—later took up Kremlin and marked him at 2:07½. Perhaps he would take a Kremlin today and do as well as John Young, but Mr. Young surely understands them, as a glance over the list of Mr. Allen's great horse well proves. Jack Curry is one who does well with every sort, if it but has speed. He teamed the sensitive, ambitious little Alix—and I'll always think I saw her trot part of one heat in the 1893 Columbian free-for-all that she won, at a two-minute clip for about a quarter—and left her at 2:07½, made, too, in a nine heat race in a field of real trotters. He raced Joe Patchen successfully, then exhibited him profitably. Today, if a man owned a very great one by Joe, don't you think Jack could get on with it well? Just a little better, possibly, than one who had never had to do with good "old Joe."

I'd rather have a man who had given the sire his lessons handle the best among his performers than a man who knew only "training by the hook" and never had a chance to study family peculiarities—gaits, actual and possible by balance, temperament and structural defects. Any one can take some colts and

just get them straight and accustomed to the shafts and wheels and then go out and drive them a fraction at a 2:30 gait before putting on the fine touches. Some families are all trot while yet young, others need age to round them out.

It is ever an interesting moment when you can induce a farm trainer to discuss family characteristics and tell you how he "made" some record-holder. The first mile in 2:50 is usually harder to secure than the first in 2:15.

A Proposed New Circuit.

A Chicago daily prints the following:

Plans are now under way for the formation of a grand trotting circuit embracing the states of Utah, Montana and Washington.

It is the intention of those interested to arrange for purses to be given by each city located in the circuit, such city to be responsible for its own losses only.

Of those cities proposed for the circuit the following have been named: Butte, Anaconda, Missoula in Montana; Salt Lake and Ogden in Utah; and Seattle and Spokane in Washington.

The schemes to provide seven weeks' racing, each city to have one week.

George S. Klotz, a prominent handicapper of Butte, is now figuring on the circuit, and the following gentlemen who are interested in fast horseflesh are understood to be behind the movement: Fred Sterling and Tyler Thompson of Missoula, Dr. Hanson of Butte, Judge English and John Calkins of Anaconda, Mr. Huffman, owner of several good trotters.

It is argued by many horse followers that Montana being one of the banner tryout States, with many good horses produced there, it should have a circuit wherein young horses could be tried out for future entrance elsewhere. Many of the horses now winning fast events in other parts of the country made their maiden appearance there, and if the circuit is formed, a gilt-edged article of racing will result.

The circuit will be so arranged that each city included will have sole charge of its own affairs, but at least once a year the members will all meet at some central point and arrange a schedule which will govern the next season's events.

The season in Butte would open during the summer months after the cold weather had passed, while in Salt Lake and Seattle the meeting could be held earlier. If the circuit proved successful the season would be lengthened to meet the occasion.

So far nothing tangible has been accomplished, but it is understood a meeting of those interested will be called some time in the near future, at which time full details of the proposed circuit will be perfected.

Good Money at Spokane.

As will be seen by reference to our advertising pages there will be many liberal purses and stakes for the harness horses to contest for at the big Interstate Fair at Spokane, Washington, this year. The meeting will be held from the 3d to the 9th of October, and entries close May 10th. The stakes for trotters and pacers are as follows:

Interstate Fair Stake, for 2:17 pacers, \$1200.

Greater Spokane Stake, for 2:20 trotters, \$1200.

The Bolster Stake, for 2:10 pacers, \$700.

Chamber of Commerce Stake, for 2:13 trotters, \$700.

The Kootenai Stake, for 2:25 pacers, \$500.

The Montana Stake, for 2:30 trotters, \$500.

The Idaho Stake, for three-year-old pacers, \$350.

The Oregon Stake, for three-year-old trotters, \$350.

Two consolation purses of \$300 each will be given to non-winning starters in the Interstate Fair Stake and the Greater Spokane Stake.

Entries to all above stakes will close on May 10th.

The program of running races will be announced later and will be stronger than ever so that both the runners and harness horses will have a chance at the money this fall.

Little Boy 2:01 1-2 Goes Home.

Mr. C. K. G. Billings has presented Little Boy 2:01½, the world's champion wagon gelding, to Mr. Walter Palmer, Ottawa, Ill., his old trainer, and the fast side wheeler will spend his days at Sunny Side Farm in idleness and luxury. A more appropriate and gracious act Mr. Billings could not have performed. It was Walter Palmer who took Little Boy in hand, after he had been discarded by others, and made him a world beater. Little Boy always had speed "to hurn," but it took the quiet, sedate, skillful, even-tempered Ottawa trainer to instill in him a disposition to "be good"—and break world's records. The two are greatly attached to each other, and at Sunny Side Farm the handsome little champion will indeed be "at home."—*Western Horseman.*

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Answers to Correspondents.

ROBT. EHVERT, Alvarado.—Please give full breeding of Bay Rose in your next issue.

Answer—Bay Rose 9814, bay horse foaled 1881, by Sultan 1513, dam Madam Baldwin by The Moor 870, second dam Daisy King by Ben Lippincott, son of Williamson's Belmont.

N. Y. Z., Point Arena.—Please give name and breeding of dam of Pasha 2:27½, especially as to his sire. Also breeding of dam of David Hill, Jr., 17139, and of Lexington Bell, dam of Lassie Jean (dam of Who Is It 2:10½). Has Wilfred L. pacer by Bozero 8560 a record? He was owned in Reno, and raced there and in California in 1900 and 1901, possibly after. Is this breeding correct? Hatchet, mare by Norfolk, dam by Owen Dale sale son of Williamson's Belmont, second dam by Lexington son of Boston, third dam by imp. Margrave.

Answer—(1) Pasha 2:27½ is by Echo 462 (son of Hambletonian 10, and Fanny Felter by Magnolia 68). The dam of Pasha was Young Fashion by Correct, son of Williamson's Belmont. (2) The dam of David Hill Jr., 17139 was called a St. Lawrence mare, but nothing further is given in the books. (3) The pedigree of Lexington Bell as follows: Sired by Lexington dam Eagles of imp. Glencoe, second dam by Grey Eagle. She is registered on page 289, volume 4 of the American Stud Book. (4) Wilfred L. pacer by Bozero has a record of 2:30. (5) Yes.

W. E. KEWIN, Modesto.—Will you please inform me of the past performances of Goldscratch, thoroughbred?

Answer—Goldscratch, gray colt by Goldfinch, dam Helen Scratch started fourteen times as a two-year-old in 1898, won two races, was second seven times, and third once. On February 7th that year, won at three and a half furlongs in 0:43½, carrying 106 pounds, track heavy. On March 4th, same year, won at four furlongs, in 50 seconds, carrying 111 pounds, track fair. Started once as a three-year-old but did not win and started several times in 1903, but did not win.

E. P. McDANIEL, Marysville.—Kindly state in your next issue the pedigree of a horse called Perfection, said to be by Direction 2:08½ out of Red Bell by Red Buck.

Answer—We can find no such horse registered, up to Vol. 15 of the A. T. R. Vol. 16, containing names of horses registered since the early part of 1901, is not yet published.

SAM FRANK, Reno.—Can you give me the breeding of a horse called Flashlight that raced in Colusa a few years ago?

Answer—Flashlight is by Illustrious 4178, son of Happy Medium. His record is 2:34.

JACOB BROLIER, Hanford.—To decide a wager, the result of an argument, I claim Jonesa Basler's technical record to be 2:11½ and not 2:11½ as accredited to him in some editions of the BREEDER AND SPORTSMAN. My recollection is that in your summarized report of this race at Vallejo, Basler was accredited with a record of 2:11½. I am positive the holiday edition of the Horse Review and Chicago Horseman report it the same. Which is right?

Wager No. 2. That Ira by Iris did not take a record of 2:10 flat at Petaluma, Sacramento or anywhere on the circuit. My recollection being that it is 2:10½.

Wager No. 3.—That in this race where Ira took his record the first heat, I claim that Jonesa Basler beat him for place in the second or third heat if not in both of them, the heats being won by Ben F. But, by reason of Ira being a heat winner he stood second in the summaries and won second money, he and Ben F. being the only starters in the fourth heat, since the conditions of the race were, "Any horse not winning a heat in three to remain in the stable."

By answering the foregoing questions to decide these wagers, you will confer a favor on us.

Answer—(1) Jonesa Basler's record is 2:11½ and not 2:11½. The summary of the race at Vallejo, as printed in the BREEDER AND SPORTSMAN was correct. The Year Book gives his record as 2:11½ in the table of new 2:25 pacers, but in the summary of the race as printed in the same volume it is given as 2:10½. (2) Ira's record, which was made at Sacramento is 2:10½. (3) The summary of the race in which Ira took his record is as follows:

Ben F. b g by Bradmoor.....	3 1 1 1
Ira b g by Iris.....	1 5 7 2
Kelvin S. c g by Dr. Hicks.....	5 2 2 0
Jonesa Basler b h by Robert Basler.....	7 4 3 0
Col. C. 7-4-3-0; Miss George 6-7-4-0; The Mrs. 4-5-8-0; Alledale 9-8-6-0; Swanhilda 6-9-10-0; Nance O'Neill 11-10-9-0; George 10-11-0-0.	

Time—2:10½, 2:11, 2:13½, 2:15½.

SUBSCRIBER, Palo Alto.—The following wager was left to the BREEDER AND SPORTSMAN to decide, will you kindly publish the answer in your paper? A says that the number of horses used throughout the United States at the present time is larger than ever. B says that it has gradually decreased. Kindly publish your answer as soon as possible, as there has been \$100 placed on the wager.

Answer—There are no statistics as to the number of horses in use in the United States at the present time. The national statistician at Washington makes statements of the number of horses in the

country at different periods. He states that on January 1, 1904, there were 16,736,059 horses in the United States. In 1901, according to the same authority, there were 8664 more than that number, and that is the only year when there were more horses than at the present time. The value of the horses in this country on the first day of the present year he gives as \$1,136,940,298, which is \$106,235,339 greater than at any previous period. As horses in use are considered more valuable by the assessors than horses not in use, the inference is that there are more horses in use at the present time than at any other period in our history, but there are no statistics available on which to decide your wager.

A Trio of Champion Reinsmen.

The coming season of light harness sport will witness the return to active work in the sulky of three distinguished reinsmen who have not been seen together in races for the past decade.

There are John Splan, Budd Doble and Charles Marvin, who, over a generation ago, had driven world's champions to their records.

Budd Doble, after the famous Nancy Hanks had been driven by him to a record of 2:04 in 1892, retired from the turf and devoted himself to mining and other business pursuits.

Charles Marvin, after making Palo Alto famous, went to the Sibley Farm in Pennsylvania, and later engaged with Senator Bailey to train and develop his young stock, but has not been in evidence at the great meetings. He has now a campaigning stable which will come down the great line.

It would be difficult to name three jockeys on the running turf today who were prominent ten years ago, yet here are three drivers who were famous over three decades ago, and whose biography would include the most brilliant chapters of the history of trotting sport during that period.

In this remarkable trio, Budd Doble has the pride of place. He is the only man who has the triple honor of having driven three trotting world's champions to their records. When he began his turf career Flora Temple was still the queen of the turf. She won the crown on October 15, 1859, at Kalamazoo, Mich., when she trotted in 2:19½, the first time a trotter got below the 2:20 mark.

In 1864, Dexter, the famous son of Hambletonian, began his victorious career, which culminated in his becoming the champion three years later. On July 30, 1867, at the Riverside half-mile track, Boston, driven by Budd Doble, he cut the world's record to 2:19, and on August 14th of the same year he reduced this record over the mile track at Buffalo to 2:17½. Dexter was then sold to Robert Bonner and retired from the turf. The next great star in his stable was that empress of all trotters, Goldsmith Maid. She began her racing career in 1867, and won her last race ten years later, defeating the succeeding champion, Rarus. In that time she won 100 races.

On September 6, 1871, at Milwaukee, Wis., driven by Doble, she cut the record to 2:17. She was then 14 years old. In 1873 the brown gelding Occident trotted in 2:16½ at Sacramento, Cal., but in the following year Doble drove his great mare in 2:16, 2:15½ and 2:14½, and finally, on September 2, 1874, at Mystic Park, Boston, he cut the champion record to 2:14. Goldsmith Maid was then 17 years old.

Eighteen years elapsed before Doble again got a champion. In 1890 a four-year-old mare called Nancy Hanks was in his stable, and she soon showed her quality. In 1891 she took a record to high wheel sulky of 2:09, and at that time the best record on a regulation track was that of Maud S. 2:08½, while Sunol 2:08½, held the championship, made over the kite track at Stockton, Cal.

With 1892 came the bicycle sulky, and records fell in a most startling manner. Doble with Nancy Hanks smashed the records three times. August 17 he cut it to 2:07½ at Chicago. At Independence, Ia., August 31, he reduced it to 2:05½, and September 28, at Terre Haute, Ind., he placed it at 2:04.

No man identified with trotting sport is more widely known or more popular than John Splan. He is at once the sage and the wit of the trotting turf, and his book on the trotters is a classic.

It was the great gelding Rarus that placed Splan on his pinnacle.

In the same year (1874) that Goldsmith Maid made her record of 2:14 Rarus won his first race. He was on the turf for five years, and during that long period defeated the best horses of that time, including the famous Goldsmith Maid.

At Buffalo on August 3, 1878, Splan drove him in 2:13½, which gave him the champion record. His next champion was at the pacing gait. In 1881 the famous pacer Little Brown Jug had put the record at that gait at 2:11½, thus beating the champion record of 2:12½, made by Mattie Hunter a month previously,

driven by Splan, but the latter was next in line, for at Chicago on October 5, 1884, he startled the world by driving the bay gelding Johnston to a record of 2:06½. The trial took place at the West Side track, in Chicago, and the hooks laid 3 to 1 against the horse beating 2:10. At that time the trotting record was 2:09½, held by Maud S.

The horsemen of to-day are apt to connect Charles Marvin solely with the late Senator Leland Stanford's great farm at Palo Alto and the champions of that famous establishment, which he trained and drove. But Marvin had made a reputation before he went to the Pacific Coast, for in 1874 he was driving Smuggler, who he eventually made the champion trotting stallion. He was on the turf till 1877, when he was retired to the stud. In 1876 he reduced the stallion record to 2:15½, the world's record at that time being 2:14.

With the Palo Alto stud his career was one long series of sensationally brilliant triumphs. He won the world's championship in 1891 with Sunol in 2:08½, having previously won the three and four-year-old championships with her in 2:13½ and 2:10½.

In 1891 he also drove the bay horse Palo Alto to the stallion championship in 2:08½, within half a second of the world's championship of that time. In the same year he drove Bell Bird to a yearling record of 2:26½, but his crowning achievement was, in all probability, when he drove the two-year-old colt Arion to a record of 2:10½.

The magnitude of this performance can only be estimated by two great salient facts. The previous record was 2:18, and though the performance was made to a high wheel sulky thirteen years ago, it is still the two-year-old champion record.

These are only a few of his achievements, and the question is, Will he be able to repeat them with the new stable which Senator Bailey has bred?

These are the three remarkable men who, though veterans of the turf, are still active, vigorous and progressive, and whose reappearance on the active arena of the trotting turf will be hailed with pleasure by thousands of their old admirers.—Dexter in New York Telegraph.

Exit the Tipster!

[Sports of the Times.]

Is it possible that at last the mob of Howling Derivishes, known as Tipsters, may die off this season as a geranium "cutting" dies from its own damp? It begins to look like it!

The past winter has been one of the worst the cult has ever experienced. There has been practically no sale for their goods in New York for the simple lack of places open where the information, good, bad or indifferent, could be utilized. Those few who have gone south or west have not done well, and it has been a hand to mouth game for the majority.

When the season opens there will be the usual splurge, but it is safe to say that many will cave in, as did Maxim & Gay at New Orleans. The public chain has been broken; when men could not play, they ceased to buy, but they did not cease to try and locate winners. Most of them will be surprised to find their own unaided efforts surpassed the wonderful "information" results of the average tipster, and they will adhere to their own hand. This caused one of the leaders of the tipsters to say this week: "The game is about played out. New York is about ripe for another new sucker game, and I am willing to pay a big price for anything off the stock market, racing and religion."

The late William C. Whitney was the first to really try and break up the objectionable gathering, and to a great extent succeeded. He splintered the ranks, and it looks as if the fissure were going to spread until nothing but fissure remains!

It will be an unmixed blessing!

The Horseman and the Bunch.

W. F. YOUNG, P. D. F.

Dear Sir:—In every case where I have sold Absorbine it has given perfect satisfaction. One case in particular, where a horse had a soft bunch over the pastern joint half the size of a man's fist, which, of course, made it impossible to use. After using a number of blistering remedies I persuaded him to try Absorbine, which not only removed the bunch but made the horse worth fifty dollars more, as he was a splendid horse and perfectly sound with the exception of this bunch. Yes, I would advise any one having a horse troubled with soft bunches of any kind to use Absorbine, as it will do all the original claims for it. Respectfully yours,

J. W. CASE.

Absorbine \$2 per bottle, express prepaid.

Address W. F. YOUNG, P. D. F., Springfield, Mass.

Stockholders of the driving club at Tiffin, O., have decided to change the mile track there to a regulation half mile course, as experience has shown that the city is not large enough to support a meeting of Grand Circuit calibre, while in one of the half mile circuits it would be a winner.

Strikel—if they don't give you Jackson's Napa Soda when you ask for it.

Proposed New Standards.

Casper L. Redfield, the writer on hereditry whose opinions have caused much controversy among the students of breeding, proposes a new standard for the registration of trotting and pacing horses. His article on the subject appeared in the last issue of the *Chicago Horseman* and is as follows:

We have a breed known as trotting horses, and a series of rules by which we determine whether a horse belongs to the breed or does not. As proof that the establishment of standard rules for this purpose has been of material advantage in improving the breed we have the fact that horses standard under the rules average superior to those horses which are not standard.

These rules were first adopted in 1879 and have been modified or changed several times since. In their original form the actual performance of horses formed a large part of the essentials for the admission of horses to the standard, as witness the following first rule:

"1. Any stallion that has, himself, a record of two minutes and thirty seconds (2:30) or better, provided any of his get has a record of 2:40 or better; or provided his sire or his dam, his grandsire or his granddam is already a standard animal."

The general character of this rule represents the general character of seven out of ten original rules. The animating idea evidently was to form a breed by bringing together those animals which had demonstrated their trotting capacity by actual performance. The other three rules, however, left it open to bring in the relatives of these performers on the theory that if a horse is good enough to belong to the standard breed all of his immediate relatives are good enough, simply because they are relatives. In regard to this matter Wallace says in Volume 4 of the Register:

"For the next few years the doors of the standard will be constantly opening to admit new performers, and in many instances, on a single performance of 2:30 or better, whole families and tribes will enter. There are many trotting-bred stallions, conspicuous and valuable, but not technically standard, that are being bred largely on standard mares, and just as soon as one of their get scores a record of 2:30 they will step inside the standard and bring a hundred colts with them."

It is bad enough to leave an open door through which the ranks of standard horses may be filled up with incompetent relatives, but the present rules go still farther in this direction. The first rule of the present standard is:

"1. The progeny of a registered standard trotting horse and a registered standard trotting mare."

According to this rule the children are registered because the parents were, the grandchildren will be registered because the children have been, the great-grandchildren because the grandchildren were, and so on in indefinite series. By this rule we may go on breeding standard horses for a thousand years without any one ever trotting a mile in 2:30. In fact, by the well known principles of selection, we may produce a breed of "standard trotters" that cannot trot at all—that do not know and can use any gait between a walk and a run. To the man up a tree it seems as if a breed of trotting horses should be made up of horses that trot, and not of horses that are descended from some other horses which in the distant past were related to still other horses that did trot.

Without disturbing the present standard, which has served a useful purpose in the past and which may continue to do so in the future, I will suggest that there be formed a new and higher standard by which there may be gathered together a select class of horses who have demonstrated their capacity as trotters by actual performances. Such a standard may take a great variety of forms, one of which I will suggest as follows:

PROPOSED TROTTING STANDARD.

1. Any animal that has a trotting race record of 2:10 or better.
2. Any animal that has trotted ten heats in 2:15 or better, provided the sire or the dam has a trotting record of 2:30 or better.
3. Any animal that has trotted twenty heats in 2:20 or better, provided that the sire or the dam and one of the grandsires or one of the granddams have trotting records of 2:30 or better.
4. Any animal that has trotted thirty heats in 2:25 or better, provided that both sire and dam have trotting records of 2:30 or better.
5. Any animal that has trotted fifty heats in 2:30 or better, provided that both sire and dam, and one sire or one grandam have trotting records of 2:30 or better.
6. The progeny of a horse that is standard by one of the preceding rules.

7. The progeny of a standard horse and a standard mare, provided such progeny has a trotting record of 2:15 or better.

The essence of these proposed rules in the establishment of a high class breed of trotters is actual performance at the trot. Rule 1 goes on the theory that any horse that has trotted a mile in 2:10 or better is good enough as a trotter to be entitled to entrance into a breed of trotters irrespective of what his ancestry may have been. Rule 2 would admit a horse who has trotted in 2:15, provided that he has made ten demonstrations of his ability to trot at that speed, and provided also that he has a small amount of trotting ancestry. Rules 3, 4 and 5 admit horses of less and less speed, but each decrease in speed requires an additional amount of demonstration and an additional amount of inheritance of demonstrated speed in previous generations. Rule 6 admits horses without records to the standard, but there is no means by which horses that are standard by this rule can pass the standard along to the next generation except as provided in Rule 7, and that rule requires that the next generation must demonstrate its speed before it becomes standard.

Rules of this class should be acceptable alike to those who believe that the breed of trotters is to be improved solely by selection, and also to those who believe that improvement comes by reason of developed sires and developed dams. It probably would not be acceptable to those who believe that the best way to breed is from sires and dams who never wore harness, but those persons can form a third standard in which that theory would be the dominating idea. They might breed from young stallions and young mares and then discard them. These discarded animals might be sent to the racetrack and the results of their performances would indicate to the breeders what ones of their sons and daughters would probably be the best to become the young sires and young dams of the next generation. In establishing a standard of that kind due provisions might be made that no animal should be registered unless there was satisfactory evidence that neither sire nor dam had been raced and that neither had been subjected to circumstances which might impair his or her vitality. By dividing off from the present trotting stock two special standards of the kinds indicated, and consistently breeding to those standards, it probably would not be many years before we had some definite information of a kind that is now lacking.

Maud S.'s Sulky.

There seems a strong probability that the tribunal which decided the Lou Dillon-Maud S. high wheel sulky controversy made a mistake when they found that the record of Maud S. was made to a plain axle sulky, evidence recently unearthed by Chas. S. Tanner of Cleveland, who testified before the board that the sulky was fitted with ball bearings in direct contradiction to the evidence of Mr. R. E. Bonner, making an even stronger case in favor of the ball bearing theory that had been supposed. Lyman Redmond, a brother-in-law of W. W. Bair, who drove the daughter of Harold in her record breaking mile, and who practically had charge of the mare at the time of her performance, wrote Mr. Tanner upholding him in his stand and offering to furnish an affidavit to the effect that the sulky in question was of the ball-bearing variety. Tanner at once wrote for the affidavit, which came at once and reads as follows:

State of Maryland, Baltimore City—to wit: Be it remembered, that this 2d day of March, A. D. 1904, before me, the subscriber, a justice of the peace of the said state, in and for the city aforesaid, personally appeared Lyman Redmond and made oath in due form of law that when Maud S. trotted to 2:08½ in 1885 at Cleveland, Ohio, she drew a high wheeled, roller bearing Caffrey sulky; that the record was made during the grand circuit meeting.

LYMAN REDMOND.

Subscribed and sworn to before me this 2d day of March, 1904.

C. CHAS. FRIEDEL, J. P.

Mr. Tanner in a letter to a Chicago friend expresses great satisfaction over the evidence of Redmond confirming his own and goes on to say that when he ordered a high wheel sulky for Lou Dillon from Mr. Caffrey it was to be as near as possible a duplicate of the one drawn by Maud S. except that it was to be made large enough for The Monk, and claims that in fitting it with ball bearings he gave silent evidence that it was a sulky of that variety which Maud S. drew. Tanner states that the sulky was seventeen pounds heavier than the one drawn by Maud S., and gives it as his opinion that the runner which was driven in front of the trotting queen when she trotted in 2:05 did more harm than good as Sanders had difficulty in keeping her from colliding with the pace maker or going over the top of him. He claims that a mile in 2:03 would have been the result without the runner.

In regard to Mr. Redmond's connection with Maud

S. Tanner says that Bair persuaded him to give up his training stable to take care of the mare as he wished to get the best possible results from her the last season which she was to appear. The day when she trotted in 2:08½, Tanner assisted Redmond in caring for the mare and in that manner became acquainted with the style of the sulky which she drew, and he states positively that it was of the ball bearing variety, the latest of Caffrey's make, built especially for her trials against time that year, and weighing only thirty-eight pounds. Mr. Caffrey had been experimenting for a year or two before that with ball bearing sulkies and had made them so they were practical.—*Chicago Horseman*.

The Three-in-Five System.

There is no question that the day of the three-in-five system is practically over, and while a few of the more important events will still be given under that plan, it is almost a certainty that never again will any new stake be inaugurated under such conditions. The two-in-three plan so thoroughly answers all purposes, and so emphatically does away with many evils existing under the three-in-five plan, and finds such favor in the eyes of the racing public that it can be said to be distinctly a success, and the wonder of it all is that it was not the rule rather than the exception years ago. The mere fact that the racing public is in favor of the two-in-three plan is reason enough for its acceptance by every racing association, for the time has now come when the managers of associations must awaken to the realization that the racing public is of greater importance than the owners or the drivers. The public, if racing the light-harness horse is to be properly maintained, must be looked to for the support of racing, and unless the public is given that form of sport which most appeals to it the patronage so earnestly desired will be lacking. The two-in-three system eliminates to a certain degree the evils of beat betting; it does away in a very large measure with the laying up of heats and in almost all races under this plan the best horse wins, which is not always the case under the three-in-five system. Dash races will doubtless grow in popularity as rapidly as have those of the two-in-three plan, yet it is hardly possible that so radical a change can be brought about at once, although the spectators at Memphis last autumn evinced more interest in the Diamond Handicap at a mile-and-a-half than in any race of the meeting, except the Gold Cup. It has been the history of many of the most important events during the past few years that the best horse did not win, and this is doubtless due more to the fact that combinations, collusions and fraudulent practices are more easily brought to a successful issue in a race of three heats in five, which permits of a long-drawn-out contest, than in any race on a shorter plan, and as it is the aim of every association, as well as of every fair-minded horseman, to have the conditions of all racing so framed that the best horse can win, everything should be done to encourage conditions where the defeat of the best horse by unfair means is impossible.—*Kentucky Stockman*.

Readville's Five Stakes.

Three of the early closing purses at Readville are renewals, viz.: The Massachusetts, \$15,000 for 2:10 trotters; the Blue Hill, \$5000 for 2:30 trotters, and the Norfolk, \$5000 for 2:24 pacers. The Poakog, \$3000 for 2:14 trotters, is a new event, as is the Tyro, \$3000 for trotting three-year-olds of the 2:25 class. These events are on the Grand Circuit meeting program for August 22d-26th, with the usual attractive list of open purses to come.

Entries to all five early purses close April 11th, when horses, excepting in the Massachusetts, must be named August 11th, for horses that were eligible at the closing date.

First payments, which under the rule must positively be made April 11th, are: \$150 on the \$15,000 stake, \$20 on the \$5000, and \$15 on the \$3000 events. By the conditions, horses not standing for any money after the bird beat in three in five races, will be ruled out, and the usual debarment of hobbled horses remains in force.

Has Used 200 Bottles.

LAMONT, IA., Dec. 13, 1902.

The Lawrence-Williams Co., Cleveland, O.
I have used Gombault's Castile Balm for the past five years with the greatest success on almost everything that animals are heir to. I think as near as I can tell you I have used two hundred bottles of Gombault's Castile Balm since I became acquainted with it, for both man and beast.

A. R. JONES, V. S.

MILFORD, MASS., Jan. 11, 1902.

DR. TUTTLE: Having given your Halmet a good trial, I find it is the very best article of its kind in existence. My wife sprained her ankle very badly. After using two bottles of Tuttle's Family Elixr, she was able to be about as usual. I cannot say enough for Tuttle's Family Elixr.

A Point Reyes Fishing Song.

[With apologies to Tom Moore.]

Faintly we toil through the evening climb,
Our voices keep tune and our steps keep time.
Soon as the willows on the banks look dim,
We'll sing at Point hostel our angling hymn.
Roe! brothers roe! the stream is high,
The trout were near, but scorned the fly.

Why should we not the angle worm hurl?
There's not a single pool but hides finny churl.
Anon, when wind blows off the shore,
Oh! sweetly we'll whip for trout galore.
Blow, fishers, blow, tho' the stream is high,
The mood is queer of he who cannot lie.

Paper Mill's tide, this full shining moon,
Shall see the rainbow engorge the spoon.
Saint of ye gentle art, hear our prayers,
Oh! grant us clear streams and favouring airs.
Hike, anglers, hike, tho' "steam" flows fast,
The train is near, and the daylight's past.

Opening of the Trout Season.

Yesterday, Saint Walton's Day, was observed as the annual feast day of the Ancient Fraternity of Anglers with a more or less rigid adherence to the unwritten law that an angler must be on his favorite stream on the first day of the season—or at least devoutly hope that he would be able to be in attendance at the initial opportunity at his disposal. He is indeed unworthy of membership in the fraternity who would not make or strive to bring about such opportunity.

That the conditions are not auspicious for indulgence in the joys of angling during these first days is not to be gainsaid, for the recent rains have played hob with the prospects for trout fishing at almost all trout resorts, save at the most extreme tributaries and heads of small streams where the water will get lower and clearer first.

One consolation, however, is that in all of our Coast streams and the interior large rivers and the confluents as well, the fish have had the chance to get up to the spawning grounds unimpeded; also during the almost continuous rainy weather the poacher has been inactive, so there are lots and lots of fish and, despite the few weeks delay the sport will be all the more enjoyable later on.

Reports from most nearby favorite resorts, as well as from many interior points, are that the streams are high and the water generally too muddy. A few clear days, however, will give a modicum of sport for the adventurous and enthusiastic devotees of the gentle art who religiously observe the opening days of the season by sallying forth with tackle and basket. As for fly-fishing, it is the general opinion that that particular and high art branch of the sport will be out of the question for some weeks, not until the water in the streams gets much lower and clearer.

Fish are reported to be plentiful and fat in many streams. The trout have had a plethora of food washed into the water from bank, field and hillside by the rains. The ancient and reliable worm, shrimp and salmon roe will be the baits for the first weeks, supplemented by the spoon and spinner.

Country boys are planning excuses to stay away from school these days that they may drop a line in the brooks where the trout are eager to bite. Their elders pay little heed to their preliminary preparation whilst looking after the efficiency of their own fishing gear. The natives, young and old, realize that an army of city fishermen will come, decked out in perfect fishing attire, many of whom dare not go home without a goodly number of speckled beauties in the creel, and some of them, sad to say, are suspected of being only too eager to use the "silver hook" as an exchange bait for fish captured by the natives. Thus will some Waltonians guilelessly "dodge the lightning."

Scattering reports from a few resorts within easy reach of this city are encouraging for good trout fishing when the conditions are better. At Point Reyes the Paper Mill is high and muddy. A few days will make a big improvement for the angler, in spite of recent bad weather. Lots of fish have been seen, and this resort should produce much sport to the many anglers with whom it is a favorite fishing ground. In the streams about Olema fishing will be good this season. Bait fishing will prevail for the present. Fly-fishing will not be good until the middle of April at the earliest. At Liberty Ranch the stream is high, but fish are reported to be plentiful. Tocoma is always good on the opening of the season. The water there is high at present, but fish are numerous in that section of the Paper Mill.

The Lagunitas will not be available this season for

the angler. This for years favorite stream, a good ear y water too, has been posted and is only open to the members of the Lagunitas Sportsman's Club, a recently organized association of 30 members which controls 26,000 acres as a new preserve in Marin county.

From Duncan's Mills Mr. Allen Morse reports that there will be extra good fishing this season in Russian river and all of the streams in that vicinity. The continuous rains have prevented poaching, and the extra high water has resulted in a bigger run of fish to the spawning grounds of the mountain tributaries than usual.

The streams in Sonoma, Napa, Mendocino and Lake counties have been amply stocked with young fry, principally taken from the hatchery near Ukiah. About 1,000,000 trout fry have been planted in these streams during the past year by the California Northwestern Railway officials.

This stocking has been supplemented by a good run of fish up the various rivers and creeks.

From La Honda, a favorite early fishing resort, Mrs. S. J. Sears writes: "The indications are that trout fishing will be good in the nearabout streams. These streams at present are high and roily."

Reports from Santa Clara county are to the effect that there is an abundance of fish in the streams. Many large steelheads and trout have run the gauntlet during the recent freshets, and the upper courses of the creeks are filled with trout. This is especially true of the streams in the eastern part of the county, where the waters are not diverted by irrigation ditches and the fish have an unimpeded run from the ocean to the mountain spawning beds. The coast streams in Santa Cruz and San Mateo counties are also reported to be full of trout and give indications of providing better fishing this season than for years past.

Reports from the following resorts have been received in response to inquiry. The indications for excellent trout fishing are consequently most promising:

Sissons—Ideal trout fishing resort of the Sacramento canyon, outlook being very favorable for the coming season. Abundance of trout in the Sacramento river, also in Hazel creek which empties into the river at this point.

Castella—Fishing will be good.

Dunsmuir—All indications point to a very fine fishing season.

Delta—The local opinion is that fishing will be first-class at opening of trout season.

Klamath Springs—The fishing prospects were never better, if ever equalled. Immense numbers of rainbow

A Tempting Pool.

On the River near Klamath Springs.

trout have been going up Shovel creek, in fact, all streams leading out of the Klamath river are full of trout of all sizes.

Roseburg, Or.—Brewster Valley creek, near this station, is unexcelled for trout fishing. Daily stages pass the various stopping points on creek.

Floriston—Excellent fishing at this point on the Truckee.

Boca—Fishing this year will be much better than last year, and good strings of trout can undoubtedly be caught along the Truckee.

Verdi, Nev.—Fishing season is now open and many good trout are being taken daily, and everything points to an unusually good season on the Truckee at this point.

Santa Cruz—Extract of letter from C. A. Reed, Game Warden, Santa Cruz Co.: "The run of steelheads this winter far exceeds that of any other for a good many years. The run has been especially good in San Lorenzo river, and Scotts and Waddell creeks. To verify my own observations the people who live along these streams inform me that not in twenty years have they seen so many fish as they have this winter. When I say that trout fishing should be

good in San Lorenzo river, that means it should be good in Bear, Deer, Kings, Two Bar, Boulder and Jameson creeks, for all these streams are tributaries of the San Lorenzo. These streams are all easily reached from the town of Boulder Creek, the distance from the town to the farthest creek is only a little over an hour's walk. A person desiring a delightful day's sport cannot miss it if he fishes either in Scotts or Waddell creeks. When I visited these streams three days ago, besides the eight and ten pound fish, I saw a great number that would scale one-half to two pounds. The San Vicente, Sequel and Aptos creeks are also splendid trout streams and the fisherman that visits either is reasonably sure of a well filled creel."

Boulder Creek—Fishing will be better than for several years past, as there was a very fine lot of trout planted which have had a good chance to grow and the water now is high and has stirred up feed for them.

Capitola—Trout prospects on Sequel creek are reported very good.

Felton—Indications are for a good fishing season.

Salt Water Angling.

This journal has repeatedly urged the possibilities of developing the sport of salt water fishing in and about our bay waters and the nearby coast fishing resorts. A variety of fish invite the attention of the angler both in shore and boat fishing.

We have often pointed out the crudity of the tackle used and the indifference as well of many fishermen who are content to enjoy a day's outing on salt water. The southern coast waters are daily the resort of a large number of anglers many of whom seem to divine that a change in the old style of tackle is one for the better. This transition is happily treated by a writer in a Los Angeles exchange who says:

"We were greatly edified the other morning to pick up a paper and note that the 'fishing season had commenced.' Now, what in the name of all that has fins and bites, constitutes the 'fishing season' in Southern California? Last winter the average of the fishing in San Pedro bay was far above that of the previous midsummer as regards most kinds of fish, and the rod and reel fraternity were certainly present in full force at every opportunity.

"The 'fishing season' must be a joke. If there is any, it begins January 1st and ends December 31st. Though, in general, the month of September is better for all-round sport than any other, it is impossible to measure the habits of fish with a ruler.

A very creditable craze for light tackle has taken hold of alongshore fishermen during the last year. The public has been rather slow to awake to the sporting possibilities of old Pacific, and when it did arrive at a realizing sense of the fun that was to be had in fishing, few knew that the same gear used inland is not available for salt water. High-priced silk lines were rotted out in two or three trips, and fine split bamboo rods, allowed to unwrap, proved inadequate to the work of swinging heavy sinkers about. Many then decided that only clumsy gear was of service in the ocean. A greater mistake was never made. There is no fun in catching a trout on a hoe handle. Neither is there any sport in catching a pound surf fish on a tuna rod. Nor is there any need of employing such tackle in sea fishing.

Up to a year ago most anglers had not realized the truth of this assertion, but now all the sporting goods houses are carrying light, serviceable greenheart and lancewood rods, with small-calibre linen lines, to match, and neat, effective multiplying reels, having been forced into buying this kind of equipment by the fishermen who appreciate and can handle the tackle. Every light rod has been the means of selling more like it, until now the man who uses a seven-ounce stick is not laughed at as a tenderfoot.

On the Atlantic Coast light tackle has been in use for many years, and the best rods now sold on the coast for alongshore fishing are New York weak-fish models. Even in taking the husky striped bass in the surf our sportsmanlike Eastern friends employ rods of a calibre that California anglers are hardly prepared to try on a yellowtail, though the time is coming when these fine gamy fellows will not be slaughtered by the hundreds on almost indestructible tuna rods.

As a matter of fact, light rods are more deadly than the billiard cues. They yield to the fish and meet every rush with a steady strain proportionate to the pull, and much less gear is smashed than with the unyielding clubs. Even were this not so, it would be worth the price of an occasional accident to enjoy the beautiful play of a perfect piece of lancewood or straight-grained greenheart as an eight-pound croaker surges back and forth on it.

Fishing, like anything else a man does for sport, owes much of its charm to its uncertainty and its difficulty of achievement. It is no accomplishment to do what every Tom, Dick or Harry can do—catch fish on a hand line. But the catching of any game fish over three pounds on a light rod and line is quite a trick: one that not every angler can successfully turn. It calls for considerable presence of mind, a quick hand, and more than a little judgment. With the heavy tackle a good-sized fish can be thrown into the boat, but with light gear a gaff or a landing net must be used, and, this too, calls for skilled work.

There would be nothing to fishing if one was assured of catching a back-load every time he went down to the sea. It would become tiresome, as does any other cinch game.

Some of those who have caught the light-tackle fever have not been inoculated thoroughly enough. Tackle should be proportioned; there is no sense in putting a 24-thread line on a seven-ounce rod. Nine-thread line is strong enough to land a 10-pound halibut.

but (or striped bass) out of a boat—in fact, properly banded it will kill a yellowtail. Springy rods take up much of the breaking strain.

One clear advantage of small lines is the reduction in the weight of sinkers they make possible. Gut leaders, a necessity in taking shy fish, are naturally a part of light outfits.

Legislation Detrimental to Sportsmen's Interests.

We call the attention of the sportsmen of the Pacific Coast to Senate Bill No. 4319, now before the subcommittee of the United States Senate.

This bill has for its purpose the proper and safe handling of high explosives. The promoter of the measure is Mr. Elkins, Senator from West Virginia. Embodied in the bill are clauses relating also to all shotgun, rifle and pistol ammunition.

This bill, if it becomes a law, will do an immense amount of injury to all sporting dealers in America, besides the sporting public, as it prohibits the shipment of any ammunition except under the restrictions of high explosives. In other words, all the precautions, care and restrictions for handling a car of dynamite would have to be conformed with and applied to one small box of ammunition.

A package of 200 shells carried by a duck hunter on a train, as thousands of our sportsmen annually do, would make the possessor amenable to the punitive provisions of this proposed bill if passed.

While we do not question the wisdom and necessity, of proper legislation controlling, for the safeguard of the public and the protection of property, the handling and shipment of high explosives, we do, however, urge our readers, individually and collectively, to use every influence possible for the defeat of this drastic measure in its present shape.

A unity of effort among Coast sportsmen in calling the attention of their various representatives at Washington to the pernicious and unnecessarily restrictive features of the proposed bill will possibly prevent the imposition of conditions so directly concerning the rights of sportsmen that if they are adopted will practically result in an unjust discrimination and hardship.

AT THE TRAPS

Rainy weather prevailing at Mill Valley last Sunday, although there was a fair attendance of shooters, the regular club events were postponed until April 10th.

The College City Gun Club March shoot has been postponed until April 10th. The rains have made the county road leading to the club trap grounds almost impassable for the shooters.

The California Wing Club live bird shoot for April will take place at Ingleside tomorrow.

Four beautiful and valuable club gold medals are to be seen in a show case at Clabrough, Golcher & Co's. These trophies are as large and thick as twenty dollar pieces. The legend, California Wing Club, 1904, in black enamelled letters is inscribed around an enamelled flying pigeon, the enamelling is in a different color for each medal. The drawing and action is a skillful and lifelike attest of the goldsmith's art. The medals will be awarded to the four high guns for the club season of 1904.

A recent meeting was convened of the Board of Directors of the Louisiana State Society for the Prevention of Cruelty to Animals at New Orleans to consider the question of preventing the recurrence of pigeon shoots in that city.

Individual members of gun clubs appeared before the meeting and argued severally that there was no cruelty practiced in these exhibitions. The board, however, adopted as the sense of the meeting that pigeon shoots were cruel and unnecessary practices, and a violation of state laws for the prevention of cruelty to animals, and it being the duty of the society to see to the enforcement of these laws, a resolution was adopted instructing its counsel to take the proper proceedings to prevent any recurrence of that particular form of trap shooting in Louisiana.

At the Capital City Blue Rock shoot at Sacramento last Sunday about twenty-five members were in attendance. The regular club shoot is billed for April 10th.

The club will this year adopt a new system of handicapping, and instead of having separate classes as heretofore the shooters will be required to stand at different marks, graduating from 14 to 20 yards, according to the scores that they make. A special monthly medal will be competed for and the person making the highest score at the club shoot will be entitled to wear it until the next shoot, when it will again be competed for.

This distance handicap is expected to create more interest among the shooters and is the system generally used throughout the United States and will be adopted at the coming Northern California championship tournament which will be held in Sacramento this coming May.

Fissel, "Poor Bill" and Montgomery were in attendance from Davisville.

Hugh McWilliams and J. Blair shot each other to a standstill and in the final event, which was a shoot-off at fifteen targets, Blair succeeded in winning by a score of 8 to 4. Englehart was high gun for the day.

The meet was for preliminary practice and to test the new Leggett trap before the first club regular shoot.

The trap is the very latest thing for throwing targets, and instead of using a set of three or five in a pit, but one is required, which does the work with better execution than anything ever before used in California, so the Sacramentoans claim.

The members did not shoot up to their usual form and the scores as a rule were poor.

Ten target warm up—Hughes 8, McWilliams 4, Blair 4, Upson 6, Newbert 6, Englehart 8, Adams 3, Trumpler 5, "Poor Bill" 8, Morgan 3, Fissel 4, Stevens 4, Montgomery 6.

Fifteen target race—Adams 8, Fissel 11, Englehart 13, Newbert 11, Trumpler 8, McWilliams 10, "Poor Bill" 10, Blair 11, Stephens 11, Glacken 10, Morgan 8, Hughes 9, Just 10.

Twenty-five target race—Adams 14, Fissel 19, Hughes 17, Just 21, Stephens 14, Newbert 20, Trumpler 12, McWilliams 20, Englehart 23, Montgomery 18, Davey 10, Smith 21, Blair 19, Rubstaller 18, "Poor Bill" 19, Jackson 9, Callahan 10, Glacken 13, Morgan 12, Brown 14.

San Francisco Show.

Entries will close to-night with, it is believed, a better showing than the club has had for several years past. The office at 630 Market street will be kept open until 10 P. M.

The splendid list of valuable specials has no doubt been a great drawing card.

The entry of English Setters will be a good one. Of the small breeds, excepting Fox Terriers, the Boston will make the largest showing. An effort has been made by fanciers of the breed to have a record entry of Bull Terriers. We have here at present a number of good ones.

During the show, several prominent Bull Terrier owners will re-organize the Pacific Bull Terrier Club and a move in the right direction this will be, for there is material here to form a strong specialty club.

Tommy Banks will have charge of the benching and feeding at the Pavilion next week and that means that the show will run smoothly as far as it comes under the direction of Spratts popular representative.

Dogs will be received between 8 A. M. and 12 M. on Wednesday and will be passed on at the door by Dr. K. O. Steers, the club's veterinarian.

Talks to Dog Owners.

Such an apartment as a kennel kitchen may possibly be regarded as entirely a superfluity by many of those who read these lines; but to the dog owner in anything like a large way a kitchen must be devoted to the preparation of food for the occupants of his kennel. Dogs, like every other living thing, are dependent upon what they consume for their health and development, and if their food is not properly prepared they suffer. It would be expecting too much, moreover, of the domestic who controls affairs in the kitchen indoors to ask her to find room on her stove for an immense cauldron every day; and besides this, the operations connected with the preparation of the dogs' food are occasionally malodorous. It will be more convenient to everybody concerned if the dogs' kitchen is situated near the kennel, and therefore a shed should be set aside for the purpose.

It is most desirable that this apartment should contain a copper for boiling bullocks' heads and such large-sized delicacies, and besides this there will be economy effected in the shape of fuel, as a copper will burn anything, whereas an open range requires a good deal of coal, so the initial expense is fully justified. Of course a fire place is an advantage, and, if possible, there should be one in the shed, and there should be shelves and a cupboard and bins for the accommodation of the meal, biscuits, and other articles of food. In addition to the copper the kitchen should likewise be provided with a kettle or two, some open tin pannikins, and a large earthenware crock into which the food can be turned after it has been cooked, for if left to cool in a copper or metal vessel, it will probably become sour. The floor of the kitchen should be kept scrupulously clean, and so should the shelves and table if there is one, for if these are once allowed to become sour, the grease will be difficult to get off and the place will become offensive. A good light is required when cooking arrangements are in progress, and so, if gas cannot be laid on, there should be a suitable lamp for the dog's kitchen, and a proper place and a good hook for it to hang on.

As to the kennelman's quarters even though the establishment be quite a small one, it becomes almost an essential that there should be a room set aside for the uses of the person who looks after the dogs, be he the master of the establishment or a servant. A shed, provided that it is clean, dry and light, will answer the purpose very well, or a room in the house will do equally well, and perhaps better, if it is close to the kennel, but it is most desirable there should be some place of the sort. Here the dogs' medicine-chest can be kept, also their clothing, chains and, in fact, all the kennel impedimenta and accessories, which will be treated of later on. Should there be no accommodation of this sort things are sure to be missing when they are wanted; and even if they are not it is extremely likely that they will be found to be damaged or dirty. Besides this, if the room is at all a sizeable and pleasant one, there is a place for the owner to take his friends to on a bad day if they wish to look over a particular dog—in fact, the apartment can easily be devoted to the purpose of a sort of office, where the kennel books and registries can be kept and the general purposes of the establishment conducted.

Where many dogs are kept the establishment of a more or less elaborate hospital or place of isolation for sick animals will be found to be of the greatest advantage. Failing the existence of such a place the affected dog has either to be kept in the kennel with his companions at the risk of his own life, if it is a bad case, and a source of danger to them, or else accommodation has to be found for him indoors, or in the stable, where he is sure to be in the way, and very likely improperly housed. There should, of

course, be a stove in the hospital, and if this indispensable adjunct is on the slow combustion principle it will save the owner a good deal of trouble and anxiety of a night when the weather is cold and delicate animals require to be kept warm.

In some kennels gas stoves are very largely used, and fulfill their duties well, but unless the precaution is taken of having a large vessel of water close to the stove they render the atmosphere extremely unwholesome. The object of the water is to keep the air moist, as when it becomes heated the steam rises and accomplishes this, but the water soon boils away, and, therefore, the vessel which contains it should be a large one and frequently filled, especially the last thing at night. The internal arrangements of the hospital should consist of several good sized pens, boarded on all sides excepting the front, which should be of stout wire-work or iron bars. The doors should be large, and in every way the pens should be easy of access, for nothing upsets a sick animal more than being pulled about unnecessarily. And yet it often happens that frequent examinations must be made. There can be no objection to having two or more tiers of pens in the hospital, provided that the bottom of each is perfectly watertight, and that nothing can drop through from the top ones on to the occupants of the lower pens. To insure this it is the custom in some kennels to arrange the floor of each pen as though it were a drawer of four or five inches deep, and then the strip in front will keep the bedding and other matter from falling through. Another and a very great advantage of these drawers is that they adapt themselves so admirably for cleansing purposes, for one can be drawn out and another of the same size substituted, so that one which has been fouled may be taken away and properly disinfected before being used again. There should be a liberal supply of food and water vessels for the use of the patients in the hospital, and these vessels should never be allowed to be placed before a dog that is in good health, for if they have not been properly disinfected they may bring disease into the kennel. Consequently, those in use in the hospital should be of a different size or pattern to the ones in general use, so that it becomes impossible to make mistakes. In large kennels it is frequently the custom to reserve one building especially for the reception of distemper cases; but, be that as it may, the importance of isolating all animals which are suffering from infectious diseases cannot be too strongly impressed upon the dog owner.—English Stock-Keeper.

DOINGS IN DOGDOM.

The judges at Vancouver, B. C., this week were J. S. Williams and E. Davies of Dewdney, B. C.

The English Setter Mallwyd Di has gained her championship at Chicago and without ever having been shown in an open class. She won at New York first in novice, limit and winners. At Boston she was first in limit and winners, and again at Chicago first in limit and winners.

A meeting of prominent dog fanciers of Milwaukee is to be held to discuss informally plans for the organization of a kennel club. Frank Forest and J. I. Behling are the men who will take the initiative in inviting local men who are interested in the venture to meet and discuss the situation thoroughly before attempting organization. The intention of the prime movers is to form an association of local fanciers for the purpose of holding a dog show annually in Milwaukee.

The Valley Farm Russian Wolfhounds will be entered in their full strength at the World's Fair Dog Show at St. Louis, after which the hounds will be taken to the extreme Northwest for a Wolfhound hunt of several weeks.

Spratt's Patent (America) Ltd., were awarded the contract to pen, feed and fit up the following dog shows: Duquesne Kennel Club show, held March 2-5; Chicago Kennel Club show, March 10-12; Rochester Kennel Club, March 16-19; Paterson, N. J., March 21-27; Buffalo, March 22-25; Atlantic City, March 30-April 2, and they have several other contracts pending.

At the annual meeting of the Bloodhound Club the following resolution was unanimously passed: "That when Bloodhounds are judged by points in the show ring it is desirable that sufficient points should be given for strength of loins and quarters to encourage breeders to produce a more powerful and symmetrical animal."

John Davidson will judge at Victoria, James Watson will look after the Seattle show and James Mortimer will make the awards at Portland.

Frank L. Turner and John Bradshaw will judge at San Jose.

Entries for the Atlantic City Kennel Club show this week have closed with a total of 1028, distributed as follows:

St. Bernards.....	12	Boston Terriers.....	120
Great Danes.....	29	Basset Hounds.....	9
Russio Wolfhounds.....	11	Dachshunds.....	9
Greyhounds.....	3	Beagles.....	3
Boxhounds.....	11	Fox Terriers.....	111
Poodles.....	23	Irish Terriers.....	41
English Setters.....	54	Scottish Terriers.....	23
Gordon Setters.....	9	Welsh Terriers.....	13
Irish Setters.....	13	Dandie Dinmonts.....	3
Sporting Spaniels.....	124	Black and Tan Terriers.....	1
Collies.....	65	Whippets.....	1
Old English Sheep Dogs.....	1	Yorkshire Terriers.....	4
Dalmatians.....	26	Toy Terriers.....	2
Poodles.....	18	Pomeranians.....	14

Alredale Terriers.....	49	Total.....	1028

Jackson's Napa Soda does not tangle the feet

California Lions and Coyotes.

A press dispatch from Santa Cruz this week states: "Cattlemen of Mt. Madonna district, in the Santa Cruz mountains, are becoming very much alarmed over the condition of affairs in that vicinity, arising from the posting of notices that all hunters or trappers are prohibited from shooting. This action was taken some time ago by a number of cattlemen who had been imposed upon by maliciously inclined parties who were favored with the privilege of hunting and camping on their cattle ranges. Upon several occasions damage was done in innumerable petty ways and considerable annoyance caused by these ungrateful parties who seemed to be possessed of a destructive spirit.

As a consequence of these inconveniences the range owners decided to exclude all trespassers from their premises, and from the action thus taken has developed a much more serious state of affairs inasmuch as California lions and coyotes, which hitherto have been kept in fear and subjection by the repeated appearance of sportsmen, are now becoming so numerous and ferocious as to create considerable anxiety. Numerous clues have been discovered disclosing the fact that many calves have disappeared and it has been ascertained without a doubt that California lions have been slaughtering them. On several occasions coyotes appeared within very short distances of dwellings and in one instance in particular one of these animals advanced openly in broad daylight into a barn yard and barked at a woman who was at work there.

Another reason for the appearance of marauding animals near ranch dwellings and about the pasture lands is the prevalence of storms and heavy down pour of rain in the mountains which has driven the animals down into the lower levels for food."

The debut in a harnyard of a coyote and its "harking" at a woman in broad daylight is, we believe, a stretch of the imagination on the part of somebody, for such action is entirely foreign to the habits of a coyote; possibly the beast had a disordered liver.

In the Santa Cruz, Santa Clara and Monterey districts, it has been claimed, immense tracts of land have been posted against deer and quail hunters generally. This action was for the benefit of a favored few who took advantage of the situation and enjoyed in many instances, practically preserved ground. The depredations complained of have undoubtedly been committed by poachers in a retaliatory spirit possibly.

In some sections of Santa Cruz the country is an ideal ground for the refuge and propagation of "varmints." Cattlemen and ranchers will probably throw open their lands this season and allow hunters thereon. It would be comparatively easy to do so under certain regulations which would enable owners to know who were out hunting, at what time and in which localities the chase was being conducted. Under such a system the perpetrators of damage or vandalism, or the presence of objectionable parties could be definitely located and proper action taken.

We have heard it stated by sportsmen in this connection that the policy of general exclusion, in its inception, was illadvised and for the benefit of a favored few. Ranchers and cattlemen may now, in the hope of reaping some advantage from the presence of properly organized hunting parties, revoke the posting edict.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 15-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

April 9—Saturday Contest No. 4. Classification Series, Stow lake, 2:30 P. M.

April 10—Sunday Contest No. 4. Classification Series, Stow lake, 10 A. M.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 1-May 1—Open season for shrimp.

Sept. 10-Oct. 15—Close season in tidewater for steelhead.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

April 3—California Wing Club. Live birds. Ingleside.

April 3—College City Gun Club. Blue rocks. North Berkeley.

April 10—Union Gun Club. Blue rocks. Ingleside.

April 10—Empire Gun Club. Blue rocks. Alameda Point.

April 10—Millwood Gun Club. Blue rocks. Mill Valley.

April 10—College City Gun Club. Blue rocks. North Berkeley.

April 17—Golden Gate Gun Club. Blue rocks. Ingleside.

April—Capital City Blue Rock Club. Agricultural Park, Sacramento.

May 29, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.

July 1-Feb. 15—Dove season open.

Nov. 1-July 15—Deer season closed.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

March 30, April 2—Vancouver Kennel Club. Vancouver, B. C. P. K. L.

March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.

April 7, 9—Victoria Kennel Club. Victoria, B. C. T. P. Mc Connell, Secretary. Victoria, B. C. P. K. L.

April 13, 16—San Francisco Kennel Club. Eighth annual show. Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.

April 13, 16—Seattle Kennel Club. Seattle, Wash. Charles McAllister, Secretary. P. K. L.

April 20, 23—Bay State Co-operative Bench Show. New Bedford, Mass. T. Middlebrooke, Secretary.

April 20, 23—Portland Kennel Club. Portland, Or. T. E. Daniels, Secretary. P. K. L.

April 27—California Collie Club. Oak Grove, Lawrence, Santa Clara Co. P. K. L.

April 28, 29, 30—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary. San Jose, Cal. P. K. L.

April 28, 29, 30—Los Angeles Kennel Club. A. K. C.

The Fly-Casters.

Last Saturday and Sunday, weather conditions interfered materially with the chances for anything better than average scores being made at Stow Lake. Wind and rain in gusts and squalls however could not deter a score of the club members from the meet at the lakeside. On Sunday the long distance work was discarded entirely. The results are given below.

SATURDAY CONTEST NO. 3. Classification series—Stow Lake, March 26, 1904.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Dexterity, (a) accuracy percentage, (b) dexterity percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

Striped bass angling in and about Raccoon straits is still tempting enough to induce a number of fishermen out in the trolling boats daily. The water, as a rule, is very muddy, the best and clearest fishing waters being found off the Angel Island fog bell. The bass taken do not average over from four to five pounds as a rule.

Lake Merritt yet produces a certain amount of sport for the striped bass angler. An eighteen pound fish was taken one day recently by an elderly fisherman after an exciting struggle, during which the fish, in running away with the hook, fouled the line on a stake sticking out of the water a short distance from the boat. The taut line caused the fish to swim around the stake in gradually diminishing circles until it was brought up hard and fast to what proved to be a fatal hitching post. The stake had to be pulled up from the mud bottom before the big fish was finally taken and that with the aid of a volunteer crew of spectators that had enjoyed the rumpus and came to the old man's aid at the finish.

Mr. G. Carroll, who is a persistent and skillful salt water angler, last Sunday hooked on to and landed a twenty-eight pound quinnat salmon off the "fog bell" at Angel Island. He was trolling for striped bass at the time. The salmon was taken on a No. 6 German silver spoon.

Harvey McMurchy was the recipient last week of a very curious souvenir in the shape of a bird's nest. The nest was found in Monterey county recently by an Alameda sportsman, Mr. Ward, and contained two yellow warbler eggs, one of them broken. In their effort to establish a household the birds constructed a neat and compact home about four inches in diameter by three inches deep. The feathered domicile was built up in the forks of a small bush, the outside of the nest being wound in and out with a varied assortment of fibred stuff and wadded inside with some material that looked like cotton. Here and there in the texture there was various material the birds had gathered in the building operation, among the stuff being several scraps of newspaper. One piece—an inch long and three-quarters wide, spade shaped, provided the element of curiosity. The fragment of paper, yellow with age and exposure to the weather, on the upper surface was torn from a section of the paper which had originally been space devoted to a press dispatch which mentioned the Hunter Arms Company, several letters and the figures of a city and date being partly decipherable, the words Hunter Arms Company were almost intact. The subject matter of the dispatch was a statement concerning proof house judging of the L. C. Smith gun. On the under side was a portion of a mining company's display ad. The finder, "Buck" Ward, being a personal friend of Mr. McMurchy, presented the nest to "Mac." The latter states that he is more convinced than ever that it pays to advertise.

Trade Notes.

"Billy" Crosby is certainly a wonder with the shot gun. At Americus, Ga., March 7, he broke 98 out of 100 targets; at Macon, Ga., March 8, he scored 97 out of 100; and at Columbus, Ga., March 9, he smashed 98 out of 100—a total of 293 out of a possible 300. At the first mentioned place Messrs. Sells and Loving won first and second high amateur averages for the tournament, while at Macon the first, second and third high amateur averages of the shoot were won by Mr. Chas. Jones, Mr. David Jones and Mr. McNeal. All the above gentlemen used the Winchester "Leader" shells, and it is a well known fact that "Billy" Crosby never shoots anything else.

Fred Gilbert shooting Winchester "Leader" shells, the shell he always shoots, broke the world's record at St. Joseph, Mo., March 12, when he defeated Mr.

Wm. Clayton, of Kansas City, in the challenge contest for the Weyth trophy at live birds, 100/birds per man. Mr. Gilbert killed 98, shooting from the 33 yard mark, and lost the other two birds dead just outside of the houndry. Gilbert scored his first 70 straight, also 4 practice birds, and killed the last 15 straight in a contest at Seneca, Kan., two days previous, making a total of 89 straight from the 33 yard mark, which makes a new world's record for this mark. Mr. Gilbert's score of 98 out of 100 is also a world's record for the 33 yard mark.

At the Carteret Gun Club's amateur championship, shot at Westfield, N. J., on the grounds of the Carteret Club, February 22-23, Mr. D. E. Bradley and Mr. G. McAlpin tied on scores of 92 out of 100, first class pigeons. In the shoot-off at 25 birds each, Mr. Bradley scored his first 25 straight and Mr. McAlpin had then lost three birds, the race was over and Mr. Bradley was the winner for the second time, having won the title and trophy last year. There were twelve competitors. Mr. Bradley shot "New Schultze."

The U. M. C. Southern Squad shot at Charlotte, N. C., March 12th. Col. Anthony was right in his glory as Charlotte is his home town, thus giving him a chance to show up some of the tricks he had been teaching the amateurs during the past few years. Mr. John Tod broke 96-100 using U. M. C. Shells; J. D. Carrier broke 94-100, using U. M. C. Shells; D. A. McCullough broke 166-175 using U. M. C. Shells. Such phenomenal work is hard to be beaten, even by professionals.

Mr. F. D. Ellett, Keithsburg, Ill., won first average at Joy, Ill., with a score of 94%. He also won a live bird match killing 50 birds without a miss. This is gilt edge shooting for an amateur. There seems to be something about Keithsburg which produces live bird shots of the first order. Mr. Ellett always shoots a Remington and U. M. C. Shells.

Mr. F. C. Riehl made a spectacular run of 100 per cent at Aberdeen, Miss., March 11th, shooting at 70 flying targets. Mr. Riehl used a Grade "CEO" Remington gun, and he has written us as follows:—

"My average in fifteen exhibitions for the U. M. C. Southern Squad is a little over 94%, uniformly since the first of the year. With my new Remington gun I have made the best scores of my shooting career.

Yours very truly, F. C. Riehl."

Mr. H. G. Taylor won the high average for all open events at the Seneca Gun Club shoot, Kansas, March 8th to 10th with a score of 340-365 or over 93%. He used U. M. C. Shells.

At the Golden Gate Gun Club Shoot Sunday, March 24, '04, on the grounds of the San Francisco Trap Shooting Association at Ingleside, in the Medal event at 25 targets, 8 men missed but 18 hit; all used U. M. C. "Magic" and "Acme" shells. M. J. Iverson scored 50 straight in both the Medal and Consolation matches (25 targets each), using U. M. C. "Magic" shells. Two other shooters also made straight at 25 targets, Clarence Nauman and M. O. Feudner, all using U. M. C. "Magic" shells. The following made straight at 15 targets, "Wilson," C. Nauman and H. Jacobson, all using U. M. C. "Magic" and "Acme" shells.

The World's Record Beaten.

Fred Gilbert with the Parker Gun at St. Joseph, Mo., March 12, defeated Mr. Wm. Clayton of Kansas City in the challenge contest for Weyth Trophy at live birds, 100 birds per man. Mr. Gilbert killed 98, shooting from the 33 yard mark, and Mr. Clayton 96 from the 33 yard mark. Gilbert scored the first 70 straight, also 4 practice birds, and killed the last 15 straight in a contest at Seneca, Kan. two days previous, making a total of 89 straight from the 33 yard mark, making a world's record from this mark. Mr. Gilbert's score of 98 out of 100 is also a world's record from the 33 yard mark.

Such shooting as this speaks volumes for the Parker Gun. Do you know Parker Bros. are making guns everyday just as good?

THE FARM.

A California Goat Ranch.

An Angora goat ranch owned and managed by three girls and fifteen hundred splendid Angora goats that know no other shepherd than the three sisters, presents a unique enterprise in Northern California that has resulted in giving a fortune to the three plucky, enterprising young ladies, who have been patiently and ploddingly breeding these profitable little animals for the past thirteen years.

The loss of their father left the management of what was proving to be a very poor cattle ranch and range to the mother and three daughters, Ina Yeaton, Ethel and Berdie Champenois, who met the situation by securing a small flock of well-bred Angoras. The lack of grass and the poor grazing so detrimental to the handling of cattle on their place was liberally offset by nature through provision of an abundance of bushy growths affording the best of feed for the Angora and making possible the conversion of a practically worthless cattle ranch into a successful Angora enterprise. Contemplated plans of abandonment were gradually changed into a feeling of contentment as the new stock thrived and the flock increased.

A summer range was secured to relieve that of the home ranch to which pilgrimages have been made annually by the mother, daughters and their entire flock. The summer home in the mountains is visited each year and maintained until fall. The moving of the goats is said to present a most interesting sight, for but for the fact that one of the girls is ahead and leading them no progress could be made. The journey is one of about eighty miles, and while willing to follow their owners wherever they will, to drive them without inspiring in them the confidence coming from the leadership by one to whom they have ever been accustomed has proved a fruitless task.

Fifteen hundred goats on the range are rather hard subjects to control before a camera, but the professional photographer could have the magic success in getting the average "kid" into line that was experienced with these several hundred "kids" as a result of about four varying peculiar yells from a pair of strong feminine lungs, that made every Angora swing into position and pose as though at the command of a general, he, of the studio, would certainly make a decided bit with nursery subjects.

Such command of the flock comes but from constant association with it, one of the girls being ever with the goats on the

range. Clad in short skirt, neat waist broad Mexican hat, high, stout shoes and always carrying her faithful Winchester, the flock is ever under the control of one whom each animal has come to know and respect.

At home, about the corrals, sheds and pastures, the other sisters are ever busy-bodies, while the flock is on the range, suits common on the average farm, it is admitted, being often found far more convenient than skirts, while repairing fences and performing other similar work.

The old proverb that many hands make light work has proved not amiss here, and by that good management, characteristic of all successful enterprises, attendance at school has not been neglected. The magnitude of their enterprise now makes possible the hiring of assistants and three well educated, accomplished and now quite wealthy young Shasta county ladies are longingly looking forward to their proposed visit to the World's Fair at St. Louis, to see a steamboat, an electric car and the myriads of things wonderful that are not found 'mid the chaparral and manzanita of the California hills.

As an incident illustrating the able manner in which their enterprise has been conducted and one that surely pays a marked compliment to its management, is an experience had by the writer two years ago. Visiting the Sanford Mills at that time inquiry there concerning the best shipments of mohair received from western breeders brought out particular reference to a California clip of high class mohair that had been coming to these mills annually in a splendid condition, but ever under the partnership name of Yaaton & Champenois, all of which was suggestive to them that in these shippers one would find a most enterprising firm of Angora breeders and one from whom many valuable suggestions in flock management could be gained. Urged to visit this ranch if ever in its vicinity, an opportunity to do so was recently afforded when en route from Portland to San Francisco and the interesting personnel of the "enterprising firm of breeders" was discovered far back in the hills from a little station on the picturesque Siskiyou line. Likewise, too, the "many valuable suggestions."

On this ranch the revenue from the flock comes wholly from the sale of mohair, meats and pelts, no fancy stock being raised. Here is a most convincing example of the worth of the Angora as a range animal and the success of the three plucky sisters should in itself prove a "valuable suggestion" to other owners of rough western range lands.—*Corr. Am. Sheep Breeder.*

Hog Breeding in California.

P. H. Murphy, of Perkins, Sacramento county, writes as follows:

I have been breeding and feeding hogs in Sacramento county for more than forty years, and believe there is no better stock on the farm to bring good returns if properly fed and cared for.

I will give you my experience on profits: Salas—From hogs in 1902, \$1400; from hogs in 1903 \$1050.

I have no alfalfa at my home place for pasture. I have several lots fenced off from one to four acres each, and sow barley, wheat or rye in the fall or during December or January, and when about six inches high pasture one lot, then change them to another, and continue to change until harvest time.

Hogs do well on this pasture with some drink of water, middlings and bran. I also grow mangles, sorghum and pumpkins. One acre of alfalfa one year from seedling will keep about ten hogs in good growing condition. Alfalfa hay cured with the leaves on is ralisbed by the hog. A little grain daily will greatly increase the growth and health. Milch cows, hogs and alfalfa is a money-making combination. I believe alfalfa will make a good growth and keep hogs in good condition, but for finishing off for the pack-

ing-housa they should have a few weeks' feed of grain, such as wheat, barley or corn to make the meat solid.

California has as good hogs as there are in the world. We have been breeding up and purchasing the best blood to be had at long prices for years. The Poland China and Berkshira are the leading breeds for California. Chester Whites were lately imported to California, but breeders do not like them on account of their color for this climate. California conditions are first-class for raising hogs, as well as cattle and horses. There is money in raising hogs at 5 cents per pound. For six months in the year they are gleaming the grain fields, orchards or vineyards without any cost or care to the owner. All there is needed is fresh water, and here I will say from experience fruit and grapes make first-class pork.

Diseases are often found among the large herds of hogs, principally those kept on water courses and rich river bottom lands, but is not such as to discourage breeding and raising them for profit. A

prevention is in clean quarters, plenty of room and healthy food.

Stock raising in connection with grain growing is profitable, and will keep up the fertility of the soil and make a full purse for those who continue in that line with attention to its details.

Feeding Salt to Cows.

One of the most successful dairymen we know about feeds his cows four ounces of salt per cow per day and says that it pays. "The cows give more milk, the milk has a much better flavor and will keep considerably longer." The salt is fed with the grain ration. Since hearing this man we have fed our cows more salt. Altogether we have not got up to the quarter pound notch, yet we still believe that a good many cows do not get as much salt as they really need. Salting is one of the little things that are apt to be neglected, and a handful once a week is a too common practice.—*Rural New Yorker.*

Trotting Horse Breeders Association BOSTON, MASS.

(Member of National Trotting Association.)

GRAND CIRCUIT MEETING AUGUST 22-26, 1904.

READVILLE TROTTING PARK

EARLY CLOSING PURSES:

No. 1.	\$ 5,000.	The Blue Hill, 2:30 Class, Trotting.
No. 2.	15,000.	The Massachusetts, 2:10 Class, Trotting.
No. 3.	3,000.	The Ponkapoag, 2:14 Class, Trotting.
No. 4.	3,000.	The Tyro, Three-year-olds, 2:25 Class, Trotting.
No. 5.	5,000.	The Norfolk, 2:24 Class, Pacing.

Conditions. National Trotting Association Rules to govern, except that in three-in-five races, unfinished in three heats, all horses not standing for any part of the purse, will be ruled out. Hoppies barred.

Entrance. Five per cent of purse and five per cent additional from the winners of each division of the purse, but nominators will not be held for forfeits falling due after they have declared out in writing.

Forfeits will be due April 11, May 11, June 11, July 11 and August 8, and in amounts as follow:

Classes Nos. 1 and 5,	\$20, \$30, \$45, \$75, \$80.
Class No. 2,	\$150, \$150, \$150, \$150, \$150
Classes Nos. 3 and 4,	\$15, \$25, \$30, \$35, \$45.

Terms of Entry. Except in Class No. 2, the Massachusetts event, horses to be named at time of first payment. In Class No. 2, to be named August 11, and have been eligible April 11.

In compliance with the rules of the National Trotting Association, an entrance fee will be required for each horse named.

ENTRIES CLOSE WEDNESDAY, APRIL 11, 1904.

Applications for Entry Blanks, requests for information, and all entries to be made to the Secretary.

JOHN E. THAYER,
President.

C. M. JEWETT, Secretary,
READVILLE, MASS.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Carles, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the pedler's cart and the broken-down horse market. Mr. C. H. Hicks, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, curbs, windpuffs and bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

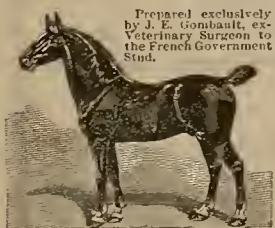

W. B. Eddy & Co., Whitehall, N. Y.

Horse Owners

Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz:

GOMBAULT'S CAUSTIC BALSAM

Prepared exclusively by J. E. Gombault, Veterinary Surgeon, to the French Government Stud.

SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or blentch. The safest best Blisters ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

To the Livestock Men of California.

SAN FRANCISCO, March 1.—In view of the large volume of business which we have done with each other, and in the hope that, by well directed, joint efforts, we may be enabled to swell this business to even greater proportions for our mutual good, we take the liberty of laying before you a matter of consequence to all of us.

You are aware, of course, that the Western Meat Company is a liberal buyer and a prompt payer. More than likely, however, you have no definite idea of the extent of our yearly purchases, therefore, in order that you may be better informed we wish to say that we are killing over 900 head of cattle per week, over 4000 sheep and lambs per week, over 2500 hogs per week, and are paying nearly \$4,000,000 per annum to the cattle and sheep growers and hog raisers of this State.

We know that you spend a goodly part of this money with the country merchants. Have you ever asked your grocer for the goods of the Western Meat Company? If not, and if you desire to protect the livestock interest of the Pacific Coast, do so; and keep on asking for them until you get them. The more goods we sell, the more livestock we buy; therefore, why should you sell your stock to us, and then promote the livestock industry of the East by using eastern goods?

If the merchants in your territory are not receiving our price list, ask them to write for it.

Our products are all strictly high-grade goods, cured and smoked, after the most approved methods by experienced men, and they will please the most fastidious trade.

In commending this matter to your earnest consideration, we will say that one word spoken for the Western Meat Company means two words spoken for yourself. Yours faithfully,

WESTERN MEAT COMPANY.

The plant of the Western Meat Company is situated at South San Francisco, San Mateo county; general offices at Sixth and Townsend streets, San Francisco; distributing houses at Oakland, San Jose, Sacramento and San Francisco.

The Western Meat Company are packers and exporters of provisions, lard and canned meats, their yearly sales amounting to over \$4,750,000. They handle a number of popular brands, among them being their "Primrose," "Eastern Star" and "Monarch" Hams and Bacon, "Golden Gate" Pure Leaf Lard, "Eastern Star" Boiled Hams, "Arrow" Lard Compound, "Golden Gate" Canned Meats, and other high-grade products. *

Autumn Colt or Calf.

In my opinion, the autumn colt or calf has a decided advantage over one born in the spring of the year, says E. E. Rockwood in the *Breeder's Gazette*. It is almost certain to excel in size and thriftiness at six months, and this for several reasons. The summer is very trying to any young animal unless it has more than ordinary care. Pastures are not often of the best, flies torment, and the heat is debilitating.

Take the case of a colt foaled in the fall. October is a good month for this. The dam has finished her summer's work and can be kept in a loose stall with a small yard or paddock for exercise after winter sets in. If turned on pasture with her spring foal, she will not get as good nourishing food as she will in winter, and without that in abundance no foal will attain best growth and development. Then, too, the young things soon learn to eat grain where the dam is regularly fed and should have their own ration of ground oats as soon as they are old enough to nibble it.

"As wild as a hawk" is usually the condition of the weanling colt if it has been at pasture all summer. When it is in the barn and has a chance to become acquainted with the family, it will be tame

and easily handled from the very first.

The advantages of the autumn calf are not less evident. The average calf pasture is a delusion—a place grown up to burdocks and mayweed, often with nothing to break the heat of the sun, where the poor creatures are doomed to stay and fight flies all summer. The winter calf escapes all this. In a box stall, which need not be large, it can eat clover hay or silage and have its grain regularly, only a little to be sure, but just as essential to growth and development as if the quantity were measured by quarts instead of hand-fuls. It is not wearing itself out fighting flies, and the chances are that the milk it receives will be in better condition than it would be in summer.

To be sure, it means a little extra work. The stables must be cleaned and kept well littered with straw, but there is usually plenty of time for this in winter. It does a man good to get acquainted with his stock, and the greater amount of care bestowed on it the better the results. The way those winter calves grow will be very gratifying and when the time comes to turn them on pasture they will be sleek and fat, far ahead of calves at the same age dropped in the spring and kept on grass. If only all farmers realized the importance of keeping young stock growing there would be fewer stunted colts, calves and pigs.

The Shire Draft Horse.

Among the representatives of this long-established breed of English draft horse, the most desirable form is low, broad and massive. Weight is considered a leading feature, and so with this we must associate the attributes of being heavily built, muscular, with large bone and rather slow movement. Strength of shoulder has been preferable to slope, which is probably given power in the collar, but detracted from the freedom and length of the stride.

The body of the best representatives is of exceptional merit, being large in girth, deep, strongly coupled with broad, short back and heavily muscled quarters. Their points of excellence are undoubtedly exceptional weight, made up of heavy bone,

CALIFORNIA NORTHWESTERN RAILWAY

Through Picturesque California.

The Ideal Route for

The Angler and Oating Trips

One day's ride from San Francisco will take you to some of the finest Trout Streams in the State. Along the line and within easy distance are many of the best Springs and Summer Resorts in the State. The Company maintains a Fish Hatchery and annually stocks the many streams reached by its road. One million Trout Fry were planted last year in these streams.

Black Bass Fishing can be enjoyed in Russian River near Guerneville, Guerneville Park and Camp Vacation, in season.

The best Striped Bass Fishing waters on the Coast reached by the Tiburon Ferry.

SAFETY IMPREGNATOR OUTFIT

A practical, durable, and easily used Impregnating Outfit, with which you can get a foal all mares you breed, and greatly increase the income from your stallion. GUARANTEED to give satisfaction. A necessity in every breeding stable. Write for descriptive circular. Price of Impregnator, \$5.00. Outfit, complete, \$7.50. I. O. CRITTENDEN, 2 FOX BLDG. ELYRIA, O.

full, muscular development, with width and depth of form; associated with these qualities there are kindred deficiencies which are sometimes in evidence, meaning thereby a lack in general quality, coupled with a sluggish temperament. The superior consideration which has been given to weight has frequently overbalanced the claims of action, consequently, while showing to excellent advantage standing there are some which fail to sustain their merit when their action is shown. A lack of quality in a draft horse must necessarily be discounted, for durability depends on this and also on the set of the limbs.

Soft soap and a little kerosene will kill lice on hogs. If only a few are kept, a thorough washing and scrubbing is exceedingly effective.

For 2:30 Trotters.....	\$500

THE IDAHO STAKE	
For Three-Year-Old Pacers, owned in the District and Montana, Jan. 1, 1904.....	\$350
THE OREGON STAKE	
For Three-Year-Old Trotters, owned in the District and Montana, Jan. 1, 1904.....	\$350

Two Consolation Purses of \$300

Each, with free entrance, will be given to non-winning starters in the Interstate Fair Stake for 2:17 Pacers and the Greater Spokane Stake for 2:20 Trotters, on condition that there are eight or more starters in each of the above stakes. Mile heats, 2 in 3, money divided 70, 20 and 10 per cent of purse.

CONDITIONS.

Entrance fee 5 per cent of stake and 5 per cent additional from money winners, payable 2 per cent May 10th, when horse must be named, and 3 per cent September 1st. Money divided 50, 25, 15 and 10 per cent of stake; no stake to be worth either more or less than sums guaranteed above. Mile heats, best three in five, except the Idaho Stake for three-year-old pacers and the Oregon Stake for three-year-old trotters, which shall be mile heats, best two in three. No race longer than five heats. Money to be paid in accordance with summary at the end of the fifth heat. Right to transfer or substitute entry in all stakes open to August 1st to horses eligible May 10th. The management reserves the right to declare off and return first payment on any stake that does not fill satisfactorily. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 70 per cent to first and 30 per cent to second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case will a horse be entitled to more than one money. Two horses belonging to one stable may be entered in one stake and be held for the entry of the horse that starts. But one entry fee will be required if neither starts. Other than specified, rules of the National Trotting Association, of which this Fair is a member, to govern, except hoppers not barred on pacers over three years old.

Names and Records of Trotters and Pacers Under 2:20 and Liable to Race in 1904

We have just published a fine book giving names and records of all Trotters and Pacers below 2:20 that are liable to race in 1904. This book contains 52 pages of fine paper with extra good cover and *Just The Right Size To Go In Your Pocket*. Every Horse Trainer, Care Taker, Horse Breeder or any one interested in horses can have one of these books, *Absolutely Free*, for reference. It also contains names of all horses holding world records. We had it compiled at a large expense and you will find it a valuable and handy reference book for the entire year of 1904.

The Useful Shropshires.

This breed, having its home in the Down of England, is very symmetrical and stylish in form. The head should show refinement in every feature, with moderate length. A characteristic attribute is for it to be closely covered with wool, the cap between the ears being dense, running to the bridge of the nose and joining that which covers the cheek and lower part of the head. The ears should be far apart, pointed and moderate in thickness, and preferably covered to the tip with fine curly wool. There should not be the least evidence of horns, as the places where these sometimes appear should be covered with wool.

The neck should be nicely attached and full, and of sufficient length to carry the head with peculiar style. The body, to possess this characteristic smoothness and symmetry, must be somewhat circular and round ribbed. The hack should be straight, strong and knit, so that the handling of this part shows it to be smooth and evenly covered. The loin must be wide and hips not prominent, and the quarters lengthy and deep. The characteristic of this part should be maintained on the outside of the thigh and the inside as well, making the twist not only deep but plump with flesh. The fleece should be strong and fine in fibre, with all the density possible. From the bridge of the nose to the fetlock, as well as along the belly, a dense covering of wool is desirable. In opening the fleece the fibres which are generally about three inches long, should part readily, show clear white in strong contrast to the pink skin. These appear distributed anywhere in the fleece. The characteristic markings for the face and legs are a rich dark brown in color. The best type of this breed shows an unusual combination of quality and quantity of both wool and mutton.

The type of draft horse that the market wants is a horse weighing 1600 pounds or over in ordinary working condition, a deep bodied, broad, close coupled, massive horse, with powerful loins and hind quarters. He should be deep and wide in the chest, to insure a rugged constitution; his legs should be well set, with clean, dense bone, sloping pasterns, and his feet should be large, round, wide at the heels and of fair depth, especially at the heels. For without good feet and legs the best bodied draft horse in the world would be practically useless. Good action is also a prime requisite, for with all other things equal the horse that can walk four miles per hour with ease is of far more value than the one that cannot take this pace, and good action is also invariably associated with a good constitution.

Prizes for fruit will be greatly increased at the Spokane Interstate Fair this fall. The management hope to be able to get out as good a show of all kinds of fruit as there used to be at the old fruit fairs. And if this is done, there will no doubt be a good attendance of eastern commission men at this fair who will come to look over the crop and buy for their markets.

Bristles.

From ten brood sows you should raise eighty good pigs.

A pig should be able to gain one pound per day until it is nine or ten months old. Give the pig a low trough. Eating over a high trough gives them crooked backs.

A spoonful of bonemeal added to the food once a week will be found beneficial. For diseases of the digestive system give some sulphur in the food to cool the animal and purify the blood.

For worms give turpentine and castor oil, according to the size of the pigs, using pumpkins as a part of the rations.

For cough in hogs mix linseed oil in the food, a half pint for each animal. Follow this with a teaspoonful of nitrate of potash for each hog in the drinking water once or twice a week.

An excellent cholera disinfectant is made by mixing eight ounces of sulphuric acid and eight gallons of water.

The Lincoln has the distinction of being the largest known breed of domestic sheep, high weights of the breed exceeding 500 pounds, and medium or average weights running from 275 to 300 pounds under favoring conditions of feed and care. The fleece of the well bred and well fed Lincoln ewe runs from 11 to 18 pounds, though these weights are often exceeded in Lincolnshire. The Dorset is a smaller sheep and has the advantage of the Lincoln in early maturity.

A new idea at the Spokane Interstate Fair this fall will be a number of prizes in different departments which will be open only to school children.

IODOFORM

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor.

We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year.

This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlocks which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

ALMONT, 5 years old, registered No. 25539, Percheron Stud Book.

SIR TEMPEST, 3 years old, registered No. 25549, Percheron Stud Book.

Will make ton horses at maturity. Price \$1000 each. Write to
C. E. HUMBERT, Cloverdale, Cal.

FOR SALE.

MY ENTIRE STOCK OF STANDARD-BRED Trotting and Pacing Horses. Single drivers and double teams. Some excellent prospects for stake winners entered in the Occident, Stanford and Breeders' Stakes. A fine carriage team, also the great broodmare Daisy S. (dam of Tom Smith 2:13½, General Vallejo 2:20½, Sweet Rose 2:28 (trial 2:21) and Little Mac (3) 2:27). The driving horses and colts can be seen at my stable in Vallejo, and the broodmares, etc., at the race track. Apply to or address
THOMAS SMITH, Vallejo, Cal.

BROOD MARE FOR SALE.

THE GRANDLY BRED TROTTER MARE, LAUREL 2:13½ by Nephew 1220 (sire of 25 in 2:30 and 14 producing daughters); dam Laura C. 2:24½ (dam of Jackson 2:17½, Laurel 2:13½ and Lauretta 2:14½) by Electioneer 125; second dam the thoroughbred mare Fanny Lewis by imp. Buckden. Laurel is a four-year-old filly by Stam B. 2:11½, which can heseen at my place, and is expected to foal again to that horse in a few days. Laurel is bred at a very reasonable figure. She is 14 years old, sound, and a regular breeder. For further particulars apply to
F. J. YANDEL, Santa Rosa, Cal.

PETIGRU 2:10½

Son of Kingward by Onward (sire of 11 in 2:10) and Lemonade (dam of Bessie Wilton 2:02½, Petigru 2:10½, Lady Wilton 2:11½ and Lemonee 2:18½). PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. FEE \$50.

CORONADO 2:18½

By the great McKinney 2:11½ (sire of 8 in 2:10 and 27 in 2:15); dam Johanna Treat (three-year-old trial 2:17) by Thos. Rydahl; second dam by Venture, sire of dams of Directum 2:05½ and Sideoy Dillon (sire of Lou Dillon 1:58½, world's champion trotter). CORONADO is one of the handsomest of the sons of McKinney. He won five races out of seven starts. FEE \$40.

SILVER COIN 2:11½

(Record made as a four-year-old in a winning race of five heats against aged horses. Sired by the great Steinway (sire of 4 in 2:10); dam, the fast race mare Jenny Mar 2:08 by McKinney 2:11½. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual. FEE \$40.

Send for card containing tabulated pedigrees and full particulars of above Stallions. Address

GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1904

FEE - - - \$75

Reductions made for two or more mares.

Manager, WALTER SEALY.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos. Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from a breeding season of 1904, either pacers or trotters. Must be three to start and race to come off on Hollister track, Fair week, 1907 (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. F. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Willson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 38 1/2 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2197, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:53 1/4. His second dam is Argenta by Almont Lightning, sire of the dam of Zomro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venus (dam of Adonis 2:11 1/4, Leah 2:24 1/4, Cupid 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27 1/4, sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,

Supt. Santa Rosa Stock Farm.

Santa Rosa, Cal.

SAMUEL GAMBLE, Pleasanton Cal.
Or TUTTLE BROS., Rocklin, Cal.

NEERNUT 19810

Record 2:12 1/4 (Sixth Heat)

Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09 1/4 to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 11333 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

Record 2:20.

THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:04 1/4, MUCH BETTER 2:07 1/4, DERBY PRINCESS 2:08 1/4, DIABLO 2:09 1/4, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed.

Pasturage, \$5 per month. Hay and grain \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15 3/4

REG. NO. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.); dam LULANEER (dam of Limonero 2:15 1/4, Blon 2:19 1/4) by Electioneer 135.

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-heat race for \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shylock 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree, address

BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal.

or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09 1/4, champion 4 y. o. of 1903 (half mile 59 3/4), OUR LADY (trial 2:30 1/4), and full brother to JOHN A. McKERRON 2:04 1/4 (the fastest trotter of the Wilkes family).

LONGWORTH 2:19 (Reg. No. 18452), sired by Sidney, grandsire of the champion Lou Dillon 1:58¼, dam Grey Dale by American Boy Jr., he by American Boy, sire of Williamson's Belmont; second dam by Winfield Scott; third dam, Sorrel Pol by Sir Henry. LONGWORTH is a very high-class horse in form and disposition; is a very dark bay or brown. He has sired Alfred D. 2:12¼, El Moro 2:13¼, A. C. 2:15¼, Esmerald 2:19, etc.

RINGWOOD by Sidney; dam, Alma by Dashaway, he by Belmont, son of American Boy. RINGWOOD is a dark bay.

SABLE CZAR by Sable Wilkes, he by Guy Wilkes; dam, Olivette by Whipple's Hambletonian, he by Guy Miller, he by Hambletonian 10; second dam, Belle by Easton's David Hill, he by Blackhawk; third dam, Lady Almack by Almack, he by Monmouth Eclipse, son of American Eclipse. SABLE CZAR is a black horse.

MAHOMET, color white, with bay and blue spots. His sire is Longworth, dam Sonoma Maid, said to be by Arabian horse; second dam by Whipple's Hambletonian.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$2.50 per month. No responsibility assumed for accidents or escapes.

For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTTER STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19¼

(Sire of Monte Carlo 2:07¼, Idolita 2:09¼, etc.); dam CRESIDA (3) 2:18¼ by Palo Alto 2:08¼; second dam Clarabel (dam of 3 in 2:30) by Abdallah Star; third dam Fairy (dam of 2 in 2:20 list) by Hambletonian 10.

CASSIAN is a high-class young stallion in every particular and one of the best bred ones ever foaled at the famous Palo Alto Farm. He has producing blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast natural trotter and has every qualification for a sire of extreme and early speed, being good gaited, level headed and game.

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:30)

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short hack, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crescens 1:59¼, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:32. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All hills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

MONTESOL

(TRIAL 2:24)
Full Brother to Lady Grannard 2:23 (trial 2:13)

MONTESOL, 6 years old, stands 15½ hands, weighs about 125 pounds; is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcyon. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege.

POLE STAR

4 years old, by McKINNEY, dam MOUNTAIN HARE by Young Venture; 3d dam Rose Clark by Nigger Baby; 3d dam by Imp. Trustee. Will be permitted to serve 10 approved mares at \$40 for season.

The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address **P. FOLEY Race Track, Alameda.**

SEYMOUR WILKES

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12¼
and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmalt; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasture \$3 per month. For further particulars apply to **THOS. ROCHE, Lakeville, Sonoma Co.,** or **J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.**

Alta Vela 22449

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07¼, Sunol 2:08¼, Palo Alto 2:08¼, Alta Vela 2:11¼, and 9 more in the 2:15 list, etc.). Dam LORITA 2:18¼ by Piedmont 904; second dam Lady Lowell (dam of Ladywell 2:16¼, Lorita 2:18¼, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16¼.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FRELLSON,
Race Track, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17¼, winner of Occident and Stanford Stakes of 1903 (trial 2:11 at 4 years); Black Jack 2:28¼ (trial 2:22); The Boquet (4 y. o. trial 2:17¼); Majella 2:39 (4 y. o. trial 2:31¼). Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Fidella (dam of Fidette 2:28¼, dam of Mary Celeste 2:17¼) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancot, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08¼, James L. 2:09¼, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15¼) by Ansel 2:30, son of Electioneer; second dam Mayflower 2:30¼ (dam of Manzanita 2:16, Wildflower (2) 2:21 and 8 producing daughters) by St. Clair 16675. Prince Ansel's oldest colts are now 2 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM. Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

W. F. INGWERSON, Sec'y.
TULARE, CAL.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he is starved. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c. W. B. Eddy & Co., Whitehall, N. Y.

GREEN'S RUFUS	The Baywood Stud, San Mateo

GENEROUS AND PROMPT should be the response of everyone identified in any manner with the sport of riding and driving, to the subscription now being asked to aid in building a half mile training track and athletic grounds in Golden Gate Park. The sum required to be raised is \$25,000 and the Commissioners have promised to expend as much more if that sum is raised. Nearly ten thousand dollars have already been subscribed. There is no improvement made or contemplated in San Francisco's beautiful park that will afford as much general enjoyment and be used by as many people as the proposed track and athletic grounds. There will be a half mile track sixty feet wide provided for harness horse speeding, and the infield will be arranged for polo games, athletic contests, ball games, etc., and will be free to the public at all times. The old speedway is not to be interfered with but will be maintained as it is at present. Those who are interested in harness horses should respond liberally when asked for subscriptions. The new track will be of great value to every horse owner and road driver, and will furnish clean sport for thousands.

SHORT HORNS have held their own through all the fads of cattle breeding and are to-day the most popular of the beef breeds. A draft from the Walnut Grove Short-horn Herd of Mr. S. J. Maddox of Brookfield, Missouri, reached Sacramento this week, and will be sold at auction next Friday, April 15th. Fred H. Chase & Co., of this city, will do the selling. These cattle are all registered and are a grand lot. There are fifty head, twenty-four being bulls coming two years old, and twenty-six heifers, two and three years old. The heifers are all bred to imported Master Walton, one of the best red hulls ever brought to this country from Scotland.

Fred H. Chase & Co. have eight head of beautiful little Shetland ponies at the salesyard, 1732 Market street, that are for sale privately. They are splendid animals, thoroughly broken for children. An excellent surrey and harness made especially for a pair of these ponies is also for sale.

NO DOUBT EXISTS as to the best place to sell a good horse in the spring of the year. It is at the Blue Ribbon Sale at Cleveland which is held in May. This is the place where the big money is paid and one reason is that horses can show what they can do at the well appointed track there. Californians who want the high dollar for their horses should consign them to this sale. See the big ad for particulars.

TUESDAY NEXT, the Directors of the Pacific Coast Trotting Horse Breeders Association will meet at the office of Secretary Kelley, 36 Geary street, San Francisco, to decide as to the place where its meeting is to be held this year. Two cities will make propositions for the meeting—San Jose and Santa Rosa. The citizens of both places have raised quite a bonus to offer for the meeting.

Highland, a High-Bred Stallion.

At the Old Glory sale in Madison Square Garden, New York, Mr. W. A. Clark Jr., son of the Montana Senator, and now a resident of San Mateo in this State, purchased among others the five-year-old black stallion Highland, bred by Highland Stock Farm, Dubuque, Iowa. Mr. Clark bought this young horse with the intention of racing him, but trainer Ted Hayes thinks he should have a long and careful preparation, as he is too high-class to take any chances with, and so it has been decided to breed him to a few mares this year and race him next season. The very low fee of \$25 has been fixed for the services of Highland, and none but good mares are desired. Highland is a grand looking stud. His breeding is the most fashionable and he is a true representative of the stoutest of blood lines. He is beautifully gaited and perfectly tempered, in fact, there was never a better dispositioned stallion. He is a level headed fellow and can be placed anywhere in a bunch of horses when scoring. Mr. Hayes says he is a 2:10 trotter sure. As to his breeding there are none better bred than Highland.

His sire Expresso 29199 was bred at Palo Alto Stock Farm and is by the great Advertiser 2:15 (sire of Adbell 2:23 champion yearling trotter) out of the great thoroughbred dam of trotters Esther by Express. Esther is the dam of Expressive, three-year-old record 2:12 1/2, and several others in the list. Expresso has the Electioneer—Wilkes—thoroughbred combination that is pretty near the acme of breeding. The dam of Highland is the great broodmare Alpha 2:23 1/2 by Alcantara, son of Geo. Wilkes and the great Alma Mater. Alpha is the dam of Aegon 2:18 1/2, dam of Aegon Star 2:11 1/2. She is also dam of Algy 2:19 1/2, a producing sire, of Aeolian 2:20 and of Lady Acacia, the dam of Precursor 2:22 1/2.

The second dam of Highland is one of the most famous of broodmares, Jessie Pepper by Mambrino Chief 11. This mare had eleven foals that have either taken records or are the sires or dams of record holders. She is the dam of the great broodmares Iona, Wenonah, Annabel, Gossip, Iola, Starling, Metella and others. Among the fast ones descended from these mares are Wilask 2:11 1/2, Lady Geraldine 2:11 1/2, Heir-at-Law 2:05 1/2, Baron Rogers 2:09 1/2, Early Reaper 2:09 1/2, Metallas 2:11 and many others that have earned reputations for a high rate of speed and great gameness.

Highland himself has trotted a trial mile in 2:12, stands 16 hands, is coal black, and a square trotter. He will be in the stud at San Mateo and is worthy of patronage by progressive breeders.

I Direct 2:12 1-2 Goes to Sacramento.

Mr. Mabry McMahan, the well known and enterprising real estate dealer of this city, who purchased the handsome stallion I Direct 2:12 1/2 last year, has sent him to Prof. H. B. Freeman at Sacramento, and the fast son of Direct will be in the stud there to a few approved mares. Mr. McMahan intends to have I Direct raced this year as he is sound as a dollar and able to reduce his record, but he also desires him to get a reputation as a sire and will therefore breed him to a few mares. Prof. Freeman, who will have him in charge is a horseman of extended experience, having been for years in the employ of Villsge Farm, New York, and gave first lessons to a number of that farm's best horses, including Shadow Chimes 2:05, Lord Derby 2:05 1/2, Derby Chimes 2:07 1/2, King Charles 2:08 1/2 and many others. Mr. Freeman will begin giving I Direct slow work during the breeding season, and will race him through California, starting at the Pleasanton meeting where the horse is already entered in the 2:10 class pace.

I Direct 2:12 1/2 is one of the best bred of all the sons of that great horse Direct 2:05 1/2. His dam is Francisca by Almont, one of the great brood mares, she having produced Sable Francis 2:15 1/2, Guycesca 2:26

and the sire Earl Medium, sire of six standard performers. The second dam of I Direct is Francis Breckenridge by Serf-tin 280, own brother to Volunteer and sire of eight in the list, eleven producing sires and fourteen producing daughters. The third dam is the thoroughbred mare Luna by Swigert's Lexington, and the fourth dam the famous Eagles, founder of a great family, by imported Glencoe. Eagles traces in a direct female line to the great Cub mare, one of the most famous in the English stud book. As a race horse I Direct showed himself to be game as a pebble and wonderfully fast. In the race at Santa Rosa in 1900, won by the now famous ringer Walter K. in 2:08, I Direct was a close second and was officially timed as the second horse in 2:08 1/2. It is thought that 2:06 will not stop him this year if he reaches the races in good order. He stands 15.3 and weighs over 1100 pounds and is a horse of excellent conformation and the most perfect disposition. Read his advertisement in our business columns.

Answers to Correspondents.

W. W. THOMAS, Davisville.—Please state in the next issue of the BREEDER AND SPORTSMAN how much hay an ordinary driving horse will eat in a day that is fed grain.

Answer—There is no rule for feeding a horse. Some require all they can be tempted to eat, while others have to be restricted in their diet. It depends very much also on the amount of work the horse is required to do. Some owners would call ten miles an ordinary day's work for a driving horse, while others consider thirty miles an ordinary drive. The average horse, fed grain, will require from 12 to 20 pounds of hay. Read "How Some Horses Are Fed" in another column.

FRANK VANCELL, Milton—Kindly define the words thoroughbred and full bred.

Answer—"Thoroughbred" is only applied to the running race horse. For purposes of registration the compilers of stud books in this and foreign countries require a horse to have five uncontaminated crosses, that is all his ancestors for five generations to be recognized thoroughbred animals. Full bred animals may be of any distinct breed, whether horses, cattle, sheep, hogs, or other animals. For every recognized breed there is a standard, and all animals must come up to that standard to be recognized as full bred. We say a full bred Jersey cow, or Shropshire lamb, meaning animals that are eligible to registration in the Jersey and Shropshire stud books. The definition of the word "thoroughbred" as understood by the general public, you will find in Webster's dictionary, but we take it that you ask for the definition as understood by breeders.

E. B. HENRY, Klamath Falls, Or.—Will you kindly give me the registry number of Oakwood, a thoroughbred stallion by Fellowcharm, dam Agnes B?

Answer—The Stud Book does not give the number of registration certificate. Write to the Jockey Club, Windsor Arcade, New York. Oakwood is a chestnut horse, foaled 1891. He is registered on page 140, volume 6, of the American Stud Book.

An Omission.

In the list of foals entered in the Breeders Futurity No. 3, on which fourth payment of \$10 was made April 1st, which is printed on the 9th page of this issue of the BREEDER AND SPORTSMAN, there is an omission. The chestnut colt Joe Bowers by Silver Bee, dam Bessie by Cornelius Jr. should be named in this list. S. U. Mitchell had the original nomination and as his colt died he transferred the nomination to Mr. William Hayes of Sacramento, who names his colt Joe Bowers.

The new rules of the National Trotting Association have been published and can be had in pocket size in paper or leather binding. For sale at this office.

In a big field of horses there is nothing so certain as that under the "only three heats" system there will be several animals on which entrance has been paid that will practically have no chance to win the race, or any part of it. Positions from the pole are drawn by lot, and a horse that is in the third tier, or even the second, is handicapped from one to four seconds in the mile over one that gets in the front row, fairly close to the pole, and can score well. The ability to get away with the other horses is quite important in the front row horses, and is a wonderful help towards beat winning, but in the case of the second or third row horse this ability to step away fast from the wire may be a positive disadvantage. With an eager, nervous horse of that sort the driver who finds himself in one of the rear flanks of a field of starters is frequently obliged to take a lot out of his horse before the word is given by doubling him up to keep from going into or oversome of the slow scoring ones in front.

H. T. WHITE.

JOTTINGS.

JAMES BUTLER OF NEW YORK, who has been spending a month in California, left for his home in New York one week ago last Monday, accompanied by his family. Mr. Butler has purchased from the Bank of Livermore the famous Valensin Farm near Pleasanton, lately owned by Mr. R. E. de B. Lopez. The farm was once the property of the late Count Valensin, and was the home of the great stallion Sidney. Mr. Lopez purchased it several years ago, when he came to this State from Australia, and called it the Merriwa Stock Farm, after a thoroughbred stallion by that name which he brought here from the antipodes. Mr. Lopez also kept the stallion James Madison 2:17½ there for some time, but afterwards leased this horse to Mr. J. B. Haggin, who took him to Kentucky where he died. Among the many fine horses bred at Merriwa Farm was the ill-fated Articulate, one of the best racehorses ever seen in America. The farm is well fitted up for a stock farm, there being numerous barns, fine box stalls and a comfortable residence. A three-quarter mile training track is also on the place. It is Mr. Butler's intention to make this a mile track, and he will use the farm both for breeding and training his trotters, and the place will doubtless regain all its former prestige as one of the leading stock farms of America. The residence will be remodeled and fitted up, and Mr. Butler will occupy it with his family during a portion of the winter months each year. Nothing has occurred in this State for some time that will do more to help the trotting horse breeding business than this purchase. Mr. Butler is one of the millionaire business men of New York City and his East View Stock Farm one of the most extensive breeding farms of New York State. He takes a very active interest in racing his horses, and last year campaigned three strings on different circuits. He is the principal owner of the Empire Trotting Track, the best appointed track of its kind in America, and is also a member of the Board of Review of the National Trotting Association. He will doubtless send many of his best brood mares out to California, and may send Directum Kelly and Direct here to make seasons in the stud. May good luck attend him in his new venture, and may the former greatness of the Valensin and Merriwa farms be revived and grow to larger proportions under Mr. Butler's excellent management.

If any breeder in California entertains any doubt as to Alex Brown's stallion Nushagak proving a great sire, he should visit Pleasanton and look over the youngsters by that horse that Charlie Spencer is training. No person ever saw a more uniform lot of good lookers than this string and there is showing prize winning material in the bunch. They are all two-year-olds except Aristo 2:17½, the Occident Stake winner, and The Bouquet, a very fast mare, and they are five. Much has been written and said about Aristo and he is pretty well known to the trotting horse fraternity. He has grown into a grand looking trotter. In my humble opinion there is no handsomer horse than he of the three hundred in training at Pleasanton. And how he can step. He trotted a quarter in 31 seconds, last eighth in 14½ seconds one day last week. As he worked a mile below 2:12 last year, the probability is that 2:06 will not stop him this year. He is a good looker in or out of harness, and many persons have made offers for him, but he will not be sold until Mr. Brown gets what he thinks him to be worth. The two-year-olds have all stepped quarters better than forty seconds. One by Nushagak out of Pioche by Dexter Prince, second dam Peko 2:11 by Electioneer, has been a mile in 2:44 and a quarter in 38 seconds. Another has been a quarter in 37 seconds and still another in 37½. There is one by Prince Ansel out of a Nushagak dam that has marched a quarter in 37½ seconds with the last eighth in 18 seconds. The second dam of this last mentioned two-year-old is Francisca, the dam of I Direct 2:12½, Sable Francis 2:15½ and others.

Pleasanton track presented a lively appearance last Saturday forenoon, several hundred people being present to see the quarter dashes that had been arranged between some of the horses in training at the track. There were three events, in each of which there were three starters. Two were for pacers, the other for trotters. In the trotting dash the gray mare Louise Croner, driven by Farmer Bunch, the bay horse Golden Gate driven by William Brown, and the bay gelding Major Cook driven by J. M. Alviso were the contenders. Golden Gate acted badly and would not score, and finally the other two were sent away without him. Bunch landed the old gray mare winner in the good time of 32 seconds.

The first dash for the pacers had Loupe, Boomer and Dictatress as starters. Mr. Iverson's little chestnut mare was the fastest and paced the quarter in better than 31 seconds, nearly all the watches making it 30½. Ed Parker drove the winner.

In the last event there were also three to start—Christobel 2:11½ by Chas. Derby, King Cadenza 2:15½ by Steinway and Miss Idaho, a mare owned by Mr. Springer of Pleasanton. Christobel won easily in 30 seconds flat, Ted Hayes having to make no effort to land her first under the wire. She is a remarkable mare, having two-minute speed to show at any time. She was bred this spring to Bonnie Direct 2:05½ and

CHRISTOBEL in training for her quarter in 30 seconds at Pleasanton last Saturday.

has not been in training at all. The only work she has to do is to pull a wagon containing Mr. Hayes and his assistants from the track to town and back at meal time. Knowing that she had a great flight of speed Hayes took her out of the wagon the day before the race, hitched her to a hike and jogging up above the quarter pole turned her and scored down a couple of times. He said she would know the next day when the race was ready that the quarter pole was the starting point and would do the rest herself, and she did. Christobel can count up to four as has been tested more than once. She usually hauls that number in the wagon to dinner every day. When taken to the stables at the noon hour, she patiently waits until four have come and climbed into the wagon before she attempts to start. If two persons are in the wagon when she takes it up to town and both alight and enter a store or the hotel, she waits until both have come out and become seated in the wagon before she starts up. One can take his seat and she will make no movement toward starting, but when the other gets into the rig she is ready to start. Christobel is owned by Mr. W. A. Clark, Jr., son of Senator Clark of Montana. He has quite a string of horses in Mr. Hayes' charge at Pleasanton. Christobel is by Charles Derby, dam Algerdetta by Allandorf, second dam King Girl by Mambrino King, and has paced a quarter in 28½ seconds. Her foal next year by Bonnie Direct should be a two-minute horse, whether it paces or trots.

In Monroe Salisbury's string at Pleasanton there is a gray two-year-old trotter owned by Judge W. E. Greene of Alameda county, that Mr. Salisbury says is the best trotter of his age that he ever had anything to do with. The colt is a very breezy looking youngster well proportioned and good all over. He has a very short back, great driving power and splendid action. The colt is by Nutwood Wilkes out of Little Witch by Director. He ran out last year and was taken up in the fall and broken by Mr. Martin Carter, proprietor of Nutwood Farm. The colt was simply

Judge Greene's Two-Year-Old by Nutwood Wilkes.

broken to harness, not trained any, and was sent to Mr. Salisbury on the first day of March this year. One week ago last Saturday Chas. De Ryder stepped him a quarter in 36 seconds. Mr. Salisbury wanted Judge Greene to set a price on the colt but the Judge

thinks him good enough to keep for a while. All horsemen who have seen the colt at work predict a great future for him. He is a pure galloped trotter, one that wants to get to the front and seems to enjoy the exercise. It was the Nutwood Wilkes-Director cross that produced John A. McKerron 2:04½ and this youngster is even more promising than that great trotter was at the same age.

By the way Mr. Brown has had a streak of bad luck this year, as his beautiful Walnut Grove Stock Farm is in the district that has been inundated by the overflow of the Sacramento river. His loss is estimated at close to ten thousand dollars which is a severe one. The district is one of the richest in the state however, and in years when the levees do not break immense crops are produced. Mr. Brown has removed his stock to high ground and the broodmares and colts are all in good shape.

Miss Georgie 2:25, the fast brown pacing mare by McKinney 2:11½, dam Georgie B. 2:12½ by Nutwood Wilkes 2:16½, was sold last week by Martin Carter, proprietor of the Nutwood Stock Farm, to Mr. W. A. Clark, Jr., of San Mateo, and is now in Mr. Clark's string at Pleasanton in charge of trainer Ted Hayes. The sale was negotiated by Mr. W. W. Mendenhall and the price paid is private, but it was a long one, though not a cent above her value. Miss Georgie has paced below 2:10 and is as game as any mare ever bred. She raced last year as a four-year-old on the California circuit, but did not win a heat, meeting the unbeaten horse Ben F. 2:10 in all of her starts, which were four in number. Her first race was at Vallejo. Ben F. won the race in straight heats, with Miss Georgie 2-2-3 in the summary. The time was fast—for the first race of the year—2:12½, 2:11½ and 2:12½. This was on August 13th. Her next start was on August 26th at the Breeders meeting in the Pacific Slope Stake for 2:20 class pacers. She finished a close second in every heat in this race, the time being 2:12, 2:11½ and 2:11½. At the State Fair she started twice. On September 5th, in the 2:20 class, she was not right and finished outside the money, but three days later she was again second to Ben F. in each heat, and the time was 2:10, 2:10½ and 2:12. During the whole season Miss Georgie was in poor flesh and did not look like a mare that was in first class condition, but she raced with great gameness in every start. The previous year, as a three-year-old, she was started at the Pleasanton meeting in August to beat 2:28½ and paced a mile very handily in 2:25, which is her present record. Miss Georgie is entered in the Pacific Slope \$1500 Stake at the Breeders meeting again this year and is also in the \$1000 2:20 pace at Pleasanton, but it is not certain that she will be started in either. Mr. Hayes will take her to Denver with his string about the last of May and there is a probability that he will take her from there to the Grand Circuit, as she is considered good enough to meet any in her class in this country.

Open to All Comers.

Prince Alert 1:57, the famous pacing gelding which for more than two moons was the champion harness horse of the world, is to be a husy horse this year. James J. Hanley, his owner, and Mart Demarest, his trainer, are looking for big game, harring neither Dan Patch, Dan R., or, in fact, any Dan, and believe when the reports are all in from Memphis next fall the rangy gelding will be more than a pretender to the throne.

Demarest has wintered his horses in his stable in One Hundred and Forty-first street. He contemplated going to Cleveland and at the Glenville track putting on the finishing touches. He has changed his mind, however, and in about three weeks will ship to Syracuse, where he believes he can do just as well. He has a long campaign mapped out for Prince Alert, and from Syracuse he will go to Indianapolis and other Western cities. He is willing to talk "match races" to any one owning a fast pacer; 1:57 is not the limit of the Prince, according to Demarest, and while McHenry is talking of 1:54 for the popular Dan Patch the same Demarest is not taking to the woods.

In the Demarest string to be shipped to Syracuse are Invader 2:11½ by Jay Bird, Walter Keim 2:31½ by Young Jim, a three-year-old colt by Idolita, and Director Joe, a young pacer well bred, being by Director, out of Josephine Young, the dam of Joe Patchen 2:01½. He can pace a bit, too. It is a good stable, and Demarest can be depended on to be heard from when the sulkies begin to hum.—Ky. Stock Farm.

Bene Brack is the name Geo. T. Beckers has selected for his yearling filly, own sister to Zombro 2:11. She is entered in the Breeders Futurity.

There are 15 trotters and 88 pacers in the 2:06 list.

Notes and News.

Forbes Farm has been offered \$25,000 for Bingen 2:06½.

The McKinney trotter Marengo King 2:29½, dam By By by Nutwood, in stable of E. F. Geers at Memphis, is said to be able to beat 2:15.

Bouncer 2:09 by Hummer failed to get in foal last year and will be raced again. Her owners are confident she can reduce her record.

Readville entries close Wednesday next, April 11th. See the five big stakes in our advertising columns and make your entries in time.

Early this week Mr. A. B. Spreckels' fast trotting mare Dione 2:07½ by Eros, foaled a handsome filly by Dexter Prince at the Aptos Stock Farm.

Monroe Salisbury will go East with his horses about May 1st. He hasn't a sick horse in his string which contains thirty-five trotters and pacers.

Lady Nutford, a pacing mare by Nutford 2:15, was mated to Zolock 2:10½ this year. The offspring from this cross should be a good one, as the mare has two minute speed.

Lou Crellin of Pleasanton has purchased from Oakwood Park Stock Farm a yearling by Owyhee, dam Bertha, the dam of Don Derby 2:04½, Diablo 2:09½, etc., by Alcantara.

From six to ten dollars a head is the ruling price for bronchos in New Mexico. It costs about ten dollars per head additional to round them up and have them halter broke.

Dr. Le Moyne Mills, of Los Angeles, has consigned Coeur de Lion, one of the best matinee horses in Los Angeles, and the five-year-old mare Bonnie Carlotta by Conifer to the Blue Ribbon sale.

Spokane offers some excellent stakes and purses for the harness horses this year. Entries do not close until May 10th, but don't let the date go by without entering there if you intend to race up north this year.

Hancock and Miller of California have taken a string of about twenty trotting-pacing and running horses to Pueblo, Colorado, to train for the light air circuit. The fast pacing mare Martha B. 2:12½ by Asbland Wilkes is in their string.

John Sherwin, of Cleveland, Ohio, has purchased the California trotter Richard S., wagon record 2:16 by Grover Clay and will use him in the matinees. Richard S. is a full brother to Clay S. 2:13½ and was taken east about two years ago by J. M. Nelson.

Sunol 2:08½, the champion trotter to high-wheeled steel-tire sulky, is shortly to foal to the cover of Axworthy. Everyone hopes that the youngster may live at least somewhat longer than the rest of the unlucky family of the great daughter of Electioneer.

Twenty-five business men recently met in St. Paul, Minn., and organized the St. Paul Driving Club for the purpose of holding matinees and generally promoting the sport in the North Star State's capital. H. W. Fagley is President and George R. Kibbe, Secretary.

Budd Doble visited Aptos Stock Farm last Tuesday with some eastern friends and was shown around by Sandy Smith, who is handling quite a string of trotters and pacers belonging to Mr. A. B. Spreckels. Everything at Aptos is in fine shape and the stock all look well.

Fourth payment was made April 1st on 158 colts and fillies entered in the Pacific Breeders Futurity stake for foals of 1903. This is an excellent showing; and as these foals are now yearlings the outlook for big fields of starters in the two-year-old divisions next year is good.

The Norfolk \$5000 stake for 2:24 class pacers which is offered by the New England Trotting Horse Breeders Association for its Readville meeting in August, should be a good race for some of our California pacers to get part of the money. Entries will close Wednesday next, April 11th.

Bessie Norfolk by Duke of Norfolk foaled a dark bay colt by P. Foley's McKinney stallion Mootesol on the 23d of last month. The mare and foal are the property of Mr. H. P. Smith of Alameda. The colt has been named Mootes Norfolk and is entered in all the California stakes. Bessie Norfolk has been bred back to Mootesol.

Mexico has captured the mule trade of Cuba, the cheapness of the animals offsetting their lack of size. A Washington dispatch says that of late several thousand mules have been shipped from Mexican to Cuban ports. Some of these mules are also going to Porto Rico. The Cuban order is apparently a large one, 600 mules having been bought at one town in Durango, and buyers are at work in other Mexican states. The prices paid range from \$25 to \$60, in Mexican coinage, or from \$11.20 to \$26 per mule, American currency.

J. D. Kalar has sold his fine three-year-old trotting filly Maggie Glynn to George A. Davis of Pleasanton, for \$500. Maggie Glynn is by Robin 2:22½, out of a mare by Alpheus Wilkes 2:25, a son of Mambrioo Wilkes. The filly is a square trotter and as a two-year-old could trot close to 2:30. She is entered in the Occident Stake this year.—*Salinas Journal*

Mr. L. C. Gates of Modesto took to Pleasanton last week a pacer and a trotter, both without records, which he placed in Sutherland & Chadbourne's stable for training. The pacer is called Almost Boy and is by Juanito, son of Tilton Almost, out of a mare by Oaklaid Boy. The trotter is by Cornelius, son of Nutwood. Both are good prospects and will be developed for speed.

The Blue Ribbon sale is the place to sell a horse that can show speed. There will be a good California representation this year. The greatest trotter the world ever saw was sold at the Blue Ribbon sale last year and she was a California mare. The consignments from California to this year's sale will attract many buyers as they know good things come out of the California farms.

The veteran New York road driver, Frank Work, who was 85 years old on February 10th, still drives the noted Grand Circuit trotter Pilot Boy 2:09½ in Central Park, nearly every day when the weather is fair and the roads are free from snow and ice. Mr. Work's old favorite, Edward 2:19, now in his 33d year, has wintered nicely at Carl S. Burr's Long Island farm, and looks good for several years to come.

Denny Lynn, of the firm of Shepard & Lynn, has placed in Charles Whitehead's charge to be trained at the Salinas race track his fine three-year-old trotting filly Azina by Azmoor 2:20½, first dam Nina by Piedmont 904, second dam Nancy by John Nelson. Azina is a half sister to Ariel 2:27½. She was bred at Palo Alto and was bought by Mr. Lynn at one of the dispersal sales of that famous stock farm.—*Salinas Journal*

H. S. Hogoboom of Woodland is another horseman who says Mr. Warlow of Fresno is right in regard to colt stakes helping the business. Mr. Hogoboom says

Miss Georgie by McKinney

that when there are no colt races the farmer seldom has his colt broke until it is three years old. He thinks that colt training will help to do away with hobbles on two and three-year-olds, and with book betting stopped will result in good races. All of Mr. Hogoboom's horses are doing well at the Woodland track.

When Red Wilkes was owned at Belle Mead, N. J., several thoroughbred mares were bred to him, says the *American Horse Breeder*. All proved in foal, and one of the foals, a three-year-old chestnut filly, owned by E. B. Bergen of Harlingen, N. J., is said to be very promising. She is from Our Kate by Don Jose, son of Joe Hooker by Monday, he by Colton, son of Lexington. Her second dam is Kate by Engraver, son of Enquirer by imp. Leamington.

Mr. A. H. Davidson, the expert horse shoer of Phoenix, Arizona, has had the misfortune to lose his very valuable filly Zodiola D. from lung fever. This filly was by that fast son of McKinney, Zolock 2:10½, and her dam was Delnette 2:28½ by Boydell, son of Electioneer, so her breeding was very choice. Delnette has the distinction of being the last standard performer of 1903, having taken her record on December 31st, last year, at the Phoenix track and in a race. Deloette's filly was a very promising animal and Mr. Davidson regrets her loss very much.

Gil Curry, one of the old guard of the trotting horse trainers, who has been devoting his time to the runners for the last four years, and has spent the winter in San Francisco, is returning to his old love and will doubtless be seen in the sulky this year on the Grand Circuit. He has been driving some of the Salisbury horses during the past few weeks just to get his hand in and on Saturday last was up behind Consuela S. 2:12½ by Directum and worked her three beats in company with Judge Greene 2:10½ driven by Charlie De Ryder. It was Mr. Curry's first seat in a sulky for four years.

Geo. T. Beckers will leave Los Angeles about May 1st for Cleveland with his great horse Zombro 2:11. He will take several of the get of this horse with him which will be offered at the Blue Ribbon sale. Zombro will make the season in the stud at Glenville track at \$100, and has several high class mares already engaged. We hate to see Zombro leave California, and hope that after a season or two Mr. Beckers will conclude to again keep him in this State during the breeding season. No stallion on this Coast has more promising colts than this son of McKinney and they all have speed of the natural kind that it does not take long to develop.

Jack Groom left Alameda this week with his string of six horses and, now has them stabled at the San Jose track, where he will train them for the races on the California Circuit. His record horses are Liege 2:12½ and the pacer Harry Hurst 2:14½ by Delwin, that was recently purchased by a gentleman of this city from his former owner Mr. A. T. Van De Vanter of Seattle. Harry Hurst was bred in Contra Costa county and raced quite successfully on the Northern circuit last year. The other horses in Mr. Groom's string are all green pacers, two of them being by Seymour Wilkes, one by Nutwood Wilkes and one by Don L. They are all good prospects and Jack hopes to get another Sir Albert S. out of the bunch.

Mr. L. H. Todhunter of Sacramento, returned from a week's visit to Los Angeles on Tuesday of this week. While in the southern metropolis Mr. Todhunter sold his good colt The Jester by Stam B. 2:11½ to Mr. J. W. Miller of Colorado Springs for a good round figure. Mr. Todhunter was loth to part with this grand looking four-year-old, but as his farm in Yolo county, across the river from Sacramento, is now under water, he thought cash in hand would come in pretty handy and therefore accepted Mr. Miller's offer. The Jester is as handsome a young stallion as was ever bred in California and won third money in the Occident last year. He is a beautifully gaited trotter and game as a pebble. His dam is a mare by Silver Bow 2:16.

An adjourned meeting of the Board of Review of the National Trotting Association will be held at the Murray Hill Hotel, New York, N. Y., at 11 a. m., on Tuesday, May 3, 1904. All communications intended for the consideration of the Board at the May meeting must be forwarded to Secretary W. H. Goocher at Hartford, not later than April 19th. The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

With harness racing going on at the same time on a dozen circuits in this country it will be very hard to supply the demand for men suitable for the position of presiding judge according to the following standards fixed by the *Kentucky Stock Farm*: "A man thoroughly familiar with the rules, and with moral courage enough to enforce them to the letter, and backbone enough to maintain his position in the face of all adverse criticism; with familiarity enough with drivers and horses to know their characteristics, abilities and dispositions to enable him to quickly form an intelligent opinion of any transaction or incident in racing. He must have been on the grounds and in touch with the actors themselves, both horses and men, and he must, as a result of his experience, be able to apply the practical side of every question, as well as the theoretical."

The Los Angeles *Express* says: "While it has been definitely decided by the Los Angeles Driving Club to give a Fiesta, or May entertainment, it has not been determined just what class of sport is to be given. A majority of the officers and members favor a combination of outdoor horse show and racing matinee, the same as was given last year, but on a larger scale. It is proposed to have the day open with a horse show parade, to be followed by the judging of tally-hos, four-in-hands, etc., equipment, handling of horses, the animal and vehicle to count. The coaches of whatever type used would be filled and this, too, would be taken into consideration in judging. After this parade has been passed on it is thought one heat of the first race might be disposed of, to be followed by another class parade, judging, awarding of ribbons and the like. Then would come another heat in the race and in this way the spectators would be treated to a new arrangement in the way of matinee program as given by the Driving Club. This club now is in a position to give such an exhibition with great credit to itself, as the members have horses, vehicles, harness and every kind of equipment that goes to make up an excellent showing. With W. H. Stimson, William Garland, John S. Cravens and others with four-in-hands, three or four tandems belonging to others, a big runabout class, and all of the other kinds of vehicles it would not be difficult to present an attractive program. This probably will be the plan adopted and the following classes brought out: Women's saddle class, men's saddle class, gaited saddle horses, four-in-hands, tandems, roadsters, pair roadsters, ponies under saddles and runabouts."

C. A. Harrison Visits the Ford Farm.

The business reports say that the manufacture of automobiles has fallen off during the past year. That's a horse on the gasoline wagon.

An Appeal to Horsemen.

WOODVILLE, CAL., April 5, 1904.

BREEDER AND SPORTSMAN:—In offering a program of good stakes and purses the Tulare Association has made a move that is deserving of the support of every one that has an interest in the harness horse on the Pacific Coast. While they do not presume to be the whole show they may by encouragement become an important factor, and it behooves the men who are breeding and developing harness horses to recognize this fact.

The BREEDER AND SPORTSMAN has very aptly and opportunely said that it was time the harness horsemen were awaking from their torpor and *doing something*, and doing it without depending upon state appropriations that are so fickle and uncertain. The Tulare Association has answered the call and now it is up to the horsemen to say whether they will help themselves, assist in building up home enterprise by a liberal patronage or wait for the realization of some winter "pipe dream" while the business of breeding and racing harness horses in California languishes and falls into a hopeless decline.

Let a few more of the doubting brethren come forward and do as Tulare has done and with a hearty co operation of horsemen there will be a racing circuit in California and "something doing" in the harness horse business in this state.

Don't stand out and say that ten per cent is too much, but look back over the track of some of the associations of California strewn with financial wrecks. Of course these failures have not been due so much to low entrance fees as to other causes but the entrance fee is an essential element. It is a business proposition and this association has gone out as far into the realm of uncertainty as business men will reasonably venture. Let the horsemen meet them half way. They are not only putting up five dollars with a chance to win fifty but they are subscribing for stock in the business upon which they are depending for dividends.

The day is past for associations handing out fifty or one hundred dollars apiece to dicky legged racers to go out and trot around three times. Such entertainments disgust the public and with bookmaking is largely responsible for many of the failures.

An intelligent wide awake public are anxious to patronize honest real racing where honor and money are at stake and reputation of men and breeds of horses hang in the balance, but they have no time or money for the other kinds.

There are associations older and better established that can offer easier terms to the horsemen. They are doing so and it is proper that they should do so. This association may do so another season if their experience justifies it. Let the horsemen remember

that their interests and those of the association are mutual and reciprocal and that if the association prospers they prosper. If you give Tulare reasonable encouragement she will respond nobly.

Last fall after raising \$273,000 to liquidate an irrigation district hounded indebtment her citizens contributed \$5000 for a days celebration of the event. No place possesses better conditions for a successful fair and race meeting than Tulare, located as she is in the center of a rich well watered and prosperous section of the Southern San Joaquin Valley, and especially may this statement be emphasized this season as nature has bestowed her bounties with a lavish hand and the heavily laden orchards and alfalfa fields swarming with fat stock bespeak a season of unparalleled prosperity. Once more I say to the horsemen, awake, make your entries. Not only encourage this association but every other that makes an honest bid for your support.

There is this principle of philosophy running through all the affairs of men, "There can be no effect without an adequate cause."

If harness racing succeeds in California an effort must be made equal to the result desired.

J. W. MARTIN.

Every Heat a Race Plan.

Now that several associations over East have decided to adopt the three heat plan, with every heat a race and money divided accordingly there is much discussion in the papers about it. Henry Ten Eyck White, the very entertaining writer on harness horse affairs in the Chicago *Tribune* has the following to say on the subject:

The Buffalo people think the scheme will be popular with horse owners, but that remains to be seen. The truth of the matter is that the "every heat a race" idea and splitting up the purse in queer forms are merely efforts to prevent the laying up of heats by making it to the interest of every starter to go for all he is worth in each mile. No doubt considerable headway in the desired direction is made, but, on the other hand, the pleasure of seeing races as they like them is denied a good many people, who like the old-fashioned way of trotting, in order that some cheater in the sulky may not be tempted to get hussy.

The way to get rid of the "laying up" evil is to abolish hetting on the heats, and every track manager and horseman knows it. But to do this would cut off a considerable revenue, the bookmaking on heats always bringing a fancy price at the Grand Circuit and other big meetings. "Every heat a race" has been tried by A. J. Welch, who is the owner of two grand circuit tracks as well as the man who buys the hetting privileges all the way down the line, but it cannot be said to have worked well. The

\$5000 Ohio stake at Cincinnati last fall was an "every heat a race" affair, and it was also provided that the race should terminate automatically at the end of three heats. This was stated on the program of the day, but not one person in ten, even among "the regulars," remembered the fact.

Caspian won the first and second heats in 2:09½, 2:10½, and then Hawthorne, which had been second in each of these miles, gave wonderful exhibition of homestretch speed and beat Caspian to the wire in 2:09½. Just as the crowd had cheered the mare to the echo and settled down for a good, hard contest, they were surprised by the judges announcing that the race was ended. It was a cheap finish to a race that promised well, and nearly everyone regretted that foolish conditions had spoiled the sport.

Perhaps the Buffalo plan that permits nine horses to win a part of each purse and allows one horse to win close to 70 per cent of the purse may suit horsemen, but one would hardly think so. So far as the horsemen themselves are concerned the plan does not appear to have any advantage over the present system of racing. If ten or a dozen tracks were to have "stop at the end of two or three heats" races a man could fit his horses to go that sort of a journey, but if, as at present is the case, he is compelled to get his 2:24 class horse ready for a three in five race in the M. and M. at Detroit, he would be at a decided disadvantage if later meetings were "three heats only" events. It makes a lot of difference in a trainer's plans whether his horses are to be trained for possible five or six heat races or for events where three heats, no more, no less, are the horse's portion. For these and other reasons the new fangled notions as to money divisions and chopping off races after three heats do not find much favor with the men who train and drive harness racers.

There are three ways to choose a brood mare, one on breeding, another on conformation, a third on both. About eight years ago Al Thomas was at an auction in New York, and saw a mare named Maggie Yeager about to be knocked down at \$50. The mare was fairly well bred, being by Red Wilkes, dam by Almont. Mr. Thomas' attention was attracted to her because she was a mare of roomy proportions—his ideal of a brood mare. He quickly bid \$60, and the mare was knocked down to him. Mr. Thomas was then superintendent of the Sangamon Stock Farm, Springfield, Ill., the home of that good grey son of Electioneer—Conductor 2:14½. Mr. Thomas bred his new purchase to Conductor, and the result was Walnut Hall 2:08½.—*Am. Horse Breeder*.

Allendale by Falrose, one of Ed Mills' recent purchases, is doing well at Pleasanton. He moves like a 2:10 horse, and is as handsome as they make 'em.

NUSHAGAK 25939

Walnut Grove's Premier Stallion, Whose Get are Attracting Much and Merited Attention.

Modesto News.

Mr. Haney has plowed the track recently and is putting it in fine shape to work some horses that he has in charge. He has several very promising colts in his string which he expects to race this year.

One of his favorites is Lady Rea a two-year-old trotter, own sister to Thos. R. 2:15 and a sure trotter. She is owned by Mr. C. L. Jones of Modesto. Her breeding is just about top notch. She is by Iran Alto 2:12½, son of Palo Alto 2:08½, and her dam is Yedral (dam of Linda Oak 2:18½) by Nutwood, grandam Lady Patchen by Budd Doble 3764.

Frank Lane, a three-year-old stallion by Elector, dam Franza by Steinway, second dam by Echo, is one of the handsomest young stallions in California as well as a very fast one.

A two-year-old filly called Dictatus Princess is by Prince Nutwood, dam by Dictatus. She is a pacer, and from the way she moves, with the little work she has had, will be a hard one to beat some day. The above two are owned by Dr. C. W. Evans.

A yearling stallion by L. W. Russell, dam Elsie (dam of five trotters in the list) by Gen. Benton is a very promising colt, and a yearling by Prince Nutwood dam Daisy E. by Elector, a fast mare that could pace a quarter in thirty seconds. Daisy E. is an own sister to Cora S. 2:20½. These two promising youngsters are owned by Geo. Cressy, and are entered in the Occident Stake and the Pacific Breeders Futurity.

Mr. Geo. Whalon is the owner of a yearling filly by Prince Nutwood, dam by imported Partisan, that promises to be a fast trotter.

Mr. Haney also has a yearling colt by Prince Nutwood, dam by Dorsey's Nephew, that is a large and powerful colt and a natural trotter. It is owned by Mr. B. F. Angel. A four-year-old pacing gelding in his string is by Dexterwood. Mr. Z. E. Drake owns this gelding and it will make a very fast horse. Gene Rose has a black filly by Prince Nutwood out of a Joe Daniels mare that is learning to trot. Besides these there are several other young horses owned in this vicinity that will be sent to Mr. Haney soon and he will be a busy man.

There are several good stallions standing here this season, among them Prince Nutwood, Pacheco Wilkes, Wild Whisp and Somerset Prince in the standard line, besides several good roadster stallions, and D. B. McQuester in the thoroughbred line. We have some good mares to mate with the above stallions including Daisy Nutwood, the dam of that fast mare Consuela S. 2:12½, now in the Salisbury string at Pleasanton; Lucy L. 2:22½, a great race mare of her day; Elsie, dam of five in the list; Daisy E., a very fast mare, and several other mares that should produce speed, as they are by such sires as Diablo, Prince Nutwood, Elector, Sidney Arnett, Dictatus, Steinway, Charles Derby, California Lambert, Gen. McClellan Jr., Dorsey's Nephew, Dialect, McKinney, Gen. Benton, Piedmont and many others.

In the draft line we have Hercules, a very fine horse owned by C. L. Jones, and Baron Primrose 2d, owned by Dr. C. W. Evans. Both these stallions will weigh 1800 pounds or over. So you see we have some good horses of most every class.

Prince Nutwood 2:12½ is by Dexter Prince, dam Luella by Nutwood and she is the dam also of Myrtle 2:13½ and grandam of Robizola 2:12½. He is 16.3 hands high and will weigh 1250 pounds. In 1894 Prince Nutwood won one of the greatest races ever contested for by a three-year-old. It was at San Jose for a purse of \$400 and there was but one other starter—Gertrude G., a chestnut filly by Redwood. It was a see-saw race, Prince Nutwood getting the first heat, Gertrude G. the second, and then they made the third a dead heat. Prince Nutwood then took the fourth, but the mare got the fifth, and then the Prince wound up the affair by annexing the sixth heat. Few two horse races have ever lasted so long and as all the heats but the sixth were from 2:22 to 2:23, and that was in 2:23, Prince Nutwood showed great gameness. He should be a great sire of speed.

OCCASIONAL.

A good horse trainer, that is, one whose horses are good mannered, is nearly always a quiet man himself. As a writer in *Country Life* says: The horse does not like a nervous, fidgety, fussy, or irritable man. He is too nervous and irritable himself. "Why is it," one teamster was heard to ask another, "that Phin's horses are always gaunt? Phin feeds them well." "Yes," was the reply, "but he's like a wasp around a horse." A well known owner of race horses, not at all a sentimental person, recently made an order for hiding his employees to talk in loud tones or to swear in the stable. "I have never yet seen a good mannered horse," he says, "that was being sworn at all the time. It hurts the feelings of a sensitive horse, and I'll keep my word good to discharge any man in my employ if I catch him swearing within the hearing of any horse in this stable."

Instructive Points About Glanders.

For more than a year past, Dr. A. D. Gill, the well known and popular New York road rider, has been devoting a great deal of his time to the investigation of that frightful scourge of horses—glanders. One particularly interesting feature of his work has been an instructive and valuable series of experiments with Mallein, the bacteria of glanders, which he injects hypodermically, as any other anti-toxin, to discover hidden glanders which is far the most dangerous phase of the terrible disease. In the face of the most strenuous opposition on the part of some of the scientists who differed with him, he has been able to discover hidden glanders by the use of Mallein, and in fact to cure mild cases. The importance of his work cannot be estimated by mere dollars and cents. His discoveries are of incalculable benefit to mankind, not only as a means of saving horses, but in saving human life. While Dr. Gill as well as many other veterinarians have been experimenting for years in a vain attempt to discover a cure for glanders, it is only within the past year that he has approached the goal. He has demonstrated that injections of the Mallein will discover hidden glanders and will cure mild cases with no resultant harm to a healthy horse. Something of the value of his work can be realized when it is known that in the boroughs of Manhattan and Brooklyn alone half a million dollars' worth of horses were lost last year from this dread malady.

The doctor's recent report to Hon. Charles A. Wieting, Commissioner of Agriculture, is exceedingly interesting, and is the means of securing a liberal appropriation for the purpose of establishing an experimental station in New York, which will be hailed with great satisfaction by every horse owner in the country. The report is as follows: "I have the honor to send you my yearly report on the disease known as glanders or farcy, which has been and is prevalent among horses in and around New York City. I will briefly mention, as far as possible, the number and value of horses destroyed with this disease and the results of our experiments with Mallein both as a diagnostic and curative, with the view always in mind, of detecting, controlling and possibly eradicating this snaky horse scourge from the State. Glanders is alarming prevalent in and around New York City. During 1903, fifteen hundred cases were reported by veterinarians to the local health department; but this record does not by any means show the actual number.

"As an example I have traced from January, February and March, 1903, from a stable of seventy horses, twenty-seven positive cases, only eleven of which were reported. A great many cases were killed in the street cleaning department that were never reported. The larger express companies and trucking stables don't report glandered horses, but quietly get rid of them. Owners of boarding stables in fear of quarantine and loss of business, never call in the local authorities. Many horses are worked with a glanderous discharge from the nostrils and opened farcy buds. In large stables it is the custom of stable foremen and veterinarians to examine the horses Sundays when they are all in, and to pick out well-developed cases, and send them to the offal dock to be killed. This accounts for the finding of proportionately more cases at the dock on Mondays.

"Glandered horses are sometimes sold or sent to pasture, spreading the disease wherever they go. Every outbreak of glanders that I have investigated has been traced directly to New York City. It is safe to say that over 3500 glandered horses have been destroyed in and around the city of New York in the year just past. The lowest value of these horses, if they were healthy, would average \$150 per head, making a yearly loss to the horse owners of over \$500,000.

"As you are familiar with the cause, history and symptoms of glanders as it affects horses and mules, I will not burden this report with any detailed definition, but deal more particularly with the practical application of Mallein and the results obtained. Mallein is a laboratory product and was given up as a diagnostic for glanders. Ever since this agent came into use, there has been great diversity of veterinary opinion as to its use and reliability. At the beginning of the year when orders were given from your office to investigate glanders and experiment with Mallein, I could find but few who had any faith in Mallein as a diagnostic, and none who believed that it had any immunizing or curative value. We were put to the test and very soon satisfactorily showed that we could pick out hidden glanders with Mallein and prove it by microscopic examination and animal inoculation of lesions found on autopsy.

"It is therefore very gratifying to me to be able to tell you that to-day very few veterinarians can be found who doubt the value of Mallein. At the last

meeting of the State Veterinary Society, when I had the pleasure of reading a paper on the use of Mallein, I was agreeably surprised to note a great many veterinarians who a few months ago antagonized the use of Mallein, speaking in its favor and expressing the wish and hope that the State Department of Agriculture would continue its investigation and experiments with Mallein to more thoroughly and positively establish its use as a diagnostic, and determine its true curative value.

"We have been severely handicapped in our work by not having the proper facilities. We were compelled to hold autopsies on the open end of the offal dock. In bad and cold weather many had to be abandoned. In this way some of our experiments were not carried out to the end. We have no laboratory handy, Professor Moore being obliged to carry pathological material and cultures to his laboratory at Ithaca. We had no place of our own to carry on our inoculating experiments, many refusing to permit it in their stables; others with experiments half completed would become frightened and order horses destroyed. However, notwithstanding all this, much has been accomplished; but still a great deal more must be done. I believe the results obtained have satisfied the horse owner that the only way to deal with glanders is by the use of Mallein. I have been exceptionally fortunate in having the counsel and help of Prof. V. A. Moore, of the State Veterinary College, and Dr. Smith, of the Cornell Medical College. These eminent bacteriologists have worked out the pathological material found at autopsies, and it is in a great measure due to the results of their work that I am to-day able to state:

"First—That Mallein injections are harmless to healthy horses; in fact, it improves their general condition.

"Second—That Mallein, when properly applied, will detect hidden glanders.

"Third—That Mallein seems to have immunizing and curative properties.

"Fourth—That we are not justified by the lesions found, in killing all cases that react from the Mallein test. Horses slightly affected may recover.

"A wider knowledge of the use of Mallein can bring nothing but good to the State. We will be able to satisfactorily and positively prove to all concerned the value of Mallein as a detector of and cure for hidden glanders, at the same time control its spread, saving thousands of dollars' worth of horseflesh. It would be a most satisfactory relief to horse owners if we would pick out, isolate and probably cure infected horses that show no outward sign of disease, although in some cases may be able to give it to others. The responsibility for the existence and spread of this horse disease, the ravages of which cost taxpayers of this State over half a million dollars a year, has been placed on the Department of Agriculture.

"The public very properly look to this department for relief which is a pressing need and cannot be had too soon. The task is stupendous, but it neither can be avoided nor delayed. We cannot expect to do much under present conditions. With proper help and equipment, I feel quite sure that glanders can be controlled and whatever amount of money is used for this purpose, will be many times returned to the people by preventing the spread of this disease and its transmission to man; for according to report the loss of human life from glanders has greatly increased."

\$5850 at Vallejo.

Thos. Smith, manager of the Vallejo Race Track has arranged a program of ten stakes to be given for trotters and pacers at the meeting to be held at that track in August. Nearly six thousand dollars is hung up which is a very liberal showing and the meeting should be supported by every horseman who will race his horses in California this year. The stakes are as follows:

Pacing, 2:20 class.....	\$1000
Trotting, 2:24 class.....	1000
Pacing, 2:10 class.....	600
Trotting, 2:16 class.....	500
Pacing, 2:15 class.....	500
Trotting, three-year-olds.....	500
Trotting, 2:13 class.....	500
Trotting, 2:30 class.....	500
Pacing, Green class.....	500
Trotting, three-year-olds (district).....	250

Entries close with the manager, Thomas Smith, 329 Georgie street, Vallejo on May 16th.

According to the Year Book, there are 19,373 trotters with records of 2:30 or better and 10,657 pacers with records of 2:25 or better.

Strike!—If they don't give you Jackson's Napa oia when you ask for it.

PACIFIC BREEDERS FUTURITY STAKES No. 3, \$6000 GUARANTEED, FOR FOALS OF MARES BRED IN 1902.

Fourth Payments of \$10 each were made April 1, 1904, on the following 158 Foals of Mares bred in 1902:

How Some Horses are Fed.

The feeding of horses is a question that all horse owners are more or less interested in, according to the interest they take in the welfare of their animals. Just what to feed a horse under different conditions to keep him in the best of health and condition, and at the same time keep the cost as low as possible, is a question that each feeder must solve for himself.

There are certain standards given to go by, but the average of the men who handle horses are unfamiliar with feeding standards and are guided by their own observations and experiences in what they feed their horses. In consequence many of the horses do not receive the proper amount and kind of food for the work they have to do. No account is taken of whether the horse is working or standing in a stall, but a few pints of oats and a forkful of hay are thrown in the manger without a thought of the nourishment they contain.

In order to get some idea of what the average horse was being fed some investigations were made by the class in Feeds and Feeding under Prof. Plumb, of the Ohio State University, among the different classes of horses in Columbus.

In these investigations it was aimed to get the horses doing different kinds of work and to see what feeds and care they were receiving. The following are a few of the results which may be taken as representative of the places visited.

1. A stallion belonging to McLaughlin Bros., exercising about 20 minutes a day and going on an average about a mile, was fed 8 pounds oats, 10 pounds bran, 2 pounds carrots and 15 pounds timothy hay.

French coach stallion, also belonging to McLaughlin, and weighing 1000 pounds, was fed 6 pounds oats, 5 pounds bran, 15 pounds hay and 4 pounds carrots.

2. Davidson Transfer Co. horses weighing 1400 pounds, driven every day to a transfer wagon, were fed 4 pounds corn, 4 pounds oats, 4 pounds bran, and two-thirds of a pound barley, 20 pounds hay.

3. Hoster's Brewing Co. horses going from five to fifteen miles per day, received 20 pounds hay, 10 oats, 3 pounds bran, and a little oil meal a few times a week.

4. Doctor's driving horse, weighing 1051 pounds,

was fed 10 pounds corn, 3 pounds oats and chop, and 15 pounds hay.

5. Fire department horse weighing 1200 pounds, received 14 pounds hay, 10 pounds oats, 3 pounds bran and one-sixth pound oil meal.

6. A 1100-pound horse, doing medium work, on a grocery wagon, was fed 20 pounds hay, 5 pounds corn, and 6 pounds oats.

The cost of the feeds varies and runs on an average from 20 to 50 cents per day, according to the different kinds of feed fed. In some cases the amounts given are only estimates, as no attempt was made by the feeder to weigh the feed.

Remarkable Old Stallion.

The most remarkable instance of prepotency in an old stallion is the case of the famous Jay Bird, which great horse, although twenty-five years old in 1903,

according to the private stud books of his owner, W. A. Bacon, Jr., was bred to eighty-four mares that season, and a round-up of the number show that fully sixty are safe in foal. At twenty-four years of age in 1902 this remarkable horse was mated to sixty mares, and forty-two foals were the outcome, while the seventy mares bred to him in 1901, when he was twenty-three years old, resulted in the production of forty-eight living foals. Being now twenty-six years old, his owner has limited him to fifty mares, and among the great stars already hooked to him this season are: Keepsake, dam of Tommy Britton 2:06; Eastmere, out of Kincora, dam of Constantine 2:12; and Thorn 2:12; Jennie Hulse, dam of Gail Hamilton 2:11; as a three-year-old; Alma Wilkes, dam of Baron Oakland, trial 2:14; and Oakland Belle, trial 2:12; as a three-year-old; Lady Ham, dam of Hawthorne 2:06; Ed Winters 2:12; and Oneida 2:17, and the dam of Patchen Clay 2:10. Jay Bird has now ninety-three performers to his credit, including Hawthorne 2:06; Allerton 2:03; and Rose Croix 2:11, a Kentucky winner. Jay Bird is the oldest horse in active stud service among trotting sires in Kentucky. He is three years older than Gambetta Wilkes, now twenty-three years old; four years older than Patchen Wilkes, and even a year older than Clay, the aged son of Electioneer. Red Wilkes, now thirty years old, is the oldest trotting stallion in America still in the stud, and he is

about the only horse still fit for service older than Jay Bird, as Baron Wilkes is only twenty-two years old. Jay Bird is now just the age at which the famous sire, George Wilkes died; but he must live through another season to be as old as his grandsire, Rysdyk's Hambletonian, was when he died. Electioneer died at twenty-two years of age, Almont at twenty and Belmont at twenty-five. Daniel Lambert was probably the most remarkable instance of longevity in famous trotting stallions, he dying at the advanced age of thirty-one years, and Red Wilkes will have to live safe in 1905 to equal this record. Jay Bird, in the face of his twenty-five years, looks the perfect picture of health and condition. There are many horses in the stud in Kentucky far under him in years that do not look to-day near as young as does George Wilkes' aged son.—*Spirit of the West.*

May Day Races at Dixon.

DIXON, CAL., April 5, 1904.

On Monday, May 2d, there will be racing at the Dixon Driving Park, and much interest has been awakened, not only here, but in Yolo county. The race schedule will be as follows:

For three-year-olds, pacers and trotters, distance one mile, purse \$100.

For two-year-olds, pacers and trotters, distance one-half mile, purse \$100.

Buggy horse race for \$100, distance one-half mile.

In the first two races only horses of Solano and Yolo counties are eligible.

A special feature of the day will be an automobile race for a purse of \$25 between automobiles of Solano and Yolo counties.

Italia by Zombro has been entered in the M. & M. at Detroit by her owner Mr. W. P. Murray of Cleveland, Ohio. In a letter to the BREEDER AND SPORTSMAN Mr. Murray states that Italia is looking especially well this spring and he expects her to be a good mare in her class. She has a matinee wagon record of 2:11, and showed her ability to trot in 2:10 last year. Mr. Murray also writes that his Nutwood Wilkes colt that he purchased from Martin Carter has grown into a fine horse and he is only waiting to give him age before starting him and is sure he will be heard from later on.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

S. F. K. C. Bench Show.

The local club officials are to be congratulated upon the list of entries received for the show next week—about 550 entries and nearly 425 dogs. This is far ahead of last year and is an encouraging indication of increasing local interest in doggy affairs.

A summary of the principal entries and breeds gives: St. Bernards 35 entries, Great Danes 32, English Setters 59, Irish Setters 18, Pointers 27, Cocker 58, Collies 53, Bull Terriers 44, Bostons 23, Irish Terriers 12, Bulldogs 16, American Foxhounds 17, Dachshunds 21, Fox Terriers 47—small breeds making up the balance.

The Setter entry is a rousing one, the trophies, however, for Setters and Pointers, some \$600 in value, were drawing cards. W. J. Baughn has sent out Fairland Dude from Ridgeville, Indiana.

Entries from the north and south have been almost nil. Another far away entry is that of Mr. Virgil F. Shaw, of Salt Lake City, who sends out the Collie Maplemont Shower of Gold. F. E. Watkins, of Portland, Or., will send down some Bull Terriers.

The Board of Supervisors of Contra Costa county have donated two \$15 collars as specials. A good entry of Setters has been received from the county also.

Mr. Mortimer is due to arrive next Tuesday.

All in all, prospects for the most successful local show in years are very bright.

San Jose Show.

The fanciers of San Jose, Cal., are preparing for a big bench show in that city on April 21, 22 and 23. It will follow the show in this city and precede the Los Angeles bench show. It will be held under the management of the Santa Clara Kennel Club. At a recent meeting of this club new members elected were: Miss Livingston, Miss T. S. Howard, Dr. Grissam, M. F. Marshall, W. H. Carmichael, N. Metcalf, John S. Williams, Henry Bloom, Charles Kenyon and Christie Barker.

Quite a little band of dogs is coming from Los Angeles. That city is ahead of others in one class of dogs and that is in the Toys, the Japanese, King Charles, Blenheim and Ruby Spaniels. When the San Jose show opens there will be on exhibition a rare collection of these little favorites.

The Los Angeles breeders of these merry little dogs, Mrs. Broadhead and W. W. Sweeney, will let San Jose people see what they can do in this line. Mrs. Broadhead has recently purchased a son of the imported champion Leo Barey, a six-pound dog of rare quality and breeding. This is a Blenheim and will make the trip to San Jose with others of Mrs. Broadhead's collection.

Mr. Sweeney is particularly interested in Japs, and a couple of choice puppies from imported stock will be there to represent the Inglenook Kennels. Not all the honors in this division of the show will go South, for Miss Sargent of Sargents has entered her two prize winners and others will probably come from unexpected places to try conclusions with the experienced show dogs and make things interesting at the San Jose show.

Los Angeles will also send Collies and Cockers. The Echo Kennels breed both Collies and Cockers and will be represented and Arthur Letts will enter his imported Collie, Ravenswood.

Owners of local dogs are busy contemplating what chances they have for certain prizes and are conditioning and rubbing the dogs to put them at their best by the time the show opens.

Now that the premium lists have been sent all over the Coast the San Jose show is attracting much attention. Dogs are being purchased on purpose for this show. Mrs. Murphy of Hollister has telegraphed an order for a dog that made a record for himself at the recent show in Chicago, and he will arrive in time for the local show. In fact the dog would never have come to the Coast if it had not been for the San Jose show, and the rivalry created by a home exhibition and a desire to have California dogs compete creditably with the champion English Setters coming from Seattle. Mrs. Murphy will exhibit a kennel of English Setters.

Entries for the show close on April 21st. The Kennel Club holds meetings regularly on Thursday nights in the parlors of Native Sons' hall and are rapidly completing the final arrangements for the show.

The Vancouver Show.

The Vancouver Kennel Club deserves great praise for getting up such a splendid exhibition as we had last week and particular credit is due to the following gentlemen, who composed the show committee: Messrs. John J. Tulk, A. J. Mayo, H. S. Rolston, C. Wentworth Sarel, R. P. Forshaw, Edgar Durkee, Colin F. Jackson and George J. Dyke, Secretary.

The entries numbered 261, a feature of the show being the large number of entries from this side. Mr. George J. Dyke, the secretary, speaking of the

American entries said: "Portland, Seattle, San Francisco, Spokane, San Jose and Los Angeles have done splendidly, thanks chiefly to the Hon. John Riplinger and Mr. F. W. Gilbert of Seattle. There are at least one hundred dogs from the American cities. Seattle sent the largest number, Portland is second, and San Francisco was a good third. As we have had such good numbers from the other side, it behooves the dog fanciers of Vancouver to return the compliment when the American shows are held."

The large breeds were fairly represented, Collies, Fox Terriers, Cockers and Irish Water Spaniels were most numerous.

The entries in detail were as follows: St. Bernards, 5; Bloodhounds, 4; Great Danes, 6; Greyhounds, 7; Pointers, 9; English Setters, 8; Irish Water Spaniels, 27; Collies 31; Old English Sheepdogs, 1; Dalmatians, 2; Bulldogs, 2; Fox Terriers, 34; Bull Terriers, 6; Boston Terriers, 2; Airedales, 3; Irish Terriers, 12; Scotch Terriers, 1; Bedlington Terriers, 1; Black-and-tan Terriers, 1; Dachshunds, 1; Pugs, 4; Dandie Dinmonts, 5; Yorkshire Terriers, 2; Japanese Spaniels, 1; Pomeranians, 5; Cocker Spaniels, 27; miscellaneous, 5.

The attendance was good during the three days of the show. This is the first annual bench show of the Vancouver Kennel Club, held under the rules of the Pacific Coast Kennel League, and the large number of entries and the excellent classes of dogs displayed speak well for the fanciers of this city and the manage of the local club.

Last year a show was held in which the exhibits were mostly local dogs, and the success of that show encouraged the club to hold a larger exhibition, in affiliation with a number of important kennel clubs of the Coast. The breeding of good dogs is thus encouraged, and during our show the many visitors were surprised at the large number of thoroughbred dogs in the competition.

The classes were in nearly every instance well filled, and the judges, Mr. E. Davis of Dawdney, B. C., and Mr. J. S. Williams, of Toronto, had no easy duties to perform in deciding on the merits of the respective competitors.

The following is a summary of the principal winners: In St. Bernards, first honors went to His Highness, owned by W. F. Hall, Victoria, in the open class. For novice bitches, Lady, owned by C. Justin Kennedy of Seattle, took first.

Bloodhounds, first open, Remus, owned by Mrs. George Seymour, Vancouver.

In Pointers, novice class, King Sol, owned by R. M. Palmer of Seattle, led. Woolton Bang, owned by F. J. Moon of Salem, took second in the limit, while Oregon Lad, owned by E. S. Wilhand of Vancouver, was easily first. In the open class Oregon Lad again took precedence over Minnesota Joe, a handsome dog owned by H. F. Zeigler of The Dalles, Or., and well known on last year's circuit. In novice hitches, Scott's Dot, owned by J. C. Scott of Walla Walla won first.

There was a good exhibit of English Setters. Stylish Sergeant II, owned by John W. Riplinger, Seattle, led the puppies, and second honors was carried off by Real John Paul, owned by Paul Borsted of Seattle. Sixteen dogs were entered in the novice dog class. Tirpil's James, owned by T. P. McConnell, Victoria, captured first against twenty entries. Stylish Sergeant II, and Real John Paul were second and third, respectively. Riplinger's dog defeated the Victoria dog in the limit, and did the same in the open class. Riplinger's bitch Pera led in her class, and the Seattle dogs, Stylish Sergeant and Stylish Sergeant II, took the Setter kennel special.

John Bradshaw's kennel won everything in smooth Fox Terriers.

In Bull Terriers, Bonny Bred Stiletto, owned by F. E. Watkins, of Portland, took first in open; Newmarket Bahy, owned also by Watkins, captured first in open hitches and Jeane, owned by Mrs. A. M. Rosenherg, of Seattle, took second.

Irish Terriers, limit class, Bolton Woods Despot, owned by William Ollard of Tacoma was first and Woodlawn Irish, owned by Mrs. W. R. Whittier, San Francisco, took second. In the open dogs Despot took first, while Norah, owned by Mrs. F. W. Gilhert, of Seattle, was the best of the novice hitches. In limit hitches Kate Kearney, owned by J. R. Lowther, of Seattle, was first.

The Collie prizes were nearly all captured by Glen Tana Stock Farm Kennels, owned by Mr. Thos. S. Griffith of Spokane. R. C. M.

Vancouver, April 1st.

Important Notice to Secretaries of Shows.

The A. K. C. publishes the following in the March issue of the Gazette:

On the 1st of June, 1904, an amended copy of the rules governing bench shows will go into effect. It is very necessary that all secretaries of shows should have a copy of these rules, as all shows from that date will be held under them.

You are especially warned against copying the rules from other premium lists. This has been done heretofore, with the result that in some cases a new premium list has had to be printed, or if discovered too late, a fine has been imposed on the club using them.

To provide against this, application must be made to this office, before printing, for the rules in force.

You are also especially directed in the rules to apply for a list of disqualified persons.

This important matter has not been attended to in

some cases, with the result that entries have been accepted from such disqualified persons and prizes awarded to their dogs.

A list of persons not in good standing is sent to the secretary of every show, with the copy of the rules, at the time the dates are claimed. If not received, application should be made for them to this office.

Official A. K. C. Notices.

Name Register—Every dog previous to being exhibited at shows must be registered or listed with the A. K. C. Fee for registration \$1. Fee for listing 25 cents.

Transfers—Change of ownership of a registered dog, after publication in the Stud Book, can be made by filing an application, the same as is done for the original entry. The original number will be retained. Fee \$1.

Change of Name—No change of name is permitted after its publication in the Stud Book. No charge is made for change of name prior to publication.

Pedigrees—Certified pedigrees will be issued in accordance with the records on file with the A. K. C. including the fourth generation, if possible.

Winnings—A certificate of winnings of all dogs having won under A. K. C. rules will be issued on application.

Kennel Names—The A. K. C. will register a "word" to be used as the sole property of the applicant, as a kennel name, prefix or affix. Fee \$3.

Entry Forms—All applications for registration must be made on the official form, copies of which can be had by application to the A. K. C. No charge is made for these forms.

DOINGS IN DOGDOM.

J. L. Eastland's Bull Terrier bitch Naughty Nan has whelped four puppies (1 dog) to Chas. Dresser's Dick Curtin.

Posen Kennels' Bull Terrier bitch Bloomshury Queen whelped a litter of twelve puppies to J. D. Spreckels' Ch. Banjo.

P. D. Litville's English Setter bitch Maggie F. whelped six pups (3 dogs) on Easter Sunday to Jos. E. Terry's Kilgarif. The litter is very handsomely marked and are getting along nicely.

Lady C., a well known Pointer bitch, fell dead last Sunday while out in the Marin hills, near Brickyard station, with Alec Colvin her master. She had just come to a stance point on a heavy of quail when suddenly she fell over and when Colvin reached her he found to his sorrow that she was dead.

The annual show of the Victoria Kennel Club commenced on Wednesday and will close this evening. The show promises to be an unqualified success. Judging by the number of entries in the hands of the secretary, there was as many, if not more, dogs exhibited than on any previous occasion. Everything possible has been done to attract entries. Besides offering cash prizes, a thorough canvas of the city was made, and a large number of special prizes were donated to the club by business men. These include a number of exceedingly handsome silver cups, and all have been put up for competition, to be won outright by those capturing them at this show. Another special attraction to outside fanciers is the cash offer to handlers for every dog over ten in a string. John Davidson of Monroe, Michigan, judged the show.

T. S. Griffith of Spokane has the felicity of owning Collies that won about everything in sight at the Vancouver, B. C., dog show. Fifteen prizes were won by Mr. Griffith's dogs and most of them were for the first place. The following were the names of the dogs and their winnings: Glen Tana Monk, first novice, first limit, first open and winners. He also won five specials and the Lieutenant Governor's cup for the best Collie in the show. Glen Tana Monk beat Ravenswood twice.

The sable dog Glen Tana Sentinel, third limit, third open.

The bitch Glen Tana Bo Peep, first limit, first open and winners and also the cup for the best Collie bitch in the show.

The puppy Glen Tana Black Bahy, first novice and reserve to Bo Peep in the winners' class.

Hugh Malden of Sacramento recently purchased a black Cocker bitch (Young Fascination—Black Chloe) from J. Otis Fellows of Hornellsville.

Beach Hill Kennels has lately added a handsome Collie bitch to the San Jose string of Collies. The new comer is in whelp to Wellesbourne Hope and arrived out here in fine condition after the long trip from the Shenango Collie Kennels.

We are informed by Miss Della Beach, Secretary of the Santa Clara County Kennel Club, that "fanciers wishing to make San Jose the stop over on the way to the Los Angeles show, will be provided with comfortable quarters and good care for their dogs, at no expense, and the members of the local club will do everything possible to make a day or two's visit in the Garden City pleasant for those stopping over."

The San Joseans have an enviable reputation for hospitality and good fellowship.

Beach Hill Kennels of San Jose have two fine litters of Collies, thirteen in all, and all but one are spoken for. Miss Beach says the demand for puppies is far ahead of the supply. One litter is by Ch. Wellshourne Hope (Ch. Baigreggie Hope—Ch. Orms-

kirk Ideal) out of Tranwyn Tip Top (Imp. Cheviot Production-Imp. Brookside Farm Minnie). The second litter is sired by Ch. Hanover Monarch.

The Southwestern Kennel Club of Los Angeles will hold its first bench show in the Chutes Park Theatre from May 4th to 7th, instead of April 28th, 29th and 30th as previously reported, thus bringing the show off after San Jose instead of at the same time. James Cole of Kansas City is invited to act as judge of all classes. Entry fee is fixed at \$3 and Secretary Kirby is arranging to beach 400 dogs.

A Buffalo exchange publishes a display "ad" as follows for a Chicago owner:

"For sale—Crown, a thoroughbred Fox Terrier. Perfectly mannered about the house and has the unusual distinction of being a hermaphrodite. Address, etc."

The half-tone cut of the "mut" hears out the "unusual distinction" qualification. What earthly want Crowo can fill is a problem that is hard to solve. It, being a well mannered tyke about the house, possibly the claim would stand that—easy rests the head that owns a Crown.

Pretty markings in Fox Terriers, such as an evenly divided black and ten head and all white body, are always an inducement to novices to buy. You might offer them champion terriers such as the all white Daddy (sire of the Ch. Dancing Buck), or the black faced heavily marked Duchess of Durham, and they would tell you that they "don't like their markings." So long as the terrier has not brindle or liver-colored markings it does not matter to the connoisseur whether it is freely splashed with black, or whether it is plain white. The expert looks for length of head, small, well-carried ears, straight fronts, hard jackets, short, well-ribbed backs, strong hind-quarters, and a game, terrier expression. The new standard of the Fox Terrier Club very properly strengthens the points for the hind-quarters. It has too often happened that a good headed dog has won on his face points alone. He will be cow-hocked, long-backed, and soft, but his long, lean head will carry him through. The dog that should win is the one that shows the fewest faults, not one that excels in one particular and is all to pieces elsewhere.

Talks to Dog Owners.

Having erected his kennel and devoted proper attention to its surroundings, the prospective dog owner must prepare for the reception of its inmates by procuring the necessary appliances. Nothing can be worse for man or beast than making a bad start, and consequently some articles may be regarded as absolute necessities, whilst others are more in the light of luxuries, which the owner of moderate means would be unwise to indulge in—at all events, at the commencement of his speculation. It is quite possible that some of the articles which are included in the list of necessities which appear below, may at the first sight seem to involve an extravagant expenditure of money, but against this view it may be pointed out that many a valuable dog has been lost, or has come to an untimely end, through a faulty chain, and it is not uncommon thing for a first rate show specimen to lose a prize owing to its failing in condition. Consequently, in connection with kennel management, as in other things, what is worth doing at all is worth doing well.

The following articles may be referred to as being essential to the good management of dogs, and consequently should be provided for use in all kennels, whether great or small. The number must depend upon how many dogs are kept; as it is obviously unnecessary that, if there are twenty dogs in a kennel, a chain or a leading slip should be provided for each animal.

The list comprises chains, leather leading slips, collars of various sizes and widths, brushes, combs, scissors, muzzles, wash-leathers, sponges, brooms, a shovel, a water-cup, vessels for food and drink, a hammer, a screw-driver, a bradawl, a gimlet, nails, screws, staples and hinges. All these articles are likely to come into daily use, especially the carpentry tools, which, if at hand when an emergency arises, may be found most useful in repairing an accident to the woodwork of a kennel.

Commencing with the chains, it may be pointed out that the pattern which has three swivels is invaluable to the dog owner, and a credit to the firm of Spratt's Patent, who manufacture it. The ordinary chain which most dealers sell is nothing more or less than a death-trap to dogs.

The pattern of leather lead which is recommended is the round one, which is stronger and more easily carried in the pocket than a flat one can be, and it should be provided with a good swivel, else there may be trouble when a lively dog is being led. It is always well to have a spare collar or two in a kennel, and if the variety of dog kept is a rough-coated one, the round leather pattern is greatly to be preferred, as these do not interfere with the lay of the coat.

Brushes and combs are of course essential, and the former should be of several patterns, so that all sorts of coats can be dealt with. The ordinary body brush that is used in stables is most useful for application to the jackets of smooth-haired dogs, and for the longer-coated varieties a hairbrush with long bristles, or a common dandy brush may be used, the selection depending upon the size of the dog and the texture of its hair. A very useful accessory to the toilet is the hair glove, its great advantage being that it imparts a gloss to the jacket, but it ought not to be used for taking off the mud or cleansing purposes, the correct pattern of glove for this, like the chain, is supplied by Spratt's Patent.

Scissors are obviously necessities, and so are muzzles, especially so the latter if dogs have to be dressed with compounds which are injurious to their health if swallowed; whilst wash leathers are used for edging a final polish on the coat, and sponges for the purposes of ablution. Many kennels are made to look damp and untidy, owing to water from the drinking vessels becoming spilled over the floor; and much good food is wasted by being nosed out by the dogs when they are feeding in their efforts to extract choice pieces from the corner of their trough. Spratt's Patent manufacture metal vessels are most adaptable for either drinking or feeding purposes, and some of these should be present in every well-regulated kennel.

Conspicuous amongst the additions to the supply of a kennel, which, though not necessary, are still most desirable accessories, is clothing. It is, of course, unnecessary that the hard-haired and more robust constitutioned varieties should be provided with such luxuries, but to many of the smooth-coated breeds, and the delicate ones also, they are practically necessities, if the coats are to be kept in order, and the animals clean and free from cold whilst on a journey, or in a draughty building when at a show. Clothing, moreover, is particularly useful when dogs have to be exercised in wet weather, and for this purpose it should be made of some waterproof material, though for ordinary wear such materials as kersey, cloth, serge, or even linen may be used according to the breed of dog and the season of the year.

If a protection from wet is required, it is desirable that a sort of hood should be added for use if it rains, but capable of being turned back if not required. Some owners, inspired by a desire to save money, make the clothing for their dogs at home; but this is really false economy, as to be effective the articles should be properly stitched and put together, and consequently it is the cheapest policy in the end to obtain what is required from such firms as Spratt's Patent, who only supply the best material and workmanship to their customers.—English Stock Keeper.

AT THE TRAPS.

Four club trap shoots are programmed for tomorrow, of these the Union Gun Club shoot at Ingleside and the Empire Gun Club shoot at Alameda Point are regular club meetings for the date, the other two shoots, the Millwood Gun Club at Mill Valley and the College City Gun Club at North Berkeley are postponed shoots which were not pulled off on schedule time by reason of the weather.

Tomorrow weather indications are conducive for a large turnout of trap shooters at the various club shoots.

The California Wing Club April shoot took place at Ingleside last Sunday and was attended by twenty-six shooters. A strong northwest wind played pranks with several promising scores, a lively lot of pigeons also conducted to the gathering of several goose eggs that were not wanted. In the club race at twelve pigeons Clarence Sylvester of Pinole and Clarence Nauman shot straight scores and divided \$37.50, first and second money of the \$75 club purse. Third, fourth and fifth moneys were divided by the shooters who dropped eleven birds—Bekeart, Gibson and Feudner. Sixth and seventh moneys were distributed among the club members in the ten hole.

Following the club race a number of six bird shoots were in order, the high guns—straight scores taking care of the purses.

Clarence A Haight took part in the club race and pool shoots for the first time this season.

Among the out of town visitors who participated in the different events were: Frank Turner of Wilmington, Del., D. W. King of Colorado, F. W. Leavitt of Oakland, G. W. Gibson of Williams, Colusa county, Dr. A. M. Barker of San Jose, John Birmingham, Jr., Lester Wood, W. Hanson, C. Sylvester of Pinole, P. J. Walsh of Black Point and others.

In the pool shoots, the same distance handicaps were observed as prevailed in the club race. W. S. Wattles officiated as referee. The scores and handicaps in the different events follow:

Club race, 12 pigeons, distance handicap, \$75 purse added, one money for each four entries, high guns—
C. Sylvester, 30 yards..... 22222 22212 12-12

The Home Gun Club will hold a big shoot on the club grounds at Pinole on Sunday April 24th.

D. W. King, Western travelling representative for Ballistite, attended the California Wing Club shoot at Ingleside on the 2d inst.

Sam Tucker made his appearance on Sportsman's Row last week. He says the demand for the "Old Reliable" never was better.

The Washington Gun Club's shoot Sunday resulted in some fairly good scores as follows:

Ten targets—Cotter 9, Carey 9, Upson 7, Englehart 7, Black 7, Just 8.

Ten targets—Hughes 8, Rust 7, Trumpler 5, Heilbron 9, Weldon 6, Cotter 7.

Ten targets—Carey 6, Weldon 8, DeMerritt 8, Trumpler 4, Reichert 8.

Ten targets—Peek 9, Just 8, Hagerty 7, Carey 6, DeMerritt 7, Smith 6.

Ten targets—Rust 8, Cotter 6, Weldon 6, Reichert 7, DeMerritt 7, Just 6.

Fifteen targets—McWilliams 8, Morgan 9, Just 13, Korn 8, Weldon 9, Cotter 7.

Club shoot—twenty-five targets—Upson 19, Hughes 14, Carey 23, Englehart 19, Smith 16, Morgan 22, Korn 24, Heilbron 18, Peek 21, McWilliams 19, Rust 79, Hagerty 15, Just 21, Reichert 23, Weldon 19, Perkins 21, Ludden 13.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

A Big Aquarium for the Park.

An aquarium for Golden Gate Park has been a much discussed subject for several years past. The project has at last taken tangible shape and may be carried to a successful issue by reason of contributions offered by public spirited and wealthy citizens of San Francisco who will contribute \$250,000 for such a structure in Golden Gate Park. It was represented to the Park Commissioners at an executive session held four weeks ago that the following contributions to the proposed enterprise had been proffered: Dr. Harry Tevis \$150,000, Dr. M. Herzstein \$50,000 and Commissioner W. J. Dingee \$50,000. The executive conference, which was held at the office of the president of the board, was attended by Commissioners Dingee, Spreckels, Lloyd and Altmann. The strictest secrecy was enjoined, as the Commissioners were told that publicity would surely thwart the enterprise. The Commissioners intended to secure the money proffered and select the site on the ocean beach, near the Dutch windmill, before making public announcement of the event. The intelligence was too good to keep, hence some one babbled. A. B. Spreckels, president of the board, and Commissioner Reuben H. Lloyd fear that the publicity in this particular case, may postpone for a long time, if not entirely defeat, the execution of the plans.

It is estimated that the sum of \$300,000 would be sufficient to establish an aquarium worthy of Golden Gate Park. Every effort will be put forward by the commission to raise the money as speedily as possible. The munificence of Dr. Harry Tevis' contribution is especially gratifying to the board.

The Golden Plover.

The day, we will suppose, is one of the first bright, mellow ones of spring. The prairies, rid of their burden of snow, are clear of the congealing frost. Although the surface of the field upon which you sit is covered with downbeaten gray grasses, you may see upon the field beyond, the budding greens of springtime. Yet beyond that, there stretches the rippling surface of a field of winter wheat. Perhaps upon the other hand there is a grainfield, deep plowed and mellow, where the weeds have not yet made their appearance and where there may be perhaps an occasional bug or worm for a feeding bird to spy out and devour.

The sun has risen, we will suppose, high enough to thoroughly warm the air, indeed to warm it so much

that you feign would lay off your heavy hunting coat and pull down the brim of your hat about your face to mitigate the severity of the first sunburn of the year. Your decoys, rudely painted, but clever enough little images, moulded out of tin and binged at the back so that the two sides may nest together, stand off a bit from the blind, some of them perhaps only thirty or forty feet away, and others stretching out to nearly as many yards in distance from the blind. The more of the decoys the better, of course, but a couple of dozen will serve, for presently you will, under the direction of the market hunter, discover that a dead bird with a sick thrust up under its throat makes a very serviceable decoy itself.

There is another appliance of this form of market shooting which your market hunter is using and which you yourself would not employ, which, were you not this man's guest after a fashion, you would strongly discountenance.

Out in the middle of the flock of decoys you see a feeble motion, and catch the glint of an upturned wing. As you inspect this you find that it is a crippled bird, a wing-tipped plover which your market hunter has been keeping for perhaps a week or more, without thought of giving it food or water. There are two pegs driven down into the ground, and to these pegs, fastened by strings, are two wands two or three feet in length. These wands, tied together at their outer ends, make a sort of triangle, which is fast at the base. At the top of this triangle a long cord is fastened which leads back to the hands of the market hunter in the blind. At the top of the triangle is fastened by a string two or three inches long and tied about the end of its bill, this live decoy is attached. You catch at once the purpose of this simple but brutal engine. To show you how it works, the market hunter gives a pull on the string. The triangle, fastened in such a way that it will not fall over backward, is pulled up from the ground to an angle of about forty-five degrees, carrying with it, of course, the crippled bird. The latter, in its instinct of flight, and with the thought of self-preservation, extends its wings as it is thrown up into the air. It drops to the ground again with its wings outspread and fluttering, having in some crude fashion the appearance of a bird just alighting. You catch the idea at once, but you do not at that time see how extremely effective it may become. Pray you, never use it. It is brutal.

Now the sun comes on still more warmly, and all the air about is softly luminous with the mellow heat of early spring. You are perhaps a bit drowsy in the blind, and wonder whether, after all, this is a very keen form of sport. All at once your market shooting friend springs upon his knees, his eyes glaring keenly, fixed as they are upon some far-off object which you cannot catch.

"Wheat-wheat-wheat-wheat!" rings out his shrill whistle executed upon fingers which are clean at least as far as the first joints. Perhaps you are too proud to ask him what he sees and where it is. Finally you catch it, just on the edge of a distant field, more than a mile away, a thin black line rising and falling, and then gliding along level with the tops of the knolls, and but a few yards from the surface of the ground. This is the flight of the golden plover. It resembles very closely that of the wild pigeon excepting that it is not quite so high above the ground as was that of the passenger pigeon. The same rolling undulating course is pursued, the form of the flock being loosely extended, not in harrow shape, like that of the wild goose, nor so well ordered as that of wild ducks, yet each bird with an eye to his fellows, and no one bird wandering away from the general body.

"Wheat-wheat-wheat-wheat!" shrills the market hunter close at your ear, and you wonder whether any bird would be fool enough to come which would hear a call so far away as this. Yet now a very wonderful thing takes place. The shrill call, borne far off down upon the wind, has after all reached the ears of these distant birds. They are simply passing across this country looking for a place to feed, and they are as covetous of a "tip" as is the average speculator at a race track. At the first breath of this distant whistle they swing questioningly about. Perhaps they circle almost entirely around, feeling the air as it were, in order to ascertain more definitely the source of this call. Again and again the call goes to them, rapidly, anxiously, eagerly. In calling a golden plover the rule is precisely the reverse of that in calling the wild turkey, the wild goose or the wild duck. One need not be afraid of calling too much when he is plover hunting, and especially at this stage of the game. He simply keeps as close as he can to the natural note of the bird, and calls as long and loud and shrill as he is able. You yourself could not make your call heard half this distance, and it will take you very long practice before you are able to deliver a note which will carry the distance of a half mile down wind.

At last the flock lines out the direction of the call, and now it swings and comes on, still undulating, still wavering, and moving up and down and from side to side, precisely as does the nose of a bird dog in running out the trail of some bird along the ground. Now your market shooter sees them coming safely, and he redoubles his importunities for them to come ahead, telling them that it is all right, as witness this bird already alighting among these others which have already found a feeding place, and a good one.

For, out among the decoys, the crippled live bird is now flapping up and down vigorously. At a distance it seems to flying birds that this is really a bird upon the point of alighting. They see the distinct form of their fellows, yellow backed, black breasted, standing there upon the close packed cover of the field. At last, think they, someone else has found something to eat! Let us go and do likewise!

Now the market shooter having made sure that the flock has sighted his decoys and seen his live bird

working, gives himself very little farther concern. He knows that you could not keep that flock of golden plovers away now by any possible means. If you were alone and on foot, they would not come so close to you. If you were in a wagon or on horseback they would not come so very close.

But the sight of these standing birds, and of this other bird apparently flying down among them, is too much for them. Their brains cannot encompass the thought of any danger. They are too fat-witted to take care of themselves. They come on and on, and the only protection they make is to swing a wide circle around and prepare to alight against the wind, as is the fashion of all feathered creatures.

As they swing back of you, the market hunter reaches out his hand and catches you by the shoulder. He knows perfectly well what you are going to do. You are going to get back and take a side shot as they swing by at a distance of forty yards, so close that the shine of the sun upon their golden backs makes a glare of splendor in your eyes. This you would have done and you would have perhaps killed four or five birds; but the market shooter is not here for his health or for your sport. He waits, and he forces you to wait.

Carried by the slant of the wind, the flock slides off and away, and the swift suspicion comes to your mind that they are gone. You mutter some protest to your friend, because he would not allow you to shoot. He has no time to answer you, for, with his eyes still glaring, he whistles the same call, not quite so loud, but still importunate and pleading.

This time they show brown and black in the sun. Then they come, head on, straight for the blind, looking as though they would fairly overwhelm you, flying with wings covered down, and head outstretched, and legs which presently begin to droop. But still the market hunter holds you down, and still you tremble with your own excitement. The skill of this market hunter is the product of many years of special training. Now witness the virtue of this special training on the part of your numerous companion. The birds have come in and on until it seems that you could almost strike in among them with your gun barrel. "Now give it to them—give it!" he cries, his speech broken, however, with the roar of his own gun. He is shooting a wide open cylinder bore, he is sure of that, probably ten gauge, surely loaded heavily with not less than an ounce and a quarter of number eight shot. He does not shoot at the head of the flock nor the side of it, but at the shoulder of it, and his charge tears through obliquely, passing from end to end and from side to side. There is a line of dark bodies upon the ground. Closing up the ranks, the flock is up and away. As it packs the second barrel of the market shooter tears through, and still the birds fall among the decoys, hopping around or struggling in the last moments of consciousness, or lying quiet where they have fallen. By this time you haze away at the flock, and perhaps cripple a few as they swing off farther away than you had thought.

One or two birds which have broken away from the flock in their flight, pass you at one side, and with your long second barrel you perhaps stop one of them. The market hunter grins at you amiably. You have done just what he thought you would do, but you have done it a little later than you would have done been left to your own devices.

But there is not time to talk. The market hunter is not yet through. The birds have swung but a couple of hundred yards away. "Wheat, wheat, wheat-wheat-wheat!" rings out again the same plaintive and persuasive call. One would think that these poor creatures would surely have intelligence enough to take themselves away. Not so; they gather again, close packed, perhaps a third of their number gone, yet eager as ever to get in among these standing birds and to investigate the nature of these jumping, flapping members of their own tribe which are now upon the ground. They come in precisely as before, against the wind, strung out, land precisely as before, at the right moment the charge of the market shooter's gun tears through the flock again. This time you have gotten the hang of it, and your fire is of marked assistance to his own. It is no unusual thing at all for the birds to come in a third time, and scattered birds will even come back after a half dozen barrels have been fired from a given blind. You pick up twenty, thirty, forty, perhaps more birds as the result of the half dozen shots at this close range.

This is the most highly specialized form of killing the golden plover, and the most successful way of encompassing its destruction which man, the hunter, has yet devised. Had you not had these plover decoys along, you would probably have killed not more than a dozen birds, even had you been able to induce the birds to notice you at the distance where they were originally discovered by your friend, the market hunter.

The repetition of this sort of thing on flock after flock, day after day, would pall upon the sportsman. One day of it is too much. The market shooter does it for business reasons, and loses sight of the enjoyment of it, simple and certain as he knows his art to be. Tried occasionally, this may be a novel and pleasant experience for the sportsman, and he may not for a long time be able to work much havoc with his art. In the fall, when the birds are coming south, stuffed full of wheat and other food, the sport is most attractive, if not most prolific. In the fall season the migratory flight is not so regular nor so prolonged.

The golden plover; *Charadrius fulvus*, var. *virginicus*; or *dominicus*. Common names: Golden plover, frost bird, hull head, field plover, sometimes called pigeon, as is the upland plover.

Description: In colorization of plumage the American golden plover somewhat resembles the European species, except that in the European bird the lining of the wing is white instead of the smoky gray, which latter is found in the American golden plover. The color of the upper parts is dark brown sprinkled in rich profusion with regular circular spots of golden yellow mingled with markings of ashy white. The

breast is black. The under tail coverts are mixed with white. The tail is grayish brown barred with white. The forehead, sides of the head above the eye and the sides of the neck are white, there being a broad line of white from the eye. The bill is black and the legs dark brown. This species may be distinguished from its cousin the black bellied plover by the fact that it has no hind toe. The young of the golden plover lacks the black on the lower parts. The black is most pronounced in the breeding season and the change of the black colorization of the breast shows many gradations of black. Length, ten to twelve inches; wing, seven inches; bill, one inch or less.

Range: From lower South America north to the Arctic circle; from the Bermuda islands on the east to the Hawaiian islands on the west; a widely distributed species known in many parts of the world, as seen earlier description. In the United States the golden plover is more abundant from the Atlantic Coast to the Mississippi valley. It was formerly common and is still found in the Eastern States and in the West to the dry steppes or great plains. Less abundant on the Pacific slope.

Habits: Widely migratory and gregarious in nature. Feeds on tender grasses, insects, seeds and small grains. In feeding it runs rapidly a short distance and then stops and resumes. It feeds also upon grasshoppers and small insects. The nest of the golden plover is a shallow depression roughly lined with leaves. The breeding grounds are far to the north, reaching the Great Slave lake. It nests also in the Athabasco and Little Slave lake regions and on the eastern coast of Labrador. Its south bound migration is regular, its appearance in the United States being usually made at about the time of the first frosts of fall. The name "frost bird" is more common in the Eastern States, that of the "bull head plover" more usual in the West. In its north bound migration it appears in the Mississippi valley at about latitude 42 close upon the average date of April 25th. The eggs of the golden plover are usually four in number, greenish or ochraceous, speckled with dark brown, and much larger at one end than the other, with more spots upon the larger end.—E. Hough in *Texas Field*.

Trade Notes.

Parker Bros. call attention to their "ad." in this issue and promise something interesting in next issue—watch them.

Parker Bros. call the attention of sportsmen to their long experience in the manufacture of guns. They have a fund of information gathered from years of honest toil and their experience is of value to every sportsman. Do not hesitate to write them and you will receive courteous treatment.

The superiority of the Parker Gun over all other competitors was demonstrated on March 12th at St. Joseph by Fred Gilbert making a world's score at 33 yards, killing 98 live birds, the most severe test to which a gun can be subjected. The Parker beats the world for strong shooting and reliability.

At the second monthly club shoot of the California Wing Club, a live bird shoot, held at Ingleside on April 3d, twenty-six shooters contesting. Out of the twenty-six contestants—

20 shot Union Metallic Cartridge Co.'s "Magic" shells
3 shot Union Metallic Cartridge Co.'s "Expert" shells
1 shot Union Metallic Cartridge Co.'s "Acme" shells.

In the regular club shoot the only two contestants making straight scores were C. Sylvester and C. C. Nauman, both shooting the Union Metallic Cartridge Company's "Magic" shells.

The following circular has been issued by the Savage Arms Company, and is submitted to dealers and users of the Savage, as well as for sportsmen in general:

"Our attention has been called to a circular issued by the Marlin Fire Arms Company, with reference to a claim of infringement of patents made against the Savage 22-calibre rifle. It is a significant fact that we have not been sued for the alleged infringement, but suits have been brought against two of our customers in New Haven, Conn. We have already assumed all responsibility of these suits and are able to take care of them and intend to do so. We have the services of able counsel and experts, who assure us that our 22-calibre rifle is not an infringement of the Marlin patents, and, indeed, this must be apparent to all who are familiar with, or will take the trouble to compare the Savage and Marlin rifles.

Marlin was not, by any means, the first to produce or make a take-down rifle. Our rifle is not like Marlin's we are pleased to say.

We assure you that we are able to and will protect all dealers and users of the Savage 22-calibre rifles against all claim of infringement. We shall continue to maintain the high standard of excellence of our arms and rely, as we have heretofore, on the trade and public to recognize real merit."

"The Trap Shooter's Guide" is the title of an interesting and complete booklet issued by the Winchester Repeating Arms Company. The rules for blue rock and live bird shooting, division of purses, with diagrams for laying out traps, etc., are supplemented with information concerning loads used by the champion trap shooters of the day, loads for field shooting, some data concerning guns and a summary of champion trap records.

Another important publication just issued by the Winchester Repeating Arms Company contains much valuable information concerning proof house testing of guns and rifles, the different tests for fixed ammunition and a variety of data about velocities, primers, pressure, etc., of the greatest interest to sportsmen.

Copies of the above can be had by addressing the Winchester Repeating Arms Company, New Haven, Conn.; 312 Broadway, New York; or the Pacific Coast Agency, 127-135 First street, San Francisco, Cal.

THE FARM.

Experiment Station at Chico.

The United States Department of Agriculture has decided to establish a Plant Introduction Garden and Experiment Station at Chico, California. Contracts for the necessary land have been closed and work has been begun on what will undoubtedly be the greatest institution of its kind in America and perhaps in the world. A beginning will be made with ninety acres but it is the intention of the Department to extend the area as the needs of the institution require. The garden will be devoted to experimental culture of the plants introduced from various parts of the world and to a careful study of plant life.

Such an institution has long been contemplated by the Agricultural Department. California was selected for its location on account of climatic conditions which admit of the culture of tender plants from the tropics and of northern products as well. The ideal location for such an institution is that which admits of the successful cultivation of the widest possible range of products and the committee entrusted with the duty of selecting the site believe they have found it at Chico.

This Committee was composed of Prof. P. H. Dorsett, Government Expert who will have charge of the institution, and Prof. A. V. Stubenrauch of the University of California, acting with Dr. A. J. Pieters, head of the division for seed and plant distribution. Messrs. Dorsett and Stubenrauch spent months in making a careful study of conditions affecting plant life in various portions of the State, visiting and carefully inspecting each locality likely to prove available. The decision in favor of Chico was reached sometime ago but the site selected could not be secured and another tract had to be chosen, which has now been done and the purchase consummated.

Chico is situated near the eastern border of the great Sacramento Valley, seventy-five miles north of Sacramento the State Capital, and was the most northerly point considered by the Committee. Climatic conditions in California are affected but little if at all by conditions of latitude, the orange, the lemon and the olive being staple products of a district that measures fully five hundred miles north and south.

Farm Notes.

Farmers should study to increase the value of their manures.

Cultivation enriches the soil when properly done in proper time.

With dairy cows, good care and good feed will give a larger yield of butter.

When an animal is off its feed there is a going backwards which must be made up.

No single ration meets the entire wants of the young growing or fattening animal.

Growth is profit in anything or any kind of business.

The manner of training and handling an animal is made apparent by its looks and actions.

In plowing in order to do the best and most thorough work the furrow must not be cut too wide.

Breeding stock in the full prime of life and health always gives the best and most satisfactory returns.

Take time and think whether you are doing your work in the easiest as well as in the most effectual way.

One advantage in plowing and working the soil reasonably deep is that it will withstand drouth much better.

As a rule, a well fed pig is a lazy one and will not take as much exercise as it should unless compelled to.

The food given should be the life, health and vigor of the animal, when it fails to give this it is not a proper ration.

It is unreasonable to expect to raise wool profitably and of good quality with anything except a healthy flock.

Too much cold water when the horse is heated and tired, and too much green food are frequent causes of colic.

With any product, when there is an oversupply in the market, prices become demoralized and people then only buy the best.

With all stock all of the good qualities cannot be found in any one breed.

Horses which have steady and constant work are the ones which stand it best.

The most enduring horses are those which are kept constantly moving, never overtaxed and given good care while at work.

Adjust the double trees to correspond with the strength of the horses which make up the teams. It is a hard matter for a weak horse to work alongside one that is much stronger unless some advantage is given him.

In a majority of cases the whole value of corn meal is not utilized when fed by itself, as it is not well masticated and consequently does not digest perfectly. Better results can be secured by mixing with bran, feeding in connection with some rougher food.

The production of seed makes the greatest drain upon the soil and the plant. The tree that bears a great crop of small and imperfectly developed fruit exhausts itself by having to produce an undue proportion of seed. A greater bulk of fruit but less bulk of seed, the result of training, reduces the drain upon the resources to a minimum.—*Texas Farmer*.

Are Separators Profitable.

There have been improvements along all lines of farm work. This is no less true of the dairy work on the farm. Think of the work it used to take when milk was strained away in gallon crocks or pans with from half a gallon to three quarts in each crock, then estimate the number of crocks it would take to hold the milk from six to ten cows. These crocks of milk must all be set away to cool and for the cream to raise, and then the work of skimming the cream, emptying the milk, washing and scalding the crocks and lids and setting out on a table to sun. I am afraid a good many of us would cease to be butter makers if we had to return to those former days.

As an improvement over this method milk was put in tall cans holding from three to five gallons each. These were kept in cool water. This was quite a saving of labor, as there were fewer vessels to care for.

I consider the separator is as much of a saving in labor over the cans as the cans were over the crocks, and in addition gets more cream from the same amount of milk. I have never made many tests to find out the actual gain for the separator over skimming, for I have not felt like going back to the skimming process even for the sake of a test. But from a test made in December I find that by using the separator twelve gallons of milk gives three gallons of cream from which I churned 7½ pounds of butter or 9½ ounces of butter for a gallon of milk. By letting twelve gallons of milk set thirty-six hours, then skimming closely, I got less than two gallons of cream which churned four pounds and two ounces of butter or 6 1-8 ounces to the gallon of milk. I run the milk through the separator after it had been skimmed and from this cream I churned two pounds and six ounces of butter, or 3½ ounces to the gallon of milk. I lost by skimming on twelve gallons of milk, counting butter at 25 cents a pound or cream at 50 cents a gallon, just about 60 cents, or 5 cents on each gallon of milk. In Mrs. Gilchrist's paper, read at the institute last year, she says that from her herd of twenty Jerseys they sold \$100

worth of cream for four months which was equal to \$5 a cow. They skimmed their cream. We sold \$60 worth from eight cows, six Jerseys and two Short-horns, which is equal to \$7.55 to the cow per month. And according to these figures they received just two-thirds as much per cow as we did. I have a number of testimonials and they all secure from one-fourth to one-half more cream by using the separator. I consider that the separator is of greater profit in the summer than in winter, as comparatively few farmers put up ice and are prepared for keeping the milk cool as it should be for the cream to raise well.

The separator cream should be cooled as quickly as possible. Put it in cold water and stir a few minutes with a spoon. The next cream must be thoroughly cooled before putting the two or more skims together. In this way the cream can be kept till there is enough for a churning and all ripened at one time without any danger of its becoming rancid, and there never need be a shadow of difference in the quality of your butter.

I have heard the objection raised that separator cream made oily, salty butter. This is not the case at all. The grain is just as nice as when the cream is allowed to raise. I think the grain of butter depends largely on the temperature at which it is churned and the way it is worked afterward.

Ten minutes is ample time to take the separator apart, wash and scald it, and put it away—beginning washing as soon as it stops running. While it is warm it is much easier cleaned. I wash with warm water and scald each piece with boiling water after I wash it. Leave the parts apart to air till you want it for use again.

The cost of a good separator is a great drawback to a great many people, but with seven or eight cows you can get enough more cream in one year to more than pay for the separator. Then after that will be that much clear gain, to say nothing of the saving in labor. When the separator is perfectly level, properly adjusted and run with proper speed, there is scarcely a trace of cream left in the milk. The milk is strained and run through the separator while still warm.

If you are raising calves by hand take the milk from the separator and feed them without the work of heating it for them, or it can be fed to the pigs and all pails washed and no cooling of milk or pumping of water.

The separator is not hard to run, but you have to learn to run it with ease. It turns with a swinging motion something like a barrel churn. Our five-year-old girl can run it with good speed for a while.

The expense of the separator has been about 75 cents a year, principally for rubber packing rings and oil. The separator has ceased to be an experiment but is a necessity, the same as any of the other improved machinery on the farm. The farmer should use a separator both for profit and a labor saver.—A. R. Hellings.

The World's Fair dairy barns are at the north end of the live stock site and just west of the live stock forum or main amphitheater. The barns are uniform octagons, 100 feet in diameter. Each will have thirty-eight stalls arranged in a semi-circle, with a rear promenade twelve feet wide to accommodate visitors. Eight box stalls, 8x12 feet in size, will be provided for the cows at milking time, and two box stalls will furnish quarters for hulls. The second floor will have four feed bins, each holding about 500 bushels of ground feed. Sleeping quarters for the men in charge of the cows are also provided. The arrangement of the barns permits full inspection of the stock by visitors, and of the care of the cows to the best possible advantage.

Sober up on Jackson's Napa Soda.

A Dairy Cow Standard.

Some twelve years ago, when I took charge of the dairy department, we had about a dozen ordinary grade cows.

At present we have about thirty cows milking and twenty younger animals coming on.

We have steadily increased the production of our herd and last year the average of the herd was over 8000 pounds of milk per cow, and over 300 pounds of butter per cow.

For 1902 the record is not so large, owing to the fact that we have five heifers with first calves, which have brought down the average.

However, I believe we are steadily improving our herd.

We selected first the best grade cows we could get, using pure-bred sires of the dairy breeds always, and raising practically all the heifer calves; then at the end of the second milking period weeding out all that had not come up to our standard.

Here is the first principle I would lay down as necessary in founding and maintaining a dairy herd: Have a standard, and if a cow does not come up to that standard the wise dairyman will get rid of her, no matter what she cost.

Our standard is 6000 pounds of milk and 250 pounds of butter.

I expect we shall bring our herd up to 10,000 pounds of milk and 400 pounds of butter per cow.

That can only be done by a process of breeding and selection.

When we buy a cow we weigh her milk every night and morning, take a sample and put it into the Babcock test and test it.

Then at the end of the month we know the number of pounds of milk she is yielding, and the percentage of fat.

At the end of the year we know what each cow has done, and if she does not come up to the standard we get rid of her.

In the case of heifers with the first calves, we give them a second trial.

That, briefly, is the plan we have adopted—raising all our heifer calves, having them drop their calves at two and one-half or three years old, milking for two lactation periods, and weeding out at the end of the second lactation period.

To improve the quality of the herd and the quantity of the milk yield, a man must not only breed his cows right and weed them out according to standard, but it also involves the question of feeding.

People say: "No wonder your cows milk well; you feed them so well."

Cows cannot be expected to milk well on a small quantity of feed.

In addition to this she should receive eight pounds of meal to every thirty pounds of milk produced, in order that she may produce milk economically.—Prof. H. H. Dean, Ontario College of Agriculture.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular, testimonials, etc. Address The Lawrence-Williams Co., Cleveland, O.

Guernseys at Home.

In a letter to the *Country Gentleman*, Mr. D. C. Stanton of New York writes as follows of his studies of Guernsey cattle at their home and in England:

Guernsey and Alderney cattle are common, the Alderney being originally of Guernsey blood. The animals of the Islands of Guernsey and Alderney are interchanged between the two only, but other breeds are never found within their shores, as the law forbids; thus there is no distinct Alderney breed, for the Guernsey roam over both islands.

While on the breed's home island, I met, through the courtesy of Mr. A. Le Patourel, Mr. W. Jauncey, manager of the Spotswood Dairy Farms, Broad Axe, Pa., and accompanied them about for some time. In this way I came in touch with the most noted breeders and their herds, and especially with some thirty well selected animals, purchased by Mr. Jauncey, representatives of the France, Countess Sucotte, Deanie and Jessie families. This gentleman makes two or three importations yearly to supply the demand for the best all round dairy cow which Spotswood Dairy has for sale, and I noticed that animals with marked dairy conformation were chosen of the distinct wedge shape, and having remarkable skin secretion, yellow being strikingly noticeable about the ears, tail, base of horns and udder. They possess great power of assimilating food and converting it into milk of uncommon richness, yet they are delicate feeders, with thin flanks, strong frames, straight backs and broad, deep chests, giving that desirable lung room so often lacking in other dairy breeds. The hide and hair are of fine texture, the udders, from which run large tortuous milk veins, extend well forward and up between the thighs, with level sole and good sized, well placed teats.

I noticed also the produce of the Guernsey herds about the island and in England; it was my privilege to visit Lady Montefiore's vast estate and noted dairy, together with others, where the same breed is kept. The milk was of fine quality, producing butter with a bright golden yellow hue, even on winter rations in stable, a characteristic of the Guernsey alone. The fact that the butter never needs coloring makes it sought by the market, often bringing from 44 to 50 cents per pound. The milk also obtains fancy prices, often being added to milk below the three per cent standard, so that the other may sell.

Since the economical dairy test at Buffalo in 1901, the Guernsey's standing among the most profitable business breeds has not been questioned. Being the most economical, these animals are the common farmer's milkers, as well as being preferred by the gentry for their hearty joined with strength of constitution. Even the bulls are very gentle but vigorous, and like the opposite sex adapt themselves readily to different climates.

I was interested in seeing the feeding of this breed on the island and in England; and though the English herdsman does not get from the Guernsey what the American farmer does, the Yankee may do well to take notes of the Channel Island feeder. In England too much concentrated food is given, making the dairy product at too great cost, which often demands a dollar or over per pound per head weekly on grain alone.

In England the different grain rations consist chiefly of corn meal, oil or cottonseed cake; wheat bran and ground oats are mixed with cut hay, boiling water being added to steam several hours and thoroughly moisten before feeding, thus swelling the constituents. Grain is fed morning and night, hay thrice daily, with little or no succulent foods, such as roots or ensilage. In fact, ensilage is not used to any appreciable extent, and is quite unknown in the Channel Islands.

On the home island, sliced roots, such as turnips, parsnips and mangels are fed

in small quantities several times daily, often mixed with grain, cut hay or straw. Parsnips have a tendency to fatten, and in fact one hears of parsnips instead of corn-fattened pork, as in America. The other roots are milk producers, which, with the rest of the well-chosen ration, make the cow most productive at a minimum cost. Occasionally the islander steams his grain with cut hay or straw, similar to his neighbor, feeding it alone to give the animal a change. In fact, the Guernsey farmer, knowing the value of his animals, is very considerate in the way of variety feeding, and often on a bright winter's day will tether his stock to pick at the green grass, never covered by snow of any depth. Even enough snow to whiten the ground or a killing frost is rare. In early February shrubbery was blossoming and daisies were being grubbed from the neat lawns.

Thus the Guernseys on the island have an advantage, and still the American herdsman has something to learn as regards feeding for the best results. From these observations, I believe that the same quantity of food given several times daily in smaller feeds and varying as to way of serving is, taken with the docile nature of the breed due to much handling, the reason why better results are achieved among the Guernseys at home. Too often exported cattle soon lose their affectionate manner, no doubt because they receive less attention. For the interest of the breed and the faithful islanders who are striving to keep their favorites at the front, the Yankee should give more attention to the minor as well as essential points of the care and management of this most economical and beautiful breed.

Calves will begin to nibble at hay when ten days old or at the same time that they begin to eat grain. When from six to eight weeks old calves will consume from one-half to one pound a head daily. Mixed orchard grass and prairie hay are best. Alfalfa hay proves too loosening for calves, although it may be gradually introduced into a ration after three or four months. Nothing but clean, bright hay should be used. The greatest difficulty in raising calves is undoubtedly scours. Here, as elsewhere, an ounce of prevention is worth a pound of cure. The principal causes are overfeeding, sour milk, cold milk, grain with the milk, dirty milk-pails, unwholesome feed boxes and irregularity in feeding. An intelligent and observing feeder will notice the symptoms of this disease as soon as they appear, in which case the ration of milk should be cut down one-half or more and gradually increased again as the calf is able to stand it. A successful feeder will do his best to keep the milk sweet. Heating milk seems to produce chemical changes that help to prevent scours.

The germs of blackleg have great vitality and will retain their virulence in the soil for an indefinite time. Frost does not destroy the germ. Carcasses of blackleg victims should be burned or, if buried, covered with quick-lime and plenty of earth. Treatment of sick animals is not often successful but preventive measures give good results. These consist in inoculating the cattle likely to be exposed to contagion with blackleg protection virus. There are different firms which prepare and sell virus for this purpose and give full directions for its use. The effect of this inoculation is similar to that of vaccination in protecting man from smallpox.

H. H. Hinds, of Stanton, Mich., the superintendent of the Shorthorn milk test at the St. Louis exposition, is to take the cows selected for the test to the fair grounds as soon as the weather moderates. Mr. Hinds has secured from Shorthorn breeders a number of cows that are heavy milkers, and he is to pit them against the dairy breeds, with the hope of winning, or at least to show that the Shorthorn is a profitable milker.

Feeding Hogs for Growth.

In raising hogs for profit one must in the first place feed the sows before farrowing time with a view to the raising of good, thrifty, strong, healthy litters. That done, he has scored a very important point, for if we start with a lot of little, puny weaklings, we are handicapped at the beginning, writes J. P. Fletcher in *Farmer's Guide*. As soon as the pigs manifest a disposition to eat, give them a convenient place, out of reach of the sows, furnished with shallow troughs, in which place feed consisting of bran, shorts and soaked corn, but not soured. Place a proper amount of salt in each ration. Also place some ashes in a convenient place, with some salt sprinkled thereon, for them to root in.

Now we have the youngsters started and must keep increasing the feed as they

grow older and larger. Supplement all this with a good clover field, and if you have no clover, sow oats or rape and pasture it before it gets too large. Have two or three lots and have something growing for the pigs all the time. Do not let them get stunted from birth till day of sale. Plant quite early some sweet corn. Plant two or three different times and by the time the pigs get old enough to eat it, it will do to cut and throw to them. Feed it while in the roasting ear stage. By the time the sweet corn is fed out, the field corn will do to feed. In this way one can keep the pigs thrifty and in good growing condition from farrowing time till day of sale. The latter should be from seven to eight months, and weight should be from 200 to 230 pounds. The most clear profit can be obtained at that age, besides there is a lively demand for that class of pork.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Fifty Years With Hens.

Wesley Mock, who has had an experience of fifty years in poultry raising, gives the *Santa Rosa Democrat* the following:

I have heard the question asked, "Does chicken raising pay?" For my own satisfaction, I concluded to keep an exact account of the cost and profit of 48 hens for one year. From March 5, 1903, to March 4, 1904, the number of eggs laid by these 48 hens was 6892 or 574 dozen. The hens were kept on a lot 25x40 feet all the time up to the last month, when a number of them were moved to another yard. The average number of eggs credited each hen with having laid was 143. I sold 422 dozen eggs for \$102.63. I used 152 dozen. The feed cost me \$48 47.

Some years since I kept a similar account with 700 hens. I kept up my stock and sold something over \$1400 of poultry and eggs. The feed cost me a little over \$700. My experience of over fifty years in California is that a profit of \$1 a hen is about a fair average per hen per year, and keep up the stock, etc. In other words, you can double the cost of their feed, clearing \$1000 on 1000 hens. The feed I used was rolled barley and shorts in equal parts, with plenty of green feed and shells.

The proportion of constituents in milk depends largely upon the kind of cow. It is impossible to make any perceptible change in the relation of solids to each other. For instance, if there is 3.5 per cent casein, 4.7 per cent sugar, and 4 per cent of butter fat; there it stays right along. If it were not so, it would be easy to take a Holstein and make a Jersey butter cow of her; or very easy to take a Jersey and make a Holstein milk cow of her, if you could change the per cent. The percentage is practically fixed. Some cows give richer milk than others. This is because they are bred so, and not because they are fed so.

Clean eggs, assorted to size and color, make the best appearance for market.

Quality in Horses' Legs.

We often hear men speaking about "flat bone" in horses' legs, and while they are referring to a splendid type of leg it is not due to flat bone exactly, but to marked cleanness of the bone and ample development of the hack tendons. The leg bones of horses are not flat but razor-shaped, with the edge backward, and from it standing out the two great tendons (perforatus and perforans) so that they may be easily noticed and handled. The leg of this type has a broad, flat appearance. It is not round in contour, but even when round appearing it is not due to round bone but to lack of development of tendon, and presence of surplus, coarse tissue.

When a leg appears flat and clean with outstanding, well-marked tendons we usually find silky feather in horses of breeds so characterized and conclude that flat, dense, flinty bone and silky hair, or "feather" as it is often called, go together. Given such "quality" in a horse's legs we may take other things for granted. We may be sure that there is corresponding quality throughout the frame for such bone and tendons are not chance possessions, but tell surely of long continued line-breeding to animals of like conformation. They are then to be taken as a guaranty of "breeding" and that usually means the prepotency which makes it possible for the possessor to transmit his good qualities to his progeny. Lacking such "quality" we may conclude that the animal inclines to general grossness and sluggishness. His legs are meaty and coarse and if he is a "feathered" horse hair is coarse, kinky and likely to more or less surround the leg instead of springing from the hack tendons.

Together with fine quality of bone and hair it is usual to find oblique springy pasterns, and that means free, clean, sprightly, straight action. In such a horse the shoes should turn up to the sun as he goes and comes at a walk or trot, and such action is desirable in both light and heavy horses. When selecting a stallion or mare for breeding purposes it is then important to commence at the ground in making an examination.

Anybody can put meat on a draft horse but none can change the legs. They are all important and should be full of quality. Avoid the straight-pasterned horse, as he is sure to travel in a stilty fashion, but also avoid too great length of pastern especially on the hind legs, as it weakens and detracts from the power of the horse to move heavy loads. He should stand nicely on his pasterns, which should have the same angle as the front of the hoof. Forty-five degrees is about the proper angle, and anything less or more than that means departure from ideal type. Mere grossness of body in either sire or dam is objectionable. Great weight is advantageous when it is associated with quality of bone, tendon and hair. At the same time too much quality is detrimental as it may indicate in-and-in breeding, lack of constitution and lightness of middle.

Every breeder of draft horses should seek after all the quality his horses will stand, but carefully guard against loss of width, depth, weight and muscle. To make one point a specialty in breeding is evidently an error. Quality is not everything, but it is most desirable so long as it can be had without destroying draft size and utility.—A. S. Alexander, V. S., in *Live Stock Journal*.

The American Hereford Breeders Association has decided to offer \$300 in special premiums at the Spokane Interstate Fair this fall. This will, no doubt, bring out a good show of White Faces as the Interstate Fair will give the same amount. The management are now trying to interest some of the other pure-bred stock associations in giving special premiums for their respective breeds.

Sober up on Jackson's Napa Soda.

Poultry Notes.

Scanty feed and abundance of eggs are out of the question.

There is no animal or tree on the farm from which so much is expected as from the hen.

Disastrous results are said to follow when pigeons are permitted to bathe in the poultry watering trough.

Persistent sitters may be fed on a full feed of such food as is being given the other fowls, and she will soon want to lay.

It takes some trouble to prevent disease, but it is easier to prevent it than to doctor sick hens and get rid of the cause of disease.

The Belgians are said to excel in pigeon breeding. One of their rarest and most valuable birds is the true Antwerp carrier pigeon.

If hens are doing well and laying lots of eggs on a certain ration, it is wise to let well enough alone. A change may be for the worse.

To be able to raise chickens successfully is probably the secret of success in the poultry business. Almost anyone can hatch them—but to raise them is where the rub comes.

The cackle of the hen after laying is probably to attract the attention of the other fowls, her companions, and is usually answered by the rooster or some others of the flock.

Fall, rather than spring, seems to be the most favorable time at which amateurs should commence. It gives plenty of time for study and house building. Beginners often suffer loss from a lack of appliances.

Poultry shows do a good work in exhibiting what has been done and in stimulating others to attempt great things. A large majority fail, but they do their best, and here and there is a grand success.

A liberal supply of perches should always be provided, so that the fowls need not roost on the floor or the ground. It is not healthy or comfortable for them, and they are in more danger from their enemies.

Poultry keepers sometimes seem at a loss to determine whether a broody hen is a sitter or a setter, but in our experience it has more often puzzled us to know whether a cackling hen is a layer or a liar.—*Farming World*.

When hens are moulting they need about the same feed as when laying. If kept in good condition the process is much shortened, and they are left in a healthful condition. Some add a few sunflower seed to the ordinary ration, believing that it makes the feathers smooth and glossy.

The microscope shows that scaly leg is caused by a very small parasite. Coal oil will cure it. Wash the legs of the poultry with soap and water and then with coal oil. Attend to this in the morning, so that the oil will evaporate during the day. The legs may be dipped in the oil without serious effect.

It is claimed that more meat can be grown from raising ducks than from

raising any other bird or beast on the farm, says the *Mirror and Farmer*. The farmer who has six ducks will get from 30 to 100 eggs a year; these may be set under hens, and he can have ducks to eat from early in the spring till late in the summer.

The hodies of animals dying of contagious diseases are a menace to the health of other animals, and even to some cases to that of man, if allowed to lie exposed above the ground, and it has been found that in case of certain very virulent diseases, like anthrax, ordinary burying is not an entirely effective safeguard. The germs of such diseases retain their virulence for many years, even in the soil and are thus a constant source of danger. Of course, if the diseased hodies are left above ground or thrown into a ditch or stream the danger of disseminating the disease is increased many fold. The most effective means that have been found for disposing of such diseased hodies are deep burying with free use of lime and burning.

The oleo manufacturers seem to have dropped their campaign education, in which they subsidized country papers to relate stories of dairymen who sold their butter and bought oleo, because they liked it better than the real thing. At one time we saw numerous stories of this kind in our country exchanges, but lately they have disappeared.

Few modern industries are successful without the utilization of by-products. The by-product of the dairy is milk which can be converted into pork or used in raising calves. Help the cow in her efforts to make you money.

The small expense incurred in purchasing a dairy thermometer is in no way commensurate with the improved results from its use.

For hog lice spray a good sheep dip onto them with a sprayer that means business. Kerosene emulsion often proves a good substitute for sheep dip.

Wash the butter thoroughly and there will seldom be trouble about mottled butter.

Fee \$50.

I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

For cards containing tabulated pedigree and full particulars address
Or MABRY McMAHAN, Owner,
207 Sansome St., San Francisco.

Never fill the churn more than one-half full; one-third is better.

With all due respect to the gentle bull, he should never be trusted.

Have any of our readers ever tried Turkish toweling to strain milk.

A heifer is apt to form her life's milking habits after the first calf. A little extra time spent then means money later.

Decayed vegetables and putrid food of any kind—even milk—should not be given to swine. And soapy dish water should not be put in the swill barrel.

It is said that when plucking a goose, immediately after killing, plunge into scalding water, wrap in a cloth four or five minutes, then it will be found that even the pin feathers will come off readily.

SIRE, DIRECT 2:05½, sire of 54 in the list, including Directly 2:03½, Direct Hal 2:04½, Bonito Direct 2:05½, Prince Direct 2:07, Directum Kelly 2:08½, Tribby Direct 2:08½, King Direct 2:09½, Rey Direct 2:10, etc., etc.
DAM, FRANCISCA (dam of I Direct 2:12½, Sable Frances 2:15½, Guycoeca 2:25 and Earl Medium, sire of May Bud 2:13½, Tom Martin 2:14½, Kanawah Star 2:14½, Lucy Stokes 2:18½, Goneril 2:24½, Pearl Medium 2:25, etc.) by Almont 33.
Second Dam, Frances Breckenridge (dam of Maximus 5½, sire of 8 in list) by Sentinel 280; third dam by Bayard 58; fourth dam, Luna by Swigert's Lexington; fifth dam, Eagles by Imp. Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E streets, near Agricultural Park, Sacramento.

Fee \$50.

I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

For cards containing tabulated pedigree and full particulars address
Or MABRY McMAHAN, Owner,
207 Sansome St., San Francisco.

THE STANDARD BRED YOUNG STALLION

HIGHLAND (TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1904

FEE - - - \$75

Reductions made for two or more mares.

Manager, WALTER SEALY.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Joe Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the breeding season of 1904, either pacers or trotters. Must be three to start and race to come off on Hollister track, Fair week, 1907. (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bones. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Willson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 39 1/2 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightning, sire of the dam of Zomhro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4 Son of Sable Wilkes 2:18 and Fanny Bayswater, Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nusbagak, sire of Arieto, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venus (dam of Adonis 2:11 1/4, Leah 2:24 1/4, Cupid 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27 1/4, sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

Or TUTTLE BROS., Rocklin, Cal.

NEERNUT 19810 Record 2:12 1/4 (Sixth Heat) 2:14
Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09 1/4 to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 1:13 3/4 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed.

Pasturage, \$5 per month. Hay and grain \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15 3/4

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:30 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.); dam LULANEER (dam of Limonero 2:15 1/4, Lion 2:19 1/4) by Electioneer 125.

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-hat race for a \$5000 purse which he won at Lexington, heating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in cars of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen

Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shylcock 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigrees, address

BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal.
or San Jose, Cal.

NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who is it, ex-champion three-year-old gelding of the world, reduced his record to 2:10¼. John A. McKerron 2:04¼ (2:13¼ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES will make the Season of 1904 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = \$50

Nutwood Wilkes 22116

IS THE SIRE OF

For the Season
With return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents and escapes.

C. A. BRANIN, San Lorenzo, Cal.

SILVER MOON

McGREGOR-ALMONT STALLION
Size, Style, Substance.

By Silver Bow, Jr. (his dam Magenta by Tempest, next dam by Com. Belmont, etc.) by Silver Bow 11708, son of Robert McGregor 647 (sire of Crescens 1:50¾).

SILVER MOON'S dam Leona 2:28 (Reg. Vol 12) by Almoon 20503, son of Algona 11543, by Almont 33.

SILVER MOON is a square trotter, has a high rate of speed and will be raced on the California Circuit, 1904. The combination of McGregor and Almont blood in SILVER MOON is an especially desirable outcross for the Wilkes and Electioner blood which is so numerous in California. He stands 16½ hands high and is sure to produce large handsome horses that will sell well.

Season of 1904 at Pleasanton Race Track—Terms: \$25 the Season

Mares not proving in foal can be returned in 1905 free of charge or money refunded. Best of care taken of mares but no responsibility assumed. Address,

JAMES E. BERRYMAN, Pleasanton, Cal.

FERNDALE STOCK FARM

Stallions at Stud.

Longworth, \$25.

Sable Czar, \$25

Ringwood, \$25.

Mahomet, \$20

LONGWORTH 2:19 (Reg. No. 18452), sired by Sidney, granddeir of the champion Lou Dillon 1:58¾. Dam, Grey Dale by American Boy Jr., be by American Boy, sire of Williamson's Belmont; second dam by Winfield Scott; third dam, Sorrel Pol by Sir Henry. LONGWORTH is a very high-class horse in form and disposition; is a very dark bay or brown. He has sired Alfred D. 2:12¼, El Moro 2:13¼, A. C. 2:15½, Esmeralda 2:19, etc.

RINGWOOD by Sidney; dam, Alma by Dashaway, he by Belmont, son of American Boy. RINGWOOD is a dark bay.

SABLE CZAR by Sable Wilkes, be by Guy Wilkes; dam, Olivette by Whipple's Hambletonian, be by Guy Miller, be by Hambletonian 10; second dam, Belle by Easton's David Hill, be by Blackhawk; third dam, Lady Almaack by Almaack, he by Monmouth Eclipse, son of American Eclipse. SABLE CZAR is a black horse.

MAHOMET, color white, with bay and blue spots. His sire is Longworth, dam Sonoma Maid, said to be by Arabian bore; second dam by Whipple's Hambletonian.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$2.50 per month. No responsibility assumed for accidents or escape.

For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTTING STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19¼

(Sire of Monte Carlo 2:07¼, Idolita 2:09¼, etc.); dam CRESIDA (3) 2:18¼ by Palo Alto 2:08¼; second dam Clarabel (dam of 3 in 2:30) by Abdallah Star; third dam Fairy (dam of 2 in 2:20 list) by Hambletonian 10.

CASSIAN is a big-class young stallion in every particular, and one of the best bred ones ever foaled at the famous Palo Alto Farm. He has producing blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast natural trotter and bas being good gaited, level headed and game

every qualification for a sire of extreme and early speed, being

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:50)

1st dam BELLE Mc (dam of Worthwood (1) 2:59 and Silver Bee (2) 2:27¼) by Ensign Goldust Jr.

2d dam LITTLE BELLE (grandam of 2 in 1:11) by Belmont (sire of Nutwood 2:18¼ and 58 more in 2:30).

3d dam Thoroughbred Mare by Imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 bands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grand sire Robert McGregor sired that wonderful horse Crescens 1:50¾, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

MONTESOL

(TRIAL 2:24)
Full Brother to Lady Grannard 2:23 (trial 2:13)

MONTESOL, 6 years old, stands 15½ hands, weighs about 1135 pounds: is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcione. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege

POLE STAR

The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address **P. FOLEY Race Track, Alameda.**

SEYMOUR WILKES

REG. NO. 0232.
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12½
and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are aquare trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmate; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to **THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.**

Alta Vela 22449

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07½, Sunol 2:08½, Palo Alto 2:08½, Alta Vela 2:11½, and 9 more in the 2:15 list, etc.)
Dam LORITA 2:18½ by Piedmont 904; second dam Lady Lowell (dam of Ladywell 2:16½, Lorida 2:18½, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16½.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

**HANS FRELLSON,
Race Track, San Jose, Cal.**

NUSHAGAK 25939

Sire of Aristo (3) 2:17½, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years); Black Jack 2:28½ (trial 2:23); The Boquet (4 y. o. trial 2:17½); Majella 2:29 (4 y. o. trial 2:13½).

Sired by Sahle Wilkes 2:18, sire of 38 in 2:30. Dam, Fidelia (dam of Fidette 2:28½, dam of Mary Celeste 2:17½) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancel, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08½, James L. 2:09½, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15½) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30½ (dam of Manzanita 2:16, Wildflower (2) 2:31 and 8 producing daughters) by St. Clair 19675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM.

Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Spavins, Curbs, Splints, Windpuffs and all the various lumps and hunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughly did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

EARLY CLOSING STAKES

Oregon State Fair

SALEM, Sept. 12 to 17, 1904.

ENTRIES CLOSE MAY 10

- | | |
|---|--------|
| Greater Salem Stake, for 2:15 pacers, 3 in 5.... | \$2000 |
| Lewis and Clark Stake, for 2:17 trotters, 3 in 5.... | 2000 |
| Capital City Stake, for 2:12 trotters, 2 in 3.... | 1000 |
| Rural Spirit Stake, for 2:11 pacers, 2 in 3.... | 1000 |
| Webfoot Stake, for three-year-old trotters, owned in the district and Montana January 1, 1904..... | 500 |
| Inland Empire Stake, for three year-old pacers, owned in the district and Montana, Jan. 1, 1904.... | 500 |

CONDITIONS—Entrance fee 5 per cent of stake and 5 per cent additional from money winners, payable 2 per cent May 10th, when horse must be named, and 3 per cent September 1st. Money divided 50, 25, 15 and 10 per cent of stake. Horses not winning a heat in three shall not start in the fourth heat, except in a field of eight or more starters. Then he must win a heat in four or go to the barn. Horses so ruled out shall have a right to a share of the stake according to their rank at the close of the last heat. Right to transfer or substitute entry in the Capital City and Rural Spirit stakes open to August 1st to horses eligible May 10th. The Board reserves the right to declare off and return first payment in any stake that does not fill satisfactorily. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 70 per cent to first and 30 per cent to second horse. A horse distancing the field shall be entitled to first and fourth money's only, and in no other case will a horse be entitled to more than one money. Other than specified, rules of the National Trotting Association, of which this association is a member, to govern except hoppers not barred on pacers over three years old.

TWO CONSOLATION PURSES OF \$500 EACH.

Free entrance will be given to non-winning starters in the Greater Salem stake for 2:15 pacers and the Lewis and Clark stake for 2:17 trotters, mile heats, 2 in 3.

CAMPBELL'S

EMOLLIO IODIFORM

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE, SORES and SADDLE GALLS there is now superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALCS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a water as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor.

We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the feet which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Corbie, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

SAN JOSE IS THE PLACE chosen by the Pacific Coast Trotting Horse Breeders Association for its meeting to be held this year in August, and it will follow the Pleasanton meeting which will open the circuit. When the executive committee of the Breeders' Association met last Tuesday two propositions were submitted to it. Santa Rosa asked for the meeting and offered a bonus of \$1250 already subscribed. The Santa Rosa Stock Farm offered the free use of its track, but retained the bar and restaurant privileges. San Jose's offer was an already subscribed bonus of \$1300 with the use of the track absolutely free, the Breeders to be allowed all the privileges. San Jose's offer being the best, the committee unanimously decided that it be accepted. Secretary Kelley was instructed, however, to correspond with the Santa Rosa people and make the following offer: If the subscription of \$1250 is renewed the Breeders Association will agree to give a second meeting at Santa Rosa with the exception of the futurity colt stakes, and in their places good purses would be given for three-year-olds and two-year-olds. It is to be hoped that the Santa Rosa people will agree to this, as an extra meeting by the Breeders Association will help the situation immensely and the California circuit will begin to assume respectable proportions. The harness racing season would then start in at Pleasanton, move thence to San Jose, then to Vallejo, then to Santa Rosa, and from there to Woodland, provided that place gives a meeting which it probably will. The State Fair would follow, and from there the horses would go to Fresno, Hanford, Tulare, and Los Angeles, with meetings also at Hollister and Salinas. The horsemen are much pleased with the selection of San Jose for the Breeders meeting, as it is but a short trip of thirty miles from Pleasanton where the circuit will open. The San Jose track is in superb shape at the present time, and it is one of the fastest tracks in California beyond a doubt. Santa Rosa also has a magnificent track and with the Breeders giving meetings at both places the horsemen will have a better opportunity

to earn money with their trotters and pacers than for several years past, as the Breeders give the largest purses given in this State. As soon as an answer is received to the Santa Rosa proposition, dates will be announced for all the meetings. There is about \$40,000 in purses and stakes in sight now for the California circuit of 1904.

THE SALE of the Napa race track property, comprising eighty acres of land with the buildings thereon, was completed last week, and Mr. John Cross of the Napa, Vallejo and Benicia electric railway is the new owner. The Napa Register states that Mr. Cross expects to cut the property into lots to be placed on the market for sale. We would suggest that the citizens of Napa get to work at once, assisted by the Napa Agricultural Society, and arrange with Mr. Cross for a harness race meeting to be given on the old grounds before they are devoted to other uses. The Napa track was built in 1888 and the first meeting was given by the Napa Agricultural Society in October of that year. Direct 2:05½ was a trotter and a three-year-old that season and won a race there, the best heat of which was in 2:23. The trotter Arab and the pacing mare Gold Leaf came together for a thousand dollar purse and the trotter beat the little three-year-old. Woodnut beat Lilly Stanley for a \$1000 purse and as the mare was a native daughter there was gloom in the grand stand when Woodnut won. The next year there was a big meeting at this track. Among the winners were such now famous horses as Del Mar, the sire of Major Delmar 1:59½; Redwood, a half brother to Lou Dillon 1:58½; Palo Alto 2:08½; Direct 2:05½; Lorita, the dam of Alta Vela 2:11½; Atto Rex, the sire of Rex Alto 2:07½; Lilly Stanley, dam since of three in the list; and Creole 2:15, sire of Javelin 2:08½. That year Gold Leaf paced to the world's four-year-old record of 2:11½ at Napa. In 1889 two meetings were held—the Agricultural Society giving a meeting in August and the Pacific Coast Trotting Horse Breeders Association one in October. At the latter meeting Freedom was driven a mile against time by John Goldsmith and made the circle in 2:29½, thus being the first yearling trotter to beat 2:30. During the hard times of 1893 and 1894, many of the trotting horse breeders of Napa county went out of business, and the cutting off of the State aid to district fairs was a severe blow to the Napa association as it was in many others. There have been occasional meetings in recent years, and the Napa people have always patronized them liberally. There is not a doubt but a meeting could be given there this season that would be a big success. We suggest to the Napa people that they give one more meeting before the splendid track that has felt the hoof beats of so many now famous horses is a thing of the past. It would draw all the best horses in training in California and fill the town with people during the week, putting many dollars into the pockets of the business men.

A NEW SPEED TRACK and athletic grounds for Golden Gate Park is a certainty. Treasurer Frank G. O'Kane of the Amateur Athletic and Driving Association has already banked \$7000 in cash and the committees have been at work but a little over a week, and have not seen one-tenth of the people they expect to subscribe. The needed \$25,000 will be had within thirty days and the Park Commissioners will begin work on the new pleasure grounds as soon as that amount is put to their credit, and will spend that much more on the improvement. This new feature which really originated in the minds of a few members of the Golden Gate Park Driving Association has been taken up by all the amateur organizations and is meeting with favor everywhere. The relocation for the sixty-foot wide half mile oval track is ideal, being convenient to car lines and the drives. There are to be provisions made for all sorts of outdoor games and sports. A bicycle track, polo field, base and foot ball grounds, cinder path and quarters for many other field sports will be made, and all will be laid out not only with the idea of providing accommodations for those taking part in these sports, but the public is to be looked after and it will be arranged so that thousands of people can witness the contests with ease and comfort. It will be one of the most popular features of Golden Gate Park. The excellent start made by the soliciting committees shows that the project is in the proper hands and we hope they will be welcomed and favored with generous subscriptions wherever they go.

A HUMBOLDT SOUVENIR is the title of a 200-page magazine recently issued by the Humboldt Times of Eureka. It is not only a magnificently illustrated production but it contains a fund of valuable information in regard to the county that is highly interesting. Humboldt is a little empire in itself and one of the most productive of California counties.

THE AUSTRALIAN DEMAND for American bred trotting horses is increasing. The Secretary of the San Francisco Board of Trade recently received a letter from John P. Bray, United States Consul General at Melbourne, asking that he be sent the names of breeders of standard bred trotters in California. He states that Australian horsemen desire to purchase each year in California a number of standard bred fillies in sufficient quantity to make their shipment to Australia profitable. They desire to purchase fillies about nine months old, right after they are weaned. A long list of the names of California breeders has been sent to Consul General Bray, but we advise any breeders here having weanlings for sale this fall to correspond with him.

Answers to Correspondents.

H. F. LYNN, Woolsey, Virginia—Will you please publish in your valuable paper the extended pedigree and performances of chestnut mare Quilla, foaled 1892, sire Spendthrift, dam Excellenza by Excel.

Answer—We do not find that Quilla has ever started. The dam of Excellenza is Sadie Somers by Alroy, second dam Nannie Harper by imp. Glencoe, third dam Fanny Hill by imp. Monarch, fourth dam Allegrante by imp. Young Truffle, fifth dam imp. Phantomia by Phantom, and on to the seventeenth dam Old Vintner mare.

E. J. MYERS, Nampa, Idaho—Please be so kind as to let me know through your next issue, if you can, the breeding of Jennie C., owned by Doc Wintermute, Stony Oak Farm, Tacoma, Wash.; also of the brown mare Jeannette, brand J 10, sired by Chester, be by Chesterwood, he by Nutwood.

Answer—We have no record of either mare. There are at least a dozen mares registered under the name Jennie C., but the books do not state that any are owned in Washington. Jeannette is not registered unless it be in Vol. 16, which has not yet been issued.

J. J. BOUZA, Avon, South Dakota—I have a thoroughbred colt by Pug III. by Hanover, dam Phillis by Jos. Phillips. Is there any way to make him pace while young. He was foaled March 28, 1904.

Answer—If you want to make a pacer out of him, turn him over to some good trainer, with instructions to teach him to pace, if possible. He may learn to go at that gait, but it will probably take considerable time and patience. Would like to hear from you as to results.

F. W. SHANK, M. D., Susanville, Cal.—Will you please state the breeding and performances of Dick Russell (pacer) in next issue of your valuable paper.

Answer—Dick Russell is a chestnut horse, sired by Diablo 2:09½. In a race at Woodland September 4, 1904, he won after five heats had been trotted, beating Dixie Maid, Lady and Belle Rose. He was fourth in the first heat, second in the following heat and won the next three. The time of the heats was 2:24, 2:18, 2:26, 2:22½ and 2:23½. The Year Book does not give the breeding of his dam.

W. J. EAST, Fortuna, Cal.—Please give breeding and record of bay stallion Billionaire through your columns.

Answer—Billionaire, registered number 31,818, bay horse foaled 1894, by Millionaire 7292, son of Happy Medium 400. The dam of Billionaire is Hybla by Hermes 548, second dam Nelly Litchfield by Greyhound 154, third dam said to be by Hambletonian 2, fourth dam by Morgan Tiger. His record is 2:33.

Harness Racing at Seattle.

The King County Fair Association of Seattle, Wash., has announced two early closing stakes for their meeting, Sept. 19 to 24, full particulars of which will be found in their ad on another page of this issue. The association has announced that all the races, in addition to the stakes advertised, will be on the dash system at various distances from one to two miles. There will be two or more harness races each day in addition to the stakes. It is the aim and desire of the association to make harness racing as popular in Seattle as the thoroughbreds now are, and it is thought that dash racing will accomplish the desired result.

The stakes announced are the Northwestern Derby, value \$1,500, a two-mile dash for 2:15 trotters, and the Puget Sound Stakes, value \$1,500, a dash of one and one-half miles for 2:11 pacers. Both stakes have \$300 consolation, free entrance, and will be dashes of one and one-eighth miles for the trotters and one mile for the pacers.

Like the stakes announced by other associations on the North Pacific Circuit the Seattle stakes will close May 20, when horses must be named. For entry blanks and other information write to A. T. Van de Vanter, P. O. Box 282, Seattle, Wash.

Jackson's Napa Soda does not tangle the feet.

JOTTINGS.

"OPPORTUNITIES CONSIDERED, what stallion in America has accomplished as much as Sidney Dillon?" was the question put to the writer one day last week by George Ramage, the well-known trainer formerly connected with the Santa Rosa Stock Farm, but now in the business on his own book at Pleasanton. Mr. Ramage knows all the Sidney Dillons and probably knows them better than any other person does. He broke and banded Lou Dillon and had her showing two-minute speed before she was turned over to Millard Sanders, and when she was two years old told me she was "the only trotter on earth." He "discovered" the champion mare and is entitled to the credit. For years he was in the employ of the Santa Rosa Stock Farm and knows as much as any one about Sidney Dillon and his get. So when he put the above question to me I gave him the Yankee rejoinder by asking him what opportunities the son of Sidney and Lou Milton had enjoyed, and this was the reply:

"Up to the first of January, 1904, Sidney Dillon was the sire of but fifteen living foals that were older than three years old, and of these just eight had been trained, and by training I mean given track work. The eight that had received any training were the following:

"Lou Dillon, 1:58½.

"Dolly Dillon, 2:06½.

"B. S. Dillon, 2:16½; trial 2:09½.

"Captivity, 2:26½; trial in 2:14½ the day she was sold for \$1,500.

"Andros, worked a mile in 2:17½.

"Stanley Dillon, now in Ed Geers' string and credited with a work-out in 2:09½.

"Pansy Dillon, worked a mile in 2:24½.

"Lucky Dillon, worked a mile in 2:24.

"Here are seven trotters and one pacer that have beaten 2:25, one is the champion of all trotters, four have shown miles better than 2:10, and six of the eight have beaten 2:20. There are nine or ten head of Sidney Dillon's get that are four-year-olds this season and as they are scattered about I do not know just what they are doing, but I do know that Joe Cuicello is handling one that trotted a mile in 2:25, last half in 1:07 several weeks ago; Miss Sidney Dillon has trotted a mile out in 2:28½, and my four-year-old Bert Arandale has been a mile in 2:29½, last half in 1:07½, last quarter in 33½ seconds, and last eighth in 15½ seconds. These are the facts and when you can scare up another stallion that can make such a showing with that number of foals, write to me at Pleasanton, and I will take back my assertion that Sidney Dillon, opportunities considered, outclasses all other sires of speed."

It was in 1898 that Dolly Dillon, then called Dolly D, won the Occident stake for three-year-olds at the State Fair at Sacramento, but as the time was not remarkably fast—2:25½, 2:26, and 2:21 for the three heats—but little attention was drawn to her sire. The next year Dolly reduced her mark to 2:19½ in a winning race at the same place, but this was nothing remarkable and Sidney Dillon did not get into the public eye very much as Dolly was his only performer. In 1900 this mare raced through the California circuit and started nine times. She won six of these starts, was beaten twice by Hazel Kinney, and in the other race Phoebe Childers and Dione finished in front of her. She closed the season with a mark of 2:11½, and her sire began to have a little more attention paid him, especially as his only other starter Captivity, took a record that year of 2:28½. In 1901 Dolly Dillon made her memorable campaign through the Grand circuit and was considered one of the greatest trotting mares ever seen in the east. Sidney Dillon began to be talked about and the Santa Rosa Stock Farm began to give him good mares. When Lou Dillon began to show such marvellous speed all the choice mares on the farm were bred to Sidney Dillon and from now on he will have the opportunities that his merits entitle him to.

Horse Show at Burlingame.

The annual open air horse show under the auspices of the Burlingame Country Club will be held April 23d (one week from to-day) at the Crossways Farm of Mr. F. J. Carolan, Burlingame. The horses will be shown and judged between the hours of 10 a. m. and 5 p. m., prizes of cups and ribbons being awarded to the winners. The committee in charge is composed of F. J. Carolan, chairman; Francis T. Underhill, and E. D. Beylard. The judges will be Lawrence McCreery, and J. C. Kirkpatrick. Entries are open to all and will close April 18th. The rules of the

Horse Show Association of the Pacific Coast will govern. An admission fee of one dollar is to be charged and the proceeds will be devoted to the Armitage orphanage, a very worthy charity. The classes will be as follows:

Roadsters—Horses entered in these classes must be practically sound and able to go a good pace. Class 1, single roadster; class 2, pair of roadsters.

Harness horses (open to all)—Horses entered in these classes must show conformation, quality, style, action, and suitable pace. Performance at a walk, park, and road gaits to be considered. They must have good manners and be able to back well—practical soundness only to count. Class 3, mare or gelding over 14.3 and not exceeding 15.2; class 4, pairs mares or geldings over 14.3 and not exceeding 15.2; class 5, more or gelding exceeding 15.2; class 6, pairs mares or geldings exceeding 15.2; class 7, best mare or gelding over 14 hands suitable for a lady to drive—must be driven by a lady; class 8, best pair mares or geldings over 14 hands, suitable for a lady to drive—must be driven by a lady; class 9, best tandem mares or geldings 14.3 and over; class 10, best four-in-hand, 14.3 and over, to be shown to a coach or brake; class 11, best pony over 13.2 and not exceeding 14.3; class 12, best pair of ponies over 13.2 and not exceeding 14.3.

Saddle horses—Saddle horses to be judged on their quality, conformation, and manners. To be shown at a walk, trot, and canter. Must be ridden by a lady or gentleman. Class 13, mare or gelding under 14.3; class 14, mare or gelding over 14.3; class 15, best mare or gelding suitable for a lady, and to be ridden by a lady; (a) under 14.3, (b) over 14.3; class 16, best heavy-weight polo pony; class 17, best lightweight polo pony; class 18, best qualified hunter, to be shown over jumps not exceeding five feet.

Sacramento Driving Club.

Several hundred people assembled at Agricultural Park last Sunday afternoon to witness the third matinee of the Sacramento Driving Club and enjoyed some excellent races. The timers and judges were W. O. Bowers, Dr. Weldon, and Mr. Delano, and they gave perfect satisfaction to all.

In the first class, 2:40 class, the starters were John Riley's Aleta R., John Morrison's Canny Scott, and I. H. McMullen's El Rose. El Rose took the first two heats, with Canny Scott second in each, after a good race. Time, 2:45½ and 2:46.

The second race, 2:35 class, was between F. J. Ruhstaller's Hans, Dr. A. M. McCollum's Jennie H, and Thomas Clark's Star Bitters. Star Bitters took both heats easily, with Jennie H. second. Time, 2:34½ and 2:32.

The 2:25 class came next, in the third race, the entries being Charles Silva's Queen S., F. E. Wright's Royal Dame, and William Harris' Molly Nourse. Royal Dame won without trouble both the heats, with Queen S. second. Molly Nourse showed some fast bursts of speed, but could not be depended upon. Time, 2:35 and 2:34½.

The fourth race, the 2:30 class, was between J. H. McMullen's Rosa Gold, W. O. Bowers' Glide, and John Norton's Light Bird. Rosa Gold took the first heat, with Light Bird second. The latter acted badly in scoring for the second heat, but they got a good start, and at the half Light Bird, trotting very fast, went up and collared Rosa Gold, passing her near the upper turn and coming in an easy winner, with Glide second. Time, 2:34 and 2:34½.

Light Bird won the third heat, with Rosa Gold second. Time, 2:30.—Sacramento Union.

Zombro Filly Sells for \$3000.

William Coleman, of Los Angeles, sold his three-year-old filly Geraldine on Thursday of last week to Mr. Lee Mayberry of that city for \$3000. Geraldine is by Zombro 2:11, dam Gypsy Girl by Nucleus, son of Alcazar 2:20½, second dam Rene, sister to Our Lucky 2:13½, by Rajah. 10154, third dam Dora 2:29 by Gibraltar 1:18½, fourth dam Nelly by Black Warrior 73. Geraldine was bred by Mr. M. M. Potter and at his dispersal sale in December, 1901, was sold to Mr. Desmond of Los Angeles, who in turn sold her to Mr. Coleman. She is entered in all the principal California stakes and was put in training February 1st this year. She showed a quarter in 32½ seconds last week to cart and is considered a great prospect—one of the greatest ever seen on the Los Angeles track. Although the filly is well entered in stakes in California, her new owner will probably not start her this year, but hold her over to start next year in some of the big stakes on the Grand Circuit.

Gypsy Girl, her dam, has been owned by Walter Maben for some time, and he sold her to Mr. Coleman for \$600 the same day Mr. C. sold Geraldine. She is due to foal to Zombro and will probably be bred back.

In and Around Los Angeles.

Light harness horse affairs are just booming at the Los Angeles track. Vet Kent is preparing a big string of fast ones. The fastest is his lot by record is Midnight, 2:11½. All of Kent's horses are moving nicely and looking well.

Walter Maben is as busy as a bird dog in Dakota in prairie chicken time. He has about 35 head and many of them are big game.

Will Durfee is preparing for the Colorado circuit. His string of horses is about as good looking a lot as was ever seen here. The bay colt by Peter the Great is a pacer and recently stepped a half in 1:06 going easy. Jupiter B. by Gen. Beverley, dam sister to Miss Jessie, is a cute little trotter with a lot of speed and good manners. Sweet Marie is big, stout, and sound; she is being prepared for business. Rita H. is trotting and bids fair to be as fast at that gait as she was at pacing. Petigru is being prepared for an essay against his record of 2:10½. He is the sire of a lot of fine looking colts. Durfee is training three horses for Mrs. Dr. Hastings, all the get of Sky Pointer. They are good lookers, all bays, and good actors. Willie is sweet on them.

J. H. Williams has Harrison Arms' horses, and the Limoneros are certainly showing up in great shape. Mr. Arms has just bought a car load of fine lookers here for the Chicago market. In the lot is the stallion Chantward, by Onward. These horses will start for Chicago in a few days. Mr. Arms is a good buyer. The writer offered a big figure for the white trotter Rozell, 2:17½, by Bob Mason, but could not get him. The offer was made for Mr. Arms.

I. C. Mosier is training Red Skin, Ama A., and a pacing stallion by Nutwood Wilkes, for Mr. S. S. Bailey, of Seattle. These horses are all in a fine fix and will be raced this season by Mr. Mosier.

Murray M., the colt by Hambletonian Wilkes, dam Anna Belle by Dawn is a candidate for the Occident Stake. He is going easy miles in 2:30 and is a very good looking and good headed trotter. R. Garnsey is training him at Santa Ana.

Dave Raybould worked Burnut by Neernut a mile in 2:15½ and a quarter in 30 seconds over the Santa Ana track last Thursday, the 7th. This gelding is entered in the M. & M. at Detroit, and is to be sold at Cleveland in May with Geo. W. Ford's consignment.

Geo. Beckers starts for Cleveland soon with Zombro 2:11. Zombro is making a big season.

Limonero served 35 mares here last season and has about that many booked for this season.

Mr. Miller, of Denver, has purchased The Jeater, brown stallion by Stam B. 2:11½ and will race him on the Colorado circuit. Mr. Miller sold a very hard, some chestnut mare by Allerton to Mr. Arms. This is a show mare and goes to Chicago in the Arms lot. Mr. Miller has the pacing mare Martha B. 2:09½ and she goes to the Chicago circuit.

Robert Smith is training Idlewild by McKinney for the Colorado circuit and she is trotting like a veteran. She should get a mark of 2:10 this season.

Yours,

C. A. HARRISON.

Los Angeles, April 8, 1904.

Professional Drivers Organize.

At the last meeting of the Professional Drivers' Beneficial Association of America a series of by-laws were adopted, the principal points being as follows:

Object—The elevation of the profession in general, mutual protection and relief of members, and representation in the deliberations of the American and National Trotting Associations.

Any professional driver, except colored men, may become a member, and any one who drives for a purse or stake shall be classed as a professional.

The annual dues are \$5, and a death benefit fund is established on the basis of a payment of \$3, registration fee, from each member, who in addition will be assessed \$1 each on the death of a member.

In case of accident while driving in a public race a weekly benefit of \$25 shall be paid for the first twelve weeks and \$10 per week for the succeeding fourteen weeks.

The association is incorporated under the laws of New Jersey, and its office is in Camden, N. J.

The stallion Geo. St. Clair, until recently owned at Bennington, Vermont, has been purchased by Mr. Barham of Grand Rapids, Mich., and will be taken back to Michigan for stud service. He is the sire of the sensational Grand Circuit trotter, McKinley 2:07½, and many others. Geo. St. Clair is a bay horse foaled in 1888, by Betterton 8022, dam Ill Wind by Young Jim 2009. He has a trotting record of 2:15½ and a pacing record of 2:10½.

Jackson's Napa Soda does not tangle the feet.

The Horse's Mouth.

The following very interesting and instructive article was written for the *Breeder's Gazette* by Dr. F. C. Grenside, a prominent veterinarian of New York:

If a horse has a sore mouth he manifests it in some way unpleasant to his driver or rider, but it is rarely that an examination of that organ is made in order to determine the nature and extent of the trouble. Such an examination is not difficult to make by one at all accustomed to the handling of horses and can be made as follows: Take the horse into a place in which the light is good. To examine the near side of the mouth pass the left hand into the off side of the mouth, grasp the tongue gently and pull it a little to one side of the mouth (it is not necessary to pull it out of the mouth) in order to expose the branch of the lower jaw or bar, as it is sometimes called. The thumb of the right hand should be placed in the roof of the mouth so as to separate the jaws, when the part that the mouthpiece of the bit presses on can be easily scrutinized. The other side can be examined in the same manner by using the hands in the opposite way.

The soreness, however, is not always confined to the bars of the lower jaw, the result of the pressure of the bit, for it is not infrequently found that the lining membrane of the cheeks is excoriated by the bit forcibly pressing the cheeks against the anterior grinders. This form of injury is seldom found in a horse that readily bends his head upon his neck or "gets his nose in" as it is often expressed, unless it is from the use of tight pulley-bridoon bearing rein, which is almost certain to cause it, particularly if a horse bores on it. In the majority of instances it is where a jointed or snaffle bit is used when a horse "takes hold," and in the case of one not inclined to "bend" the lining of the cheek is injured. It can be readily understood, where a jointed bit is used on a horse that does not get his nose in, that when force is exerted upon the rein it presses the cheeks directly against the teeth and we can at once realize the great liability to injury of the soft and sensitive cheeks when pressed between two hard bodies, such as an iron bit and unyielding teeth, which frequently have sharp projecting hooks and angles at the very point at which pressure is brought to bear. Horses driven with tight over-checks are particularly subject to this form of injury to the mouth, as can be understood from the explanation already given. In horses that cannot be made to get their noses in, riding or driving, and which show evidence of soreness of the mouth in the lining of the cheeks, the front grinders should be kept as smooth as possible. It is impossible for a horse to have a pleasant responsive mouth when the pressure comes upon the cheeks. Nature evidently intended the yielding lower jaw to bear the pressure of the bit with the soft and elastic tongue to aid in avoiding injury to the sensitive structure which covers the branches of that jaw. Many horses which do not bend their heads upon their necks when used with a snaffle bit can be made to get their noses in with a curb, which is consequently, when rationally used, the more humane and much more effectual in promoting style and action. Occasionally, however, one finds that a horse goes better in a snaffle than in any other kind of bit unless it is a plain, straight and ringed one.

In addition to those already referred to there are many other ill results from sore mouths, and among the more serious of these are the restless and irritable habits horses develop when being ridden or driven out of the stable, as going off with a rush, rearing, plunging and even balking. A great deal depends upon the sensitiveness of the individual as to the manner in which he shows his restiveness and irritability when with a sore mouth again facing the bit. A horse of a cool, mild temperament may do nothing but show a hesitation in going into the bit and if in double harness hang back for a time, or he will not go up with his mate. Others will go sideways, cross their jaws, press on one side of the bit or toss their heads in an irritable manner that makes it almost impossible to guide them. High-strung nervous determined horses may show their irritability in the more dangerous manner of rushing, plunging or rearing. Drivers of horses are sometimes very much astonished to find a previously well-mannered horse go off with a rush, rear or plunge, but it is remarkable how seldom they think of looking to the mouth to find out the cause for the unexpected display of ill manners, when in the majority of instances it is to be found there. Even when the lips are tinged with blood from the injured lining membrane it is seldom that an examination is made to determine the extent of the injury. Frequently when an injury to the mouth is pointed out to an owner it is thought lightly of, the extreme sensitiveness of that organ not being realized.

Pinches, abrasions and cracks about the commissures of the lips usually attract attention because

they are easily observed, but they really, as a rule, do not cause nearly the amount of irritation and pain that an internal injury to the mouth does and they are easily prevented by the use of a circular leather cheek piece on the bit. Some horses that show a disinclination to go into the bit for the first mile or two after a time begin to pull and the further they are driven the more they pull. This is usually the result of a sore mouth and I frequently have had to remove small portions of bone detached from the jaw by the extreme pressure of the bit. Bad "side-liners" are caused by a chipped jaw or else an extensive excoriation of the soft tissue on one side of the mouth where the bit exerts its pressure. In the healing up of such injuries the tissue with which Nature repairs the breach seldom seems to attain the ability to stand the pressure of the bit to the same extent that one not so severely injured does. The fact that such permanent ill effects are apt to follow injuries to the mouth from the bit should cause the exercise of due care when there is any evidence of soreness. Certainly high-couraged ambitious horses are predisposed to injuries of the mouth, but they can be largely guarded against by the exercise of care, and it is very important never to disregard "soreness," however slight.

There is probably no animal in which a bad habit is more apt to become confirmed than the horse, and these restless, irritable habits he is liable to develop on leaving the stable are among the most disagreeable. Some horses do not what is called "settle down" when first driven out, but either prance, hop or canter for a varying distance. This is generally accounted for by the owner as being evidence that the animal in question is feeling too well, or in other words is suffering from an exuberance of spirits. This may be the cause, but in the large majority of cases it is attributable to uneasiness in connection with the mouth. Sometimes this discomfort may not be the result of absolute soreness, as a change of bit may cause it. I have noticed it in an otherwise well broken horse where a curb bit is first substituted for a snaffle, particularly if it is placed too low in the mouth and if, as very often happens, the tongue is put over it, in which case a horse is very unlikely to go steadily, and his mouth is almost sure to get sore in a very short time.

I have found the placing of the bit in a horse's mouth a very important matter in influencing his manner of going. Some horsemen say there is one proper position for a bit in a horse's mouth and that it should always be placed there. My experience is that this is best determined by experiment with each individual, and one can tell by driving or riding a horse a few minutes as to where the bit should be placed in his mouth. I have found it best to place it rather high at first, particularly when changing to a curb bit, but if he keeps his tongue under it and does not respond readily to pressure lower it as much as he will stand without showing restlessness. The lower the bit in the mouth, within certain limits, the better, providing the horse will keep his tongue under it and not fuss with it and face it with a reasonable degree of firmness.

How frequently we see horses go off their feet when going well within their speed at the trot. Sometimes this is the result of excitability, but in nine cases out of ten it is due to a feeling of discomfort or want of confidence in connection with the mouth. Very often this is caused by the arrangement of the curb in giving too much leverage, especially if the hands of the driver are not good. Some horses that go unsteadily with the rein in the bar will go much better in the half-check or it may be in the plain check, but very often the breaking from the trot is due to an injured mouth. I have known horse owners endeavor to overcome this tendency to breaking by giving long drives, and fatigue will temporarily overcome it as a rule, but I have seen horses almost jaded go unsteadily. This tendency can usually be overcome in a moderately worked horse if the biting is made comfortable for him and the soreness of the mouth relieved.

Among the exciting causes of "interfering" soreness of the mouth is by no means an uncommon one and I have frequently observed it occurring even in well broken horses when a change of bit, particularly to a severe one, had produced some injury to the mouth. Fatigue, bad shoeing, rough or slippery roads and the swaying of a heavy two wheeler are all exciting causes of "striking," but I am of the opinion that the awkwardness arising from an imperfectly made (not thoroughly bitted) mouth, with the incidental soreness, is an important factor.

Driving green horses in double harness is a very fertile cause of sore mouths. There are undoubtedly advantages in handling green horses in double harness, particularly shy nervous ones as the broke horse inspires confidence in the green one and he is more easily controlled if badly frightened, but one

can make more rapid progress in making a mouth in single harness or in the saddle than in double harness, for the opportunity of humoring it is better and there is only one temper to consider. Trainers of green horses usually change the side horses are driven on every day, which is a good plan, as it tends to make them drive straight, but it is a tacit acknowledgment that there is more or less soreness of the mouth.

If the mouth is bruised or excoriated on the portion of the bars of the lower jaw where the bit presses, keep the bit out of it if possible until it heals. This need not prevent the horse being exercised, for if a suitable place is available he can be lunged a sufficient time daily to keep him in condition and under control. The lunging line can be buckled in the noseband of the halter and no bit need be used. If a suitable place for lunging is not available and it is necessary to lead the horse alongside of another that is ridden, it can be done without the use of a bit by using a tightly applied standing martingale, made with a head piece and attached to a girth that is kept in its place by a crupper. The lead line should be attached to the noseband of the headstall. In some instances by changing to a bit that exerts its pressure so as not to interfere with the sore part will answer as, for instance, the substitution of a snaffle for a Liverpool, but in most instances it is better to keep the bit out of the mouth altogether until it heals. When the mouth is sufficiently healed to stand the pressure of the bit again it is a very necessary precaution before driving for the first few times to take the sharp edge off the spirit of the horse by lunging him so that the sore part will not be so likely to be reinjured by the animal "taking hold."

It is well to emphasize what has already been stated, that the front grinders should be kept in condition, so that they can inflict no injury to the cheeks, by having them thoroughly beveled or rounded off with the tooth rasp. This does no harm, providing it is done in a rational way and is frequently of much benefit in preventing injury to the lining of the cheeks.

The Season for Hoof Troubles.

At the opening of the spring season the hoofs of horses are grown out to an extent far greater than good judgment and good care should permit. These are circumstances of a controllable character, however, and are responsible for the condition of horses' feet and were it only a matter of growth that the horse and horse owner should feel concerned about it would be very easy to forget, but that is the least of the ills. Following in the wake of overgrowth is disease and there is one particular form of disease which plays havoc with the foot of the horse and which makes its appearance at this particular time of the year more than any other.

In the discussion which is now being had on the subject of "What is the most prolific cause of corn," many writers attribute the cause to overgrowth. In part this is true, but the lodgment of foreign substances between the shoe and hoof is the cause of a most aggravated form of the disease which frequently finds its way to the living parts of the foot and not infrequently causes quittor. The moisture of the spring is constant, likewise the abundance of filth which is picked up by the shoe and lodges between it and the sole, with the outer wall as an additional guard to keep it in place until removed at the time of shoeing. Unless the greatest care is taken by the horseshoer to prevent the possibility of quittor arising as a result of this lodgment it may be expected.

Quittor is not to be feared so much in the case where a foot is free from the disease of corn, but when corn is present there is a separation seen between the insensitive sole and wall which allows the foreign matter to become located in the separated portion and gradually, through the movement of the animal, it works its way up into the living parts of the foot with the result as stated. It is therefore absolutely necessary that additional care be taken by the horseshoer to prevent the possibility of this disease arising, and as a preventative the following means are suggested:

Dress the hoof down as low as good judgment will permit, remove all dead portions of the sole and in case of corn being present cut cautiously into it with a knife suitable for the purpose of cleaning out any possible lodgment which may be seen between the sole and wall. After the part is thoroughly cleansed with the knife this part should, before the shoe is adjusted be filled with salve made up of equal parts of shoemaker's beeswax and one-half part of mutton tallow, which being melted together should be poured while hot into the heel. This forms a covering which will prevent any foreign substance finding the lodging place after the horse has been put to use and thereby relieve corn and prevent further trouble. As a further preventative the sole should be covered with a leather or rubber pad underneath which a layer of oakum and pine tar should be placed.—*Horseshoers' Journal*.

Notes and News.

Breeders meeting goes to Santa Rosa.

There will be \$13,500 distributed in stakes.

It will be the greatest meeting held in California for years.

Ted Hayes worked his green pacer a mile in 2:15 at Pleasanton one day last week.

The next inter-city matinee held by the League of Amateur Driving Clubs will be at Cleveland.

A proposition has been made to duplicate the program and hold a second meeting at Santa Rosa.

The directors of the State Agricultural Society will meet in a few days and arrange the program of harness races for the State Fair this year.

A half dozen condemned artillery horses were sold at the Presidio one day last week. The highest price obtained was \$75, and the average for the six was \$54.

Robert Garside is the owner of a two-year-old trotting filly by McKinney 2:11½, dam by Boodle 2:12½ that Charley Whitehead is training at the Salinas track.

Real the advertisement of the stakes offered for Seattle's big meeting. They are something new and novel for this coast. The harness racing at Seattle will be dashes.

Geo. T. Beckers will leave Los Angeles May 1st for Cleveland with his stallion Zombro 2:11, Tee Dee Cee 2:19½, Zimbowette 2:18½ and a yearling brother to Zombretta 2:22.

Says the Salinas Journal: The horses in training at the Salinas race track are all doing well in their work, and it is a subject of remark that these has not been a sick or lame horse at the track all winter.

The San Jose track, always one of the very best on the Pacific Coast, is in better shape than ever this year and is good from fence to fence all the way round. About seventy-five horses are being worked there.

Lady Jones, the filly by Capt. Jones, that John Pender is training at Pleasanton, stepped a quarter a shade better than 32 seconds at that track last Saturday. She is owned by Dr. Froom, of Portland, Oregon.

Tony Bernal's handsome big trotter by Charles Derby that J. M. Alviso is training at Pleasanton, is one of the best gaited and most promising green horses at that track. Alviso worked him a half in 1:07 recently.

Chas. Whitehead is giving first lessons at Salinas track to a nice two-year-old filly by McKinney 2:11½, dam Alberta by Altoona 8850, son of Almont 33. She is a good gaited trotter and is the property of Worthington Parsons.

Colonel Charles H. Page, formerly a member of the board of review of the National Trotting Association and well known to turfmen throughout the country died at Philadelphia April 10th of heart disease aged seventy years.

W. H. Shields, of New York, is now driving the bay gelding Col. Benton 2:14 on the road, and it is said the old fellow can hold his own in a brush with some of the best of them. He won four straight brushes the other day.

The Fresno Driving Club is agitating the question of giving a first class race meeting, and making a link in the California circuit. An announcement of purses and stakes will doubtless be made soon and the program will be arranged to accommodate all classes.

S. S. Stiles and Geo. Stickle sent three mares by Silver Bow 2:16 up to the Santa Rosa Stock Farm this week, where they will be bred to Sidney Dillon. The foals resulting will be closely related to the champion trotting stallion and the champion trotting mare of the world.

The mare Sallie Brooks 2:22½ was bred to Zombro 2:11 last year and nominated in the Pacific Breeders Futurity No. 4. She foaled on the 6th inst. a brown or bay colt that shows enough fine form and temperament to reach the quality of his great sire. Sallie Brooks is owned by Mr. M. L. Lusk of Sacramento.

Egletta 2:11½ that won the seven heat race at Woodland in 1902 as a four-year-old, and proved herself one of the gamest and fastest of the pacers out that year, is going faster than ever this spring and as she is sound as a dollar should be a winner in her class this year. She will go to the Blue Ribbon sale at Cleveland in May.

John Bradburn, for twenty-five years superintendent of Village Farm, the greatest trotting horse breeding establishment in America, will soon publish a volume which should be a text book on the breeding and development of the light harness horse. Chapters include "The Starting of a Stock Farm," "The Selection of a Broodmare," "The Selection of a Stallion," "Care of the Weanling," "The Development of the Yearling," "Leading Colts," "Shoeing," with plates showing the advancement of the art, etc.

Herbert E. Coil of Woodland has been appointed a member of the State Board of Agriculture. Mr. Coil is a native son of this State, a man of standing integrity and good judgment, and is a breeder of cattle and horses. He owns one of the finest ranches in Yolo county which is under a high state of cultivation. He will make an active and excellent member of the Board.

Mr. C. A. Durfee took his coal black three-year-old mare Ragsy by McKinney to Pleasanton last Saturday and left her with Ed Mills to be bred to that gentleman's coal black stallion Leeco 2:09½. Mr. Durfee says that he expects the produce of this union to make a black streak around the track in about two minutes when it is matured.

There will be about thirty entries for the M. & M., when all the returns are in, showing that the abolition of the substitution clause was popular with the horsemen as there were but fifteen entries last year. The list of entries has not yet reached us but Italia by Zombro and Stanley Dillon by Sidney Dillon are among those named for the race.

J. W. Johnston of Stockton has purchased from Singmaster & Sons from their branch at San Jose, one of the finest coach stallions on this coast. He is a seal brown without any white. The purchase price was \$2000. Mr. Johnston purchased the Percheron stallion Sultan one year ago that is a magnificent horse, and he is doing as much as anyone to improve the stock of his county.

Mr. A. B. Byrant, of Alton, Humboldt county, has purchased, through an advertisement in the BREEDER AND SPORTSMAN from Mr. C. E. Humbert, of Cloverdale, Sonoma county, the handsome five-year-old Percheron stallion Almont. This horse is a coal black, and is registered in the Percheron stud book, his number being 25,539. Almont will be a valuable addition to the breeding ranks of Humboldt county.

Fred Hahn of this city says the winner of the Breeders Futurity No. 4 was dropped at his place in Emeryville on the 14th inst. She is a light bay filly with star and is by Nutwood Wilkes 2:16½, dam Annie H by McKinney 2:11½, second dam Henrietta by Boodle 2:12½. The filly is a fine looker and a trotter. Fred says he will take fifty per cent of first money in the stake and stay out, but no less.

A Fresno correspondent writes that there are about thirty head of horses in training at the track there. C. E. Clark has ten or twelve, all green ones. Mr. Walton is training seven, the good pacer Jonesa Basler 2:11½ being his only record horse. Trainer Middleton has eight head. George 2:16½ is his fastest horse. Sangster has three head and Depoister two, all of which are without records. The track is in fine shape and the prospects are for a very prosperous season.

P. J. Williams is anxious for the associations to offer a good purse for trotters of the free for all class this year, as he would like to start Monterey 2:09½. The horse is making a good season in the stud but Mr. Williams is confident he can get him ready to step for the money and don't object to starting against anything that wears hair and trots. A free for all trot would be quite a drawing card. California associations should have a free for all trot and a free for all pace on their programs every year.

Hopper 2:17½ by McKinney, dam Cricket 2:10 by Steinway, is a great trotter this year. He has been in Monroe Salisbury's string at Pleasanton for a few weeks, and last Saturday his owner, Mr. H. W. Meek, went to Pleasanton to see him step, the idea being to see if he would do to go east. Charley De Ryder drove him a mile, handily in 2:12½, and when he called on him about fifty feet from the wire, Hopper showed a burst of speed that made the spectators think he had been loafing the previous part of the mile.

Horse breeders in Southern California should not overlook the Ferndale Ranch stallions at Santa Paula. There are five stallions standing for public service there, viz.: Longworth 2:19 by Sidney, Sable Czar by Sable Wilkes, Ringwood by Sidney, San Miguel by Longworth, and the white and spotted horse Mahomet by Longworth out of a mare by an Arabian horse. Longworth is bred much like Sidney Dillon and is a sire of extreme speed, having three in the 2:15 list, including Alfred D. 2:11½, A. C. 2:12½, El Moro 2:13½ and others. Sable Czar is a fine looker, of high carriage and style and his breeding is first class. Ringwood is also bred much like Sidney Dillon and is a splendid individual. All these horses are standing at a low figure considering their breeding and other good qualities.

The biggest race day of the year in California is the one given by the Butchers Board of Trade at Emeryville race track every year. The date this year is Wednesday, May 18th, and there will be twenty thousand of the butchers and their friends there to see the sport. All sorts of racing will be provided—trotting, pacing, and running races for horses and also a race for mules to cart. There will be races for butchers to drive and others for anybody, professional or otherwise. In the running races the starters will be horses now appearing at the regular meeting of the California Jockey Club at Oakland. Entries to the races close May 13th. The first race of the day will be called at noon as the program is a long one. J. M. Gilbert is Secretary and his office is 424 or 414 Pine street. Read the advertisement in another column. The program of races and all particulars are there given.

Kenney, the kikeman, has been so busy this week that he has not had time to rest. He has been selling bikes and speed carts right and left, and he says he thinks everybody in the country is buying a trotter. He sold a McMurray speed cart to R. Flaherty and another to Joe Evistor, both of this city. He received six new McMurray carts from the East this week, three road carts and three speed carts. Call in and see them at 531 Valencia street.

One of the sweetest gaited and most promising trotters we have seen for some time is the black mare Redruff by Chas. Derby. She is owned by F. Hahn of Emeryville and is being driven some by that gentleman, who will doubtless race her next season. She is out of Nelly Emoline by Leo Corbett 2:36½ second dam Chick by Whippleton 1883, third dam Daisy Star by Ulster Chief 18,011, fourth dam by Young Argyle, thoroughbred.

Egletta 2:11½ has been consigned to the Blue Ribbon sale by her owner, Dr. C. Edgar Smith of Los Angeles. She is one of the fastest pacers in California and can lower her record several seconds. She was the second largest money winner of the California pacers in 1902. Egletta is a great bred one, being by Ketchum 2:16½, dam Lady Mack by McKinney 2:11½, second dam by Othello, son of Sultan, third dam by Col. Hawkins 2:23 son of Echo. Vet Kent will go East with Egletta and they will be in the same car with Geo. T. Beckers and Zombro.

Victor Verilhac of this city, who recently purchased the pacer Harry Hurst 2:14½ by Delwin from Mr. A. T. Van De Vanter of Seattle, went down to San Jose last Saturday to drive him out a mile for the first time since he purchased the chestnut pacer. Jack Groom has him in charge and had him in good shape. Mr. Verilhac stepped him a mile in 2:22 and then broke the track record for this year by repeating him in 2:15½, trying to take him back and calling "whoa" nearly all the way. Harry Hurst will make it lively for some of them in the Golden Gate Park Driving Club races May 30th at Ingleside.

Capt. N. P. Batchelder, of this city, received a letter from the Santa Rita farm, near Pleasanton, last week, stating that his great brood mare Luella by Nutwood has foaled on April 6th a fine and very large strong colt by Monterey 2:09½ that was a trotter as soon as it saw daylight. Luella is now twenty-three years of age, but looks as if she was about half that. She is the dam of Prince Nutwood 2:12½, and Myrtle 2:13½, the latter the dam of the very fast mare Rohizola 2:12½ that Millard Sanders campaigned in the east last year. Luella's last foal was still born and was by McKinney, the year before she had a foal by Sidmore which died, and it is to be hoped this son of Monterey will have good luck and thrive. The old mare will be bred to Stam B 2:11½ this year.

Practical investigation to determine the exact composition of the loco weed, which is the cause of much worry and expense to horsemen throughout the West, and to detect the cause of its poisonous effects upon animals, will be undertaken early in May by Dr. H. H. True of the Bureau of Plant Industry of the Department of Agriculture, who is now in Denver. In conjunction with Professor W. L. Caryle of the Colorado experiment station at Fort Collins, and Secretary Johnson of the Colorado Cattle and Horse Growers' Association, Dr. True and his force of experts from Washington will make a thorough investigation and report upon the effect of the plant upon different animals. From experiments already undertaken it is believed that the loco weed is without serious effect upon sheep.

One of the most important sales made in California for some time was consummated at Pleasanton last week when Mr. J. D. Springer of that place became the owner of the mare Sonoma Girl by Linwood Wilkes, dam Maud Fowler 2:21½, second dam Eveline (dam of Roblet 2:12, Tietam 2:19 and Maud Fowler 2:21½) by Nutwood 600. The price is not given out by the parties to the sale but there are reports that it is somewhere between \$5000 and \$10,000. Sonoma Girl is one of the greatest prospects for a 2:05 trotter that has been seen at Pleasanton for some time. She was bred by Judge S. K. Dougherty of Santa Rosa, and was trained some last year but not raced. She went into Ed Mills' hands this spring and it is told that she recently negotiated a quarter a shade better than 30 seconds. She is gaited very much like her sire and but for an injury he would have been a 2:10 trotter to a certainty. Sonoma Girl is entered in the California Stake for 2:24 class trotters to be decided at the Breeders meeting at San Jose in August, but as Mr. Springer intends to race his horses over East this year she will probably not start in this State.

John Splan was talking about Kinney Lou to the editor of the Western Horseman at Indianapolis the other day and this is what he said: "There never was another such trotter foaled. He never had work enough to fit him for a repeat in 2:20, as trotters are usually trained, and no horse can accomplish what he has accomplished unless he had good, easy two minute capacity if fitted for it, and I do not believe that the stallion lives who has the two-minute mark so completely at his mercy as has Kinney Lou. With the same kind of training—not kept raced off of edge—Kinney Lou is not far from the Lou Dillon class, and if any wealthy gentleman wants glory of the Billings brand, and more of it, if he could secure Kinney Lou, and give the preparation, he would not have to wait long for the glory—and the fastest trotting stallion in the world. Why, I drove the runner along with Kinney Lou for Doble at Cleveland last summer a few times, just before the Cleveland meeting, and I never have seen any trotter, green nor tried out, that could step any quarter, first, middle or last, in 30 seconds with the comquerer ease with which Kinney Lou could do it."

San Jose Track Items.

Between seventy-five and a hundred horses are now being worked at this track which was never in better shape than it has been since the big rain storms of March ended. The surface is worked its entire width and there is not a bad spot any place in the entire mile.

John Phippen has fourteen head belonging to various owners, among them a chestnut pacer by Nutwood Wilkes that is the property of Capt. Williams, of Palo Alto. This pacer moves and acts like the real goods and though but three years old is a large handsome colt. Mr. Phippen says that Henry Hahn's eleven-months-old colt Bendocino by Mendocino, dam Sally Benton, is undoubtedly the best and most promising colt of his age he ever sat behind, and he handled nearly all of the best ones bred at the famous Palo Alto Farm. He also says this colt is the best city broke horse he has in his stables, and he is not afraid of anything from automobiles to steam cars. Bendocino is a natural trotter with speed of a high order.

John Gordon drove his Diahlo gelding a mile in 2:40 last Saturday when the writer was there, but this was not fast enough to get much of a line on the horse that is said to be a 2:15 or better trotter. He has considerable action, and marches out in a straight line as if he meant business. All the boys at the track think very highly of him. Mr. Gordon's stallion Silver Arrow by Silver Bow is one of the very best bred horses to be found anywhere and is looking to be in fine order.

Mr. Frank H. Burke, of San Francisco, found time to visit the track Saturday and drove his four-year-old McKinney Search Me his first mile inside of three minutes this year. The mile was in 2:41, and the horse looks better than he did last season. Wanda's three-year-old by McKinney is called Wanda II and to my mind is the best looking of all her foals, although Mrs. Burke insists that she is not as handsome as the Roman 2:09½, her full brother. She is a more rugged looking trotter and here's a prediction that she beats The Roman's present record if nothing unfortunate occurs in the way of accidents, sickness, etc. The day of the flower fete last week old Wanda was all decked out in pink and was in the parade. They say she outlooked most of them.

W. H. Williams has a small string of horses at the track, several of which are good prospects. He has the stallion Signal Wood in the stud. This is a big fellow, about seventeen hands high and weighing 1400 pounds. He is registered and is by Signal Wilkes (son of Guy Wilkes and Lady Signal) and his dam is Mignonette by Antelope, he by Nutwood, and Mignonette's dam was by Nutwood. Signal Wood is a grand looker and should be a sire of carriage horses, as he has style and action in the superlative degree.

Jack Groom reached San Jose last week with a string of six and there are four green pacers among them that are pretty slick goods. They will be heard from. The big trotter Liege 2:12½, owned by Mr. White of Washington, never looked better than he does right now and he ought to be in evidence when the money is paid out in the 2:12 class this year. He is a four-year-old by Nutwood Wilkes, dam by Direct Line, the property of W. Ford Thomas of this city, that makes visitors stop and ask about him.

Joe Cuicello has quite a string and will take a bunch of them to the Colorado circuit and then come back to California in time to race here. Mr. Coffin of this city, who has several horses in Cuicello's charge, was down Saturday and drove some of them himself. Mr. Coffin is a good reinsman and likes the sport of driving fast ones. His big mare, full sister to Klatawah 2:05½, is looking like 2:10. She is a very smooth going pacer.

Hans Frellson has a string of trotters and pacers, headed by F. Gomet's good son of Electioneer, Alta Vela 2:11½. This horse will make quite a season in the stud and there is no horse in California that has a purer trotting gait than he.

C. A. Durfee is beginning to give slow work to Almaden 2:22½, winner of last year's two-year-old division of the Breeders Futurity, and he is without doubt one of the handsomest three-year-olds in California. He could have beaten 2:20 last year very easily and is a trotter from the old town. He is such a handsome little fellow that everybody falls in love with him on sight. The two-year-old McKinney out of the famous old broodmare Elsie by Gen. Benton is to my mind about the handsomest and best proportioned young McKinney I ever saw, and there was never a better bred one. He is a square trotter, too, natural and easy and fast. Mr. Durfee has in him a successor to the old horse that will be right in the front rank before long.

Budd Doble spends a good part of his time at the track. His stallion Kinney Lou looks like a different horse from last year and is as smooth and round as

a newly varnished harrel. Kinney Lou is getting some splendid mares and will make quite a season. Doble has a four-year-old McKinney stallion that is out of a Dexter Prince mare that is a swell looker and one of the richest dark hays one ever saw.

William Cecil is handling quite a string of youngsters for Martin Carter and has several others besides. He has a three-year-old filly by McKinney from a Nutwood Wilkes mare that is owned by Mr. Mowry of Mowry Station. This filly in thirty days work began to step so that she trotted a quarter in 34½ seconds. She is a swift one. Cecil is working Mr. Carter's pride T. C. easily and the stallion is going "awful good" as one of the boys said. He trotted a quarter in 34 seconds Saturday and seemed to be taking things very easy. A grey filly owned by Judge W. E. Greene, and a full sister to the very promising grey two-year-old that Monroe Salisbury is training, is a likely miss, but she is not the powerful strong thing the colt is. She is as fine as a thoroughbred, but a good gaited one.

Mr. T. W. Barstow may be cleaned out of horses soon, the way he is being besieged with letters and proposals for his fast pacers Alone 2:09½ and the two-year-old Just It. He has received some big offers for both these flyers. There is not a particle of doubt in the mind of any unprejudiced horseman but his stallion Nearest 2:22, own brother to John A. McKerron 2:04½, is bound to be one of the greatest sires of speed with reasonable opportunities. He is a grand big horse.

Other owners who are represented at San Jose are F. F. Hoffman of Colorado, O. J. Holmes of Stockton, C. E. Dowling of Santa Cruz, H. Scott, owner of Scott McKinney, and Mr. Baker, who has that splendid stallion Red Nuttle there, and doing a good season with him.

What Lou Dillon Is Doing.

"Marque" writes from Memphis to the *Hors Review* as follows about the champion trotter:

"Lou Dillon is just at present putting a few gray hairs into Millard Sanders' head. Not that Millard is displeased with her actions, but rather because he fears that the capers she cuts may sometime cause her an injury. Never was there such a combination of wildfire and docility put up in one bundle as is found in Lou Dillon. When I reached the track last Monday morning Henry Bailey, her caretaker, was riding her with a halter and she seemed as gentle as any old saddle mare carrying a country parson. Occasionally Henry would jig the halter, making her break into as pretty a rack as could be shown by a 'high school' saddler. Every morning Henry rides her four miles, after which she is harnessed, and then Millard is made to lead the "life strenuous." Once on the track Lou begins a series of attempts to get away, fighting for her head, buck-jumping, and doing about every stunt recognized in the repertoire of a well-organized western bronco—except kicking; that she never does. To see her then would cause one unacquainted with her capricious ways to believe that she was the worst spoiled mare in America. Sometimes she is given her head and then for a short distance she fairly skims on the trot; but so far she hasn't even been turned the right way of the track. Speaking of Lou's capers, Millard said that while she makes him a trifle nervous he was glad on first hitching her up this astring to find all of the old fire and temper left in her. "Had she been docile and well mannered my experience with others of her kind would have led me to fear that the record-breaking quality had gone out with her dash and spirit," said he.

Tommy Waugh, who cared for Lou so faithfully last season, has quit the trotters and is now a traveling salesman. Henry Bailey, who now has her, first cared for her in California in 1902; last season he had Feren 2:05½. He is an excellent care-taker.

Lou has changed greatly since last May when purchased by Mr. Billings. The clip she went last season could do but one of two things to one of her tender years—break her down or build up her tissue and structure. It did the latter. Her filly-like appearance of a year ago has given way to noticeable development "from end to end," and particularly in her hind quarters.

Late last season a few very small puffs appeared on her front ankles, but these have now entirely disappeared, her legs showing no sign whatever of the awful clip she went. I have often thought that Millard Sanders was necessary to the success of the mare, and after seeing her going through the "breaking process" again, I believe it more firmly than ever. Mark 1:55 on your stable door for Lou this season.

It is said that the Kentucky Futurity received nearly one thousand entries and the American Horse Breeders' futurity close to six hundred. Colt stakes are retaining all their popularity.

Directors Sued.

The California State Bank has brought suit in the Superior Court against A. B. Spreckels, J. W. Wilson, A. W. Barrett, D. E. Knight, Frederick Cox, Frank Covey and Grove L. Johnson to recover \$7110, with interest at 6 per cent from January 1, 1903.

The note was given by the defendants, all of whom were, and some of whom now are, Directors of the State Agricultural Society, in April 1899, to tide the Society over a period of financial difficulty. The defendants assumed the personal responsibility for the return of the money advanced by the bank and the bringing of the suit is simply a precaution of the bank to save all its rights in the matter as it does not fear that the note will not be paid.

As the *Sacramento Bee* says: The obligation was incurred by public-spirited citizens of the State, who were serving as Directors without compensation, to carry one of the State's most important departments over a trying period in the history of its finances, and is a case in which individuals stood sponsor for the Commonwealth.

It is believed at the next session of the Legislature an appropriation will be made enabling the Directors to discharge the States obligation.

Natural Trotters.

There is no question that the way to breed trotters is by mating trotters with trotters, and in addition strictly adhering to the sound principle that good individuality can only be obtained uniformly by using nothing but the best as regards conformation and soundness, says the "Stock Farm." Colt trotters that possessed great speed at the very beginning of their education and were forced to their utmost before they were developed are of a kind that will reproduce themselves, for the fact that they possessed speed at an early age and did methods to possessed speed at an early age and did methods to develop it, proved that they were natural trotters, and the natural trotter will reproduce himself with greater regularity than the artificial trotter or one that requires the help of his trainer for him to put his feet in the right place or to properly exert himself.

Natural trotters are extremely rare, for while many are brought to a state nearing perfection through constant training, few are to be found that can do everything that is expected of a trotter as soon as they are bridled. One of the most remarkable examples of the natural trotter that has ever been seen was the filly by Ponce de Leon that was afterwards sold for a very large price, which was in the stable belonging to the estate of the late Marcus Daly, and which afterwards became known as Miss Previous. This filly on the first time of asking trotted a quarter in thirty-five seconds, and this without any preparation other than education, which is commonly called breaking, and without more than a dozen lessons in harness she trotted a quarter in thirty-three seconds, and all in her yearling form. It is this natural speed and perfect action that is found only in very great trotters, and whether or not this filly becomes famous, her failure to do so will not result from a lack of capacity on her part, or as a yearling she possessed every quality that is essential in a great race mare and need improve but little each year to be the best of her class.

The present champion, Lou Dillon, has always been a natural trotter, although a somewhat wilful one, for no amount of schooling could make a defective trotter into the perfect piece of machinery that she now is. Arion was another natural trotter and a very great one, and it is this fact that must convince every one that if given the proper opportunities he will reproduce himself, if he does not sire one that will be his superior. Dr. McCoy's theory that any trotter possessed of extraordinary capacity will meet with greater success in the stud if he is never severely taxed, or, in fact, given even the preparation necessary for racing, has been followed successfully among breeders of thoroughbreds in England. The late Lord Falmouth, the most successful breeder that ever lived in any country, as soon as he discovered that his fillies possessed stake form, relegated them to the stud, and no matter how great was their promise or racing, he considered that their class or merit was of more value to him for breeding purposes than for racing. Many men assume that a fast record is proof enough that a stallion or mare will be successful in the stud, unmindful of the fact that fast records are frequently obtained only after excessive training, which must necessarily sap the vitality of the horse himself, and that a horse like Admiral Dewey, which raced but little, and consequently received but little training, while his record is not a fast one, is more valuable for breeding purposes than if he had obtained a record of 2:05 after several years of extreme effort, for the stallion possesses capacity enough to trot a mile in 2:05 and his vitalities have never been taxed in the effort to do so. Great colt trotters or colts of great natural ability will be the successful sires of the future; in fact, they are such already, and wherever they are found coming for several generations of the same material, their success is all the more readily assured.—*Rural World*.

Eastern Gossip.

[COLLED FROM OUR EXCHANGES.]

Young trotting stallions of gilt-edged breeding are in demand these days. An offer of \$10,000 was made and refused, a few days ago, for the three-year-old colt, Vice Commodore, owned at Forbes Farm, Ponkapog, Mass. The youngster was sired by Bingen, 2:09 $\frac{3}{4}$, dam Narion, sister to Lord Roberts, by Arion, 2:07 $\frac{3}{4}$, second dam Nancy Hanks, 2:04, by Happy Medium.

Senator Horace White, of Syracuse, who is one of the most prominent amateur drivers in the country, believes in having his horses in good shape when he scores down for the world. The Senator is to send Miss Whitney, 2:07 $\frac{1}{2}$; Sallie Hook, 2:09; Sylvia, 2:23 $\frac{1}{2}$; and Willow Belle, 2:29 $\frac{1}{2}$, to the covered track at Jewettville, where they will be put in racing condition.

Word comes from the Village Farm that the Corker, always a fast horse, by Rex Americus, is going sound, so far, in his work, and is very fast. Ed Geers said a year or so ago that The Corker would beat 2:10 the very first time he took the word.

Four McKinneys, all of them good ones, are in training at Memphis. The Tont, 2:23 $\frac{1}{4}$, trotting, has already been miles in 2:12; Marengo King, it is said, can trot in 2:15; China Maid, pacer, was miles last year faster than 2:06, and is said to be faster than ever this spring, and Trainer Roth has The Roman, 2:09 $\frac{1}{2}$, in good shape and going good.

C. K. G. Billings dropped into town the latter part of the week on his way to New York from California, where he has had a most pleasant visit. He took a ride behind Sir Albert S., 2:03 $\frac{3}{4}$, and Prince of Orange, 2:06 $\frac{1}{2}$, with Doc Tanner, and seemed well pleased with the general appearance of all of his horses.

Bouncer, 2:09, the fastest daughter of Hummer, failed to get in foal last season, and she is now being jogged preparatory to being sent to W. J. Andrews, who will get her ready to reduce her record. Cherry Lass, 2:24 $\frac{1}{4}$, by Bobby McGregor, out of the dam of King Direct, 2:09 $\frac{1}{4}$, that has been timed in 2:06 $\frac{3}{4}$ in a race, will also be placed in Andrews' stable, as will Double Z., 2:19 $\frac{1}{4}$.

Gil Curry, 2:09 $\frac{1}{4}$, the noted gray pacer owned in Boston, is a victim of glanders and is to be killed. He is 17 years old, and first came into prominence in 1895, when Joe Mooney was winning races with him. He made his record ten years ago, but last winter he was able to hold his own in brushes over the snow around Boston.

"Marque" describes Stanley Dillon as follows: "Stanley Dillon is a big horse—standing full 16 hands and is built on rugged lines. Milard Sanders broke him last January and before bringing him to the May sale at Cleveland, where he was sold, worked him a mile in 2:15. Afterwards Frank Cares stepped him a mile in 2:13 $\frac{1}{4}$. No one could call Stanley Dillon a handsome horse, particularly because of his sharp, projecting coupling and rather low back. Leaving looks aside, he is, however, a powerful horse throughout, with a whole lot of substance and a large place to carry his victuals. He wears quite an outfit of hoots and when at speed gives the impression that he could trot through a stone wall. He has a bull-dog look about his head and trots with his legs well under him, but hits the ground very hard with his front feet. Murray Howe says that Stanley Dillon reminds him very much of the trotter Owyhee 2:11, both in gait and build. Mr. Geers has the horse under perfect control at all times, taking him back or pulling him out to one side without changing his gait or taking a strong hold of the iron. I would like the Dillon horse better if he didn't hit the ground so hard in front. Still, to offset this he has large feet of good quality and the best of front legs.

China Maid, the green pacer mare by McKinney, 2:11 $\frac{1}{4}$, owned and trained by J. M. Nelson, is one of the much-watched things of the track. She is a peculiarly-gaited mare, but very oily and very fast. She can do a quarter in 32 seconds with an eighth in 15 and not appear to be at all interested or busy. I believe she is charged with a mile in 2:05 $\frac{1}{4}$ last season. Nelson will stake her down the big ring.

From the way the consignment of carriage horses offered at the American Horse Exchange, by M. H. Tichenor & Co., of Chicago, sold last Wednesday night, the indications are that the market is in a healthy and prosperous condition. Twelve head sold for an average of \$1,235, one team fetched \$3,500, and a black gelding brought \$2,000.

A. A. McDonald will endeavor to make a race horse of Oxford Chimes 2:13 $\frac{1}{2}$, the erratic brother of The Monk 2:05 $\frac{3}{4}$.

At the Tranter-Kenney sale of trotters and pacers held in Lexington, Ky., late in March, the best price was \$2,100 paid for Neva Simmons, 2:11 $\frac{1}{4}$, by Simmons, 2:28. The best price for a youngster was \$495 paid for the two-year-old Usher by Arion, 2:07 $\frac{3}{4}$, dam by Bow Bells, 2:19 $\frac{1}{4}$. Col. Patrick, five years, by The Conqueror, dam Godelia, 2:16 $\frac{1}{4}$, by Aberdeen, was knocked off at \$955, the second best figure of the sale.

John Kelly, who for the past year and a half has been in charge of the trotters at The Abbot Farm, property of John J. Scannell, at Fishkill Landing, N. Y., has severed his connection with that institution. John has as yet made no definite arrangements for the season, but it is safe to say that he will be at some of the big meetings with a good one or two, when the bell rings.

James Bntler and family, who have been in California for several weeks, have returned to New York. Mr. Butler is very much pleased with the manner in which the East View Farm horses, in charge of Monroe Salishury, at the Pleasanton track, are working.

Dr. W. W. Aldrich, one of Iowa's veteran trotting horse breeders, died last week near his home at Tipton, while returning from California. Dr. Aldrich founded Border Lawn Stock Farm near Tipton, some years ago. He at one time owned the stallions Border Wilkes 2:15 $\frac{1}{4}$, by Jay Bird, Mamhrino Abdallah 1369, and Lord Wellington 1968.

American Belle, 3, 2:12 $\frac{1}{4}$ foaled a hay colt by McKinney 2:11 $\frac{1}{4}$ March 21st, at Terrace Farm, Titnsville, Pa.

Almost all the stall room at the Cleveland track is already taken for the training season.

Dan Patch 1:56 $\frac{1}{4}$ will travel in a magnificent private palace horse car this season. It is now being built and will probably be the most elaborate one ever constructed.

Walter T. Chester, publisher and compiler of Chester's Complete Trotting and Pacing Record, which he published from 1883 to 1890, has joined the Fasig-Tipton forces, and will fill the vacancy made by the resignation several weeks ago of A. J. Meston, head of the advertising of the sale firm. Mr. Chester was for a long time connected with the Turf, Field and Farm, and since that publication went out of business, he has been associated with Joseph Battell, of Middleboro, Vt., publisher of the Middleboro Register.

Nancy Hanks 2:04 and a yearling, two and three-year-old filly and four-year-old colt out of her will go under the hammer at the Forbes dispersal sale. Her two aged daughters, of five and eight years, now brood mares, are also included.

Advance reports indicate at least thirty entries in the M. and M.

Some \$58,000 in stakes and purses is already in sight for 2:10 trotters. And yet some of the more pessimistic speed-horse prophets are wondering why 2:10 trotters are higher this year than last, in the presence of forty per cent depression of good dividend-paying stocks.

Joseph F. Pray, the veteran sulky builder of Boston, died a few days ago. He was among the first to build an arched axle, and probably the first to tilt an axle back to the connecting brace behind the sulky seat, which vehicle he made for A. J. Feek's old timer, Alroy.

C. F. Emery, owner of Forest City Farm, looks to see Norrie, 2:10, beat 2:08 this year. He also thinks Caspian, 2:07 $\frac{1}{4}$, will lower his record a good bit. Among the other record horses by Patron, which he expects to trot in 2:10 or better this year, are Parthia, 2:16 $\frac{1}{4}$, and Persia, wagon record, 2:14 $\frac{3}{4}$.

Messrs. Campbell & Sons sold the trotting stud of J. W. Welsby at Kirk's Bazaar, Melbourne, Australia, recently, when the following prices were realized: Emulator (stallion), \$3,937; Captivator, h. c., two years, by Emulator, \$320; Jessamond, h. f., 3 years (full sister to Emulator), \$362; Juenetta, h. m., with foal at foot, by Emulator, \$367; eh. f. yearling (full sister to Emulator), \$294; Estimate, b. m., with foal at foot by Emulator, \$294; b. f., 2 years (full sister to Emulator), \$215; Edith, b. m., with foal at foot by Emulator, \$152.

Ben Walker, who last season drove for the Salisbury stable, is now at Memphis, and announces that he will train a string of thoroughbreds this season, having received an offer from a wealthy Pittsburgher who is about to break into the racing game. Walker is suffering from blood poisoning in one of his arms, which would prevent him from driving this season.

The Questor 2:11 $\frac{1}{4}$ looks a sure 2:10 trotter this season. He is working better than ever before for Geers at Memphis.

Newspaper items to the effect that Lou Dillon will make her first record-breaking effort of 1904 at the Grand Circuit meeting at Detroit, may be set down as without foundation.

E. B. Bergen, of Harlington, N. J., has a half thoroughbred trotter which he believes is worth training. This trotter is by Red Wilkes out of the mare Omr Kate, by Don Jose, a son of Joe Hooker. On the dam's side the pedigree is pure thoroughbred. The trotter is a three-year-old filly, and is the result of an experiment in breeding by a New Jersey horseman.

Cleveland is a wonderful city to bring buyers and sellers together. Everything favors it as a locality for great horse sales. Its geographical position makes it convenient for people to meet from down East and out West, and the city itself is full of horse lovers. There are always many local buyers at the Blue Ribbon sale, and a good share of the most desirable animals remain right there. They will never forget that Mr. Billings bought Lou Dillon for a tithe of her value at Cleveland last May, and everybody is looking out for another like her. Fasig-Tipton Co. scarcely expect that the catalogue for 1904 will contain a peer of the Queen of the Turf, yet it may, for there are many brilliant prospects in the consignments, and it is the unexpected that is in the habit of happening.

The Colorado Supreme Court has decided that the horse-tail docking law is constitutional in all its features. The test case was instituted by John W. Springer for his coachman, Ernest Bland. He was fined in the court below for driving docked horses. The court holds that docking is cruelty and that the Legislature has the right to prohibit the practice. No horses can be docked in the State, nor can such horses be imported. The buying and selling of animals that have been docked is a misdemeanor. Every hang-tailed horse in the State prior to the passage of the law must be registered.

A special dispatch to the daily papers from Austin, Texas, says: Blind staggers has been epidemic among the horses of the Lytton Springs community, fifteen miles south of here, causing many deaths. In dissecting one of the horses yesterday there was found in the cavities of the heart three living creatures, resembling snakes or mammoth worms. One was twenty-four inches long, one twelve inches long and one six inches long and one inch in diameter. They were white in appearance with bloody streaks running their length. Their bodies were soft and pulpy. Dr. Brewer examined the creatures, but failed to classify them. They have been brought to veterinary surgeons at Austin for examination.

Eoline, three-year-old record 2:14 $\frac{3}{4}$, dam of Lassail, 2:29 $\frac{1}{4}$, and full sister to Salome, 2:28 $\frac{3}{4}$, by Anteeo, dam Myriad dam of Eoline, 2:14 $\frac{3}{4}$, Farco, 2:19 $\frac{1}{2}$, Salome 2:28 $\frac{3}{4}$ by Stranger, second dam Myra, dam of four standard performers by General Knox, third dam Sappho dam of two standard performers and second dam of five standard performers by Jay Gould, has just foaled a beautiful hay colt by Ashland Wilkes at the Hillside Farm, Reading, Pa.

M. E. Sturgis of New York City, is to retire from the turf. For a dozen years Mr. Sturgis has raced his horses, at first on the mile tracks of New England, and of recent years he has been a prominent figure on the Grand Circuit. It was in 1902 that Mr. Sturgis had out his best stable, headed by the incomparable Dan Patch, and containing Baron de Shay, Prince Direct and Darwin. Under McHenry's able direction these horses won many races and the stable was one of the best money earners of the year. In the fall of that year Sturgis sold Dan Patch to M. W. Savage for \$60,000. Last year his table did not perform so brilliantly, but his retirement was not looked for.

Gaited Saddle Horse in War.

[Chicago Breeders Gazette.]

I was much pleased with the article in one of your recent issues by Secretary Nall, concerning the suitability of the gaited saddle horse for cavalry mounts. Then came a veterinarian from the regular army who is evidently a foreigner, probably (judging from his name) either a Russian or a Pole. This learned veterinarian says of the American saddle horse that he is good to look upon, but that he is too delicate and will not stand the hardships of a campaign.

Now we old soldiers of the Civil War know that the American saddler was and is the best cavalry horse that the sun ever shone on. The stout old four milers from whose loins he sprang had that same kind of delicacy. On June 8th, 1864, at Mt. Sterling, Ky., in a fight with General Morgan's command, my horse was shot under me, but a few moments later a gallant young Confederate officer was killed while leading his men in a charge on our position. I was not twenty feet from him when he fell and had but little difficulty in catching his

erless horse. This proved to be the best cavalry horse I ever saw. He was a bay gelding, seven years old, 15.2 hands high. He had a clean bony head, with big yellow eyes like a shepherd dog, a remarkably long and graceful neck, and it came out of the top of his shoulders instead of the front of them, a short strong back and high croup. He was a wider horse than many we see nowadays, broad across the breast, and his forelegs did not both come out of the same hole. He was broad across the quarters, but measured ten inches more across the stifle than across the hips. His legs and feet were excellent, and he dropped down in the tank like a brood mare, giving him a place to carry his dinner. What were his qualities? He could flat-foot walk five miles an hour, showing the bottom of his feet at every step; he had a good square trot, but that was a gait the soldier did not love; his running walk (he was a "nodder") would easily cover eight miles within the hour. But tighten on the rein and make the least motion with your heel and he would rack down the pike like a horse afire. Add to this that there were very few horses in either army that could run as fast, and I never saw one that could get under full speed from a standing start as quickly as he could.

In September of that year I rode this horse from Lexington to Saltville, Virginia. We "got licked" up there and had to retreat, the enemy pressing us hotly for fourteen days and nights. This horse and one other alone of all those belonging to my company lived to see Lexington again. In November we went to Crah Orchard, where another expedition against Saltville was organized. This time we went across Cumberland Gap and up Clinch River as far as Bristol, when the orders were countermanded and we basted off to Nashville by forced marches both night and day to assist in Hood's defeat. My company reached Nashville with 97 men and 18 horses. The horses were all condemned as unserviceable and turned over to the quartermaster at Nashville except my horse and two others.

Then in February we went to Louisville and joined General Stoneman. Again we went across the Gap into Tennessee, on to Knoxville, up into Virginia as far as Lynchburg, down into North Carolina, destroying the Weldon Railroad, to Salisbury, liberating the prisoners and destroying the prison. Then we went to Salem and Rutherfordton, then with Major Modderwell to burn the high bridge across the Catawba river, then on through South Carolina and Georgia.

This was our last campaign, and my horse and one other (this other horse was also a magnificent specimen of the gaited saddle) were the only ones in my company when they returned to Knoxville in June that had started with it from Louisville in February.

On the Nashville campaign it was my misfortune to be taken prisoner by some of Forest's men. They took me to Gen. Forest's quarters. The general did not seem to think that I amounted to much, but he looked mighty hard at my horse, then turning to me, said: "See here, young fellow, if the whole Yankee army had bosses like that all hell wouldn't whip 'em." He then gave orders that I should be taken to an officer who had charge of some other prisoners, and in conclusion said: "Don't forget to bring that boss to me, you hear?"

Well we never got to where the other prisoners were. The men who were guarding me were poorly mounted, and were, I thought, almost too sure of me to watch closely. When we came opposite the mouth of a lane that opened into the road I jerked my horse suddenly around to the left, threw myself flat on his neck, jamming both spurs into his flanks. He was off like a quarter horse before the bewildered guard could realize what had happened. They fired, I thought all too promptly, but both horse and rider were untouched, and as to pursuit that was hopeless. In less than half an hour we were safe within our own lines.

I must apologize for the vast amount of "ego" in the foregoing. It was not my wish to relate my own adventures, but to tell about the best cavalry horse I ever saw.

Gen. Grant was an admirer of the gaited horse, and always kept one or more good ones. I was once present at a frontier post in Western Kansas when Gen. Sheridan was on a tour of inspection. Some of the officers were speaking to him of his ride to Winchester and the wonderful endurance of the horse he rode that day. "Yes," said the General, "he did have wonderful endurance, but the man who rides that kind of a horse must have wonderful endurance, too." The horse Rienza, or Winchester as he was afterwards called, was the roughest trotting horse in the Union army. He was trotting-bred and it is said could trot in about 3:00. He could not canter, and would not gallop until forced to go faster than he could trot. Gen. Burhize was from Scott county, I believe. I know that he always rode a "mighty fine racking horse." We all know the opinions held by Generals Morgan, Basil Duke and Castleman on the subject. I have just told you about Forest, Grant and Sheridan.

The saddle-bred horse is too delicate, and will not stand the hardships of a campaign, eh? Look at Goodman's trip, and be a fat young stallion just out of a sale stable. I rode him 516 miles in twelve days.

JOHN A. WHARTON.

The Horse for the Farmer.

One of the features of the South Dakota Live stock Association was an address by J. M. Dummire of Scotland on "The Horse for the Farm." Mr. Dummire spoke as follows:

"What I have to say on this subject is intended to apply to common horse-raisers—the farmer. It is just as necessary in all classes of business to know what not to do as it is to know what to do, horse-breeding not excepted.

"We have the road horse, the coach horse, the cab, the hunter and various kinds that are useful in their places, but are only profitable to those that make a special business in the breeding and raising of them.

"No doubt they all have a place in the business and pleasure of our great country, and by special breeding and management they are made profitable to the man that breeds them, but they require a kind of care in handling and fitting for the market that is not practicable with the average farmer. They all cost too much skilled handling to fit them for their place in the market.

"The horse for the farmer is the draft-bred horse. He is the horse that can be raised by the common farmer with little trouble and expense. He is in reach of almost every farmer in the country. It is a profitable business on the farm to raise a few good colts. I say good colts, for it is just as easy to raise good ones as poor ones.

"It is just as easy to raise good horses as good cattle or good sheep or hogs. It does not pay to raise poor ones—leave that for the other fellow. The farmers that raise good stock of any kind are the men that select good sires. The men that have good herds and flocks are the men that select a pure-bred sire from one or the other of the several pure breeds, and sticks to the breed of his choice, if in cattle it is short-horns, and in a few years his herd is all of the same type and color.

"If it is Angus or Herefords, the results are the same. If this is true of cattle and sheep, it certainly is true of the horse. Fellow farmer, select a sire from one of the pure breeds of draft horses, Percheron, Shire or Belgian, it matters not little which breed.

"It is only a matter of choice to the breeder himself. Be sure and select a good individual. Breed just such mares as you have. The better the dam the better the result. Always breed their produce to a pure-bred sire of the same breed.

"In a very short time your mares are all alike and of the same type and disposition, all bearing a family resemblance. You will not have the disposition of the bronco in one and the trotting horse in the other, but you will have a class of horses that are easily handled, easily fitted for the market, and an every-day market at home and abroad.

"You need not spend any extra time and expense in looking after buyers—the buyers are always looking after this kind. If they get a wire cut or hemlock they are the kind that are useful to keep for any kind of farm work. A good mare with proper care will do just as good service on the farm and raise a colt, as a gelding, and have the colts for the keep.

"Never allow the colt to follow the dam when in harness, as the colt will do much better left in the barn, and the dam will be better off without them. Give the little fellows some oats and bran in their trough—they soon learn to eat and forget their dam.

"They are easily weaned, and if proper care is taken they will not stop growing until they are matured. Breed in this way, and in a very short time it will be impossible to raise a poor colt. Look at the farmers' horses that breed one year to a draft horse, that produce to a road horse, that produce to some cheap mongrel.

"His horses in ten years' breeding are no better than when he began. The price of service fees should hardly be considered. It costs as much to raise a low-priced horse as to raise a high-priced one. It is all in the breeding.

"Always use a pure-bred draft sire. A better individual than the dam, and then you are sure of gaining. Select one breed or the other and stick to it, and you will come out ahead and be on the right road to success in horse-breeding."

Fitting the Shoes.

A shoe for the regular hoof fits when the outer border follows the wall closely in the region of the nail holes and from the last nail to the end of the branch gradually projects beyond the surface of the wall to an eighth of an inch and extends back of the buttresses an amount equal to the thickness of the shoe. The shoe must be straight, firm, air-tight, its nail-holes directly over the white line, and its branches far enough from the branches of the frog to permit the passage of a foot pick. Branches of the shoe must be of equal length. In fitting a shoe to a hoof of regular form we follow the form of the hoof, but in base-wide and base-narrow hoofs which are of irregular form, we must pay attention also to the direction of the pasterns and the consequent distribution of weight in the hoof, because where the most weight falls the surface of support of the foot must be widened, and where the least weight

falls (opposite side of the hoof) the surface of support should be narrowed. In this way the improper distribution of weight within the hoof is evenly distributed over the surface of support.

A shoe for a base-wide hoof should be fitted full on the inner side of the foot and fitted close on the outer side, because the inner side bears the most weight. The nails in the outer branch are placed well back, but in the inner branch are crowded forward toward the toe. A shoe for a base-narrow hoof should be just the reverse of the preceding. A shoe for an acute-angled hoof should be long in the branches, because most of the weight falls in the posterior half of the foot. The support in the front should be diminished either by turning the shoe up at the toe or by beveling it under the toe. A shoe for a stumpy hoof should be short in the branches, and for pronounced cases should increase the support of the toe, where the most of the weight falls, by being beveled downward and forward.

In many cases, especially in the hoofs of draft horses that stand very close together, the coronet of the outer quarter is found to stand out beyond the lower border of the quarter. In such cases the outer branch of the shoe from the last nail back must be fitted so well that an imaginary perpendicular dropped from the coronet will just meet the outer border of the shoe. The inner branch, on the other hand, must be fitted as "close" as possible. The principal thought should be to set the new shoe farther toward the more strongly worn side. Such a practice will render unnecessary the widespread and popular fad of giving the outer quarter and heel calk of hind shoes an extreme outward bend. Few farmers have either the time or the skill necessary to so adjust a cold shoe to the hoof that it will fit, as we say, "air-tight." If a heavy shoe at a yellow heat he held tightly pressed against a hoof which has been pared too clean till it embeds itself serious damage may be done. But a shoe at a dark heat may be pressed against a properly dressed hoof long enough to scorch and thus indicate to the farrier the portions of horn that should be lowered, without appreciable injury to the hoof and to the ultimate benefit of the animal. The horse owner should insist on the nails being driven low. They should pierce the wall not above an inch and five-eighths above the shoe. A nail penetrating the white line and emerging low on the wall destroys the least possible amount of horn, has a wide and strong clinch, rather than a narrow one which would be formed near the point of the nail, and furthermore has the strongest possible hold on the wall, because its clinch is pulling more nearly at a right angle to the grain (horn tubes) of the wall than if driven high. Finally, do not allow the rasp to touch the wall above the clinches.

The hot shoe has a variety of uses. It enables us to give the frog pressure, to restore it to its original state of activity and development when by reason of disuse it has become atrophied. It gives the hoof an increased surface of support, and enables us to relieve one or both quarters of undue pressure that may have induced inflammation and soreness. The bar of the shoe should equal the average width of the remainder of the shoe and should press but lightly on the branches of the frog. The addition of a leather sole with tar and oakum sole-packing allows us to distribute the weight of the body over the entire ground surface of the hoof. Various forms of rubber pads, rubber shoes, rope shoes, fiber shoes, and other contrivances to diminish shock and prevent slipping on the hard and slippery pavements of our large cities are in use in different parts of the world. In Germany the rope shoe (a malleable iron shoe with a groove in its ground surface in which lies a piece of tarred rope) is extensively used with most gratifying results. In the large cities of England and the United States rubber pads are extensively used. They are rather expensive, but are quite efficient in preventing slipping on polished and gummy pavements, though not so effective on ice. The rubber is stitched and cemented to a leather sole and is secured by the nails of a three-quarter shoe. Such a pad will usually last as long as two shoes. They may be used continuously, not only without injury to the hoof, but to its great benefit. The belief, unsupported by evidence, that rubber pads "draw the feet" keeps many from using them. A human foot encased in a rubber boot may eventually be blistered by the sweat poured upon the surface of the skin and held there by the impervious rubber till decomposition takes place with the formation of irritating fatty acids; but there is no basis for an analogy in the hoof of a horse.—J. W. Adams, V. M. B.

Colds in Horses

are to be guarded against in Springtime. The creature should be kept in condition to resist this trouble. "Craft's Distemper & Cough Cure" is a remarkable preventive of colds in the fact that it is a germ destroyer. A slight exposure to drafts or an unusual chill affects the horse seriously when the system is permeated with the germs. "Craft's Cure" destroys the germs and leaves the blood in pure, healthy condition so that croups, distemper, influenza, gripe, pinkeye, etc., are easily resisted. The same treatment is a sure cure for colds and any of the distempers if one has neglected to follow the policy of prevention. If druggists happen to be out of stock, our readers may order it prepaid, as per advertisement in our columns from the Wells Medicine Co., 13 Third St., Lafayette, Ind.

Strike!—If they don't give you Jackson's Napa oda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

AT THE TRAPS.

About forty shooters attended the April shoot of the Union Gun Club last Sunday at Ingleside. This showing was rather surprising considering the extremely warm weather. A summary of scores and winners follows:

Club shoot, 25 targets, class shooting, 8 classes—Daniels 21, "Woodpecker" 19, Foster 23, Hoyt 22, "Slade" 21, Walpert 19, Nauman 24, Dr. Hansen 16, Masterson 20, Lowrey 16, Pisani 22, E. Klevesahl 23, Fisher 21, Dr. McConnell 17, Donohoe 18, Shreve 16, Dutton 18, Dr. Finnie 16, "Williams" 17, White 11, Biller 12, Gross 7, Frankel 11, Wollom 19, Green 9, Dr. Hutton 11, Jacobson 19, Muller 21, Murdock 21, Knick 17, Frahm 19, Dr. Pitres 22, Burns 17, Robertson 24, Patrick 19, Leary 15, Hodapp 20, Grimm 16, Miller 14, H. Klevesahl 15, Turner 10, Haight 21, Libert 15, Walsh 10, Barber 13, Iverson 21, Sylvester 21, Mitchell 21.

The winners in this race were: Nauman and Robertson divided first class money, Foster and E. Klevesahl second money; Daniels, "Slade," Fisher, Muller, Murdock, Haight, Iverson, Sylvester and Mitchell third money; "Woodpecker," Walpert, Wollom, Jacobson, Frahm and Patrick fourth money; McConnell, "Williams," Knick and Burns fifth money; Scott, Leary, H. Klevesahl and Libert sixth money; Barber seventh money; Walsh and Turner eighth money.

Medal race, handicap, 25 to targets, 2 classes, handicap fixed by scores in previous event, 25 possible—McConnell shot at 27, broke 21, Donohoe 27-23, H. Klevesahl 28-20, Walpert 27-22, Hanson 28-22, Leary 28-23, Burns 27-20, Forster 25-23, Woodpecker 27-18, Nauman 22-25, E. Klevesahl 25-22, W. Murdock 26-22, Fisher 26-22, Williams 27-18, Finnie 28-18, Patrick 27-22, Wollom 27-23, Hutton 30-14, Daniels 26-25, Jacobson 27-18, Dutton 27-16, Masterson 26-21, Hoyt 26-22, "Slade" 26-22, Pitres 25-22, Frahm 27-16, Shreve 28-19, Grimm 28-22, Hodapp 26-21, Pisani 26-23, Biller 30-21, Iverson 26-19, Sylvester 26-24, Haight 25-25, Turner 30-8, Robertson 25-20.

The winning shooters were as follows: Daniels, Nauman, and Haight tied for first medal. In the shoot-off under the original handicap Daniels won. The second-class medal was won by J. Scott Leary.

Added money race, open to all, handicap, 25 to 30 targets, 3 moneys, high guns—Daniels shot at 21, broke 16, Knick 24-13, Hoyt 20-13, Murdock 21-18, Masterson 21-16, Jacobson 22-11, E. Forster 20-19, "Woodpecker" 22-19, Robertson 20-17, Frahm 22-18, Nauman 20-19, E. Klevesahl 20-16, Hutton 25-10, "Slade" 21-19, Burns 22-15, McConnell 22-20, Fisher 21-14, Donohoe 22-15, Patrick 22-10, Haight 21-17, Turner 25-17.

Dr. McConnell won first money, Nauman, Forster, "Woodpecker" and "Slade" second money, Murdock and Frahm third money.

Fifth event, open to all, 10 targets (16 yards), 5 pairs (14 yards), class shooting, 3 moneys—Daniels 15, Pitres 14, Knick 9, Forster 17, Jacobson 14, E. Klevesahl 18, Hoyt 17, McConnell 15, Donohoe 15, Robertson 15, Iverson 14, Sylvester 13, "Woodpecker" 9, Nauman 17.

Winners—E. Klevesahl first. Forster, Hoyt and Nauman divided second, and Daniels, McConnell, Donohoe and Robertson third money. Harry T. Hoyt was high gun on doubles.

At the Millwood Gun Club shoot on the 10th inst. George Collins and W. Price were high in the first event. Collins won on the shoot-off. In the second race Ashlin and Turpin tied. The third event was won by Mr. Collins, who broke 14 out of 15.

In the club badge race at 25 targets Price and Haas were tied. Price won on the shoot-off, scoring 9 to 5 out of 10 targets. In the "sealed condition" event at 15 targets Kewell and Haas divided the pool. The individual scores in the various races were as follows:

Event 1, freeze-out shoot, J. K. Orr trophy—Price 16 19; Ashlin 3, 4; Wagner 1, 2; Haas 1, 2; Van Norden 1, 2; Collins 17, 19.

Event 2, gold trophy, 20-target race—Kewell 16, Ashlin 18, Wagner 13, Turpin 18, Haas 15, Allen 8, Collins 13, Newlands 13, Van Norden 17, Johnson 9, Price 17, Johns 13, Collins Jr. 8.

Event 3, shell race, 15 targets, class shooting—Kewell 12, Ashlin 9, Turpin 9, Wagner 19, Price 13, Haas 12, Van Norden 13, Newlands 10, Collins 14, Johnson 4, Collins Jr. 5, Allen 5, Johns 10.

Event 4, club badge race, 25 targets—Turpin 18, Newlands 17, Van Norden 17, Collins 15, Haas 21, Ashlin 16, Kewell 18, Collins Jr. 7, Johnson 10, Wagner 12, Allen 12, Price 21.

Event 5, sealed conditions, 15 targets—Kewell 10, Ashlin 11, Wagner 7, Van Norden 9, Johnson 9, Price 9, Haas 10, Collins 8, Wayman 1, Collins Jr. 2.

At the Empire Gun Club's April shoot last Sunday, W. O. Cullen's score of 24 out of 25 in the championship race was the best shot up during the day. All the scores in this event, however, show a decided improvement over last month's contests. No score below 14 made a hiatus for the fourth class in the money match. In the second event Webb was high gun, breaking 22 out of 25 from the 22 yard mark. Sweeney, Cullen and Allen were next with 19 breaks each. Dr. Payne, who shot himself into the first class at his initial trap shoot last month, did not shoot up to his average.

Sweeney shot like a winner up to his sixteenth target—having lost but one target whilst Cullen and Webb

each had lost two. The doubles were his hoodoo, as his last ten targets in the money match will show. Webb's score in the special prize event, 18 targets out of 20 at 22 yards' rise, was the best record in that event. Nothing worthy of special note transpired in the Sweeney record medal race.

The scores and handicaps in the regular events follow:

Event No. 1. Club champion race, 25 targets, entrance 75 cents, singles, 16 yards—

Cullen, W. O.	1110	1111	1111	1111	1111	24
Webb A. J.	1111	1111	1111	1111	1111	23
Allen	1111	1111	1111	1111	1111	22
Allee, L. H.	0100	1111	1111	1111	0111	22
Roman, Con.	1011	1111	1111	1100	1111	22

Allen	16	"	1110				1

The College City Gun Club initial shoot for 1904 took place last Sunday on the newly fitted up club grounds at North Berkeley. In the regular events L. Leavell was high gun in the Chick medal race at 15 targets. This contest is for members only and a shooter must win the medal three times consecutively to entitle permanent ownership of the trophy. Leavell has now won the medal twice, winning it Sunday after a shoot-off at 10 targets with Reed and Schmidt.

R. C. Reed was high gun in the club medal race at 25 targets. In the Cup race at 20 targets all contestants shoot the first 10 targets from the 16-yard mark and are handicapped as follows for the remaining 10 targets: 9 and 10 breaks, 20 yards; 7 and 8 breaks, 18 yards; 5 and 6 breaks, 16 yards; 4 or less, 14 yards. Winners each month will be handicapped 2 yards for the first 10 targets, on each win. The contest is open to members only and requires three wins to entitle a shooter to individual ownership of the prize. Swales shot the high score in this event last Sunday, in the final 10 targets he smashed 9 at 20 yards rise. Seales was high man in the "Shell" race at 15 targets. This event is shot under sealed conditions. R. C. Reed and C. C. Juster each won a club silver bar for straight scores of 15 targets.

Before and after the regular club events practice and pool shooting was indulged in. A summary of the different scores made is the following:

No. of targets	15	15	15	15	15	10	25	20	15	25	25	25
Schmidt, W.	5	7	10	8	12	7	17	13	12	16	15	18
Leavell, L.	11	10	12	8	12	10	32	14	12	16	15	18
Juster, C. C.	9	9	11	12	9	16	16	12	18	21	21	21
Reed, R. C.	10	14	12	13	12	9	32	16	13	22	20	21
Baird, L.	12	10	10	11	11	16	16	11	8	12	15	15
Baird, C.	8	8					20	14	10			
Titus							13	10	14			
Newcomb							18	12	6	9		
Witter							7	8	5			
Armstrong							10	13	13			
Seales							14	13	13			
Schmidt, E.							14	13	13			
Swales							20	19	10	21		

The Capitol City Blue Rock Club shooters held the initial medal shoot for 1904 last Sunday at Sacramento. The attendance was good, but the scores of the local shooters were below the average. The new

Leggett trap may have something to do with it, as all the targets were thrown at unexpected angles. Possibly the shooters are not yet used to it. However, the new trap worked most successfully and is an immense improvement over the electric pull traps and throws the blue rocks more evenly, and where many misses were made at the same angle the ground where the targets alighted for a radius of a yard or two was thickly strewn with unbroken discs, and this means something to a trapshooting club.

The scores made in the principal events were as follows:

The target warm up—F. B. Adams 8, 5; Hughes 2, 2; Blair 8, 9, 7; Peek 8, 9; E. D. Adams 7, 1, 8; Seaver 9, 9, 8, 7; Ruhstaller 7, 5; Weldon 7, 6; Shore 8; Upson 7; Just 8.

At 15 targets (practice)—Ruhstaller 12, 14; Seaver 13, 14, 14; Blair 12, 3; E. D. Adams 8; Shore 11, 12; Vandeford 8; Just 13; Peek 11, 9; Fissell 11, 10; O'Brien 8, 7; Cotton 7, 8; F. Adams 12, 14; Morgan 6.

16 yards, 25 targets—E. Peek 17, F. Ruhstaller 13, A. Just 18, C. Englehart 18, F. O'Brien 20, Vetter 18, Fissell 17, Weldon 18, Seaver 24, Upson 17.

San Francisco Show.

The San Francisco Kennel Club show this week at the Mechanics Pavilion, we are pleased to note, has been a great success in every respect. The entries, 534 in number, will give the show a five point rating. The A. K. C. rating for this year had been placed at three points, this based on last years entries.

Judge Mortimer handled his classes in his usual business-like and suave style, his decisions with but few exceptions being received with satisfaction by exhibitors and visitors.

The attendance was good throughout the show, the popularity of the exhibition argues the attendance of a large crowd this evening to see the special finals and the presentation of awards.

The arrangement of the benching was all that could be desired, the aisles being wider this year than heretofore, thus allowing everybody plenty of room.

The judging ring, it may be said, was the best ever put up for a dog show west of Chicago. The ring was laid over with boards, upon which the sawdust was sprinkled. This gave those handling the dogs a firm footing. At previous shows there was many an upset on the hard slippery maple floor. The ring stewards did their work faultlessly. A pleasing innovation was the pinning of numbers on the owners and handlers when they had their dogs in the ring. The press accommodations were better this year than ever.

The general average of class and quality—notably so in Setters, Pointers, Cocker, Collier, Bull Terriers, and Boston, was a pleasing surprise to many veteran showgoers.

An extended report and complete list of awards will appear next week.

Victoria Show.

The third annual show of the Victoria Kennel Club opened on the 6th inst. and was a successful four day show in every respect. The entries exceeded those of last year by a small margin. Cockers had the largest representation, 63 all told. The honors were annexed principally by Portland Cocker Kennels, Dr. A. J. Garesche of Victoria, Mrs. C. W. Sharples of Seattle, H. O. Litchfield, Mrs. J. W. Creighton and Mrs. C. A. Goodwin.

Colliers were strongly represented and of splendid averaging quality. Glen Tana Stock Farm Kennels, Thos. S. Griffiths, Spokane, won a majority of the prizes. In tri-colors Glen Tana Monk got a special for best and four firsts and winners, Glen Tana Black Baby, a full sister to Miss Tuffet, was first puppies and winners. In sables, Glen Tana Sentinel was first novice, second limit and third open. Rippowam Bo Peep took first limit, open and winners in bitches. Ravenswood, owned by Arthur Letts of Los Angeles, won second open dogs. Prince, a Victoria dog, won first open in sables.

In Scotch and Irish Terriers, Mrs. K. Bradley-Dyne of Satura, B. C., was the principal winner. Woodlawn Irish, owned by Mrs. W. R. Whittier of San Francisco, won open dogs and winners.

Fox Terriers were a stylish lot, in smooths the competition was very keen, the judge finally deciding in favor of George Florence's Wandee Revelry. Novice and open bitches went to J. K. Angus' Dot and Vic. Dr. Milne's Jeff won a first and special and points enough to get a championship.

Bonnyhred Stiletto, owned by F. E. Watkins of Portland, was the classy dog among the Bull Terriers shown. Gordon Setters and Irish Setters were a good all round showing.

The Bulldog honors were centered on H. M. Papst's King Commando and N. J. Stewart's Her Majesty of

Charlcombe. Minnesota Joe was first winners in Pointers, of which breed there were fewer shown this year than last.

English Setters made a grand display and kept Judge John Davidson busy. Perhaps the greatest surprise of the show developed when John W. Ripplinger's Seattle dog Stylish Sergeant was defeated by T. P. McConnell's Count Rigo, a Victoria dog. Then followed the wins of C. W. Minor's Zola Montez over Mr. Ripplinger's Ch. Elloree and Pera. As a result Mr. Ripplinger is out with a challenge that Elloree and Pera can beat Zola or any other dog owned by Mr. Minor and the latter gentleman has expressed his willingness to accept the challenge.

The show was held under P. K. L. rules. John Davidson judged all breeds, a summary of the entries is the following: Cocker Spaniels 63, English Setters 53, Fox Terriers 58, Collies 25, Gordon Setters 25, Irish Setters 20, Pointers 12, Irish Water Spaniels 10, St. Bernards 10, Scottish Terriers 13, Bull dogs 2, Clumber Spaniels 2, Greyhounds 2, Blenheim Spaniels 3, Japanese Spaniels 1, Mastiffs 3, Airedale Terriers 1, Field Spaniels 1, Retrievers 1, Pugs 1. Outside entries numbered 57, as follows: California 8, Portland 11, Seattle 27, Vancouver 11.

AWARDS.

MASTIFFS—Novice, limit and open dogs—1 Major, R. H. Whidden, Duncan.

ST. BERNARDS—Novice dogs—1 Rex, Geo Brownlee, Victoria; 2 Argo, Capt Gardner, Victoria. Limit dogs—1 Rex, 2 Argo, 3 Victoria Chief, Mrs H. E. Davis. Open dogs—1 Rex, 2 Victoria Chief. Winners, dogs—1 Rex. Novice, limit, open and winners, bitches—1 Gemma, C. W. Duck, Victoria.

Limit dogs—1 Bolton Woods Dispot, Wm Ollard, Tacoma; 2 Woodlawn Irish, Mrs W R Whittier, San Francisco; 3 Tramore Pat, C F Taylor, res Nailer, R F Hanson. Open dogs—1 Woodlawn Irish, 2 Tramore Pat, 3 Nailer, res Whisky, v h c Soda. Puppy hitches—1 Irish Polola, Miss A Turner. Novice hitches—1 Nora, W Gilbert. Limit hitches—1 Kate Kearny, 2 Tramore Biddy, 3 Nora, C F Taylor, res Biddy, Hugh Orr.

SCOTTISH TERRIERS—Open dogs—1 Garry, A Rowan.

BEDLINGTON TERRIERS—Open dogs—1 Dan, Miss Edith M Turner.

BLACK AND TAN TERRIERS—1 Prize Tiny, George Wagg.

DACHSHUNDS—Open hitches—1 Tackle, H Brulin.

PUGS—Open dogs—1 Pat, Miss E P Howe; 2 Jerry, Miss McKenzie; 3 Goldsind, Mrs A H Smith.

DANDIE DINMONT TERRIERS—Limit and open dogs—1 Swanpool Hector, C F Jackson; 2 Giffnock Wanderer, R Martin; 3 Skookum Raider, C J Peters. Limit and open hitches—1 Giffnock Wohlle, R Martin; 2 Skookum Kelpie, C F Jackson.

POMERANIANS—Open dogs—1 Roy, G Henderson; 2 Guess, Miss Mamie Quann. Open hitches—1 Tootsie, Miss Quann.

JAPANESE SPANIELS—Novice and open dogs—1 Honey, Florence Bailey.

YORKSHIRE TERRIERS—Open dogs—1 Burrard Cricket, Burrard Kennels. Open hitches—2 Creole Belle.

MISCELLANEOUS CLASS—Open dogs under 20 pounds—1 Major, Mrs A D Sykes; 2 French Poodle Dandy, A F McKinnon; 3 Whiskey, Miss E W Sarel. Open hitches under 20 pounds—1 Daisy, A F McKinnon. Winners class—1 Major.

Trade Notes.

The Capital City Blue Rock Club, of Sacramento, Cal., held its first medal shoot of the 1904 season at Agricultural Park on the 10th inst. Of the twenty-six shooters who participated in this shoot, twenty-five shot Winchester "Leader" shells, and eleven Winchester "Pump" guns. The star shooting of the day was done by W. H. Seaver, of San Francisco, shooting a Winchester "Pump" gun and Winchester "Leader" shells, Selby loading. Mr. Seaver scored 184 out of the 200 he shot at, and broke 93 out of the last 100. Mr. Frank O'Brien shooting a Smith gun and "Leader" shells, captured the Kimball-Upson Company's medal on the score of 20 out of a possible 25. In this event Mr. Seaver scored 24 out of 25, but being a manufacturer's representative, was not eligible to receive the medal.

No Use.

It's mighty disappointing when you've sat and fished all day, And had to grin and hear it while the fish all got away. You've done the very best you could with hook and line and bait. And nothing else remained except to trust to luck and wait. You may as well take comfort in the lazy summer day And feel the breeze and watch the shifting shadows in the bay. And do your best to tell the truth when you go home at night, 'Cause there's no use kicking if the fish refuse to bite.

And when the years are passing—"most as swiftly as the days, And you find the things you longed for have all turned to other ways, It's better to appreciate the laughter and the song Than take a solemn vow that all the world is going wrong. It's hard to be convinced that you have struck a losing chance No matter if the game be love, ambition or finance. But the days are full of sunshine and the stars all shine at night, And there's no use kicking if the fish refuse to bite.

—Washington Star.

The Poetry of Troutng.

It is a beautiful sight and a seductive example of the gentle art of angling to watch the accomplished fisherman drop his flies lightly upon the surface of a trout stream and float them deftly and tenderly over or past the spot where presumably some trout lurks. The skill with which the angler avails himself of all the possibilities of hank or hush to conceal his form or shadow from the sky and suspicious trout he would entice; his close attention and steady silence; his ready acceptance of the passing breeze's mood that would waft his fly, as with loving care, to the very spot he would have it fall, or his defiance of it, the ethereal lightness of the feathered barb; the graceful curve of the pliant rod, and the soft, musical murmur of the braided silk as it speeds through the air; the royal beauty and knightly comitativeness of the fish that is hooked—all these combine to make troutng the very poetry of angling.

But the fulness of it can not be enjoyed without the days of June. Then the year has hurst into full and lusty life. The weather is soft and gracious. Earth and air and sky are attuned to universal gladness. The streams sing with joy. The meadows are draughts of sweetness. The trees nod hearty greetings and hecken one to enjoyment. June is the time to think tenderly and lovingly of the brook among the hills; of the pools where gliding rapids grow calm and willows cluster and manzanita, oak or laurel throw their dancing shadows; and of the savory, lusty, hauteous creatures that lie in wait beneath the ripples and the foam flecks and the darkening eddies.

Pity the man into whose later life there comes no memory of a day such as this—no early June morning; the old road through shadowing woods, past fragrant fields, by knolly stretches; he eagerly afoot upon it, with rod and reel.

One bright-eyed songster of the wildwood is just astr and piping cheerily to him. The breeze carries the greeting to other feathered conferees and the others toss theirs along. Birds that are not of the plumage of the pioneers join their matin voices in the chorus, until the music-laden air is hearing here, there, and everywhere, the gladness and the sweetness of Nature's jubilate.

A frisky tree squirrel peers at him cautiously from the crotch of a white oak tree. The fussy jaybird flutters and fumes from hough to hough in noisy protest against his proximity. The leaves tremble and shake and scatter down little showers of silver that will glitter like jewels by and by when the sun sees them.

Tree and shrub and flower, bathed in the morning's moisture—fresh, unsoiled, and full-fed—partake of the joy and health he feels, and every living, running, creeping thing is refreshed and satisfied.

Then, hy and hy, from beyond the dark green stretch of trees, from which the road turns to seek a pleasanter way, he hears the brook sing and shout to him; and now he greets it face to face, and follows it where its ripples merely kiss his feet, and anon where he must have it in dark pools that frown and grumble, and where cataracts are angry, where hold, jagged rocks warn him that danger is about them, and deep ravines echo with the sullen voice of waters held in check against their will.

He follows it through shadowy woods and sunlit fields—here where it murmurs peacefully by grassy banks, there where it leaps in wanton recklessness from rock to rock, yonder where it glides in dark, smooth reaches by overhanging clumps of alders that nod and touch their tips above it.

All moods of the brook are hut changiog joys to him. And he casts his flies in pool and ripple and alder stretch, demanding tribute from them all, until at last here is the ancient bridge across the creek, its timbers decaying and awry, for its only use for years has been to cast shadows on the water for trout to lie beneath when the sun throws down too fiercely its noonday rays—the old meadow just beyond, and the h'g oak on the bank, spreading its great mat of shade on the grass beneath it—the spot for luochoon and pipe and an hour's rest.

Lyiog in the cool shade of the waving oak, the smoke of his pipe curling about in the soft June air, he sees the sky, as blue as blue can be, with here and there a fleecy cloud scudding across it, and swallows dashing and flitting up and down, high and low and never resting.

He sees the row of green hushes that grow along and clamber over the rickety worm fence that marks the line between the meadow and the woods beyond, and the cool grove of oak, laurel and manzanita climbing the hill, and the old farm road that winds around it, shady and grass-grown. He sees the

meadow green and level, stretching away and away, with the cows standing in lazy groups under the big oak trees, chewing, chewing, their eyes closed, and their breath mingling with the fragrance that even the hees can never rob the clover blossoms of, although they work all the livelong day.

And he sees the brook, and hears it as it goes singing down through the meadow, now hiding a moment behind some alder thicket, then flashing into light again, and dancing laughingly on its way, flitting off at last into the woods where the meadows ends, and losing itself among their shadows.

He sees and hears it all, and but for the brook singing and dancing on its way he might long lie willingly there, indolent, amid the humming of the hees and the fragrance of the meadow blooms, and wishing there was naught in the wide world hut sun and sky and hees and clover. But the charms of the brook woo him even from the languorous ecstasy of them all, and again he courts its every mood and caprice, until at last wholesome weariness and the departing sun warn him that the rare June day is dying, and he trails homeward with the evening shadows and the sweet-breathed kine.

Ah! the memory of it! And pity the man who hath it not!

The fractions in lure casting are 15ths.

Coming Events.

Rod.

April 17—Sept. 10. Oct. 16—Feb. 1—Open season for taking steelhead in tidewater.

April 1—Nov. 1—Trout season open

April 23—Saturday Contest No. 5. Classification Series, Stow lake, 2:30 P. M.

April 24—Sunday Contest No. 5. Classification Series, Stow lake, 10 A. M.

July 1—Jan. 1—Open season for black bass.

Aug. 15—April 1—Open season for lobsters and crawfish.

Nov. 1—Sept. 1—Open season for crabs.

Sept. 1—May 1—Open season for shrimp.

Sept. 1—Oct. 16—Close season in tidewater for steelhead.

Nov. 15—Sept. 10—Season open for taking salmon above tide water.

Guns.

April 17—Golden Gate Gun Club. Blue rocks. Ingleside.

April 24—Home Gun Club. Pileole.

April 24—Millwood Gun Club. Blue rocks. Mill Valley.

April—Capital City Blue Rock Club. Agricultural Park, Sacramento.

May 1—California Wing Club. Live birds. Ingleside.

May 1—College City Gun Club. Blue rocks. North Berkeley.

May 8—Union Gun Club. Blue rocks. Ingleside.

May 8—Empire Gun Club. Blue rocks. Alameda Point.

May 29, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.

July 1—Feb. 15—Dove season open.

Nov. 1—July 15—Deer season closed.

Sept. 1—Feb. 15—Open season for mountain quail, grouse and sage hen.

Feb. 15—Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

April 13, 16—San Francisco Kennel Club. Eighth annual show. Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.

April 13, 16—Seattle Kennel Club. Seattle, Wash. Charles McAllister, Secretary. P. K. L.

April 20, 23—Portland Kennel Club. Portland, Or. T. E. Daniels, Secretary. P. K. L.

April 27—California Collie Club. Oak Grove, Lawrence, Santa Clara Co. P. K. L.

April 28, 29, 30—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary, San Jose, Cal. P. K. L.

May 4, 7—Southwestern Kennel Club. Los Angeles. P. K. L.

THE FARM.

The Science of Breeding.

In the last issue of the *Live Stock and Dairy Journal*, Mr. Edward W. Howard of this city makes the following well timed comments upon the above named subjects:

In your December issue there appeared an article entitled the "Science of Breeding," by Peter J. Shields, which I have read several times over, and each time found new food for reflection. It seems to me that a discussion of this subject would be beneficial to all of us so-called breeders, and to start the ball rolling I should like to ask how many breeders are of the opinion that it can be determined with any degree of justice by our agricultural colleges or other investigators, "Which of the various breeds are the better for the purpose for which they are bred?"

I agree with Judge Shields as to the desirability of having answers to the many yet authoritatively unanswered questions relative to breeding, but whether it could be determined, which is the best beef breed, or which is the best dairy breed, I have my doubts. Would not the decision of such an experiment have to be qualified by some such statement, given such and such conditions, and such and such a breed will be the best? Again, who shall determine the point as to whether the individuals of the various breeds comprising the test are an equally good average of those breeds? Even if such an experiment were undertaken, would not its value be doubtful in that what might be the most profitable breed today might be forced to take a back seat tomorrow? For experience, I believe, has taught that the efficiency of a breed is dependent in great part upon the intelligence, aim, and degree of care exercised in handling and developing the individuals by those behind the breed, or in other words, the breeders themselves, for it has been found that when nature and environment are the sole moulders a reversion to an original type suited to the environment of the individuals, and not to the use or requirements of man, at once takes place.

The characteristics, then, upon which the best breed would be judged are artificial or developed characteristics, and as such will they not be on the increase or decrease in a given breed, as compared with some other breed, and will not this even be the case between different lots or herds of individuals of the same breed? That these are the facts is evidenced by the different values placed upon cattle bred by one man and those of some brother breeder, though in many cases they have started their breeding operations with very much the same foundation stock as far as blood lines and individuality are concerned. So long as the personal factor is so important a one, our experiment stations would have to inaugurate a continual experiment, or say one every six months, and the man that wished to be breeding the real thing would have to change his breed as often.

Still another difficulty presents itself to my mind; climate and other conditions are various and varied in different sections, and under various conditions of use and environment various breeds will be found to be the best breed. Would it be wise or just, say to blacklist the Jersey because under certain conditions, by reason of her more sensitive and highly strung nature, she proved to be unable to compete with her more hardy sister, the Holstein? I think not. Would it be right to say that the Short-Horn unqualifiedly is the best beef breed, because in the long run they retain their type and scale better than say the smoother and

more compact Hereford or Angus? In fact, I believe there is room for all the improved breeds.

I agree with Judge Shields in the desirability of a unity of type. The effort of our agricultural colleges and state fairs should be, to teach the farmer and breeder which is the best type, not breed, for the production of beef. That is, what type of animal does the market pay the highest price per pound for, and how to handle and feed this type to produce the largest value of beef for the least money. That individuals of this type can be found in all the beef breeds I have no doubt.

Again, in the dairy breeds, let them teach the farmer and breeder which type, not breed, is most likely to carry with it dairy qualities in excess; that they may make intelligent selection and know a dairy cow when they see one whatever the breed. Let them hammer away at color crazes and other fads and teach the breeders that utility should be the main object, not something nice to look at. That pedigree without the individual is worthless; that it is an index of the future accordingly as the line of blood represented has produced in the past and nothing else. Hence the necessity of recording past performance to acquire future improvement along the lines desired.

I believe that a great deal has been done along these lines already, and as a result the various beef breeds are approaching more and more a standard type, whether they be "Black Skins," "White Faces," or "Red, White, and Roans." Whether the dairy breeds are moving as fast towards a common standard of type and performance, I would like to hear from the dairymen.

The smooth, compact, early maturing animal is the best for beef production. What is the best for dairy capacity? I have read that recent experiments show the large, hardy type of dairy cow to be the best for the purpose for which the dairy breeds are bred. What is your experience, breeders of Jersey cattle? Does your larger type produce more profitably as a rule than your more refined type? If so, breed them larger even if you have to sacrifice some refinement. It seems to me that many of these questions can be answered by the breeders themselves if they will systematically observe and record their observations. Moreover, if they find out something worth knowing, don't be afraid to put your neighbors on. Co-operation in more ways than one will do a great deal to dispel the clouds of prejudice and ignorance on these subjects. Co-operation with each other, co-operation with the agriculture colleges, co-operation with the pedigree record associations. And in this matter of recording let us move for a recording of performance as well as a mere list of names, that we may sift the chaff from the whole grain, that we may guard against just such unfortunate occurrences as Judge Shields relates; namely, to breed to a bull which he too late found to have been bred by a man strongly inoculated with the color craze. Remember that the men that have made a success of breeding have made a life study of their subject, that they have proceeded cautiously trying out their sires before breeding them to their best females, discarding those which though they might appear to be like were shown to be not alike; that there is more to a breeding animal than appears to the eye is to be learned from the operations of successful breeders of the past, for their success was often due to the liberal use and concentration of the blood of some one sire. Of such an animal it can be truthfully said that like produces like, and of such a one only.

There is a strong temptation to purchase young males because they are cheaper. Then the tendency is to use the male too young, because he is needed. Hogs are at their best from 18 months old to five years old. He will breed a good deal earlier.

When You Buy a Cow.

When you go out to buy a cow what do you look for; or, in other words, what kind of a cow meets your idea of a profitable one to purchase? If you are buying for your own use the sooner you learn to depend entirely upon your own judgment the better. Almost every farmer has the pleasing impression that his cows are better than his neighbor's and no matter how honest the man may be when the cows are bought you are the one who has to prove whether or not they are profitable. We do not care as to size, although some of our experiment stations have tried to prove larger cows the more profitable; we think it is in the cow, not her size. One must learn to form his opinions quickly and size up a cow upon short notice and the faculty to tell a good or poor cow by examination comes from such a type. If one will study his best cows he will observe that they have certain similar characteristics, no matter what the breed or size of the cow may be.

We do not like the smooth (slick looking as she is often called) cow, yet she is always the easiest one to sell. She carries a good looking udder, is good sized, and would make fair beef if knocked down at once; but mark you, she takes good care of herself before she does anything for you, and a good share of her food goes to supply the clothes on her back. We like to see the cow in moderate flesh, not poor or thin from lack of food and care. We like the hips wide apart, thin thigh, large barrel, and the ribs wide apart; a good wide space between the hip and the first rib. Run your finger along her backbone, and the rougher it is the better. We like to see the cow thin just back of the shoulder so that the backbone is rather prominent there. If she is thick there do not buy her. She takes too good care of herself. We are simply in want of a machine that will work up the food we give her into the more profitable product, and the less toll she takes and the less she wastes the better.

We have taken pains to observe in our own herd that the unprofitable cow nearly always was thick just back of her shoulders. We like to see a small neck, clean cut, a good wide dishing forehead, a good eye, and large clear nostrils. Deliver us from the Roman nose cow; she's coarse everywhere else. Good large tortois milk veins, running well forward; these indicate that blood flows, and plenty of blood must reach and return from the udder. We do not like a cow up on legs too far, as it means that her barrel is too small to bring it close to the ground; avoid the straight under line.

The real finishing work is in the udder, and we will have our ideal in this; running well up in front and high up in the rear, teats of good size well placed, and far enough apart so that you can milk her without continually hitting knuckles. Fat, fleshy udders are no good; they should milk down well, be soft and flexible, and have plenty of tissue to perform their work. We have not said a word about breed, as that is not what we are after; it is the type of cow that is to make the most good milk for us at the least expense. Neither does the price of a cow cut any figure. The price of ordinary cows ranges from \$30 to \$60, but there may be more profit in the \$35 one than in the one costing \$60. When you see a cow you want, buy her; \$5, \$10 or \$20 difference in price is nothing compared as to whether she will make 150 or 350 pounds of butter in a year, or give 3000 or 7000 pounds of milk. You will usually find it is the large, smooth cow that commands the best price. She is not the best cow to buy, and you are buying, not selling. We ought to study our cows and find out why this one gives twice as much milk as the one beside her under the same conditions. There is a reason for it, and even nature, they say, reveals her secrets to the patient, unwary student, and when we find this reason we shall know how to pick out good cows.—H. G. Manchester in *Rural New Yorker*.

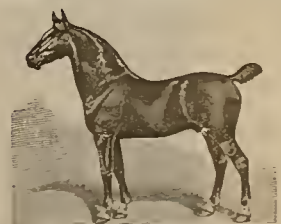

Sale of Tule Lands.

Through the real estate agency of Edward Dinkelspiel, of Suisun, a deal was consummated a few days ago, whereby Mrs. Catherine Joyce sold a tract of about 200 acres of tule land adjoining Suisun on the northeast, to Daniel and P. Danuser of Humboldt county, the consideration being \$5000. Mr. Daniel Danuser and family are now in Suisun to reside until a dwelling house can be built on the land. It will probably be erected on the southwest corner of the property on a line about due east of the last house on the east side of Union avenue. It is the intention of the purchasers to build a levee around the land and reclaim it. Some of it will be seeded to grass and grain, while the remainder will be used as pasturage for stock. It is the purpose of Messrs. Danuser to conduct a dairying business, with which they are familiar, having been engaged in that business in Humboldt county, where dairying is extensively followed on marsh lands that have been reclaimed.

The reclamation of this land will be a great improvement and will no doubt stimulate other owners of tule lands in the work of reclamation. This land is very fertile and immensely productive when reclaimed, as has been demonstrated in many places.—*Solano Republican*.

A large flock of range lambs was recently sold in Chicago, and the animals were so exceptionally large and fine that they attracted universal attention and went to the very top of the market. They were the product of heavy, coarse-wooled mutton-type rams and large grade Merino ewes. The breeder and grower of these lambs was particular to say that especial pains was taken in selecting the mothers, and to that fact was attributed very largely the size and quality of the lambs. This is a pointer to breeders of animals of all kinds to place more dependence upon the females than is generally done. Our people are too prone to think that anything will do for a mother when breeding live stock of any kind and to that fact is largely due the slowness with which our flocks and herds are improved. We should get away from the idea that the sire is the whole thing.—*Denver Field and Farm*.

There seems to be an almost universal opinion among young breeders that to get the best results, two good breeds must be crossed. Whenever it is attempted it is a mistake. The varieties we have are the result of long, careful selection and careful breeding. For a novice to attempt anything better would be a mistake. Let him select what he wants and stick to it.

WILL NOT SCAR OR BLEMISH.

GOMBAULT'S
CAUSTIC BALSAM

Is the safest and most effective lotion or blister for ailments of

HORSES and CATTLE

and supersedes all cautery or firing. It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Poultry Notes.

Under no circumstances should misshapen fowls be kept in breeding.

One of the main objects in breeding is to keep up size and constitutional development; unlimited range for fowls is not necessary, although it is great saving of feed.

On the farm after the chickens pass the sixth or seventh week, they can pick up a good part of their living.

Economy and good management go hand in hand in poultry breeding to make it successful.

The possibility of profit in raising turkeys comes from their ability to pick up for themselves a good living a good part of the time.

The most widely popular breeds of chickens are those which combine good size and form with good egg producing ability.

Under average conditions fifty fowls is as many as should be kept in one flock, and usually they will pay better than a larger number.

One objection to keeping old hens and pullets together is that the old ones boss the pullets and are apt to secure more than share of feed.

Too heavy feeding and want of exercise tend to barrenness not only among fowls, but among all kinds of animals.

Keeping fowls on hard floors or runs will frequently cause swollen feet and legs. They must have some loose ground to scratch over to thrive best.

There is no excuse for keeping poor fowls when a flock of good fowls can be secured at so small an outlay.

There is nothing better, whether the yards are removable or stationery, than turning the ground thoroughly by spading or light plowing where the yards are more extensive in dimensions.

A hen without restraint may pick up enough of the bone and eggshell material if her range be varied, but in confinement she will fail to get sufficient from ordinary food and a supply in the shape of lime, oyster shells, or ground bone must be given.

After chickens are one-third or one-half

grown, coarse and milky food may be mixed with their grains to an advantage, but it will not pay to feed too costly food to chickens intended for market.

With poultry, as with other stock, one of the main objects of breeding is to keep up size and constitutional development of the breeding stock and to breed from stunted and immature birds is to defeat what we are striving for.

The advantage in using pounded or broken oyster shells in preference to those that are ground is that the sharp pieces are the more desirable as they assist in grinding the food in the gizzard, which is not the case where they are finely ground.

When making a start with poultry in selecting your breed be governed largely by your market and what you propose to do. If eggs are to be made a specialty get some of the non-setting breeds. If you want to raise broilers you want a quick maturing breed that fatten young and will make a good weight in a short time.

On the farm there is no occasion to be

WESTERN MEAT COMPANY
SAN FRANCISCO, CAL.

lavish in food during the growing season. If the fowls can be given a free range, and they can on the majority of farms, they will pick up a good part of their living from the time they have made a sufficient growth to be given a free range and the cost of feeding be made very light.

The sensation in the Denver meat trade last week says *Field and Farm*, hinged on a bunch of spring lambs raised by Colonel Grubb of Garfield county. They were dropped on the 10th of January and were served as Easter mutton at one of Denver's fashionable hotels. At the age of eighty days they weighed seventy-eight pounds and brought eighteen cents a pound or a total of \$14.04 each. The joke about these young Shropshires is that they were grown outdoors, waxing fat in the Colorado sunshine without grain. Who can say that sheep do not pay when bred and fed right by a good farmer.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Chickens, turkeys, ducks, and geese may be readily improved by the purchase of a pair or two of birds or a setting of two of eggs.

On the Speedway in Golden Gate Park

Sale of Shropshire Sheep.

J. B. Hoyt, a prominent stockman of Montezuma hills, has sold his entire stock of Shropshire sheep, consisting of over 200 head of thoroughbred ewes and lambs, to Lambie Bros., who are the owners of over 2000 acres of farming lands and stock ranges near Denver. Lambie Bros. have extensive stock interests including horses, mules and cattle, and are now arranging to add sheep raising to their holdings. Mr. Hoyt will continue in the sheep business but simply desired to close out his stock of Shropshires.

Several tests made under the supervision of Professor E. B. Voorhees of the agricultural experimental station at New Brunswick, N. J., recently have proved that H. D. Roe of Augusta, N. J., has a Holstein cow which holds the world's record for producing milk. The record shows that in seven days the cow gave 620.95 pounds of milk and 26.57 pounds of butter fat, which produced 34.42 pounds of butter. The record for thirty days is 2640 pounds of milk, 110.1-10 pounds of butter fat, making 127.6-10 pounds of butter.

The cow is named Aggie Cornucopia Pauline and has been valued by the Holstein-Friesian Breeders Association at \$10,000. For the test the cow was milked four times each day.

Within recent years many changes have taken place in butter making. It was formerly supposed that most any one who was neat and tidy could make good butter. Since investigations have been pursued along scientific lines we find that it requires skilled labor, says *Stockman and Farmer*. The men who are pursuing dairying at our schools now are possibly twenty-five per cent in advance both in education and skill of the students who took dairy work seven or eight years ago. As we look the country over we find the people who have become famous in the dairy world are men of unusual intelligence, who would undoubtedly have made a success in most any other line of business.

Talking about practical demonstration, writes a correspondent, I was at the farm of an Angus breeder recently who had in his yards 100 fat steers. The greater portion of these steers were well bred fellows, on the whole a good average lot, even more than an average lot, but in the lot were two full blood Angus which the owner had considered too poor individually for use as sires and in consequence had castrated them. These two steers were hog fat, in fact finished, while the remainder of the lot would require three to four months more feeding to put them in the same condition. Question—Why breed grades.

Trotting Horses

in being shipped about from place to place on a circuit, subject to all kinds of weather and consequent changes in temperature are very likely to fall sick, *chills, colic, cold, pneumonia, &c.*, may take them at any time. Avoid trouble by having a supply of

Tuttle's Elixir

ever ready to hand. It is invaluable in such cases and for harts, bruises, sprains, spavins, etc. *The best body and leg wash known.*

Used as: Endorsed by Adams Express Company.

Tuttle's Family Elixir cures rheumatism, sprains, bruises, etc. Kills pain instantly. Our 100 page book "Veterinary Experience" **FREE**.

Tuttle's Elixir Co., 467 O'Farrell St., San Francisco.

Beware of so-called Elitars—none equal to Tuttle's. Beware of blisters; they offer only temporary relief.

KENDALL'S SPAVIN CURE

When you strike a stubborn case of Spavin, Ring Bone, Curb, Splint or any other form of lameness, use

KENDALL'S SPAVIN CURE.

Men who have used it all these long years assert that it is infallible in the treatment of these diseases of the horse. You need not take our testimony—take theirs.

ELSTON, S. D., March 7, 1902.

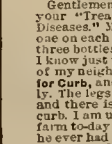

Dr. B. J. Kendall Co., Enosburg Falls, Vt.

Gentlemen:—Please send me a copy of your "Treatise on the Horse and His Diseases." My father cured two spavins, one on each of his horses, and used only three bottles of Kendall's Spavin Cure. I know just what your remedy is. Two of my neighbors used the Spavin Cure for Curb, and they cured them completely. The legs are left in good clean shape and there is no sign of any spavin or curb. I am using one of the bottles on my farm to-day and you could not tell that he ever had a spavin.

Very truly yours,
GEORGE SEARS.

For sale by all druggists. Price \$1, six for \$5. As a liniment for family use it has no equal. Ask your druggist for Kendall's Spavin Cure, also "A Treatise on the Horse," the book free, or address,

THE STANDARD BRED YOUNG STALLION

HIGHLAND (TRIAL 2:12)

Bred at Highland Stock Farm, Dubuqua, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jose Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the breeding season of 1904, either pacers or trotters. Must be payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

R. P. LATROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1330 pounds. A beautiful turned bay horse with heavy mane and tail kind and gentle with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24 but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Willson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 38 1/2 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/2), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/2. His second dam is Argenta by Almost Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

SAMUEL GAMBLE, Pleasanton Cal.
Or TUTTLE BROS., Rocklin, Cal.

NEERNUT 19810

Record 2:12 1/4 (Sixth Heat)
Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09 1/4 to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 1:13 3/4 (son of Electioneer), dam Clytie 11 by Nutwood. He will make the Season at my place in Santa Ana.

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40 To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

Record 2:20.

THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:34 1/4, MUCH BETTER 2:07 1/4, DERBY PRINCESS 2:08 1/4, DIABLO 2:09 1/4, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed. Pasturage \$5 per month. Hay and grain \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15 1/4

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:04 1/4, Alta Vela 2:11 1/4, etc., etc.); dam LULANEER (dam of Limonero 2:15 1/4, Elton 2:18 1/4) by Electioneer 1:25.

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-hat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

Owner

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney

KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shylcock 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 706. Kinney Lou's oldest colts are two year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree, address

BUDD DOUBLE, 1030 Pacific Ave., Alameda, Cal.

or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09 1/4, champion 4 y. o. of 1903 (half mile 59 1/4), OUR LADY (trial 2:20 1/4) and full brother to JOHN A. McKERRON 2:04 1/4 (the fastest trotter of the Wilkes family).

Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16 1/4, sire of John A. McKerron 2:04 1/4, Who Is It 2:10 1/4, Stanton Wilkes 2:10 1/4, Claudius 2:13 1/4, Georgie B. 2:12 1/4, Bob Ingersoll 2:14 1/4, Tidal Wave 2:13 1/4, and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04 1/4, Nearest 2:22 1/2 and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05 1/4, Direct 2:07 1/4, Direction 2:10 1/4, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 462 sire of Echora 2:23 1/4 (dam of Direct 2:05 1/4) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:22 1/4, sire of Our Dick 2:10 1/4, Homestake 2:14 1/4 and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15 1/2 hands and weighs 1300 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season. Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

Telephone: Red 1431.

T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17 1/4, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years)

Black Jack 2:28 1/4 (trial 2:22); the Boquet (4 y. o. trial 2:17 1/4); Meljella 2:29 (4 y. o. trial 2:13 1/4).

Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Edella (dam of Edette 2:25, dam of Mary Celeste 2:17 1/4) by Director 2:17; second dam by Renss Blackbird 2:22; third dam by Lancel, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL

2-year-old record

2:20 1-2

Sired by Dexter Prince (sire of Elesta 2:08 1/4, James L. 2:09 1/4, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15 1/4) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30 1/4 (dam of Manzanita 2:16, Wildflower (2) 2:21 and 8 producing daughters) by St. Clair 1905. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM.

Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

I DIRECT 2:12 1-2

(Officially Timed in Race in 2:08 3/4)

SIRE, DIRECT 2:05 1/4, sire of 51 in the list, including Directly 2:03 1/4, Direct Hal 2:04 1/4, Bonnie Direct 2:05 1/4, Prince Direct 2:07, Directum Kelly 2:08 1/4, Trilby Direct 2:08 1/4, King Direct 2:09 1/4, Rey Direct 2:10, etc., etc.

DAM, FRANCISCA (dam of I Direct 2:12 1/4, Sable Frances 2:15 1/4, Guyceon 2:23 and Earl Medium, sire of May Bud 2:13 1/4, Tom Martin 2:14, Kaowah Star 2:14 1/4, Lucy Stokes 2:18 1/4, Coneril 2:21 1/4, Pearl Medium 2:22, etc.) by Almost 33.

Second Dam, Frances Breckencord (dam of Maximue 5:15, sire of 8 in list) by Sentinel 2:30; third dam by Bayard 5:38; fourth dam, Luna by Swigert's Lexington; fifth dam, Eagles by Imp Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E Streets, near Agricultural Park, Sacramento.

Fee \$50. I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

SILVER BEE 2:27 3-4 **By SILVER BOW 2:16**
(Sire 2 in 2:15, 8 in 2:0)
1st dam BELLE Mc (dam of Worthwood (1) 2:59 and Silver Bee (2) 2:27¼) by Ensign Goldust Jr.
2d dam LITTLE BELLE (grand-dam of 2 in list) by Belmont (sire of Nutwood 2:18¼ and 58 more in 2:30).
3d dam Thoroughbred Mare by imp. Trustee.
(RECORD MADE AT TWO YEARS OLD)
Season of 1904 at
VORDEN, SACRAMENTO CO.
FEE: \$30 FOR THE SEASON.
SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1300 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grand sire Robert McGregor sired that wonderful horse Cresens 1:59½, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to **MCKINNON & GREEN, Vorden, Sacramento Co., Cal.** or to **W. O. (JOE) BOWERS, Capital Hotel, Sacramento.**

(sire of 11 in 2:10) and Lemonade
(dam of Bessie Wilton 2:09 1/4,
Petigru 2:10 1/4, Lady Wilton
2:11 1/4 and Lemonee 2:18 1/4). PETIGRU'S record was made in a
winning race of six heats. His dams for three generations are in
the great broodmare list. For individuality and racehorse quali-
ties he cannot be surpassed. FEE \$50.

CORONADO 2:18 1/4

By the great McKinney
2:11 1/4 (sire of 8 in 2:10 and 27
in 2:15); dam Johanna Treat
(three-year-old trial 2:17)
Thos Rysdyk; second dam by Venture, sire of dams of Directum
2:05 1/4 and Sidney Dillon (-ire of Lou Dillon 1:58 1/4, world's cham-
pion trotter). CORONADO is one of the handsomest of the sons
of McKinney. He won five races out of seven starts. FEE \$40.

SILVER COIN 2:11 1/4

(Record made as a
four-year-old in a win-
ning race of five heats
against aged horses.
Sired by the great Steinway (sire of 4 in 2:10); dam, the fast race
mare Jenny Mac 2:09 by McKinney 2:11 1/4. SILVER COIN has every
qualification for a great sire of speed. He has extreme speed,
great gameness and endurance, and is a magnificent individual.
FEE \$40.

Send for card containing tabulated pedigrees and full particulars
of above Stallions. Address
W. G. DUFFEE,
Box 96, University P. O., Los Angeles, Cal.

MONTESOL

(TRIAL 2:24)
Full Brother to Lady Grandard 2:33 (trial 2:13)

MONTESOL, 6 years old, stands 15 1/2 hands, weighs about 1125 pounds; is the best bred young
McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the
greatest son of the great Alcyone. He is in every respect a splendid individual and should be seen
by every owner of a good mare in this State before looking elsewhere.

\$10 for the Season, with return privilege

POLE STAR

The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address
P. FOLEY Race Track, Alameda.

SEYMOUR WILKES

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12 1/4

and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought
race and was a game racehorse. No horse in California can show
a greater proportion of large, handsome, strongly built and well-
boned colts. They all look alike, and in nearly every instance are
square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird
by Playmail; second dam by Odd Fellow, third dam by a son of
Williamson's Belmont, fourth dam by Blackhawk 7:07. He weighs 1300 pounds, stands 16 hands high
and is one of the most symmetrical horses in California. Several of his get are in San Francisco and
will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch
via steamer Gold. Pasturage \$3 per month. For further
particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George
Stables, 408 Bush street San Francisco.

Alta Vela 22449

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07 1/4, Sunol 2:08 1/4, Palo Alto 2:09 1/4, Alta Vela 2:11 1/4, and 9 more in the 2:15 list, etc)
dam LORITA 2:18 1/4 by Piedmont 3:01; second dam Lady Lowell (dam of Ladywell 2:16 1/4, Lortia
2:18 1/4, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16 1/4.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer in this Coast. Best of care taken, but no
responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of
service and must be settled before removal of mare. Address

SUBSCRIPTION
THREE DOLLARS A YEAR

PLEASANTON SNAP SHOTS

In the upper left hand corner is the brown peeling colt BOOMER by Welcome 2:10½, in Barney Simpson's string and owned by James Quigley. Facing him is the bay trotting mare SONOMA GIRL by Linwood W., recently purchased by J. D. Springer of Pleasanton at a long price. In the lower left hand corner is ROSETTA by McKinney with her one week old filly by Searchlight, owned by W. Ford Thomas of San Francisco. Opposite her is Ed Mills' handsome stallion Lecco 2:09½. The other views are Tony Bernal's new boarding house just outside the track, a view of the first turn with Pleasanton in the distance, and one of the cooling-out rings where the horses are walked.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good service out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS. If directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—a FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CURE FOR THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gull Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

Sold by all Dealers in Harness and Tuff Goods. If not in stock ask them to write any Jobber for it.

GREEN'S RUFUS	The Baywood Stud, San Mateo

OVER SIX THOUSAND DOLLARS is offered in ten stakes for trotters and pacers by the Vallejo Race Meeting of which that veteran and reliable horseman Thos. Smith is President and Manager. The list of stakes with the conditions appear in our advertising columns to-day. For the trotters there is \$1000 for the 2:24 class, and \$500 each for the 2:16, 2:13 and three-year-old classes. There is \$1000 for the 2:20 class pacers, \$500 each for the green and the 2:15 classes, \$600 for the 2:10 class and \$500 for the three-year-olds. The meeting will follow the Breeders meeting at San Jose, and the latter follow the Pleasanton meeting, which will open the circuit. It is in order now for every owner and trainer to begin boosting for entries to the Vallejo meeting. The early closing stakes at Pleasanton and the entire program for the Breeders meeting at San Jose have closed with big lists of entries. The same kind treatment should be given Vallejo by the horsemen. This is the time when every horse owner and trainer in California should respond as liberally as possible with entries to those associations that offer good purses. Help one another should be the motto and organizations that offer good purses should be supported and assisted to make their meetings successful. Unfortunately for the harness horse owners and trainers, the majority of the District Boards of Agriculture in California, under whose auspices harness racing has been given in the past, are composed largely of men who take no interest in harness horses and cannot be induced to give race meetings except as the amusement feature or as a drawing card for the district fairs. Having no State appropriation for the latter they do not feel like devoting any time to giving a harness meeting. Consequently, the associations that do offer purses this year should get the unanimous and hearty support of the horsemen and every effort should be made to swell the entry lists to large proportions. Pleasanton and the Breeders have both received grand lists and as the next place on the circuit will be Vallejo it should be treated as

generously as the others. During the coming month let every man identified with the harness horse business get in and say a few good words for Vallejo and its meeting and boost all he can for a big entry list on May 16th when entries close. We are on the road to a good circuit in California this year and with two or three more meetings of the kind already advertised horses can be raced here at a better profit than by taking them East unless they are fast enough to win on the Grand Circuit. President Tom Smith offers over \$6000 to the horsemen, now let them reciprocate by giving him a big entry list.

A REPORT comes from Santa Rosa that the committee of citizens who raised \$1250 by subscription to induce the Pacific Coast Trotting Horse Breeders Association to hold its meeting there this year, will probably not accept the offer of that association to repeat its program to be given at the regular meeting at San Jose, but may hold a meeting under its own auspices, provided terms can be made for the Santa Rosa Stock Farm track. It is to be hoped the citizens committee will hold the meeting. With the amount subscribed a list of purses fully as large as those offered by the Breeders Association can be given, and with a little effort a larger list of entries can be obtained. If the Santa Rosa Stock Farm will give the use of its splendid track and grounds, the financial success of a meeting at Santa Rosa under local auspices would be assured. A thousand dollars is not too great a sum to figure on as clear profit to any club of Santa Rosa citizens who will take the matter in hand and work energetically for entries and a good attendance. As the horseman will beat Vallejo the week previous which is only about thirty miles distant from Santa Rosa, they would all be glad to enter at the latter town. The Santa Rosa horsemen can hold a meeting that will attract a larger entry list and draw a bigger crowd at the gate than will be seen at any other place on the circuit. All the owners and trainers like the town, the track and the splendid red oat hay that is always furnished their horses when they race at Santa Rosa. The California and Northwestern Railway always gives low excursion rates to the meeting from all points reached by its lines and crowds of people can be drawn from Healdsburg, Cloverdale, Ukiah, Sonoma, Petaluma, Sebastopol and other towns that are within a short distance from Santa Rosa. Thousands of dollars will be spent in the town during the week of the meeting, benefitting everybody. If three or four or a half dozen active business men of the town will take the matter in hand and offer a program of good purses, they will find that the horsemen will not only respond liberally with entries, but the people will turn out in large numbers to see the races and a good cash surplus will be on hand at the end of the meeting.

THE HORSE WAS VICTORIOUS over the motor wagon in New York the other day when the managers of a new big department store purchased the necessary outfits for their delivery department. The New York Herald states it this way:

"The new 14th store, of which Henry Siegel is the head, is a new establishment from the ground up. Starting with a new stock in a new building the management have every feature the best, from the standpoint of economy and efficiency. When it came to delivery service, which is one of the most important features of the 20th century department store, Mr. Siegel and his associates had to choose between horses and motor wagons, and it did not take them long to make their choice. After having themselves tried the steam and electric trucks in other business and having seen a score or more of the leading business houses of New York test all the various types in an experimental way, the new firm turned them all down and placed an order with Fiss, Doerr & Carroll for 240 horses, of the best type.

The Herald adds: "This indicates the passing of the automobile for practical business purposes in a city where conditions are more favorable than almost anywhere else for the use of motor cars." The people why have been predicting that the horse would soon be a curiosity on the streets have another guess coming. That the motor wagons will continue to be improved and come into still greater use as pleasure vehicles we have no doubt, but the demand for good horses will continue to increase as the population of the country increases and will always be ahead of the supply. As a freight carrier the motor wagon is not a success so far as compared with the draft horse. The team hitched to a truck will do more work and do it better and with less delay than the best motor car yet invented. The horse will lose fewer hours in a month or year than the most perfect machine so far devised to move heavy loads. He will pull a load up a grade or over a road full of holes and as rough as a plowed field and do it willingly, asking only that he be well taken care of. When the automobile can be sold for \$250 or \$300 it may come into general use

as a pleasure vehicle for the man of moderate means, and when it does the wealthy people who are now making a fad of it will go back to the horse, as they are already doing in the East. The horse is passing the benzine buggy at a two-minute clip and will keep in the lead.

GOOD PROGRESS is being made by the committees of the Amateur Driving and Athletic Association having in charge the raising of a subscription of \$25,000 for the building of a speedway and athletic grounds in Golden Gate Park. At the present writing about \$15,000 has been subscribed and the chances are excellent for getting the full amount required within the present month, but even if it takes longer there will be no let up on the part of the committees until the entire sum is subscribed. The new grounds will do more for amateur sport than anything yet inaugurated in this city and every person who favors these sports should subscribe as much as he can afford to give. The plans for the new track and grounds have been completed and meet the approval of everyone to whom they have been shown. If you are willing to subscribe to this splendid improvement to Golden Gate Park and have not yet been called upon by the committee send your name to Treasurer Frank G. O'Kane and he will see that some member of the committee will wait upon you with a subscription book.

BUTCHERS' DAY will be celebrated at the Oakland track on Wednesday, May 18th. Read the program in another part of this paper and enter your horses in time. There are races for trotters, pacers and runners.

Foxy Quiller Brother of Cresceus.

Nothing could better illustrate the interchangeability of the trotting and pacing gaits than the fact that among the entries to the Chamber of Commerce pacing stake at Detroit is Foxy Quiller, a full brother to the champion trotting stallion, Cresceus, writes Henry Ten Eyck White.

So far as known Cresceus never evinced any inclination to pace, being a natural trotter from the start of his career. Foxy Quiller, on the other hand, is a pacer by instinct. I saw him perform at Columbia last fall, and, although not able to win, he showed a lot of speed in spots and had a way of going which made one think he would be a hard horse to beat, once his education was completed, unless his opponents could outstep him quite a little.

Foxy Quiller is a bay horse, built on generous but well proportioned lines. He seemed, however, not to be under full control at all times. The McGregors have a lot of spirit—the old horse was dangerous to approach—and most of them require careful and intelligent handling in which good treatment shall be coupled with firmness. Foxy Quiller showed a lot of determination in his race, and this was especially true in scoring, he seeming anxious to get away well and beat his horses right from the jump. That he has been named in the Chamber of Commerce shows that his owner deems the brother to Cresceus capable of a mile in 2:10 or better, and if he should eventually pace to a low mark there would be a lot of good mares bred to him on account of his blood lines and distinguished relationship, the idea being that he would for that reason get as many trotters as pacers.

Dan Patch.

I notice in the different papers in regard to Prince Alert 1:59½ racing Dan Patch this year. In the spring of 1903 a statement from me was published, in most of the horse papers, that Dan would not race with any hopped pacer. The owner of Prince Alert can issue all of the challenges that he may think best for his own advertising purposes. He is well aware that he is perfectly safe, and knew this before he talked such a race, even last year.

I am convinced that hopped pacers are not of much value to breeding interests, and I believe that they should not be allowed to start in any races with free going pacers. I know that many of them are fast race horses, and instead of keeping them out entirely as many associations do, I would have them start in separate classes, so that people who admire hopped pacers could see them race in a hopped class.

A sire that has a large number of hopped pacers in his list would not be patronized by a great majority of breeders.

I think that I am justified in my position in regard to Dan racing horses that wear double harness. If any free going pacer shows sufficient speed to put him in Dan's class, a race can easily be arranged, and I will honor the horse that wins.

I think that this explains my position, and I believe that fair-minded people will admit that I am entitled to use my own judgment.

W. M. SAVAGE.

JOTTINGS.

HIGH CLASS TROTTERS are not as thick as bees in California, but their number is increasing and one cannot visit our tracks on workout days without coming to the conclusion that two-minute speed is nearly as common as 2:20 speed was twenty years ago. The conformation of our trotting bred horses is such a vast improvement over the early day trotters that a homely horse is now an exception on any training track or breeding farm. Breeders are undoubtedly progressing faster at present in the production of horses with speed than at any time since the breeding of trotters was begun, and I confidently believe the 2:00 class will be a regular feature of the Grand Circuit a decade hence. I spent three or four hours at the Pleasanton track last Saturday and while there saw seven trotters worked that can trot an eighth of a mile right now in 15 seconds, and there were "more of them in the barns" as one of the rail birds remarked. The seven I refer to are Judge Greene 2:10½, Consuela S. 2:12½, Aristo 2:17½, George G. 2:12½, and the green horses Don M. by Neernut, Black Thorn by Hawthorne and John Caldwell by Strathway. Now I did not see all these horses show a two-minute clip, but two of them showed that fast and the others can. Judge Greene and Consuela S. were worked with a green pacer by Rajah also of the Salisbury string. The three made a mile well bunched at the wire in 2:12½, the last quarter in 31½ seconds, Charley De Ryder taking Judge Greene back the last hundred yards. Consuela S. got off behind and her separate time was 2:11½. Twenty minutes after this heat was over, De Ryder gave the Judge another mile, brushing him the last quarter in 29½ seconds. He is one of the boldest going, most magnificent trotters that ever marched on a track and moves with the regularity of an engine.

Aristo 2:17½, the five-year-old by Nushagak, is another superb horse, large magnificent bay, with a gait that is perfection. In a mile in 2:12½ he went to the half in 1:09, came the last half in 1:03½, the last quarter in 32 seconds and the last eighth in 16 seconds. He worked with a couple of pacers and started way behind. In the third quarter he was given his head and caught up with the leaders when the head of the stretch was reached, and then came through that quarter in 32 seconds without any effort. In his last mile of the day, which was slow, Spencer let him step the last eighth and he did it in 15 seconds flat, just swinging.

George G. has trotted quarters in better than thirty seconds many times. Josh Albertson drove him "a slow mile" Saturday and he certainly was urging the horse back instead of forward at the finish, yet the mile was in 2:16, last half in 1:06 and last quarter in 32 seconds.

The green horses Don M., Black Thorn and John Caldwell all have two minute speed according to reliable friends of mine who have held watches on them. I think Don M. is one of the grandest prospects for a 2:10 or better trotter that I have seen in a long while. He is six years old and is by Neernut 2:12½ out of a mare by Mambrino Wilkes. No trotter in California has a greater trotting head, and his magnificent blood bay color, carriage, splendid proportions and business like way of going stamps him as one that has class and much of it. Ed Mills certainly has a faculty of picking up good ones which shows that his judgment on a horse is not often misplaced. Don M. trotted the last quarter of a 2:24 mile by my watch in 33 seconds and he looked to me like one that could negotiate an eighth at two minute speed if Mr. Mills had desired to drive him that fast.

Black Thorn, the Hawthorne horse owned by Mr. Salisbury's brother who resides in Salt Lake, is not the grand looking horse that Don M. is but he is a trotter all right and entered in the M. & M. at that. He was with Hopper the other day when the latter worked a mile in 2:12½ and the Hawthorne gelding was right there all the time and his mile was as fast as that of the McKinney horse. He is a good gaited one, too, as good as any of them and there are no reasons but condition or accident that should put him behind the money at Detroit in July.

John Caldwell the Strathway gelding that Mose Hart sold last year to Col. J. C. Kirkpatrick for \$1500, is a vastly improved trotter over his last year's form and he was a good second in 2:13½ over East then. He can show two minute speed they say, and I don't doubt it in the least. He has been timed quarters in 31½ seconds this year and the boys accused Thompson of pulling him at that.

To these seven that I saw on the track last Saturday must be added the high priced mare Sonoma Gilr by Linwood Wilkes that Ed Mills sold to Mr. Springer last week. Mr. Springer liked the mare, and asked Mr. Mills the privilege of driving her a quarter before saying he would take her at the price. The privilege was freely granted and Mr. Springer stepped her the quarter in 30 seconds flat by his own watch. The mare became his property then and there. The photo engraving on the front page of this paper gives some idea of her handsome proportions, but no photograph can reproduce her beautiful rich bay, or show her splendid muscular development and graceful lines.

All the horsemen at Pleasanton were talking about Mr. W. A. Clark Jr.'s stallion Highland last Saturday. Ted Hayes was working him and the black fellow moved so much like a 2:10 race horse that Hayes remarked he might race him this year. Highland had trotted a mile in 2:12 before Mr. Clark bought him, but went wrong and Hayes has been very careful with him this year. It was decided to put Highland in the stud for a short season, and not work him until next season, but he is trotting so fast, and looking so near right that he will be given a week or two further trial, and if he continues to improve may be raced this year after all. He trotted a quarter in 32 seconds Saturday. He goes at it like a heavy weight prize fighter, and has the racing instinct strongly developed. He is one of the kind that wants to get to the front when another horse comes alongside, but don't get rattled in the least if there are a half dozen of them. He just sticks his nose out and trots for keeps. He will be a 2:10 race horse if he starts this year and meets with no bad luck.

Sam Gamble is getting ready to take Stam B. 2:11½ to Salem, Oregon, on the first of May. If the son of Stamboul could remain in California he would have a full hook; in fact, would probably have to turn mares away, but there was such a strong demand for his services sent in by the Oregon breeders that Mr. Gamble could not refuse to take him up to the web-foot state. There is one consolation—Oregon breeders have many high-class mares, and those already booked to him there are among the best in that country. Stam B.'s get are good size, handsome and in nearly every instance trotters and they will make race horses. Mr. Gamble has two now at the Pleasanton track that are attracting considerable attention. One is a pacer, and a sweet gaited one at that. The other is a trotter and since Gamble got some feed into him has marched a half in 1:11, and a mile in 2:25. Neither of these horses was trained any until this year, but both can take standard records next week if asked to.

Every horseman I meet these days asks me if Woodland intends giving a meeting this year, and I am compelled to answer that I do not know. District Association No. 40 has made no move toward giving one as yet, and so far as I know no meeting of the Directors has been held. No meeting was held at Woodland last year and the horsemen were sorely disappointed as there is no place in the State where they would rather enter and race. The Woodland track is a fast one, the management has always been good and as the meeting is generally held during the week preceding the State Fair, shipments in and out are convenient and the races are fast as none are trying to save records. If the State Fair takes the last week in August this year Woodland should get a move on and arrange for a meeting to follow Vallejo or Santa Rosa. It is a shame that such a good racing town should drop out of the circuit entirely just because there is no appropriation for a district fair.

Another Royally Bred Filly.

IRVINGTON, CAL., April 20, 1904.

EDITOR BREEDER AND SPORTSMAN:—Inclosed please find tabulated pedigree of Julia Blair, a very high bred filly that was dropped on the Nutwood Stock Farm yesterday. If breeding counts for anything this little miss should walk right up into the two-minute list as soon as given the chance. As you will see mostly all of her ancestors are performers and producers to the fourth generation and mostly all trace back to Hambletonian 10. This pedigree I think will suit our friend, Dr. Farnum, as this seems to be his theory in breeding which is all right. This filly I value so highly on account of her being a daughter of Nutwood Wilkes, as he is not only proving a great sire but a great broodmare sire. All of his daughters that have been bred, that I have heard of, all produce speed and I would advise all owners of Nutwood Wilkes' mares, that are not in training, to breed them to high class stallions such as: Bonnie Direct, Searchlight, Chas. Derby, in fact any high class horse that is a good performer and has proven

his producing qualities. Nutwood Wilkes is making a great showing this year. Judge Greene's two-year-old in Salisbury's string stepped a quarter last Saturday in 34½ seconds and went round the first turn up hill to the one-eighth in 17½ seconds. Mr. Salisbury has a four-year-old in his string by Nutwood Wilkes that stepped a quarter in 32½ seconds. Her dam is by Dexter Prince. She is a smooth gaited pacer and goes without hoppers. Salisbury has had her in his string about three weeks. Mr. Springer has a filly by Nutwood Wilkes that worked a fourth mile in 2:15, a few days since.

At San Jose last Wednesday I saw T. C. by Nutwood Wilkes step a quarter in 33 seconds; Mamie R. by the same horse has stepped an eighth in 15½ seconds; a brother to John A. McKerron a quarter in 36 seconds; a two-year-old brother to McKerron an eighth in 19 seconds; Gray Witch (a three-year-old) a quarter in 34 seconds; a four-year-old by McKinney, out of a mare by Nutwood Wilkes, stepped a quarter in 33½ seconds and others too numerous to mention. So a horse bred as he is and proving such a producer, I do not see how any one can make a mistake in breeding a good mare to him.

Yours very truly MARTIN CARTER.

[The tabulated pedigree referred to by Mr. Carter in the above letter shows that Julia Blair is by Nutwood Wilkes, dam Bonnie Derby, (never raced but paced an eighth in 15 seconds with a little work) by Chas. Derby, grandam Bon Bon 2:26 (dam of Bonnie Direct 2:05½ and Bon Silene 2:14½) by Simmons.—ED. B. & S.]

Answers to Correspondents.

R. E. D., Hanford.—Please give me the breeding of Algona, No. 11543, Altimont No. 985 and Arctic by Little Robinson.

Answer—Algona 11543 is by Almont 33, dam Emma Kinhead by Conscrip, son of Cassius M. Clay Jr. 22, grandam Effie Dean by Mambrino Chief 11, great grandam a daughter of Powell's Bertrand, thoroughbred. Altimont 985 is by Almont 33, dam Belle Miller by Blackwood 74, grandam by Mambrino Chief 11, great grandam Mary Belle by Hickory. We have no record of Arctic.

GEO. K. DITTUS, Sacramento.—In the next issue of your paper will you please give the breeding of Bertha by Alcantara on the dam's side, also the extended pedigree of Grace by Buccaneer and of Stella Marvin 2:24 on the dam's side.

Answer—Bertha's dam is Barcelona (dam of Bayard Wilkes 2:11½, etc.) by Bayard 53, son of Pilot Jr 12, grandam Blandina (dam of six producing sons) by Mambrino Chief II, great grandam Burch mare (dam of two in list) by Parker's Brown Pilot. Grace's dam is Mary by Flaxtail, dam of one trotter in list, one producing son and two producing dams, grandam by Bright Eyes, son of the thoroughbred horse Boanerges. Stella Marvin is not registered. She is a bay mare by Don Marvin and made her record at Red Bluff in 1900. Her dam is not given in the Year Book. She was formerly owned by D. S. Cone of Red Bluff, who can probably give you her breeding.

CHAS. HUBBARD, Riverside.—(1) Please give me the breeding of Black Ralph and David Hill. (2) Is there a family of horses called McCracken's Black Hawk; if so, are they of any note? (3) Can a horse be registered after he is dead, provided he was eligible to registration?

Answer—Black Ralph 10687 was by David Hill 857 and his dam said to be by Edward Everett 81, son of Rysdyk's Hambletonian; David Hill 857 was by Black Lion son of Black Hawk 5, and his dam by Liberty, a son of Hambletonian 2. (2) McCracken's Black Hawk 767 was by Black Hawk 5 and his dam untraced. He sired Sisson Girl 2:28½. One of his sons is a producer of standard speed and six of his daughters are producers. He can hardly be said to have founded a family, but his descendants are breeding on and his blood is highly thought of. Kinney Lou's second dam was by David Hill Jr 17139, a son of David Hill 857, and his third dam is by McCracken's Black Hawk. (3) Yes.

SUBSCRIBER, San Francisco.—To decide a bet, would you kindly answer in your valuable paper where a horse is the highest, whether over the shoulders or over the hips.

Answer—Some horses are higher over the shoulders and some over the hips. Generally the measurement at the shoulder is higher, but many horses, some of them very noted ones, have been higher over the hips.

During a sale in Kentucky a few days ago the famous old mare Lady Ham, now 19 years old, by Hambrino, and four of her produce, sold for \$13,100, a pretty good price when the age of the old mare is considered. Lady Ham is the dam of Hawthorne 2:06½, etc., and that mare was one of the four of her produce sold, bringing \$9,000. A three-year-old sister to Hawthorne brought \$1,800, a two-year-old sister \$450, and a yearling sister \$450. Lady Ham herself brought \$1400, going to the owner of Jay Bird, so that she will continue to be bred to the horse to which she has produced so successfully.

Pleasanton Notes.

William Zahner left Pleasanton on Tuesday of last week with five head of horses bound for Salem, Oregon. The stallion Waldstein by Director, dam by Electioneer, holder of the five mile stallion trotting record was among the horses shipped and will be placed in the stud in Oregon. The others were Derbertha, own sister to Diablo 2:09½, Lady Waldstein, a three-year-old filly, Goldstein, a young son of Waldstein, and Maud W. also by that horse. Derbertha paced a mile in 2:17, last quarter in 33 seconds, the day before she was shipped.

Henry Sanders intends going East in a few days and has sold his cottage in Pleasanton.

Capt. Goodall was up Saturday and worked his two horses Rajah and Uncle Johnny. The latter is one of the handsomest pacers on the Pleasanton track, being a high headed toppy fellow with a very smooth way of going. John Maguire has these horses in charge and both are in fine shape.

Pathway, the bay trotter by Strathway that is owned by W. W. Mendenhall and trained by Fred Chadbourne, looks like the real article. He does not wear anything but a harness and has worked a mile in 2:18 without making any fuss about it.

The black three-year-old pacer by Altivo that James Thompson is working stepped a mile in 2:14½ last week and was not all out at that.

Miss Georgie by Nutwood Wilkes recently purchased by W. A. Clark, Jr., from Martin Carter, is now in Ted Hayes' stable and looks a much improved mare over her last year's form.

It is said that Bert Webster will resign his position at Oakwood Park Stock Farm and go east to train the horses of Mr. Coltery of Pittsburg with whom he was last year.

Henry Dunlap worked his pacer Harold D. on Saturday last in company with his old favorite King Cadenza 2:15½ driven by Joe Goss, and J. M. Alviso driving Rey del Diablo 2:14½. One mile was in 2:16½ and all three were hunched at the wire. Harold D. shows class enough to be a 2:10 pacer this year. He is by Dexter Prince.

Ed Parker who is handling Mr. J. B. Iverson's horse and has them all in fine shape, drove the favorite little mare Dictatress a half in 1:03 on Saturday last. The daughter of Dictatus is in fine fettle.

Golden Gate, William Brown's big green trotter by Bay Bird, worked three heats on Saturday. They were in 2:24, 2:19½ and 2:18 and the last half of one of the miles was in 1:05.

Tom Carneal by Diablo, was driven a half in 1:06 by "Dad" Trefry on Monday of last week. This horse is looking better than ever and moves in a smoother, better way than he did last year.

Ben Chaboya has little Erosmont trotting like a race horse and worked him a mile very handily in 2:20. This horse is out of Francisca, the dam of I Direct 2:12½ and Sable Frances 2:15½.

Geo. Davis saw his new purchase San Lucas Maid pace a quarter in fifteen seconds, which shows that she has all the speed claimed for her.

Al McDonald has a great trotter in his string in Peter Zombro. He is a beautifully gaited trotter and stepped a last half in 1:07 last week.

Black Thorne, the gelding by Hawthorne in Monroe Salisbury's string, is named in the M. & M. at Detroit and should be a factor in that great event if he keeps right. He worked a mile in company last Saturday in 2:12½ and was on the trot all the way.

There will be plenty of stalls at Pleasanton after the first of May, when the Salisbury string will vacate about forty stalls and he shipped to the Empire Track, New York. Trainers wishing to move to Pleasanton should correspond with Geo. A. Kelly immediately. The Pleasanton meeting in July will be the first on the circuit.

A. H. Bernal's new boarding house near the track, which he calls the Lou Dillon Palace, is getting deservedly popular with the trainers and is well patronized.

Judge Hayne, a two-year-old bay pacing colt by Bonnie Direct, is just being broken and Mr. Griffith had his shoes changed a few days ago as he showed an inclination to pace. The colt took to the lateral gait as if he was born to it and moves like a piece of oiled machinery. The two-year-old filly by Bonnie Direct out of a mare by Piedmont is a trotter and attracts the attention of everybody when Teddy Bunch drives her on the track. She is not being given any fast work, but she is nicely gaited and a beauty. It would take quite a bunch of money to induce Mr. Griffith to part with her.

There are so many changes in the rules of the National Trotting Association that owners and drivers should secure a copy and devote a little time to reading them before the racing opens.

Jackson's Napa Soda untangles the feet.

Items from Agricultural Park, Los Angeles.

Vet Kent stepped George B., a bay gelding by Gen. Beverly, an easy mile in 2:15 last week. This gelding is the right size, has just the proper way of going, and is in good hands. 2:10 looks easy for him any day now.

I. C. Mosier drove Red Skin a half in 1:04, and the way he did it looked as though "Dad" has one fit for the big stakes.

W. G. Durfee has a brown pacing three-year-old colt named Jules Riddell, sired by Westfield, that good eastern Oregon sire, out of a mare by Coeur d'Alene, that looks like a first-class article. Without any training, other than a few slow miles, Durfee stepped him a full mile in 2:24, last quarter in 34 seconds and last eighth in 16½ seconds, and it was just play for him. This colt should be a champion pacer, being sired by a grand stallion, his dam sired by a fast stallion, and having the advantage of an owner that is both rich and enthusiastic over a good horse—Mr. Jules Riddelsheimer, who is one of the most prosperous business men in Seattle and is part owner in the Meadows race track. For his own driving he uses Kittitas Ranger. He is an enthusiastic dog fancier also, and his friends will surely be glad that the colt Jules h'ds fair to be a brilliant prospect for his hustling money-making owner.

Mark Anthony, black colt, three years old, by McKinney, dam by Fayette Wilkes, stepped a mile in 2:29, last half in 1:12 at the track the other day. This colt is owned by William Garland and is good looking and a good actor.

Electro McKinney was driven a nice easy mile in 2:25, a quarter in 34 seconds and an eighth in 16 seconds. This young trotter looks like a comer.

Kinney, a bay mare by McKinney, dam by Don Cossack, trotted a half here this week in 1:06½. She is a grand young trotter and is booked for the Cleveland sale by her owner, Chas. Frost of Pasadena. She is of grand circuit material if speed, good acting, breeding and good looks go to putting one in that class.

Directus, a brown colt two years old, sired by Montana Director, paced a nice easy mile in 2:33, last quarter in 34½ seconds and last eighth in 16½. This colt is a good prospect and has a high bred sire. Montana Director is by Director 2:17 and his dam by George Wilkes 2:22. This is his first colt to be trained. Directus is owned by Hon. A. T. Van De Vanter of Seattle. Durfee is sweet on the colt, and says he is sugar in the barrel right now.

Cavalier, a brown gelding by Welcome 2:10½, dam by Steinyway, is about the smoothest pacer here, wearing nothing but his harness. He paced a half in 1:05 with the last quarter in 30 seconds recently. Trainer Durfee says Cavalier is one of the highest class pacers he ever saw.

The best bred colt in this neck of the woods is the bay stallion owned by Robert Smith. This colt is a son of Peter the Great 2:07½, a stallion that needs no introduction to horse students. He was a race horse of the proper kind and will be a sire of the great sort. The dam of Mr. Smith's colt is Juanita 2:29 by Sultan, sire of the champion Stamboul 2:07½. Juanita is the dam of one standard performer and another that worked in 2:15 last year. The second dam is Beulah, dam of the great trotters Beuzetta 2:06½, Early Bird 2:10, and four more in the list. Beulah is by Harold, the sire of Maud S. 2:08½. The colt's third dam is Sally B. by the thoroughbred horse Lever, and she is the dam of Maurine 2:13½ and two more in the list, and the granddam of nine more. Besides having the advantage of being bred in the purple and owned by a horseman of means and one who knows just how to fit and handle a fast horse, this colt is a good looker, a good actor and reeled off a half in 1:06 this week with the last eighth in 15 seconds. Mr. Smith has him entered on the Colorado Circuit, and harring accidents should get a mark as low as his game sire.

Lee Mahury has purchased a black pacing stallion by Titus, sire of Stipulator 2:11½, from Mr. Henderson. This is a fast horse. Mr. Mahury also purchased from Mr. Coleman the bay trotter Geraldine by Zombro 2:11. She is but three years old, has trotted a quarter in 32 seconds and is a good one. He bought from Mr. Warner the fast pacer Highball 2:12½ and with these three has a small stable of good ones. The Titus colt paced a mile in 2:12 as a three-year-old, is of the Direct type and a good actor.

The horse owners of Agricultural Park are preparing to give a banquet to the Knights of the Ruh Rag just before the departure of the big stables for the Denver circuit. Butch Gunnison is to be toast master, Billy Dillon is to give his experience on the Northwest Circuit while valet to Sweet Marie, and other popular Knights will speak on interesting topics. This is to be a great affair and the generous owners are to be congratulated for showing their

appreciation for the faithful way these caretakers have looked after their equine charges during the past training season.

Walter Maben is training some very promising green trotters from the Haggin ranch, and today a brown filly by Knight trotted a half in 1:11. It is a daily occurrence to see one of these Rancho del Paso green ones step a half in fast time. Walter sells one quite often and says they are as good a lot of young horses as he has ever handled and when educated are always fast and reliable. C. A. HARRISON.

Detroit Entries.

The first meeting on the Grand Circuit will be at Detroit as usual this year and the five early closing events have received a big entry list. There are 31 nominations in the M. & M. and 20 in the C. of C. which is a big increase over that of last year, showing that the no substitution clause is popular. The following is a list of the entries received for the five events which closed April 1st:

Merchants' & Manufacturer's Stake, \$10,000, 2:24 class trotters—Stanley Dillon, b g by Sidney Dillon; Lisonjero, b g by Dexter Prince; Bluewood 2:24½, gr g by Jim Wilson; Dottie K., blk m by Electmont; Baraja, b g by Colonel Cochran; Ned S. 2:29½, b g by Little River; Edmee J. 2:29½, rn m by Glen Bird; Boreazelle, b h by Boreal 2:15½; Field Day Medium 2:23½, gr h by Jolly Medium; Lady Babbie, b m by Ansel Chief; Italia, 3, 2:23½, br m by Zombro 2:11; Jolly Bachelor, b g by Bourbon Wilkes; Fred Direct, hr g by Direct 2:05½; Blackthorn, blk h by Hawthorne; Johnny, h g by Geneva; Miss Gay, b m, by Ashland Wilkes 2:17½; Miss Rosedale 2:24½, ch m by Rosedale; Billy Mac, h g by Nighthawk; Ruth C., gr m by Patron 2:14½; Louvain 2:23½, h m by Lancelot; Happy Walnut 2:24½, b h by Happy Heir; Bessie Birchwood 2:23½, ch m by Birchwood; Alexander, b g by Star Duroc; Miss Jeanette, br m by Acolyte 2:21; Yack, oh g by Sidney Prince 2:21½; Burr Nut, h g, by Neerunt; Dr. Jas. O. Ray, ch h by Capt. Mack; Allie Jay, b m by Jay Hawker; Sunfish, b g by Nutbreaker. 31 nominations.

Chamber of Commerce Stake, \$5000, 2:24 class, pacing—The Mutineer, b g by Mountaineer; Suhrina, b m by Nelson; West, b g by West Wilkes; Angua Pointer, b g by Sidney Pointer; Miss Evolute, blk m by Ivaneer; Judge Denny, b g by Time Medium; Foxy Quiller, h h by Robert McGregor; Bronson Cooper, b g by Electric Belle; Miss Sherbet, b m by Sherbet; Ethel Mc, ch m by Jersey Wilkes; Bad News, b g by Coastman; Morning Star, b h by Star Pointer; Glideaway, h g by Saraway; Baron Grattan, b g by Grattan; Glad Bells, b h by Bow Bells; Miss Georgia, b m by Regal Wilkes; China Maid, h m by McKinney; Maydello, h m by Boydella; Sally Pointer, h m by Sky Pointer; Nana Audubon, ch m by J. J. Audubon.

2:12 Trot, purse \$2000—Re-Elected 2:12½, The Major 2:13½, Lady Patchie 2:14½, The Parson 2:12½, Kent 2:12½, Direct View 2:14½, Consuela S. 2:12½, Robert Burns 2:14½, Great Spirit 2:11½, Billy Foster Boy 2:11½, Kirkwood Jr. 2:11½, The Questor 2:11½, Robizola 2:12½. 13 entries.

2:09 Pace, purse \$2000—Al Bock 2:08½, John M. 2:09, Gallagher 2:09½, Allerson 2:08½, Red Bird 2:09½, Dart 2:08½, Black Pet 2:08½, King Direct 2:09½. 8 entries.

2:17 Pace, purse \$2000—Little Sphinx, John Burns, Ash Rose, Bob Hughes, Gipsev Girl, Hal Freda, Vernon, Bonnie Treasure, Baron Grattan, R. R. Johnson, Maydello, Sally Pointer. 13 entries.

Big Wagon Race for Syracuse.

Members of the State Fair committee of New York are planning a trotting race which will be of national importance, as a feature for the State Fair meeting this fall. C. K. G. Billings has notified Senator Horace White that unless something unforeseen happens he will have Lou Dillon at Syracuse during the meeting. The plan of the committee is to offer a gold cup valued at \$2000 for a race between Lou Dillon, Major Delmar and John A. McKerron. Commissioner A. E. Perren was requested to invite Mr. Smathers to enter the contest with Major Delmar and Senator White was to invite Mr. Devereaux, who drove McKerron to his record at Syracuse last fall, and it is believed he will accept if his stallion is in condition. Mr. Smathers' horses have been at the fair for the last three or four years, and it is thought that he, too, will be willing to drive his champion gelding for such a trophy.

From St. Louis comes a discovery which may save horsemen thousands of dollars annually. The veterinarian in charge of the horses' hospital at the National stock yards, East St. Louis, after three years of study and experiments, has discovered what he believes to be a preventive of influenza, distemper, and pneumonia in horses. It is an anti-toxin injected in very much the same manner in which vaccine is injected in human beings to prevent smallpox.

George Saunders to Train Angle.

Not since Mr. Billings exchanged \$12,500 for Lou Dillon have Cleveland horse lovers been more pleased by a trotting purchase than they were when it was announced that George Saunders, acting for a member of the Gentlemen's Driving Club, had purchased, at Selma, Ala., the sensational young trotting mare Angle by Axtell, writes "Glenville" in the *Ky. Stock Farm*. The purchase price was reported to be between \$13,000 and \$15,000, and the announcement of the deal was accompanied by the statement that Angle would be seen exclusively at the Cleveland matinees. Inasmuch as the mare is credited with a trial mile in 2:06½ and is said even now to be as fit as a fiddle, her position in the minds of Clevelanders is similar to that

STAM B. 2:11 1-4

Will Make a Season at Salem, Oregon, after May 1st

occupied by Lou Dillon a year ago, when that now famous mare came to Cleveland green, a champion in embryo. George Saunders, who purchased Angle, is trainer for H. M. Hanna, president of the Cleveland Driving Park Company and brother to the late Senator Hanna, and it was at first thought that Mr. Hanna was the mare's new owner. Later, however, it developed that Calvary Morris, who owned the lamented Elloree 2:08½ had accompanied Saunders to Selma, and it was then concluded that Mr. Morris had made the purchase.

At this writing definite information on the point is not available, for Mr. Morris declines to be interviewed. In any event, Cleveland is happy because of this notable accession to the matinee ranks. It means a splendid addition to the Lou Dillon-John A. McKerron class of trotters, and even now Clevelanders are figuring on seeing some wonderful racing by the real fast steppers. Also, they say, it furnishes assurance that Cleveland will be abundantly able to protect the Cleveland amateur challenge cup, as well as to make a bid for that other valuable trophy, the Memphis cup. Angle is a richly colored chestnut mare, and is a daughter of Axtell 2:12, dam by Gambonito 2:19½, a son of Gambetta Wilkes; second dam by Mambrino Patchen and third dam thoroughbred. It will be recalled that Elloree, purchased by Saunders for Mr. Morris, was also by Axtell. Saunders says that Angle reminds him of Elloree, only that she is not quite so large, and has more of the thoroughbred fineness that comes to her through the third generation. Like Elloree, she is beautiful in disposition and a perfectly gaited trotter. That she will do well in Saunders' hands goes without saying. That veteran trainer is a consummate master of the art of conditioning trotters.

Amateur Driving Clubs Have New Rules.

The annual business meeting of the League of Amateur Driving Clubs of America was held in New York last week, each of the eight clubs being represented either directly or by proxy. The following new rules were adopted in accordance with the new legislation of the National and American Trotting Associations which permits admission fees being charged at special amateur meetings without penalizing with records the horses competing:

Rule 10—All clubs in membership with this league, shall be permitted to give a special matinee not exceeding three days' duration in any one year, during

which days they may charge gate admission; but all other conditions must conform to the rules of the National and American Trotting Associations.

Rule 11—Matinees at which no gate admission is charged shall be termed "regular matinees," and those at which gate admission is charged shall be termed "special matinees."

Rule 12—At "special matinees" there shall be no public racing of any kind permitted, and all events shall be confined strictly to amateur performances, in which only amateurs shall participate, and which shall be either to wagon or saddle.

Rule 13—Any club member of this league desiring to give a "special matinee," at which inter-city competition is to be held, shall first apply to the executive committee of this league, through its president or

member of a club, not a member of this league, shall be permitted to compete except in the contests for the present Amateur Drivers' Challenge Trophy.

The Buffalo Entries.

It would require almost an entire page of our paper to contain the list of entries received by Secretary C. R. Bentley for the six purses offered by the Buffalo Driving Club. Seventeen nominators made entries in The Preparation \$1000 purse for three-year-old trotters, among them Mr. J. C. Kirkpatrick's brown filly Lucretia by Nazote, dam Lucyneer by Electioneer, also East View Farm's California Cresceus by Mendocino, and the bay filly Princess Athel by Directum Kelly.

For the \$2000 purse for 2:19 class trotters, twenty-nine owners made nominations. The California bred horses named are Lisonjera by Dexter Prince, Italia by Zombro, Confianza by James Madison, John Caldwell by Strathway, Black Thorn by Hawthorne, Leonora by Mendocino, Stanley Dillon by Sidney Dillon, and Bonnie Russell by Conifer. Nearly all these are owned in the east. In the \$5000 purse for 2:11 class trotters several high-class trotters now in training in this State are entered. William Garland of Los Angeles has named Sweet Marie, Alex Brown of Walnut Grove names Aristo, and East View Farm enters Consuela S. and Judge Green. California horses will get some of the money in that race. Among the noted eastern horses named in the event are Nella J., Country Jay, The Questor, Lady Gail Hamilton, Katherine A., Sadie Mac, John Taylor, Mary Gage, Metallas, Tiverton and Senator Mills.

In the pacing events the California bred horses are not very numerous. In the three-year-old pace, purse \$1000, fourteen owners made nominations, Mr. John C. Kirkpatrick naming the colt Albuta by Altivo, and David McClary of Highland Park, Kentucky, naming the colt Rey del Valle by Rey Direct out of Sidlette by Sidney. East View Stock Farm names the black filly Direct Agon by Direct out of a mare by Charles Derby.

The 2:14 class pace, purse \$2000, received nominations from nineteen owners, and the \$5000 purse for 2:08 class pacers has entries from twenty owners, but no California bred ones are among them.

The entry list of these early closing racing shows that the Buffalo meeting will be a high-class one this year, and Secretary Bentley is to be congratulated.

C. K. G. Billings has announced that next season he will ride the noted campaigner, Prince of Orange 2:06½ in a trial for the world's record. Mr. Billings likes a fast trotter under saddle next best to driving one, and he feels confident that Prince of Orange can be brought to lower the record of 2:15½, which has been held by Great Eastern for nearly thirty years. He purchased Prince of Orange last fall for \$7800 with this end in view, and it is probable that the trial will be had over the Cleveland track. Trotting under saddle belongs to the misty past, although there have been many successful efforts to lower Great Eastern's mark, and Mr. Billings' effort will be intensely interesting.

PRINCE OF ORANGE 2:06 1-4

With which Mr. C. K. G. Billings will attempt this year to lower the trotting record of 2:15 to saddle made by Great Eastern in 1877

Notes and News.

May 10th is the date of closing for the two big stakes at Seattle.

Farmer Bunch may take a string of horses to the Colorado circuit this year.

Captivity by Sidney Dillon, dam Captive by Piedmont, will be campaigned by Scott Hudson this year.

A farmer in Monterey county lost a fine young mare recently, presumably from the bite of a rattlesnake.

BREEDER AND SPORTSMAN ads. are selling horses right along. If you have one for sale, try our columns.

There are races provided for three-year-olds at the Vallejo meeting and manager Tom Smith will later announce purses for two-year-olds.

The stallion Pacheco Wilkes, owned by Mr. T. F. Kiernan of Modesto has been registered in Volume 16 of the American Trotting Register as Pacheco W. No. 39,072.

For the twelve stakes offered by the Brighton Beach and Empire City meetings, to be held in August 260 individual entries were received—an average of 22 for each stake.

Dick Ables who made a fast trotter out of Dolly Dillon 2:06½, is located at Santa Rosa and has a string of fine horses, some of which he is getting ready for the circuit this year.

Ben Chaboya reports that some very choice mares have been bred to Guy McKinney this year. The big horse will be given a standard record this year without much trouble.

The green trotter Miss Kinney by McKinney, dam I. C. Cossack, has been entered in the Cleveland Blue Ribbon sale by owner, Charles S. Frost of Pasadena. She is an excellent prospect for a fast trotter.

Vallejo entries close May 16th. \$6100 is to be given the trotters and pacers at the navy yard town, the meeting holding for three days. This is liberal and all horsemen should enter who expect to race in California this year.

The Seattle meeting opens September 19th and continues until the 24th. Entries for the two \$1500 stakes close May 10th. One is for 2:15 trotters and is to be a two mile dash, the other is a mile and a half dash for 2:11 class pacers.

McCarthy & Son of Portland, Oregon, had to declare their April sale off on account of the scarcity of horses. Nearly all the good horses on this Coast are being trained for the races or conditioned for private sale, the demand seeming to grow greater every month.

Mrs. E. J. Schwartz, of Woodland, claims the name Palmick for a bay filly foaled April 15th by Falrose, dam Musick, thoroughbred. The filly is a trotter and has the appearance of one that will be among the winners in the Breeders Futurity No. 4 in which it is entered.

Allendale, the pacer by Falrose, that Ed Mills purchased from Ed Dudley of Dixon, a short time ago, is working nicely at Pleasanton. He is a very smooth going horse, wears no hoppers, and can pace a mile around 2:12 and perhaps three or four seconds better than that.

Geo. Fox of the Mokelumne Stock Farm has received notice from the American Trotting Register Association of the registration of his colt The Bow. This colt is registered as standard under rule 1, with the number 39,297. He is by Silver Bow, dam Grace by Buccaneer.

The San Francisco Fire Department wants about thirty head of horses for its engines. Horses weighing fifteen hundred pounds, that have good quick action at the trot are the kind desired. The Department will pay \$300 each for horses that come up to its requirements, but they are hard to find.

In addition to the two \$1500 stakes advertised by the King County Fair Association for its meeting at Seattle, twelve other harness races will be given, conditions and purses for which will be announced later. The Seattle meeting will be held from September 19th to 24th. Entries to the two big stakes advertised will close May 10th.

John Quinn is training among others in his string at Santa Rosa, Grace Brothers' good trotter Ole 2:15½ by Silas Skinner, and thinks he will be able to shade his record a little this year. He also has two very fine McKinney colts belonging to Mr. J. H. Gray, a colt by Arthur W. 2:11½ owned by Grant Peterson and a good mare that is the property of Mr. J. H. Purrington.

A. M. Deming, an English stockman from Cape Colony, who has been in Japan for some months, is at Seattle, commissioned to purchase 10,000 horses in the Pacific Northwest to be sent to Japan. Deming explains that army demands have drained the country of all available horses, and that animals are required not only to take their places in peaceful avocations, but to supply remounts for the cavalry. Deming will endeavor to get all the horses required in Oregon and Washington and will locate supply depots, as was done when England was buying horses for the South African war.

Philip C. Byrne writes to the BREEDER AND SPORTSMAN from Grass Valley that "Elsie S. 2:16½ by Alcantara Jr, foaled a bay colt March 2d, sired by Billups 2:20½. The owner W. L. Vance, of Marysville, says it is about perfection in conformation, is a trotter, and he thinks has a chance for money in the rich stakes it is entered in—the Pacific Breeders Futurity and the Western Horsemen stakes, \$12,200 in all."

Ed Lafferty, who is handling a young stallion by Mendocino belonging to E. J. Molero, finds that he has quite a trotter in charge. The colt is entirely green and is just beginning to know what is wanted of him and although Ed has never driven him any fast miles there is no doubt of his ability to do so, as he is a strong going trotter with natural speed. Lafferty has not moved Daedalion 2:11 up any but says he is all right and there is lots of time yet.

Reports come from the Oakwood Park Stock Farm that feed is in great abundance all over the hills and valleys of the place, and the colts and broodmares are in fine shape. Breeders should not overlook the farm's great sire Chas. Derby this year. There is no horse in California that can be bred to with more assurance of getting a colt that will sell for enough money to make a profit on the transaction. The Derby's are uniformly large, handsome horses, and nearly all square trotters and fast, while his few pacers are usually crackerjacks.

Fred W. Perkins, of Sacramento, writes that his mare Garry Patis by Pittick foaled a bay colt by Athamax on April 14th, that competent judges say is "a beaut" and gets around now like an old campaigner. It is entered in the Pacific Breeders Futurity No. 4. Athamax 36,927 is doing well and his book is full for this year. He has some as fire looking colts as one would wish to see. Mr. Perkins says that Sacramento is one of the best horse towns in the State this year and the stallions are all well patronized.

The handsome colt whose picture is presented herewith is Carlok, owned by Mr. C. L. Jones of Modesto, and now in training by H. S. Hogoboom at the Woodland track. Carlok is entered in several rich stakes to be trotted in California this year and is showing up well. He is one of the best bred young

horses in California. His sire is the great McKinney 2:11½, his dam Carlotta Wilkes (dam of Volita 2:15½ and Frank S. Turner) by Charley Wilkes 2:21½, son of Red Wilkes, second dam Aspasia, dam of three in the list by Alcantara, and third dam Miss Buchanan (dam of one and granddam of four) by Clark Chief.

The handsome colt Boomer by Welcome 2:10½, dam by Kediak, son of Mambrino Wilkes, that Barney Simpson is training at Pleasanton, is certainly the dude horse of the track and makes everybody "rubber" as he goes by. He belongs to James Quigley and Barney worked him a mile in 2:17 recently, the last half in 1:07 and the last quarter in 32 seconds. Boomer is a pacer and promises to be one of the winning kind. The get of Welcome have the speed habit and lots of good looks.

The very fast three-year-old, Princess Athel, by Directum Kelly 2:08½, that is in Monroe Salisbury's stable at Pleasanton, Cal., is out of the mare Athelia Prince 2:26½, by Walkill Prince, that trotted a mile in about 2:12, while being prepared for the M. & M. stake several years ago. Back of her first dam Princess Athel has the blood of two of the pacing families as her grandam was by Athlone, son of Blue Bull, while her third dam was Lady McConnell, dam of Glenwood Prince, by Pocahontas Boy.

The sensational pacing colt Walter Direct by Direct, bred and owned by Ed F. Geers, will very likely soon join the racing stable of E. E. Smathers. This colt, which is said to be another Direct Hal, the unbeaten pacer with which Geers swept the circuit a year or so ago, is held at \$12,500 by the famous old driver. He can pace a mile right now better than 2:05 and has no record. Mr. Smathers has an option on the colt at the figure named, and his trainer, George Spear, will go to Memphis this week and look the colt over. He is absolutely sound, and the chances are that he will become Mr. Smathers' property. It was not Geers' intention to race Walter Direct this year, but to save him for next year. If Mr. Smathers gets him he may pursue the same policy with him, but it is altogether unlikely, as Mr. Smathers believes in having his horses race when they are ready.

J. W. Zibble & Son who have sixteen head of trotters and pacers at the Santa Rosa track, report them all in good condition. Mr. Zibble would like very much to start Lottie Smart 2:07½ this year in California, but thus far no races have been advertised to which she is eligible.

There were, according to the Year Book, 1059 meetings held last year, in which 3700 horses participated; 825 new trotters took records of 2:30 or better, and 944 pacers in 2:25 or better. Altogether up to date 19,373 trotters have taken records of 2:30 or better, and 10,657 pacers in 2:25 or better, making a grand total of over 40,000 standard performers.

Mr. T. H. Fogarty, of Bakersfield, reports that his mare Athenian, dam of Ed Geers' great green trotter Stanley Dillon is in foal to Richmond Chief 2:11½. Mr. Fogarty purchased this mare at the closing out sale of the estate of Henry Pierce in this city last June. Athenian is by Steinway, out of Ida Wood by Simmons and is therefore a full sister to Babe Marion 2:17½ and half sister to Owyhee 2:11. Her foal by Richmond Chief should be a crackerjack as no gamer race horse ever started than he and he was faster than his record.

James W. Rea of San Jose may build and sell a railroad or two during the next year, but we doubt if he could be induced to part with a little colt that appeared at Vendome Stock Farm a week ago last Sunday. It is by his stallion Iran Alto 2:12½ and its dam is Rose McKinney, the dam of Mrs. C. A. Duffee's great colt Almaden 2:22½ winner of last year's two-year-old trotting division of the Pacific Breeders Futurity. It is a grand looking and was hunting for stake money when a day old, and trotting so fast across the pasture that Mr. Rea wanted to bet it could show a 2:30 clip.

Lucy May 2:22½, record made as a two-year-old when she won the pacing division of the Kentucky Futurity, is working nicely for Ted Hayes at Pleasanton, and should develop into a race winner for her owner, Mr. W. A. Clark, Jr. This mare was timed separately in a race at Lexington in 2:12½ when she was four years old. She stepped a mile in 2:14 last week, last half in 1:05 and last quarter in 31 seconds. She is highly bred, being by Oakland Baron 2:09½, son of Baron Wilkes and sire of Rhythmic 2:06½, while her dam is by Allendorf 2:19½, her grandam a great brood mare by Woodford Mambrino and her great grandam by Abdallah 15.

The 1904 volume of Horses in Training has just been issued by H. A. Buck of 571 Fifth avenue, New York, and is bound in red leather, pocket size and sells at \$1. It contains the names of the thoroughbreds in the stables of 559 trainers, who have two or more horses in training. There is also a very large list of names of horses under the head of "Miscellaneous" that are trained by their owners or other parties, and a completelist of the two-year olds of 1904 that have been registered and named. The book is indexed and is a handy and necessary volume for those interested in the running meetings throughout the country.

Mr. T. J. Crowley of this city has filed with the editor of the BREEDER AND SPORTSMAN an objection to the claim made in the last issue by his friend Fred Hahn of Emeryville, who said that he has in a foal by Nutwood Wilkes out of Annie H. by McKinney, the winner of first money in the Breeders \$6000 Futurity No. 4. Mr. Hahn's filly was foaled April 14th, and Mr. Crowley's objection to the claim is that on the same date his mare Lottie Parks 2:16½ by Cupid 2:18, own brother to Sidney Dillon, dropped a colt by Monterey 2:09½ that will win the first money in that stake. He says this colt will beat his friend Hahn's filly to a dead moral certainty and he is willing to wager anything from an ordinary post hole to one of his 100-barrel-a-day oil wells on his judgment in the matter.

The two-year-old gray colt by Nutwood Wilkes, dam Little Witch by Director, which Monroe Salisbury is training for Judge Greene of Oakland, stepped a quarter in 34½ seconds one day last week at Pleasanton. Judge Greene named this colt "Dingee" some time ago after his friend, Mr. W. J. Dingee, one of the Park Commissioners of this city, and the latter became so pleased with the colt that he purchased a half interest in him from the Judge. The three-year-old full sister to this colt is not owned by Judge Greene as stated in a previous issue of this paper, but by Martin Carter, Little Witch having been sold to him by the Judge several years ago on the understanding that the latter should have her first colt by Nutwood Wilkes, which is the two-year-old that has been named "Dingee."

A correspondent writing from Ukiah says: "The horse business in this section is looking better than ever before and indications point to Ukiah having a better meeting this year than we have had for years. The main interest now is taken in the two-year-old futurity stake to be trotted this fall for foals of Mendocino county. There will be at least five starters. A few days ago H. B. Smith sent to John Quinn at Santa Rosa his three-year-old filly by Linwood W. out of May Ayers. Mr. Quinn worked her three weeks last fall, as a two-year-old, and she showed him a mile in 2:50 quite handy. Mr. Thos. Charlton has also sent to Mr. Quinn his four-year-old stallion Dumont S. by Linwood W., out of Maud Fowler, (full brother to Sonoma Girl) and also the pacing mare Rose Thorn by Hawthorne. There are six or eight other horses here doing road work until the track is in shape. Wayland W. is now making his third season here and has many very handsome yearlings distributed through the country. Col. Marks' black mare Cecille M. by Robin will probably be prepared for the fall races. She is a green mare and a mark of 2:15 is not beyond her reach."

EASTERN GOSSIP.

[Culled From Our Exchanges.]

Mr. Tanner likes W. P. Murray's California mare Italia 2:23, the Zombro mare, and has her in the M. & M. She stepped in 2:11 to wagon last season and was not all out.

The unfortunate whirlwind pacer, Sir Albert S. 2:03, is in moderate training after a run at grass and a let-up in the paddock all winter, and is likely to prove another Billings wagon sensation, for he always has possessed exceptional brush speed. It would be pleasant reading were he to get below Little Boy's world's record of 2:01 to wagon amateurly driven, and if Mr. Billings starts him he has a chance—an outside chance, for world's records are very hard to lower and especially with a horse that has once gone wrong. Still, when one stops to consider the matter a moment, Little Boy's front legs were none too sound when he joined the Billings stars.

Mr. Devereux says his star trotter, John A. McKerron 2:04, looks unusually well this season. Dr. McKillip, Chicago's famous veterinary, has treated an annoying splint during the winter and hopes it will not interfere with record making when the time comes. While eight years old, McKerron has but eleven colts aside from those that may have been dropped this year. It must be remembered that he has been at the stud but a few weeks at a time, having been used as a road horse, and one season ran in a paddock throughout. He will have a "list" started, however, as one or two are old enough to be handled a little. Let us hope that John A. McKerron reaches the sensational sire class.

Gen. Brayton Ives' widely known Baron Wilkes mare Extasy 2:10 at two, pacing, 2:11 at three as a trotter, foaled a chestnut colt by McKinney 2:11 at her owner's country seat Sunday morning. Ixia 2:18, dam of Miss Fearing 2:14, has a foal at foot by Oakland Baron 2:09. Thesetwo royally bred youngsters will be watched with a great deal of interest, and it will not be much of a surprise to some day see both take extremely low records. Gen. Ives has a few high class mares that be breeding each season, a third being Margaret Worth 2:15, half sister to El Milagro 2:11. His famous road mare Nora McKinney 2:12 is one that, when retired should produce a champion. He also owns Monte Carlo 2:07, as all know.

A novel feature in connection with the horse fair to be held at Madison Square Garden April 26th and 27th, is a series of indoor saddle races, running and trotting. There are six classes, to wit: Free for all trotting class, mile heats, two in three, purse \$100; 2:20 trotting class, mile heats, two in three, purse \$100 in money or plate, amateurs to ride; free for all running, half mile heats, two in three, purse \$100; running ponies, not over 14.3 bands, half mile heats, two in three; free for all running, five mile dash, riders to change horses at end of each mile, using as many horses as desired, purse \$100; free for all running, ten miles, same conditions as above.

Daniel 2:00 is to be out again. A free for all with Prince Alert 1:59, Daniel 2:00, Dan R. 2:01, and possibly Anaconda 2:01 would attract attention, if all raced as well as in that last season's Providence event, wherein Dan R. got his record.

The Texas pacer Al Bock 2:08 in Millard Sanders' stable, at Memphis, should be a good horse this year if he shows up as much class this year as last. He won six first money out of ten starts in the Grand Circuit last year.

It was arranged at a meeting held last month to abandon the Denver Horse Show for 1904. There is no suitable place in that city in which to house the show. It is proposed, however, by the municipality to erect a large convention building this year and if that project goes through all right the horse show will be resumed in 1905. Instead of the show two field days will be held by the Riding and Driving Club, at each of which prizes will be offered for light and heavy harness horses and saddlers, hunters and ponies. In addition a one-day open air show may be staged by the Mountain and Plain Festival Association in connection with its barvest festival and entirely exclusive of anything the Riding and Driving Club or Horse Show Association may do.

A pack train of 25 horses with all of their accoutrements, will be one of the novelties at the World's Fair. The unusual spectacle will be sent by citizens of Wyoming to mark Wyoming day. The horses will all be equipped as if ready to start on the trail.

Frou Frou 2:22, (2:25) to high wheel sulky at one year, by Sidney, dam Flirt by Buccaneer, owned by B. J. McGrann of Lancaster, Pa., foaled a colt on St. Patrick's Day, by Baron Speedwell, a son of Baron Wilkes.

Every year a race is the rule for the Charter Oak \$10,000 Stakes for 2:09 class trotters, at Hartford's Grand Circuit meeting.

Topsy, the dam of Daniel 2:00, Whisper 2:08, The Governor 2:15 and Whistle 2:20, is living at the age of 22, at Essex Junction, Vt., the property of Whitcomb Bros., and will produce a foal this spring. Her sire was Holabird's Ethan Allen by Ethan Allen 2:25, whose dam was the Harding mare by Chedell Horse, son of Morgan Tally Ho by Woodbury Morgan.

Buffalo horsemen think that the pacer Dart 2:08, by John R. Gentry 2:00, which W. J. Andrews recently paid \$4000 for, will be a king pin in the 2:09 classes down the Grand Circuit.

It is somewhat singular that Aleyone 2:27, a full brother of Alcantara 2:23, that was foaled one year later than the latter, and died when but ten years old, is credited with the same number of producing sons as the latter. Each is now credited with 51 sons that have sired standard speed. The 51 sons of Aleyone are credited with 272 trotters and 107 pacers, 379 in all. Alcantara's 51 sons are credited with 115 trotters and 134 pacers, a total of 249.

The well known trainer, Dave McClary, has sold the sensational green pacer Morning Star by Star Pointer 1:59, dam by Egthorne to Lon McDonald. Morning Star had a trial of 2:03 and is entered in the Chamber of Commerce.

Four of the 2:10 trotters of last season appear in the new Year Book with untraced breeding on the dam's side, viz.: McKinley 2:07, Lilly Young 2:09, Topsey 2:09, and Prince Greenland 2:09.

Trainers who are experts in balancing their horses, who know the weight and shape of shins best suited to them, are the ones whose horses generally win the most money.

At the letting of the boxes for the Boston Horse Show bidding was very lively and eleven boxes were sold at a premium of \$300 each. The interest displayed was keener than ever before in the history of the show.

Teamsters in Eastern cities say that never since they began business have sound hard heavy horses been so scarce or so dear as they are at present. One of the oldest and largest users of horses in Boston is quoted as saying that he has now to pay more for a Western-bred green horse than he had in former years for one fully acclimated and ready for hard work, while the Western horse is liable to be off duty quite often for a time and is therefore not worth nearly so much as a native or Eastern-bred one.

According to the last Year Book, the number of standard performers produced by Alma Mater, together with those sired by her sons and produced by her daughters, is 278. Alma Mater outranks all the other great broodmares in this respect. Next in order are Old Doll with 256, Miss Russell with 254, Beautiful Bells 2:29 with 229, and Green Mountain Maid with 26.

Mr. Savage again calls attention to his last year's announcement that he will not match Dan Patch against a bobbled pacer.

Trainer Jack Trout will train the snake horse, Anaconda 2:01. It is said that his owners are very willing to meet Prince Alert 1:57 or Dan R. 2:01 in any kind of a race.

One of the entries in the M. and M. whose name is unfamiliar is that of Dr. James O. Ray. This is a handsome chestnut stallion by Captain Mac 2:29 (brother to Lockheart 2:08), son of Nutwood 2:18 and out of Lottie McGregor by Robert McGregor 2:17. The Doctor has never started but once, at Shreveport, La., last season, where he was an easy second in 2:21. He has shown 2:10 speed and has the McGregor color, appearance and conformation. He is owned by Dr. Chas. F. Boagni of Opelousas, La., and is now in training at Memphis in the stable of Tbos. Hardy.

W. J. Andrews has bought of John Kinney, for an Eastern horseman, the pacer Dart 2:08 by John R. Gentry. The price paid is said to have been \$4000. Dart is looked upon at the Jewett covered track as a good 2:04 prospect.

An odd instance of topsyturvydom has been unearthed in the case of some Irish-bred thoroughbreds. Morion won the Ascot Cup and was called the best son of his sire Barcalaine. So great was his reputation when retired to the stud that his book filled rapidly at \$500 a mare. He proved such a failure in the stud that his owner recently rented him out to an Irish farmer for \$50 the year. On the other hand Morion's full brother Wingfield never was an account as a race horse and once when tried made such a miserable showing that he was sold on the spot for \$50. Later Wingfield showed wonderful merit as a sire and now stands at a fee of \$500 with all he can do.

Foxy Quiller, entered in the \$5000 C. of C. at Detroit, is the pacing brother of Cresceus, who showed a trial in 2:09 at Lexington last October.

A new racing association has been incorporated in Fort Wayne, Ind., with a share capital of \$40,000. The corporation is licensed to conduct fairs and to cause improvements in all kinds of live stock, and it is said that the intention is to hold annually a large fair, with a good racing meeting in connection with it. Herman W. Tapp is President and S. M. Foster Secretary.

The popular journalist, Gurney C. Gue of the New York Herald, has been elected secretary of the New York Horse Fair Association, which will hold a horse dealers' show in Madison Square Garden, April 26, 27.

The Ketcham stable this year will not include Cresceus, but will consist of Dorothy Redmond 2:10, Lady Conway 2:12, Conscience 2:28, Sara McLure, five-year-old sister of Crescent Route 2:18, and several green ones.

Glenville Track Notes.

[American Sportsman.]

Myron McHenry and Dan Patch 1:56 are expected at the track by June 1st. It is understood that McHenry will not give his attention to any other horse but the champion pacer.

All the trainers and owners at Glenville are anxiously awaiting the action of the Ohio Senate on the Chisholm bill, restricting pool selling to responsible tracks. As the Legislature is hooked to adjourn April 13th, the suspense cannot much longer last.

W. P. Murray has entered Italia by Zombro in the M. & M. She has a race record of 2:23, made in 1901, having won the Occident Stakes for three-year-olds on September 2d of that year. Last year she was matined and secured a wagon record of 2:11. She is in Doc Tanner's stable and will undoubtedly be a factor in the race.

Fred Keyes has now 25 trotters and pacers in training and has two more coming. This week he had two new ones. One is a two-year-old filly by John A. McKerron out of Rosa L. 2:17 by Elyria. This filly is very promising. She is owned by Dan R. Hanna. The other is the handsome dapple gray mare Lennie by Theodore Sbelton 2:09, dam Lady L. 2:23 by White Line. Lennie has a wagon record of 2:19, but is without a race record. She is owned by John O'Brien of the Gentlemen's Driving Club.

W. H. Moody, of Harrisburg, Pa., informs us that his trotter, Leigb Crawford 2:24 by Cbas. Derby, has wintered in fine shape and is in good form. He started fifteen times last season, was first five times, second four times, third three times and fourth once. Only twice was he behind the money.

A few days ago George Saunders quietly slipped down South and purchased the sensational green trotting mare Angle by Axtell, who is credited with a mile in 2:06. Last fall she was in the stable of the Lexington trainer, W. F. Freeman, and is thought by some to be a two-minute trotter. She is a good individual and especially well-mannered. She will not be raced this year but will be educated by Mr. Saunders, started in the matinees and saved over for the next year's racing. It is not generally known who the purchaser of Angle is, but it may turn out to be the former owner of Ellorce 2:08.

Yo El Rey for Sale.

In this issue of the BREEDER AND SPORTSMAN Mr. Cbas. S. Neal, manager Fair Heirs estate, offers for sale the well known thoroughbred stallion Yo El Rey, with the statement that the horse will be sold very cheap. Yo El Rey is by the good sire Joe Hooker, and his dam the famous Marion, one of the greatest brood mares ever produced in America. Yo El Rey was sold to the late Charles Fair as a yearling for \$27,500 and was as game a race horse as ever bred, as the last time he ever appeared on the track he ran a mile in 1:40 flat at the Bay District Course after being cut down in a most shocking manner. His full sister, Yo Tambien, winner of 44 races and \$90,450, was the undoubted queen of the American turf, while his half brothers, the unbeaten El Rio Rey and The Czar, were the best of their day. Another half brother, Emperor of Norfolk, won the American Derby. This is the greatest lot of race horses ever produced by any mare in the world's history, and Duke of Norfolk, Prince of Norfolk, El Rio Rey and Emperor of Norfolk have proven excellent sires as well as racers. Yo El Rey's brother, Rey del Sierras, is the sire of Princess Zeika, Royal Rogue, Gorgalette and other good performers. Yo El Rey is a horse of grand proportions and should make a valuable stallion in the stud.

Found the Purchaser.

CLOVERDALE, April 14, 1904.

BREEDER AND SPORTSMAN: Please take out my ad. and send me the bill. Have sold one horse (Almont) and do not care to sell the young horse, Sir Tempest, this year. Your paper found me the purchaser—Mr. A. B. Bryant of Alton, Cal.

Yours truly,

C. E. HUMBERT.

Coming to California.

Thousands in the East are crating household goods and taking a team to the train, a train to the Santa Fe and the Santa Fe to California. Are your friends coming?

There are cheap colonist rates on the Santa Fe in March and April. You can deposit the money here and have the ticket telegraphed East. If interested, ask about it at 641 Market street, San Francisco.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Common-Sense Methods of Selecting and Training

It has often been said that no man should enter into the breeding and training of horses unless he be judge enough of the horse to get what he desires, writes a Western breeder in the *Drovers' Journal*. I would go still farther—and I believe it is far more important—that he be able to select animals suited to the buyer.

The value of the majority of horses depends upon the demand for the particular class to which they belong.

Too many look only at the outward appearances of horses, especially when dealing in young ones. This fact is proven over and over every fall at the public sales, when the weanling and yearling of equal breeding sell for almost the same money.

A foal that has been by the side of its mother during the whole summer is far prettier to look upon than the yearling, which is especially rough and ungainly at this age if it be from draft stock. And that is just where so many make a mistake in buying; they pay a year's keeping for looks and at the end of the year find they have the looks of the other colt instead of the sleek little beauty bought.

A fashionable color with desirable marks and perfect make and tail are great factors in the make-up of the horse for whatever purpose. But what will all these avail the owner if the animal lack in bone or is poorly muscled?

Every person, before they assume the risk of investing their money in horses, should first find out if they know what constitutes a horse of value on the open market. That is where the majority of horses sell. If you buy without judgment it doesn't insure you a buyer of the same type.

From the amount of so-called horsemen that play a losing game when buying for speculation, one would infer that they studied this noble animal with the same profoundness of the schoolboy, whose essay ran something like this:

"The horse has four legs, one on each corner—a head in front and a tail behind." This ended the essay, also his observations of the horse.

The individual horse has its peculiarities of temperament as well as human beings. Intellectual development differs widely in the one as in the other. Any horse will respond to kindly treatment more readily than to the lash, but the latter is very much more harmful when applied to a high-spirited animal. It is the horse that has been roughly handled that snorts and wheels away when the master enters the pasture. Do not think that you can beat them to-day and they will forget it to-morrow. A horse always reflects the character of his owner, if he owns it for any length of time or during its training period. Give a horse gentle but firm treatment and it will obey and delight in it. Personally, I was always partial to a mild-eyed horse that had a broad forehead, rather wide between the eyes. They seem to develop a good deal of sound sense.

Foals raised upon the farm are fondled from birth. They struggle fiercely at first, but it is only play for a man to hold them. They soon give in, and watch for your coming and feel slighted if they are not noticed.

Serious accidents are often avoided by accustoming colts to be handled. A little girl once saved a colt from almost certainly being crippled. It had in some way gotten through a wire fence, and was whinnying and running wildly, dashing against the fence in order to get back to its mother which, in company with a herd, was dashing up and down on the other side, when, with ready wit, the child, picking berries nearby, seeing the peril of her pet, called it by name; it came to meet her; she took off her apron and tied it 'round its neck and led it quietly to the barn and saved a valuable animal.

A foal brought up from birth in contact with man is more easily handled when the day comes for it to assume the duties of a horse. It may suddenly develop an innate stubbornness, equal to that possessed by any range horse. You have only that to contend with, while in the foal unused to being handled you must overcome its fear of you, which is not such easy work as it might be.

Horse "breaking" is not what it was on the farm ten years ago. They are not here to break, but just as fast as the number decreased in that ratio their value increased. Five years ago farmers were tumbling over each other to see who could get rid of their horses first. Even the best young mares were "sold for a song," and their owners are finding out now that it was the same tune the old cow died on. Many years must certainly elapse ere the farmers of Iowa retrieve the fortunes lost by being eager to dispose of their best mares.

Little colts are very scarce comparatively. There has been so great a shrink in the number of broodmares that many are buying animals from the range for breeders. It is to be hoped that the farmers will

not again become price chasers and run prices of the medium class of horses sky-high only to find themselves in a few years the owners of inferior herds which, I believe, will always sell for less than cost of production. I would urge everyone to let all inferior animals go and retain only the very best they are able to procure. The loss will now be only on the single animal when, if retained as breeder, the loss will be felt in a heavier degree on all its offspring. Any doubters will be convinced of this if they watch the report of the auction sales of Chicago, which is to the value of live stock almost what the heart is to circulation.

A stimulant to that market in way of eastern or foreign buyers is reacted upon the farmer in a very short while. They will notice also and be convinced that in horse breeding, as well as any other work, there is always room at the top, and if any peddling or unsatisfactory prices are reported the medium and inferior grades suffer more and sooner. Even should they sell at reasonable figures, they do not return to the breeder the just profit a better horse would.

The draft horses of to-day are considerably larger than they were a few years ago, brought about by continually breeding up. These are sought for eagerly by buyers, and if the bone is ample to sustain their enormous weight they go now at a handsome price. I believe these conditions will continue.

The same may be said of carriage, coach or saddle horses; the best is wherein the profit lies; but they are harder for the average breeder to produce. The free action, the power of endurance and the proud poise of head, along with well-kept coat and gentle disposition, so essential in horses of this class, are in a great degree dependent upon education that the man who breaks his foals at the plow can scarcely hope to attain.

A good driving horse must be developed by a good driver. A good saddler is more made than born, but most often spoiled. The training of these is better accomplished if left to one who can occupy plenty of time with them. When once they are developed the owner need not fear he will fail to obtain recompense. Machines to replace these animals will come and go. They are fads for a while and may always remain in some particular way or use, but there is just one thing lacking in them that the inventor will never be able to add, and that is intelligence. These inanimate vehicles will tire their owner just as a child wears of its inanimate toys. All well enough for a time, but they will not replace and hold our affections like living things.

Man and the horse have been too long inseparable to wander far apart. I do not know how early in the history of mankind that he took up horse breeding but they were engaged in this industry heavily when the book of Isaiah was written, for there we read that "Their land is also full of horses; neither is there any end to their chariots," which shows that he was man's dependence for traveling even then and he had already grown rich in number. Do not fear that the day of usefulness of the horse is over. Too long he has shared our lot in war or peace to be lightly cast aside. A better type will be demanded and produced. The world is looking to America to provide these. Everything favors us except our own panicky tendencies. In our haste to grow rich in a day we hastily drop a good thing for what seems better. Often it is but jumping out of the pan into the fire.

Hang to the good horse. When we sink in the mire he may balk or back for a while, but he is certain to pull you through at last.

The New York Meetings.

The showing made by the two New York Grand Circuit tracks is very gratifying. The total number of entries for the early closing purses is one hundred and thirty, as against one hundred and five received by the Empire City management a year ago and sixty-nine at the Brighton Beach track in 1903. This is an average of twenty-one and a fraction, as against nineteen last year, the latter figure being the average, according to Mr. Reeves, of the meeting securing the largest number of entries last season. The quality will be something above the average, too, from the names of the horses in the fast classes. For instance, in the 2:10 trot such good race horses are named as Sadie Mac 2:11½ and Nella Jay 2:14½, both Kentucky Futurity winners, John Taylor 2:10½, winner of the M. & M. of last season, Navidad 2:11½, Lilly Young 2:09½, Prince Greenland 2:09½, Topsy 2:09½, Invader 2:11½, Kent 2:12½, Dan Wilkes 2:09½, Dr. Strong 2:09½, Country Jay 2:10½, The Roman 2:09½, Norrie 2:10 and Metallas 2:11. Here certainly is a great field despite the fact that two or three will hardly class with their associates. Lilly Young is probably the oldest trotter ever named in such a stake, and evidently her owner thinks she has a chance of recovering the form she displayed in 1902. Metallas has been a very expensive

trotter for Mr. N. W. Hubinger and a very disappointing one as well. If he should recover the form he displayed just before his purchase by Mr. Hubinger, then the latter will be well repaid for the patience he has expended in waiting so long. Most horsemen would probably hardly consider Metallas a dangerous factor, yet they all realize that if he should come to the wire in first-class shape he would be able to give any of the horses named a hard struggle before the first money was decided. Country Jay apparently has recovered from his lameness or his name would be missing. He is a game trotter, but he has cost his owner a considerable sum in nomination fees for events in which he was not able to start. The naming of Sadie Mac gives rise to the belief that Mr. E. E. Smathers has reconsidered his announcement not to race the great filly, but to save her for the next year, when she will be five years of age. This daughter of Peter the Great has a world of speed, and she is expected to train to a very low record, as she was never in danger last year and beat all of her age with apparent ease. It is possible that she will not be seen, as Mr. Smathers has also named Kent in this class, the trotter he bought out of the Pennsylvania last fall.—*Chicago Horseman*.

Points in Horse Buying.

A horse is considered practically sound when it possesses no disease, deformity, or vice that will interfere with its general or special usefulness. Soundness is important, not only to those who deal in horses, but to those who raise and own them, because its soundness, together with the general appearance of the animal, indicates its relative commercial value.

A person who contemplates purchasing a horse, if he is not thoroughly familiar with the subject, will usually find it a matter of economy to employ an expert to assist in the selection, or he will purchase of some well known dealer whose judgment and whose "word" are worthy of dependence.

The ordinary individual is likely to pride himself upon his ability to judge horses and to determine their soundness or unsoundness, and yet there is probably no one experience in which individuals are more likely to be deceived than in this. Horse dealers of wide experience usually make allowance in their judgment of a horse for defects which cannot be determined by an ordinary examination, but are likely to show themselves only after a thorough acquaintance of the animal.

As a general thing the purchaser sees a horse at its best, as regards appearance, condition, speed and freedom from defects and vices, and should take this into consideration in estimating the value of the animal. In examining animals as to their soundness, experienced judges do not allow themselves to be misled or their attention to be distracted from any part of the animal, either by the owner or by bystanders.

An excellent judge of horses once said: "If the owner or a bystander calls my attention to a possible defect about the horse's head I always make it a point to give the opposite extremity a most thorough examination."

It is a trick frequently resorted to by unscrupulous dealers to call a man's attention to a part he knows to be sound in order to attract his attention from an unsoundness in another part. In considering statements made by horse dealers especial care should be given not only to the statement, but to the reasons why the statement is made.

When possible it is always a good plan to examine horses in the stable under their ordinary conditions, then to take them out where the light and other conditions are favorable and go over thoroughly every part of the horse until one is satisfied of its freedom from unsoundness. After thoroughly manipulating every part, the horse should be tested in his paces for any defect in locomotion or breathing, and afterward he should be tested as to his ability to eat and drink normally.

In examining horses for soundness it is generally assumed that the horse has every defect, deformity, and vice that horseflesh is heir to, and the presence or absence of these defects is demonstrated by thorough examinations and tests.—*From Prof. Mayo's "The Care of Animals."*

The Best of All!

To bring your friends or mother or family from Eastern ice and snow to the glorious climate of California is to do the best of all.

Santa Fe cheap colonist rates are good during March and April. You can pay the money here and the ticket will be delivered in the East by telegraph. Why not send?

If interested, ask about it at 641 Market street, San Francisco. The Santa Fe is the Best Way.

Strike!—If they don't give you Jackson's Napsoda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

AT THE TRAPS.

The April shoot of the Golden Gate Gun Club last Sunday was attended by thirty-four shooters. Four schedule events were shot up as well as the final shoot for the Hibbard trophy—E. Klevesahl broke 49 out of 50 targets and won the cup for the third time and permanently. The other shooters in this race were: W. A. Robertson 44, E. J. Forster 42, Ed Donohoe 41, M. O. Feudner 42, Dr. E. G. McConnell 34, G. Sylvester 43.

In the medal shoot, 25 targets, W. A. Robertson and M. O. Feudner were medal winners in the champion class. Harry T. Hoyt and Mr. Gamble won first class medals and H. Klevesahl and Mr. Clark won second class medals.

In the \$150 purse event at 25 targets, C. C. Nauman and C. A. Haight were high guns.

In the consolation match, 25 targets, \$25 added, Nauman, 25 breaks, won first money; Haight, 24 breaks, second money for the champion class division. The first class purse was split by G. Sylvester and A. M. Shields, 24 each, for first and second moneys. E. Klevesahl, W. J. Golcher and J. Potter, with 23 breaks each, divided third, fourth and fifth moneys. The winning shooters in the second class were: H. Klevesahl, first money; Knauft, second money; Jacob sen third and Cuneo fourth moneys.

In the re-entry shoot, 15 targets, Nauman and Hoyt were high guns with straight scores.

In shooting up back scores in the medal race the following scores were made: Robertson 23, Haight 21, Dr. McConnell 19, Biller 17, Cuneo 13, Burton 10.

A summary of scores follows:

	Medal Shoot	\$150 Purse	Consolation	Re-entry Shoot
Champion Class—	25	25	25	15
Robertson.....	25	19	23	13
Feudner.....	25	21	21	13
Nauman.....	23	24	25	15
Forster, E. J.....	22	22	23	13
Haight.....	21	24	24	13
First Class—				
Iverson.....	18	19	19	13
Gamble.....	24	20	16	11
Klevesahl, E.....	23	21	23	14

McDonough.....	8	5	11	4
Baker.....	9	12	..	4

The Pastime Gun Club two day tournament at San Diego, held April 16th and 17th, was well attended by Southern California shooter. The first day's card comprised the following events:

Event	Targets	Entrance	Added
No. 1.....	10	\$1.00	\$ 9.00
No. 2.....	15	1.50	13.15
No. 3.....	20	2.00	18.00
No. 4.....	10	1.00	9.00
No. 5.....	15	1.50	13.50
No. 6.....	20	2.00	18.00
No. 7 Fano trophy.			
No. 8.....	10	1.00	9.00
No. 9.....	25	2.50	22.50
No. 10 Hoogee trophy.			

Fano trophy—Value \$50. To be contested for at each annual tournament held by the Pastime Gun Club, 25 birds, entrance \$2.00, birds included, high gun wins. Trophy to go to the shooter making highest score, \$6 to second highest, \$4 to third, \$2.50 to fourth. Winner of trophy to receive entrance money less price of targets at next tournament.

Conditions of the Hoogee Infalible Three Man Team trophy—25 birds to each man; \$6 entrance per team. Winning team to receive trophy and 60 per cent of entrance money; second highest team, forty per cent of entrance money. Birds included in entrance. Team winning three consecutive times will become the owner of the trophy. Three onafide members of any club in Southern California to form a team. Two or more teams may enter from same club. To be shot for at each tournament given by the Pastime Gun Club of San Diego.

The second day's program was the following.

Event	Targets	Entrance	Added
No. 1.....	10	\$1.00	\$ 9.00
No. 2.....	15	1.40	13.50
No. 3.....	20	2.00	18.00
No. 4.....	15	1.50	12.00
No. 5.....	20	2.00	18.00
No. 6 Jenks trophy			
No. 7.....	15	1.50	13.50
No. 8.....	20	2.00	18.00
No. 9.....	15	1.50	13.50
No. 10.....	25	2.50	25.00

Jenks trophy—Value \$50; 20 targets, \$1.50 entrance, birds included; high gun wins. First, trophy; second,

\$5; third, \$2.50. Holder of trophy to receive all of entrance money; less price of birds at next tournament.

Side pool in each event; entrance \$1; high gun to win; 60 and 40 per cent.

The Pastime Gun Club donated \$7.50 to the contestant making the highest average in the two days' shoot; \$5 to the second highest average; \$3 to the third; \$5 to the longest run of consecutive breaks. Contestants had to compete in all regular events, except team shoot, to count on average.

Squad shooting—Sargent system, American shooting rules to govern, except in division of money, which will be divided as follows: Divide net purse by the sum of birds broken in the three high classes. For example, say 15 birds; net purse \$84. A breaks 15, B 14, C 13; total 32. \$84 divided by 42 birds is \$2. A's share is \$30, B's share \$28, and C's share \$26.

M. Chick, Ed Fano and Chas. Julian were the committee in charge.

Among the out of town visiting shooters were: C. D. Hagermann, J. Matfield, Ed Vaughn and Mr. Whitman of Los Angeles; Louis Ehrhart of Atchisot, H. Justin of San Francisco, F. C. Stephens of Spokane, Gus Knight and A. B. Thomas of San Bernardino, J. M. Kolbe of Oceanside and others.

The high average shooters for the two days were: J. E. Vaughn 129-146, 275 out of 326 F. C. Stephens 128-144, 272 Chas. Julian 122-143, 265. J. M. Kolbe 120-144, 264 M. Chick 122-139, 259. Number of targets shot at \$25; 150 first day, 175 second day. J. A. Julian made the best straight run, 34.

Chas. Julian, M. Chick and F. S. Ecker won the Hoogee "Infalible" team trophy—65 out of 75 F. C. Stephens and C. D. Hagerman tied for the Fano trophy, 22 each out of 25. Stephens won the shoot off, 21 to 19. The Jenks trophy race resulted in a tie between Fano and C. B. Monaghan. The latter won on the shoot off 17 to 9.

A summary of scores follows:

	10	15	20	10	15	20	25*	10	25	Broke	Shot at
Hagerman, C.D.....	8	12	17	8	8	17	22	8	16	115	150
Mills, F.B.....	8	12	17	7	12	18	22	8	20	114	150
Julian, C.....	8	10	16	8	9	18	22	9	17	99	150
Stephens, F.C.....	6	10	17	9	14	19	22	9	22	128	150
Ecker, F.S.....	6	11	19	7	10	15	18	7	22	115	150
Smith, S.R.....	7	14	14	9	11	14	21	9	11	118	150
Gibson, J.A.....	7	9	14	7	11	15	15	8	18	106	150
Cotton, Dr J.G.....	8	10	15	7	11	11	18	8	17	105	150
Vaughn J.E.....	8	14	17	8	12	18	20	8	23	129	150

Event No. 6. 30* Jenks Trophy.

At Sacramento, last Sunday, at the medal shoot of the Washington Gun Club the new trap was used and there was some excellent shooting. D. W. King Jr. of Denver proved high gun. T. L. Lewis of San Francisco was also present. C. E. Egglehart won the monthly club medal. A summary of scores follows:

Twenty-five targets—Rubstaller 16, Hagerty 12, Englehart 19, Weldon 6, Dr. Brown 8, Perkins 11, Reichert 14, Just 18, Adams 9, Peek 16, McWilliams

14, Vetter 18, O'Connor 1, Morgan 12, Carey 9, King 16, Lewis 11, Heilbron 11, Brown 17, Ludden 10.

Ten targets—Morgan 8, Woods 5, Bowen 7, Adams 7, Englehart 8, McWilliams 4.

Fifteen targets—Morgan 8, Peek 13, King 12, Lewis 6, Englehart 10, Just 11, Reichert 12, Adams 7, Vetter 12, Carey 9, McWilliams 10, Hagerty 9, Heilbron 5, Morgan 9, O'Connor 3, Just 4, Perkins 5, Weldon 7.

Twenty-five targets—Reichert 11, McWilliams 10, Hagerty 9, Heilbron 5, Morgan 9, O'Connor 3, Just 4, Perkins 5, Weldon 7.

Twenty-five targets—Reichert 11, McWilliams 10, Ludden 10, Bowen 8, Peek 20, King 18.

Fifteen targets—Rubstaller 11, Carey 12, Vetter 10, Heilbron 7, King 10, McWilliams 3.

Twenty-five targets—F. Brown 17, Brown 4, King 21, Peek 20, Lewis 18, McWilliams 15, Hagerty 13.

Ten targets—D. W. King 9, F. Brown 8, Brown 3, Lewis 5, Ludden 6.

The Hercules Gun Club will hold a live bird shoot at Pinole tomorrow. The local contingent will be largely represented. Take the 7

San Francisco Show.

The eighth annual show of the San Francisco Kennel Club last week was a success in many respects. The gate was a paying one, entries were made in excess of last year, the attendance was large and interested during the four days, and, with a few exceptions, the management of the show was satisfactory to everybody concerned.

Judge James Mortimer's decisions received general approbation. There was, as is usual, however, a certain amount of dissent—it would not be an orthodox dog show if this spirit was absent. Time, however, is a potent factor and we hope that for the next show, the losers will come in with a winner, thus turning the tables of canine adversity.

The ring arrangement, judging and stewardship as well as the benching and placing of the rows of benches was all that could be desired. Sanitary conditions were faultless.

The show last week is, we trust, the forerunner of a series of future big shows, that are a possibility if a spontaneous and increased showing of interest and enthusiasm are any indications of what is coming. During the show a new Bull Terrier club was organized with a membership roll of thirty-five fanciers.

St. Bernards averaged fairly well in quality and were an increase of eight dogs over last year's entry. Ch. Lester C. again took winners and first open over Le King the reserve dog. Both were put down in good shape. In novice and limit dogs Marcus Nelson first, a bit long in head and muzzle, not overly good in markings and with a rather lanky big dog, we would rather have seen placed under Alta Chevalier, second, who is better in head, muzzle and expression, well marked and a more substantial dog. Gothard, third limit, is a good sort, even and sound with agreeable color and markings. In quality, the hitches rated far below the dogs. Queen Bess, winners and first limit and Lady Melha, first open and reserve, were placed right. Puppies was withheld and the single novice entry Cuba was awarded only a second.

In Great Danes Rupert of Hentzau, tri-color and first open, and Ruy Blas, reserve and second open, were placed in one two order just as they ran a year ago. Rupert has improved to quite an extent. Lord Glanville, third open and second limit, could have been in better fettle and can do more when in condition. Three novice dogs were only good enough to get Nero a first. In puppies the order was Canute, Jumbo and Tom for a rather ordinary class. In puppy hitches, a new one, Princess Harlequin, a handsome blue and white, came out. She has a neat head, shows type and character, has a good body, front, nice legs and feet and was easily first puppies and then took winners in the final over Maud S., a well known bitch, who was first open. Flora, second open, Carlotta third and first limit, are also familiar benchers.

Greyhounds were represented by a quartette of good ones in the following order. Rucker, winners and open, Crockett Boy, reserve winners and novice, Roman Athlete, second open and limit. May Hempstead took all the female honors in three classes. These hounds have each had an illustrious career on the greens ward and are noted dogs.

American Foxhounds were represented by nine specimens. Crowder and Boh were the quality of the dogs, both being good specimens of the breed. Two excellent bitches, Rose and Bess represented the bitch entries and ran in the order mentioned.

Pointers as a class were not up in quality to what could have been expected, with the exception of a few Boston, winners, first open and limit is a stylish handsome dog, carries his head up and tail merrily, he has a good front, strong body and legs and feet right. Bang Up, the reserve dog and first novice, a black and white one, is another good Pointer, just a slight shade overtopped by the winner. Glen Rose, his kennel mate, another black and white one, second open and novice is just a bit lighter than his mate, but a well set stylish dog. Tick, first puppies is a promising young dog. Aside from Oregon's Jessie, winners and first limit, bitches were an ordinary lot. Jessie is familiar as the winners, open, limit and novice bitch last Spring. She was put down in fine condition and showed well. Posen Queen, the only puppy in was reserve. A third in novice to Pattie of Kent closed the Pointer awards.

A far better showing, in numbers and quality, of English Setters than has been seen for several shows past were hatched. In dogs, Cato Jr. and hitches, Laura L., litter brother and sister (Cato-Maggie F.) captured everything in regular awards and specials, and there were some nice ones too. Cato, Jr. is a stylish blue belton, and a good one all through. Ch. Buckwa kept his former position of reserve and second to Cato. Kilgariff third open, Fairland Dude reserve and Cato (Senior) three letters made up a class of five Setters, all bred in the purple and fine types of the breed. Wad (another Cato-Maggie F. puppy) first limit is full of character and quality. Dude second, Hardy third, Wig Wag res, D-way and White Star letters were a hot class. Eight dogs out of thirteen received recognition in the novice class. Wad, Starr (Cato-Maggie F.) and Kilgariff led the string. Some nice puppies were shown, Palo Alto

and Pope, one two, are sons of Laura F. Puppy hitches only turned out one, Feathers, who was noticed by the judge. In novice Fanchon (reserve winners), Dot Cummings and Arrow—another Laura F. puppy, was the proper order, all good Setters. Dot also took first limit. Laura L. winners and first open, Lady second open.

Irish Setters were far better than usual, twelve hatched and everyone received a ribbon. Brian Boru, winners and first novice, was disqualified, which will put Ch. Mike Swiveller, first open, up a peg. Toronto Pat, first limit, excellent in head, had a beautiful rich color and fine coat, good body, legs and feet. Lady Jose II, put down in proper shape, took the honors and repeated her 92 wins. Sapho second open. Lady Glenmore first, and Diana M. second novice and Kathleen first puppy, are a trio of better hitches than we have noticed for several years.

Gordon Setters were again few and at least fair. Homestead Boy and Dick, winners and open and reserve and limit, were the best shown. Irish Water Spaniels were few and good. Ch. Dennis C. again took in the tri-color, he holds out well. Robert Emmet, Mike B. and Teddy were placed in the order named. Floradora, winners hitches, is by Dennis C. One Clumber Spaniel, Buck Grove Dick, showed considerable quality. Field Spaniels were ordinary and weedy. Pompey and Judge Casey only scored.

Cockers were a good all round showing, nearly every one in received the judges attention, ribbons predominating, there were but few letter notices. A red, Browlie, took specials for best dog and winners outside of blacks. He is a good sized sound bodied dog with neat head and nice expression, but quite a bit short in coat, but of a desirable color. Black Silk II, winners blacks, was a type the judge liked. Wiggles, winners and first novice, is a well set classy one and led Miss Frivolity only a hairs' breadth for the tri-color hued favor. In reds, Victory A, reserve and first open, was followed by a string of excellent entries. Delverton Promise is a puppy that will come on nicely. Delverton Domino, took the special for best puppy dog, he is a black and white pup, a good show, just the right sort. Paprika, black and white, winners and first open went over Little Dorrit, winners last year. Lady Schotz might do better were it not for an off eye.

Collie entries were ten in excess of last year's benching. Champion Hanover Monarch was easily winners and first open. Prince, reserve and first open, is a rather large dog but will do. Old Hall Sandy, second open, should have done better in novice. He shows quality to a degree, has a fine head, proper ears, good front, nice coat, and was passed possibly because he did not show in the ring as well as he could have done. Maplemont Shower of Gold, first novice, was reserve puppies and Mount-in Duke, second novice, got three letters in puppies, an ordinary class, save first. In Bitches Presidio Lassie, winners, was lucky in her competition, this division of the breed was way below the quality of the dogs.

Bull Terriers were, possibly, a better showing than may be seen outside of New York. The classes were replete with the distinctive features that makes the breed so popular. The talent were treated to an agreeable surprise when Edgecote Peer was taken on the sawdust. This young dog is one of the best ever brought out here and is a fashionable type of the breed from the ground up. He walked through all his classes and landed the tri-color and specials easily. Titus, reserve, a Banjo puppy, is only a shade behind the winner, second puppy and first light weight limit. Ch. Banjo was put in this year in nice shape for first light weight open and reserve winners. He retains his form very well. Woodlawn Wonder first open in heavy, Woodcote Imp second and Englewood third are a trio of Ch. Woodcote Wonder's sons that will go well at any show. Edgewood Jean II, in far better condition than last year, took reserve, first open and limit in heavy weights. Down to proper weight and condition, she is a good bitch, despite pig jaws and a previous sickle tail that is now artistically pointed in the proper direction. Hawthorn Snowflake reserve winners, first open and limit, is a stylish one on the light size, Woodcote Beatrice second limit. Halthome Pleasure third limit and second open are all above the ordinary run. Newmarket Queen first novice is good in type and quality, but could be a trifle better in eye and muzzle. Taken as a whole, the matron class was very good.

Fox Terriers were few but classy, in smooths and wires, the best lot ever shown west of Chicago. Ch. Wandee Coastguard, in for specials only won the trophy for best in the show. Wandee Kennels' dogs were all conditioned to a hair. Wandee Smasher, a grand puppy gave way in limit to Sabine Brightlight who was also reserve winners. Golden Souhrette, second novice, was the only bitch to score besides the Wandee entries. Violet and Sea Breeze won the premier honors. The Wandee puppies, Smasher and Snow Girl, carved slices out of the special cake. Wires also had an easy run for the Wandee entries to romp over. In dog puppies, Humberstone Bristles II, got the blue. This youngster will improve. Wandee Mevras and Buck Up are new dogs, but are far ahead of anything in wires ever shown here. Manilla and Cowslip led the bitches. Lucretia and Coastguard were in for specials only and made a more than a favorable impression during their initial appearance.

The Bulldogs were led by Ivel Damon, winners, first open and limit. Harry Lucy reserve and second limit. The Battler, first novice and third limit, was a new dog and is a good type. In hitches Geford Ranne, we thought, was better than the old timer Canford Rusb.

Boston Terriers made a record entry. The classes at large were good and well represented by Coast guard dogs. Dugle E., a black and tan Dickshund, was the best of that breed shown by quite a margin. Of two Airedales shown, the dog Wyndhill Papoose is one of the best yet seen here.

Red Hills Doctor, a new comer, outranked the Irish Terrier competition. Royal Noreen and Shan Van Vocht, both bench show familiars, were the bitch ribbon winners.

Mastiffs were represented by three entries, Kaiser, first open, has a fine head, body and bone, and is a bit better than has been shown here for some time.

The small breeds and toys, with the exception of English Toys, Japs, two Italian Greyhounds and a couple of Chows were only ordinary. Two good specimens of French Toy Bulls, Boulette and Nounou, were shown. The latter was purchased by Mr. Graham E. Bahcock of San Diego for the sum of \$600.

AWARDS.

MASTIFFS—Open dogs—1 W E Meek's Kaiser, 2 Mrs Wm A Deane's Beau Montez. Open bitches—1 Dresser, Simpson & Niehaus' Duchess of Posen.

BLOODHOUNDS—Open dogs—All awards withheld.

ST. BERNARDS (Rough coats)—Puppy dogs—1 Allen Mac Dougall's Teddy Roosevelt. Novice dogs—1 Mrs A L Strauss' Marcus Nelson, 2 Mrs Teresa M Maloney's Alta Chevalier, 3 Sydney J Ackerman's Glenwood Boozie, res August F Chsmot's Tzar II, v b c Fateley & Matthews' King Lion, c Ernest P Silber's Dewey, c Mrs S Barnett's Col Moshy. Limit dogs—1 Marcus Nelson, 2 Alta Chevalier, 3 Miss Clara Moffat's Gothard, res Tzar II, c Dewey, c F F Luck's Aargan. Open dogs—1 (bas Newman's) Lester C, 2 W W Wallace's Le King, 3 Marcus Nelson, res Alta Chevalier, v b c Tzar II. Winners dogs—1 Lester C, res Le King. Puppy hitches—All awards withheld. Novice hitches—1 A L Hamilton's Golden Fairy, 2 M Coleman's Cuba. Limit bitches—1 Fateley & Matthews' Queen Bess, 2 F F Luck's Cascade. Open bitches—1 Fateley & Matthews' Lady Melha. Winners bitches—1 Golden Fairy, res Queen Bess.

GREAT DANES—Puppy dogs—1 Mrs D O Druffel's Canute, 2 S Barnett's Jumbo, 3 John Rauch's Tom. Novice dogs—1 Miss Etta Miller Schrock's Beauty. Limit dogs—1 John L Cunningham's Ruy Blas, 2 Mrs Arthur W Spear's Lord Glanville, 3 Mrs S Barnett's Nero. Open dogs—1 Mrs L S Adams Jr's Rupert of Hentzau, 2 Ruy Blas, 3 Lord Glanville, res Nero. Winners dogs—1 Rupert of Hentzau, res Ruy Blas. Puppy bitches—1 Mrs C G Saxe's Princess Harlequin, 2 Dresser, Simpson & Niehaus' Posen Princess, 3 Mrs J F Fitzgerald's Queen F, res John L Cunningham's Carmencita. Limit bitches—1 John L Cunningham's Carlotta, 2 Queen F. Open hitches—1 O Bergsten's Maud S, 2 Dresser, Simpson & Niehaus' Flora, 3 Cunningham's Carlotta, res Queen F. Winners hitches—1 Princess Harlequin, res Maud S.

GREYHOUNDS—Novice dogs—1 S A Cummings' Crockett Boy. Limit dogs—1 J H Rosseter's Rucker, 2 J H Rosseter's Roman Athlete. Open dogs—1 Rucker, 2 Roman Athlete. Winners dogs—1 Rucker, res Crockett Boy. Limit, open and winners hitches—1 J H Rosseter's May Hempstead.

AMERICAN FOXHOUNDS—Puppy dogs—1 Mrs J J Killalee's Don Carlos. Novice dogs—1 C H Shaw's Bob, 2 Henry B Tickner's Tick. Limit dogs—1 William Berg's Crowder, 2 Boh. Open dogs—1 Crowder, 2 Boh. Winners dogs—1 Crowder, res Boh. Novice bitches—1 W S Kittle's Rose, 2 C H Shaw's Bess. Limit bitches—1 Rose, 2 Bess. Open bitches—1 Rose, 2 Bess. Winners hitches—1 Rose, res Bess.

POINTERS—Puppy dogs—1 Chas L Griffith's Tick, 2 Dresser, Simpson & Niehaus' Duke of Posen, 3 W L Purcell's Point. Novice dogs—1 W B Coutts' Bang Up, 2 W B Coutts' Glen Rose, 3 John Nield's Sport, res Wm Highy's Duke, v b c Thos Kispinski's Duke K. Limit dogs (under 55 pounds)—1 E Courtney Ford's Boston, 2 Ed D Wastie's Brassy Mack, 3 P Lapachet's Marquis, res Duke, v b c H B Gardiner's Flash, b c Sydney Hamilton's Lady Ruffles' Rip. Limit dogs (55 pounds and over)—1 Dr D Shoemaker's Rap Rattler. Open dogs (under 55 pounds)—1 Boston, 2 Glen Rose, 3 Lady Ruffles' Rip. Open dogs (55 pounds and over)—1 Dr D Shoemaker's Rap Rattler. Winners dogs—1 Boston, res Bang Up. Puppy bitches—1 Dresser, Simpson & Niehaus' Posen Queen. Novice bitches—3 Dr Edmond Pittres' Pattie of Kent, other awards withheld. Limit bitches (50 pounds or over)—1 F W Walmsley's Oregon Jessie. Winners bitches—1 Oregon Jessie, res Posen Queen.

ENGLISH SETTERS—Puppy dogs—1 E W Moulton's Palo Alto, 2 Mrs Ida L Moulton's Pope, 3 Geo Dupuy's Major E, res Pearl Wilkerson's Warte Nicht, v b c W T Wood's Rod's Bub, c Thos Irving's Jack. Novice dogs—1 C D Carman's Wad, 2 Jos Broder's Starr, 3 J E Terry's Kilgariff, res F C Scherstein's Leon, v b c Pearl Wilkerson's Warte Nicht, v b c W J Baughn's Fairland Dude, b c H B Gardner's Cato, b c R J Raetz's Harvey. Limit dogs—1 Wad, 2 Fairland Dude, 3 W H Lemmer's Hardy, res A B Truman's Wig Wag, b c Charles Easton's Dewey, c Payne L Shaffer's Star White. Open dogs—1 John M Goloback's Cato Jr, 2 William Felge's Ch Buckwa, 3 Kilgariff, res Fairland Dude, v b c Cato. Winners, dogs—1 Cato Jr, res Ch Buckwa. Puppy bitches—1 C L Griffith's Feathers. All other awards withheld. Novice bitches—1 H Elster's Fanchon, 2 Mrs H H Brown's Dot Cummings, 3 Mrs L A Broder's Arrow. Limit bitches—1 Dot Cummings, 2 S Barnett's Theodora Gladstone. Open bitches—1 C C Lee's Laura L, 2 J E Terry's Lady. Winners, bitches—1 Laura L, res Fanchon.

IRISH SETTERS—Puppy dogs—1 Francis T Keane's Terry M Jr. Novice dogs—1 Joe King's Brian Boru, 2 Eghert Georges' Steinyack Jack, 3 J J Klapper's Rodger. Limit dogs—1 F S Johnson's Toronto Pat, 2 Steinyack Jack, 3 Rodger. Open dogs—1 A B Truman's Ch Mike Swiveller. Winners, dogs—1 Brian Boru, res Ch Mike Swiveller. Puppy bitches—1 Francis T Keane's Kathleen. Novice hitches—1 Francis T Keane's Lady Glenmore, 2 Robert A Miller's Diana M. Limit bitches—1 Mrs Howard Black's Lady Jose II, 2 P J Higgins' Lady Lucy. Open bitches—1 Lady Jose II, 2 A B Truman's Sapho. Winners, hitches—1 Lady Jose II, res Sapho.

GORDON SETTERS—Puppy dogs and hitches—1 Emil F Cuenin's Juno Sing. All other awards withheld. Novice dogs and bitches—All awards withheld. Limit dogs and hitches—1 Mrs A A Rol's Dick.

Open dogs and bitches—1 Dr Fred P Clark's Homestead Bsy, 2 A Stuart's Doc. Winners, dogs and bitches—1 Homestead Boy, res Dick.

FIELD TRIAL CLASS—Dogs—1 J E Terry's Kilgarif. Bitches—1 Jos E Terry's Lady. Winner of W S Tevis trophy for best English Setter in Field Trial Class—1 Kilgarif, res Lady.

IRISH WATER SPANIELS—Novice dogs—1 Wm Bay's Mike B, 2 Chas W Oaks' Teddy. Open dogs—1 Wm Watson's Ch Dennis C, 2 W H Williams' Robert Emmett, 3 Mike B. Winners, dogs—1 Ch Dennis C, res Robert Emmett. Open bitches—1 Jas E Spink's Floradora. Winners, bitches—1 Floradora.

CLUMBER SPANIELS—Open dogs—1 G D Boyd's Bash Grove Dick.

FIELD SPANIELS—Puppy dogs and bitches—All awards withheld. Novice dogs and bitches—1 L Curran Clark's Pompey. Limit dogs and bitches—1 Pompey, all other awards withheld. Open dogs and bitches—1 J Stuart's Judge Casey. Winners dogs and bitches—1 Pompey, res Judge Casey.

COCKER SPANIELS (black, not over 24 lbs.)—Puppy dogs—1 Percy Weeks' Black Beau, 2 Chas Rieze's Mascot, 3 Harry J Moore's Ben. Novice dogs—1 Mrs C Hermann's Major Domo, 2 Black Beau, 3 F L Greenberg's Bubiow, res Mrs A Eckert's Captain Stuh, v h c N Macfee's King Domo, h c Dr W O Toye's Duke. Limit dogs—1 Mrs J H Brooks' Dandy, 2 Mrs Philip G Meyer's Glenwood Havoc, 3 Duke. Open dogs—1 Jas Harvey Jones' Black Silk II, 2 Mrs A Roncovieri's Delverton Wonder, 3 Babiow, res Duke. Winners dogs—1 Black Silk II, res Major Domo. Puppy bitches—1 A Leslie Creswell's Plumeria Sally, 2 R Eugene's Hunter Queen, 3 Miss May Goulon's Little Girl, v h c P H Doble's Hazel Barton. Novice bitches—1 D C Brown's Wiggles, 2 David P Creswell's Bonnie Black Bess, 3 Mrs M Brautfort Startzman's Mink. Limit bitches—1 Jas Harvey Jones' Miss Frivolity, 2 P H Doble's Mill Girl, 3 Bonnie Black Bess. Open bitches—1 Bonnie Black Bess, 2 Mrs Philip C Meyer's Glenwood Maisie. Winners bitches—1 Wiggles, res Miss Frivolity.

COCKER SPANIELS (solid colors other than black)—Puppy dogs—1 Delverton Kennels' Delverton Promise, 2 William Blackwell's Brother Goldie. Novice dogs—1 A Wolfen's Brownie, 2 Chas G Lyons' Omo. Open dogs—1 Miss A Farno's Victory A. Puppy bitches—1 Miss A Farno's Bonnie Bess, 2 Mrs R H Atkinson's Red Bettie, 3 Mrs J Leo Park's Lady Goldie. Novice bitches—1 A Wolfen's California, 2 Frank I Turner's Plumeria Chic, 3 R H Atkinson's Blondy. Limit bitches—1 James Harvey Jones' Little Maid, 2 Mrs Peter Moir's Coquette Bonnie. Open bitches—1 Delverton Kennels' Little Dorrit, 1 James Harvey Jones' Plumeria Sapho. (Parti-colors)—Puppy dogs—1 Delverton Kennels' Delverton Domino, 2 Thos Smith's Don S. Novice dogs—1 Miss A Farno's Teddy Roosevelt, 2 Don S. Limit dogs—Don S. Winners dogs—1 Brownie, res Victory A. Puppy bitches—1 Delverton Kennels' Delverton Dolores. Novice bitches—1 Mrs W Rounthwaite's Delverton Deborah, 2 Mrs Wm Blackwell's Lady Schotz, 3 Mrs J W Douglass' Trixie. Limit bitches—1 Delverton Kennels' Delverton Tattoo. Open bitches—1 Delverton Kennels' Paprika, 2 Mrs Wm Blackwell's Lady Schotz. Winners bitches—1 Paprika, res Little Dorrit.

COLLIES—Puppy dogs—1 F M Blanchard's Prince, 2 Dr Quinn's Old Hall Buh, 3 W P Burnham's Sunset Marvel, res Virgil F Shaw's Maplemont Shower of Gold, v h c Mrs J D Mercer's Mountain Duke, h c Fred S Hohro's Ormskirk Bill B. Novice dogs—1 Maplemont Shower of Gold, 2 Mountain Duke, 3 Mrs L W Seely's Old Hall Sandy, res W P Burnham's Sunset Galopin, v h c Mrs Bertha Scholtz's Kernel, h c Dr O N Orlow's Borda Lad, v h c Capt N H Wulff Jr's Niels. Limit dogs—1 W P Burnham's Yarrow, all other awards withheld. Open dogs—1 Miss Della Beach's Ch Hanover Monarch, 2 Old Hall Sandy. Winners dogs—1 Ch Hanover Monarch, res Prince. Puppy bitches—3 Dresser, Simpson & Niehaus' Mignonette. Novice bitches—1 E J Thomas' Bahbie, 2 Miss Daisie E Meek's Mollie of Nettle-down. Open bitches—1 Mrs H McCracken's Presidio Lassie, 2 W P Burnham's Brandane Dollie. Winners bitches—1 Presidio Lassie, res Wag.

BULLDOGS—Puppy dogs—1 Mrs H H Brown's Yeoville Thornfield. Novice dogs—1 Capt E V E Neil's The Battler, 2 Yeoville Thornfield. Limit dogs—1 Mrs Chas K Harley's Ivel Damon, 2 L S Greenbaum's Harry Lucy, 3 The Battler, v h c Dresser, Simpson & Niehaus' Bully. Open dogs—1 Ivel Damon, 2 The Battler. Winners dogs—1 Ivel Damon, res Harry Lucy. Novice bitches—1 Delger Trowbridge's Gesford Rane. Open bitches—1 Marks Weiner's Canford Rush. Winners bitches—1 Marks Weiner's Canford Rush, res Gesford Rane.

BULL TERRIERS—Puppy dogs—1 Ed Attridge's Edgecote Peer, 2 John D Spreckels Jr's Titus, 3 J I Sparrow's Silkwood Dan, res J W Morton's Edgewood Baron, v b o M H Francois' Silkwood Duke. Novice dogs—1 Edgecote Peer, 2 Titus, 3 Silkwood Dan, res Mrs Chas F Jackson's Woodcote Imp, v h c Wm Kaler's Woodcote Bummer, h o John J Deane's Spot. Limit dogs (35 lbs. or under)—1 Titus. Limit dogs (over 35 lbs.)—1 Mrs Arthur W Spear's Woodlawn Wonder, 2 Woodcote Imp, 3 Mrs W J Tiersman's Dick Curtin, v h o J I Sparrow's Silkwood Teddy. Open dogs (35 lbs. or under)—1 A McBean's ch Banjo, v h c J I Sparrow's Croydon Czar. Open dogs—1 Woodlawn Wonder, 2 Woodcote Imp, 3 W C Bogen's Englewood. Winners dogs—1 Edgecote Peer, res Ch Banjo. Puppy bitches—1 F W Kelly's Bess, 2 W C Bogen's Silkwood Venus, 3 Roberta T Duryea's Silkwood Bettie, v h c Mrs Bessie Kaler's Baby Queen. Novice bitches—1 Frank E Watkin's Newmarket Beatrice, 2 Silkwood Venus, 3 Phil J Fay's Woodcote Empress, v h c E S Simpson's Woodcote Ditto, v h c Silkwood Bettie. Limit bitches (30 lbs. or under)—1 J C Bone's Hawthorne Snowflake, 2 Mrs Chas F Morrell's Silkwood Patsy, 3 J L Eastland's Naughty Nan. Limit bitches (over 30 lbs.)—1 J L Sparrow's Edgewood Jean II, 2 Philip J Fay's Woodcote Queen, 3 Andrew P Welch's Haltome Pleasure, v b c Woodcote Ditto.

Open hitches (30 lbs. or under)—1 Hawthorne Snowflake, 2 Naughty Nan. Open hitches (over 30 lbs.)—1 Edgewood Jean II, 2 Haltome Pleasure, 3 Woodcote Ditto. Winners hitches—1 Edgewood Jean II, res Hawthorne Snowflake.

FRENCH BULLDOGS—Open dogs and bitches—1 L Guglielmoni's Boulette, 2 Mrs Cash Sloan's Nounou.

BOSTON TERRIERS—Puppy dogs—1 Mrs G L King's Oaksides My Lady's Boy, 2 W H Deming's Snowdrop II, 3 Mrs G L King's Oaksides His Royal Highness, v h c Mrs H H Carlton's Oaksides Hub Bub. Novice dogs—1 Richard J Jose's Boston Jack, 2 Mrs H H Brown's Cracker Jack, 3 W H Deming's Lord Rushie. Limit dogs—1 Boston Jack. Open dogs—1 Mrs H H Carlton's Tremont. Winners dogs—1 Boston Jack, res Tremont. Puppy bitches—1 Mrs H H Carlton's Oaksides Bonibel. Novice bitches—1 Mrs H C Greenberg's Glenwood Enchantress, 2 W H Deming's Dixey D, 3 M Ella Harris' Little Miss Muggins. Limit bitches—1 Mrs W H Deming's Endcliffe Vernette, 2 Dixey D, 3 Little Miss Muggins. Open bitches—1 Endcliffe Vernette, 2 Mrs H H Carlton's Oaksides Princess of Avondale. Winners bitches—1 Glenwood Enchantress, res Endcliffe Vernette.

DACHSHUNDS—Puppy dogs—1 Mrs Phil M Wand's Dougie E, 2 Mrs G W O'Donnell's Count, 3 Mrs F A Brookbank's Dock. Novice dogs—1 Dougie E, 2 Dock, 3 Carl Von Baumgarten's Prlnzt. Limit dogs—1 Dock. Open dogs—1 Count, 2 Dock. Winners dogs—1 Dougie E, res Count. Novice bitches—1 Philip C Meyer's Glenwood Fraulin. Open bitches—1 Marie Evans' Mejula, 2 Marie Evans' Tilly. Winners bitches—1 Mejula, res Glenwood Fraulin.

AIREDALE TERRIERS—Limit dogs and bitches—1 Augusta L Reiners' Wyndhill Papoose. Open dogs and bitches—1 J A Reiners' Red Crack.

FOX TERRIERS (smooth coated)—Puppy dogs—1 Chas K Harley's Wandee Smasher, 2 Lewis Prenot's Edgcliff, 3 Walter W Stetthelmer's Tallac Sagebrush, v h c Domnick Shannon's Silver Trumpet. Novice dogs—1 Wandee Smasher, 2 Tallac Sagebrush, 3 Silver Trumpet. Limit dogs—1 Irving C Ackerman's Sabine Brightlight, 2 Wandee Smasher. Open dogs—1 Chas K Harley's Wandee Result, 2 Sabine Brightlight, 3 Wandee Smasher. Winners dogs—1 Wandee Result, res Sabine Brightlight. Puppy bitches—1 Chas K Harley's Wandee Snow Girl. Novice bitches—1 Chas K Harley's Wandee Treasure, 2 J B Martin's Golden Soubrette, 3 Wandee Snow Girl. Limit bitches—1 Chas K Harley's Wandee Sea Breeze. Open bitches—1 Chas K Harley's Wandee Violet. Winners bitches—1 Wandee Violet, res Wandee Sea Breeze.

FOX TERRIERS (wire haired)—Puppy dogs—1 Irving C Ackerman's Humberstone Bristles II. Novice dogs—1 Chas K Harley's Wandee Buck Up. Limit dogs—1 Chas K Harley's Wandee Mearns. Open dogs—1 Wandee Mearns. Winners dogs—1 Wandee Mearns, res Wandee Buck Up. Novice bitches—1 Chas K Harley's Wandee Worry. Limit bitches—1 Chas K Harley's Wandee Cowslip. Open bitches—1 Chas K Harley's Wandee Manila. Winners bitches—Wandee Manila, res Wandee Cowslip.

IRISH TERRIERS—Limit dogs—1 John Douglass, His Lordship, 2 Thos Howard's Shaun Rhu, 3 F J Walker's Iowilde Dougan. Open dogs—1 Jas Watson's Red Hill's Doctor, 2 His Lordship. Winners dogs—1 Red Hill's Doctor, res His Lordship. Limit bitches—1 Miss Ina C Martin's Shan Van Vocht, 2 Dresser Simpson & Niehaus' Lady Powers. Open bitches—1 Mrs F J Walker's Royal Noreen, 2 Shaun Van Vocht. Winners bitches—1 Royal Noreen, res Shan Van Vocht.

BLACK AND TANS—Withheld.

PUGS—Novice, open and winners dogs—1 Mrs G Meyers' Face. Open and winners bitches—1 Marguerite Constance Hoag's Muggins.

POMERANIANS—Puppy dogs and bitches—All awards withheld. Open dogs—1 Mrs Lewis Bernstein's Beauty.

YORKSHIRE TERRIERS—Novice dogs and bitches—3 Miss Doris Wilshires' Punch. Limit dogs and bitches—withheld.

MALTESE TERRIERS—Open dogs and bitches—3 Miss F Marx's Teddy R.

ENGLISH TOY SPANIELS—Open dogs and bitches—1 Mrs A Roi's Pansy, 2 Irving C Ackerman's Humberstone Ribby, 3 Ed Attridge's Rufus.

JAPANESE SPANIELS—Limit dogs—1 Thos H Stevenson's Blatcher, 2 R Robinson's Gip. Open dogs—1 Thos H Stevenson's Prince. Winners dogs—1 Prince, res Blatcher. Limit bitches—1 Thos H Stevenson's Beauty. Open bitches—1 Thos H Stevenson's Queen. Winners bitches—1 Beauty, res Queen.

MEXICAN HAIRLESS—Open dogs—Mrs Ida L Moulton's Stylsh Jack, 2 Mrs Ida L Moulton's Cupid. Open bitches—1 Mrs Ida L Moulton's Bing Bing, 2 Mrs Ida L Moulton's Jane.

CHOWS—Open dogs and bitches—1 Mrs D De Barrows' Hong, 2 D De Barrows' Kong.

MISCELLANEOUS—Puppy dogs and bitches—1, 2 Mrs L H Wagner's Puggie, Toodles (Long haired Chihuahuas). Open dogs and bitches—1 Mrs C F Hewson's Jappo (Japanese Chin), 2 Mrs I L Moulton's Bummer (Toy Poodle), 2 Mrs L H Wagner's Bunny (Long haired Chihuahua), res Mrs L H Wagner's Beauty, v h c Mrs L H Wagner's Toy (Long haired Chihuahuas).

SPECIAL AWARDS.

George S. Thomas' trophy for best of any breed, Wandee Kennels' Ch. Wandee Coastguard.

Herman Oelrichs' trophy for best dog owned by a lady, Ch. Lester C.

Chas. K. Harley, President's trophy for best Setter of any variety, Cato Jr.

Bohm-Bristol trophy for best Setter or Pointer, Cato Jr.

St. Bernards—Livingston Jenks trophy for best, Ch Lester C. Lester K Wells trophy for best, opposite sex to winner of Jenks trophy, Golden Fairy.

Great Danes—S & G Gump trophy for best, Rupert of Hentzau. Lick House trophy for best, opposite

sex to winner of Gump trophy, Princess Harlequin. W F Williamson trophy for best pair, dog and bitch owned by one exhibitor, Ruy Blas and Carlotta. Chas Newman trophy for best bred on Pacific Coast entered in the puppy class, Princess Harlequin. Best kennel, John L Cunningham.

Greyhounds—San Francisco Kennel Club trophy for best, Rocker.

American Foxhounds—Clabrough, Golber & Co.'s trophy for best, Crowder. S F K C trophy for best bitch, Rose.

Pointers—P J Weniger trophy for best, Boston. "A Friend" trophy for best of opposite sex, Oregon Jessie. Shreve & Co. trophy for best brace owned by one exhibitor, Glen Rose and Bang Up, W B Coutts.

English Setters—S F Britton trophy for best dog, Cato Jr. John E de Ruyter trophy for best bitch, Laura L. Irving C Ackerson trophy for best puppy, Pale Alto. The collar offered by Board of Supervisors of Contra Costa county for best dog entered from their county, Cato Jr. The collar offered by Board of Supervisors of Contra Costa county for best bitch entered from their county, Laura L.

Field Trial Class—W S Tevis trophy for best English Setter, Kilgarif.

Irish Setters—E Courtney Ford trophy for best, Lady Josie II. Walter Magee trophy for best of opposite sex, Ch Mike Swiveler.

Gordon Setters—John Butler trophy for best, Homestead Boy.

Irish Water Spaniel—W S Kittle trophy for best, Ch Dennis C.

Cockers—Shreve & Co's Breeders' Cup for best Coast bred, whelped the year previous to competition (1903), must be won three times by same breeder before becoming absolute individual property, Wiggles. Mrs Andrew P Welch trophy for best, Paprika. J L Cunningham trophy for best of opposite sex to winner of Welch trophy, Brownie. Arthur N Spear trophy for best in novice class, Brownie. S F K C trophy for best puppy, Delverton Domino.

California Cocker Club silver medal for best dog and bitch, respectively, Omo and Paprika.

California Cocker Club specials, silver medals, for members only: Best black open dog, Black Silk II; best black puppy bitch, Plumeria Sally; best black novice bitch, Wiggles; best black limit bitch, Miss Frivolity; best black open bitch, Bonnie Black Bess. Solid colors other than black: Best novice dog, Brownie; best open dog, Victory A; best puppy bitch, Bonnie Bess; best novice bitch, California; best limit bitch, Little Maid. Best parti-color novice dog, Teddy Roosevelt.

Collies—Palace Hotel trophy for best, Ch Hanover Monarch. J A McKerron trophy for best of opposite sex, Presidio Lassie. Oriental Cafe trophy for best in novice class, Maplemont Shower of Gold. J P Glynn trophy for best in puppy class, Prince.

Special prizes offered by the California Collie Club, for members only: Silver Medal for best dog, Old Hall Sandy. Silver medal for best bitch, Brandane Dollie. Bronze medal for best California bred dog, Old Hall Sandy. Bronze medal for best California bred puppy dog, Sunset Marvel.

Bulldogs—Walter S Moore trophy for best dog, Ivel Damon. S F K C trophy for best of opposite sex to winner of Moore trophy, Canford Rush.

Bull Terriers—Dr H L Tevis trophy (Breeders' Cup) for best Pacific Coast bred, to be won three times before becoming absolute property, Edgecote Peer, first time. W C Ralston trophy for best, Edgecote Peer. Grain Brokers trophy for best of opposite sex, Edgewood Jean II. Chas Bliss trophy for best novice, Edgecote Peer. F & H Quigg trophy for best puppy, Edgecote Peer.

Boston Terriers—Yellowstone trophy for best bitch owned in San Francisco county, Glenwood Enchantress. Henry Kahn trophy for best bred on Pacific Coast, Oaksides My Lady's Boy. Mrs J P Norman trophy (Montez trophy) for best brace of California bred puppies, Oaksides-His Royal Highness and Oaksides-My Lady's Boy. Russian Bazaar trophy for best, Glenwood Enchantress.

Dachshunds—Dr A T Leonard trophy for best, Majula.

Fox Terriers—E Courtney Ford trophy (Breeders' Cup) for best smooth coated bitch, to be judged by two or more of her get and to be won three times before becoming absolute property, Wandee Kennels' Wandee Delight. New California Jockey Club trophy for best, Ch Wandee Coastguard. H C Tilden trophy for best of opposite sex to winner of Jockey Club trophy, Wandee Lucretia. W W Moore trophy for best Pacific Coast bred smooth puppy dog, Wandee Smasher. Charles Woolsey Johnson trophy for best Pacific Coast bred bitch, Golden Soubrette. F H Farwell trophy for best brace American bred, Wandee Smasher and Wandee Snow Girl. Walter W Stetthelmer trophy for best California bred, wire or smooth coated, Wandee Smasher.

Pacific Fox Terrier Club specials, for members only, Charles K Harley (President's Trophy) for best. Donor not to compete, Sabine Brightlight. Irving C Ackerman trophy for best of opposite sex to winner of President's trophy, Wandee Lucretia.

Pacific Fox Terrier Stakes, first and second division, \$5 for the best dog, puppy class, Wandee Smasher. \$5 for the best dog, novice class, Wandee Buck Up. \$5 for the best dog, limit class, Wandee Mearns. \$5 for the best dog, open class, Wandee Mearns. \$5 for the best bitch, puppy class, Wandee Snow Girl. \$5 for the best bitch, novice class, Wandee Worry. \$5 for the best bitch, limit class, Wandee Sea Breeze. \$5 for the best bitch, open class, Wandee Manila. (wires or smooths).

Irish Terriers—S F K C trophy for best, Red Hills Doctor. F J Walker trophy for best of opposite sex, Royal Noreen.

Yorkshire Terrier—S F K C trophy for best, Punch. Japanese Spaniels—Captain C L Griffith trophy for best, Prince.

Cows—Capt C L Griffith trophy for best, Hong.

Miscellaneous—Dr E G McConnell trophy for best, Jappo.

Establishing a Mutton Flock.

The Wisconsin station after several years of experience gives the following suggestions as to the most important points to be considered when farmers are starting a flock of sheep with the intention of raising mutton:

Our chief consideration has been to secure good rams. It is a profitable policy in our experience to put as much value as possible in a ram. The high priced rams are usually those that have been winners of many prizes, but this is not the sense in which it is used here. A greater mistake cannot be made than to buy a highly fitted prize winner, no matter what the price may be. They almost invariably prove infertile or incapable of service. While it is hardly possible to injure a lamb by too liberal feeding, provided exercise to an unlimited extent is given, it is none the less a demonstrated fact that highly fitted yearlings and those of mature age are practically worthless in the breeding flock. The high-priced rams give good value when they are vigorous without having been pampered or starved, and most certainly when they show that they have the merit that attracts higher prices in the common market.

In the ewe flock attention should be directed toward selecting the ewes that are the deepest milkers, those that suckle their lambs best and have the densest fleeces for their own protection. To secure heavy weight in the lambs and have them show the smooth appearance of coat and form which indicates thrift, the ewes must be free milkers. It matters little if a ewe is not as nicely rounded as she might be. If she is a good milker she deserves the premier position in the flock. In fact the thinnest ewes at weaning time are invariably the best mothers, so that when the culling out is to be done it should be solely on the ewe's record as a mother and not on points of style or smoothness. Ewes vary considerable in respect to the quality of lambs they rear from year to year, so that it is well not to be too hasty in discarding a ewe on one year's record when she has many better to sustain her reputation.

The feeding of the ewe lambs that are to furnish the new material for the flock should be liberal in every sense of the word. Feed them liberally on oats and see that they get the best pasturage that it is possible to secure for them, and it will be found surprising how lusty they will grow during the first nine months of their lives. More can be done by liberally feeding the ewe lambs to secure weight of both body and fleece in the flock than any other course that might be adopted. It is evident in the size and weight of the fleece, and after the ewe lambs have been liberally fed during the first year it is hardly possible to check their growth afterwards, as they then possess the power to do for themselves to a greater degree.

In a grade flock when the lambs are sold to the butcher uniformity counts for something. To secure this it should be an axiom of every flockmaster to never sell or dispose of a ram that proves to be a valuable breeder as well as a getter of superior lambs. Such a ram should be permanently retained at the head of the flock and bred to the same ewes year after year, as long as it is possible to do so. In this way there continues to be similarity in the basis of the flock. Then in choosing a new ram to mate with the get of the other look for those qualities that are absent in the ewes to be bred to him. It is by balance breeding that the greatest progress may be made. It may be accepted as a truth that every sheep has a fault, and when the ewes are uniformly faulty in any feature of fleece or form the aim of the shepherd should be to secure a ram to correct it.

Country Butter Disappearing.

Genuine country butter is getting to be a scarce article in many parts of the country. The development of the dairy industry, with its skimming stations, milk routes and the like, has induced many farmers to go out of the business of butter making. According to the *Drovers' Telegram*, in many districts the farmers not only do not make butter for market, but sell their milk or cream and buy butter for their own use, as well as butter-milk and skim milk for their pigs and calves. While the passing of real country butter with its delicious flavor and innocence of adulteration of coloring matter—rich golden in hue in summer time, and white but no less savory in winter—is to be regretted, still it is a consummation to be desired, because it materially lightens the labors of the farmer's wife and daughters.

Time was when the dairy was operated exclusively by the women of the farm. They milked the cows, skimmed the milk, watched the cream until it properly soured, did the churning, worked the butter and then took it to market, exchanging it for the family supply of groceries, and occasionally having enough over to purchase a sun-bonnet or a calico dress pattern or a piece of gingham for aprons. The work of the dairy was no small part of the heavy burden upon the shoulders of the women on the farm, who, in addition, did all the housework, the washing and the mending, cultivated the garden and put in their leisure time sewing carpetbags and "piecing" quilts. Gradually the male members of the family were coaxed into the milking, but they always rebelled at working the churn dasher and washing the milk crocks. Even the dogs shied at the churning business. On some farms there were mechanical arrangements by which dogs did the churning, but the canines soon learned when churning day was due, and made it a point to disappear the day previous and remain away until the churning was over.

The advent of the dairy corporation has metamorphosed the business of butter making, just as the big packing house has revolutionized the distribution of meat products. Formerly there were numerous little slaughter houses scattered over the country, one to each village at least, in which the local butchers slaughtered animals and prepared their own meat products, the process being attended with much labor of a disagreeable nature and much waste. Now the big packing houses slaughter the animals, distribute the dressed meat or the preserved meat products, and utilize everything from the hoofs to the hair. Now the butcher may wear patent leather shoes and a nice, snow white apron all day and spend his time in his store making himself solid with his customers and incidentally laying the blame for high prices on the packing companies. Previously it was between the farmer and the butcher when it came to prices.

Good Udders.

Good udders are the exception rather than the rule. There are a good many cows that are kept for both milk production and breeding that have very badly shaped udders. It seems unfortunate that these characteristics must be transmitted from generation to generation, says *Farmers' Review*. The large udder, well developed in each of the four quarters, with the teats set on at regular distances, is the kind of an udder we want, so far as the shape is concerned. The udder that puts down four teats all in a bunch should not be perpetuated, but should be eliminated as soon as possible by skillful selection for breeding purposes. This kind of an udder is particularly objectionable if the teats are irregular in shape.

Perhaps the udder that is most to be guarded against is the one that has about all of its development in one or two quar-

ters, generally the fore ones, with the hind quarters poorly developed and with the hind teats pointing forward toward the forward teats.

Some farmers say they want an udder that will milk down to a rag, while others claim that the thick udder indicates richer milk. The experience of the writer has seemed to indicate that there is something in this latter belief, and that cows giving rich milk have thick udders. This may be due, and is due, doubtless to the fuller development of the milk glands, especially of those parts that have to do with the formation of butter-fat. At some of our stations the matter has been looked into, and similar conclusions have been reached.

In the great stock markets where dairy cows are bought and sold, we see an infinite variety of conditions under which such cows originate. They have in them blood from every known breed and from 10 known breeds, and this continuous crossing has produced numberless modifications in the udders. In the established breeds of cows we find udders bad enough; but they have probably a greater regularity in formation than the others.

We must, in fact, look to the established dairy breeds for an improvement in the shapes and substances of the udders. It would be interesting to know the general facts about the udders of cows for a number of generations, just as we find it advisable to keep records of their capacity to produce milk and butter fat. A record of the udders of cows might be a new thing in dairy science, but it would most certainly be the basis for a very interesting study. Such a compilation would show us that certain strains of our cows are responsible for the poor udders and such strains could be eliminated from the breeding operations.

In the investigation, however, of the udders we take into consideration milk veins and milk wells, as being parts of the udder.

One man has said that after generations of study on the matter, the inside of the udder of a cow is the darkest place on earth. This should not discourage the study of the udder; but it should remind us that we have in the udder an object of study that requires the use of all the knowledge that science can bring to our aid.

Feeding the Calf.

Among dairy cattle the best practice is to remove the calf from the cow within twenty-four hours after its birth and at once teach it to drink. This separation may be delayed until the dam's milk assumes the normal condition, but as a rule the earlier a calf is taken in hand and its feeding regulated the better for the calf. The younger it is the easier it learns to drink. It is also better for the dairy cow to be regularly milked by hand than to suckle a calf. The milk of good cows is often too rich for their calves, and the latter are apt to take too much if left to help themselves. The calf should have the milk of its dam or some other fresh cow, and receive it while warm, and at least three times a day (preferably four) for a week or more. During this time, if the milk is rich, it should be diluted with warm water one-fifth to one-third its own bulk, according to the richness, or the milk may be kept a few hours, the best of the cream removed, and then warmed and fed. To make a good calf, three feedings a day should be kept up for a month or six weeks, and the milk should be fed warm for a longer period, especially if the weather is cold. But after ten days or so milk set twelve hours and lightly skimmed will do, and after ten days more the skimming may be gradually made closer, until at the end of a month, or soon after, a skim milk diet is reached.

No rule can be given for quantity in feeding calves, they differ so much in size and food requirements. Judgment must be used, the feeding effects observed, and the calf given enough to thrive and be active, but not too much. More calves suf-

fer from overfeeding than from scant diet. Keep the calf a little hungry and eager for more rather than fill it to dullness. The endeavor should be to prevent the beginning of indigestion, which leads to scouring and perhaps fatal diarrhoea. Nothing causes indigestion sooner than overfeeding or irregularity in the quantity, time, and temperature of the milk, especially while the calf is young; and absolute cleanliness about the feeding vessels is essential, with frequent scalding. If it can with certainty be kept equally clean, some feeding device which compels the calf to suck its milk instead of swallowing rapidly is preferable to the open pail; but, all considered, the latter is usually the best utensil. If gritting the teeth or other symptoms of indigestion appear, a little lime water in the milk or a little baking soda will usually prove a correction. Keep the calf dry and clean, fairly warm, but in pure air, and allow it to exercise. If its box is small, turn it daily into a covered yard or small paddock. Young calves like company, but if kept together are likely to learn bad sucking habits. Every calf had better have its own box until a month or two old, and then be tied up out of reach of neighbors; but several may exercise together if not turned out until an hour after taking milk.—*Agricultural Bulletin No. 55.*

Farm animals in the United States January 1, 1904, according to estimates of the Agricultural Department follows:

There is an increase of 314,590 milk cows and a decrease of 1,229,708 other cattle, making a net decrease of 915,118 cattle of all kinds. The hog supply is estimated at 86,743 more than a year ago. Sheep show the greatest shrinkage, the decrease being put at 12,434,732 head. Horses show an increase of 79,086 head. The number of mules increased 29,828 head.

In general it may be said that where two-year-old steers are gaining at the rate of two and one-half pounds per steer per day on rations calculated to produce that finish demanded in the market, and that in a reasonably short time with feeds at average prices, they will increase in market value at the rate of from 20c to 30c per hundred weight per month, providing of course the market does not decline in the meantime.

To get the best results pigs should not be weaned until the sow weans them. They are almost sure to be stunted if taken away too soon. Breeders of fine hogs do not permit the pigs to be taken until their growing is assured. At times a pig will weigh as much as 75 pounds when taken away from the sow.

Sober up on Jackson's Napa Soda.

Horse Owners Should Use GOMBAULT'S CAUSTIC BALSAM

The Great French Veterinary Remedy.
A SAFE, SPEEDY & POSITIVE CURS.

Prepared exclusively
by J. E. Gombault, ex-
Veterinary Surgeon to
the French Government
Stud.

SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or blemish. The safest best Blisters ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. WE GUARANTEE that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or ointment ever made.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular, testimonials, etc. Address

JEN LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Choice Shorthorns for California.

Mr. E. W. Howard, Vice-President of the California State Agricultural Society, returned recently from Minneapolis where he attended the 25th annual sale of Shorthorns at the Browndale Farm, Minneapolis, Minn.

Mr. Howard was fortunate in securing a fine lot of cows and heifers that are exceedingly well bred and of good quality.

Amongst the purchases are three imported Scotch cows bred in the purple and the kind that breed on as their calves show.

Imported Spicy Princess—A red cow bred by Robert Bruce of Aberdeenshire, Scotland; got by Prince of Archers 141.547, (the famous Duthie bull) has a red heifer calf by Imp. Nonpareil 150.830 at foot.

Imported Orinda of Pine Grove—Bred by Jas. Hay, Aberdeenshire, Scotland; got by Squire Nonpareil 75.723, (another Duthie bull) has a red bull calf by Royal Victor 138.865 at foot. Mr. Howard has named this calf, Pioneer.

Imported Lustre 19th—is a beautiful strawberry roan by Scottish Fancy 75.601 out of Lustre 17th and was bred by James Black, Aberdeenshire, Scotland. This cow is safe in calf to Scottish Consul 181.231, a pure scotch bull.

A yearling Scotch bull, Ramsden Lad 203.772, deserves more than passing notice as he was the 1st prize calf at the Minneapolis State Fair in 1903 amongst hot competition; and in securing a bull of such breeding and outstanding quality combined, the owner is congratulated. The total shipment was 14 cows and 3 bulls.

On his trip Mr. Howard purchased for Mr. John Parrott for his Chico ranch, 8 head of registered Shorthorn two-year old bulls that have arrived in good shape. —Stockgrowers Journal.

The consumption of milk in the city of New York has increased enormously during the past twenty years, far exceeding the increase of population during that period. The milk consumed in the metropolis is not by any means the product of that State, but a great quantity is. In 1884 the city of New York consumed 529,954 cans; in 1894, 1,039,454 cans, and in 1903 it took 1,734,953 cans to supply the demand. This shows that the growth in population of the metropolis has not equalled the increased consumption of milk. The revenue derived from the dairy products of the State by the farmers is very great.

Good ensilage, properly fed, helps to maintain healthy cows. There is nothing else quite so good for milch cows as good ensilage that has been rightly made and properly kept. Much depends upon this. If the silo is too large to feed off the whole surface every day the top ensilage is liable to become slightly mouldy. Mold is bad for cows or any other ruminating animal. Of course it is possible to feed too much of the very best ensilage. A mixed ration is necessary to secure good results. A little ensilage is a great addition to a cow's feed, both in winter and during the heat of summer.

The same feed will not necessarily produce milk of the same quality from different cows. Two cows may be fed exactly the same ration and one will give milk rich in butter fat, while the milk of the other will contain a comparatively low per cent of butter fat. This is one of the decrees of nature to which we must submit and which no system of feeding will change.

Fat and Flesh.

Extra fat fowls are not in demand in the best markets. An extra quantity of fat is objectionable because when cooking the hot oily substance saturates the meat making it unpalatable and indigestible. This is the reason why some people cannot eat either ducks or geese when roasted.

Over-fat fowls are more expensive as there is much less lean meat in proportion to the total weight. The best customers want poultry that is reasonably well fed, but not stuffed to over-fatness. When fowls are fed for market there is a right condition to stop at. When this stage is reached, the last six days before killing, the fowls should be cooped in quarters that are clean, airy and healthful and the fowls should be fed on corn, then for three days before killing give them nothing but skim milk and soft boiled rice. The night before killing they should have plenty of water but no food, which leaves the crop empty and the intestines clean.

This careful dieting gives a clean pleasant flavor to the meat that is very different from the product of common fowls killed in the ordinary old fashioned way. The flesh of fowls is quickly flavored by their feed. To prove this, one lot of fowls may be fed on onions, musty meal and other strong odored feeds, while another similar lot is fed for a short time on celery, lettuce, fresh skimmed milk, rice, etc. One experiment is sufficient if the product is used at home.

Word has come to the Manufacturers and Producers' Association of California that the Quartermaster-Generals Department has awarded to members of the association contracts for furnishing California hay amounting to about \$45,000. These contracts are awarded under bids opened April 15th, and are in addition to those amounting to about \$75,000, also for California hay, made several months ago. These purchases are all made for shipment to Manila.

Of the Jersey cows assembled near Jerseyville, Ill., for the purpose of entering the World's Fair contest, nineteen are due to calve this month. The contest will last six months.

A. S. OLNEY & SON - Proprietors

In buying a cow we always look well to the head. A clear, bright eye; delicate gentle head; well developed veins and udder, supplemented by a good digestive capacity, usually center in the cow that is a good milker. Well placed teats and an udder that extends well in front are other details the dairy breeder looks for. A little practice will enable one to select the good cows in every herd.

A nine-week-old bull calf from the world's record Holstein cow, Sadie Vale Concordia, recently sold in New York for \$4000. His dam, Sadie Vale Concordia, completed her 60-day butter test on March 27, 1902, and made 30 pounds 10.2 ounces of butter in seven days, 123 pounds 9.5 ounces in thirty days and 220 pounds in sixty days, all world's records.

The dairyman who has his stable located on an elevation where he can secure good drainage has something to be thankful for. Those who have not good drainage should immediately improvise some method for keeping their stables dry under the floors. The product of the cows, as well as their health, makes this imperative.

Milk the cow dry—this develops the udder as well as increases the power of giving milk. If there is even a very little milk left in the udder after each milking it will cause a decrease in her flow of milk and finally cause her to dry up before she would otherwise.

In regard to feeding for eggs much depends on the breed. Feed that will fatten a Plymouth Rock will just keep a Leghorn singing and laying beautifully. Hens must be made to scratch, but they must have something to pay them for their work and trouble when they get to the bottom.

Old horses should be given ground feed, or it should be soaked until soft, so that it may be easily chewed and digested. Old horses are hard to keep fat because it takes them so long to eat to sustain themselves.

The Armstrong Bros. sold last week to San Francisco parties and shipped 75 head of fat steers. They got the fancy price of 9½ cents on foot at their feeding grounds near the Spreckels factory.

You can't judge the value of a cow as a milk producer by external appearances any more than you can tell how fast a horse can trot by his appearance in the stall. The test must be applied.

Get your hens to set or put an incubator to work if you wish to make money on your poultry.

You must produce eggs or raise chickens to make money on fowls.

The hen that fails to lay now is a useless lumberer of the earth.

Plenty of eggs means a good living for the good housewife.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

HAVE YOU HORSES?

Are any of them troubled with Spavins, Ring Bones, Splints, Curbs or any other form of Lameness? If so you need **KENDALL'S SPAVIN CURE.** It Cures all of These. Hartmannsville, W. Va., Jan. 5, 1903. JENKINS.** Price \$1; 6 for \$5. Ask your druggist for Kendall's Spavin Cure, also "A Treatise on the Horse," the book free, or address **DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.**

THE VALLEJO RACE MEETING

VALLEJO RACE TRACK

AUGUST 11, 12 and 13, 1904

Entries Close Monday, May 16.

GUARANTEED STAKES:

TROTTING.		PACING.	
1. SOLANO COUNTY STAKES—\$1000		6. GRISSIM STAKES (2:20 Class) \$1000	
(2:24 CLASS)		7. Vallejo Stakes (Green Class) 500	
2. Waldorf Stakes (2:30 Class) 500		(Horses without records)	
3. Board of Trade Stakes (2:16 Class) 500		8. Gen. Frisbie Stakes (2:15 Class) 500	
4. Breeders Stakes (2:13 Class) 500		9. Electric R.R. Stakes (2:10 Class) 600	
5. Three-Year-Olds 500		10. Three-Year-Olds 500	

Races for Two-Year-Olds, Trotting and Pacing, and for District Horses will be Announced Later.

Entrance Due as follows: 3% May 16, 1904, when entry is made; 1% additional if not declared out on or before June 1, 1904; 1% additional if not declared out on or before July 1, 1904.

Declarations (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at time declaration is made.

Substitutions.—Nominators, by the payment of an additional 2% on July 16, 1904, have the right of transferring their entry or substituting another horse eligible to the class in place of the one named in original entry.

The Program will be arranged so that horses entered in several events can start in each.

CONDITIONS.

Entries close Monday, May 16, 1904, when horses are to be named and to be eligible to the class in which they are entered.

Stakes not filling satisfactorily to the Manager may be declared off.

At any time previous to the last payment an owner may sell any of his horses and transfer the entries to the purchaser.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.

Five per cent of the amount of the stake will be deducted from each money won.

The Manager reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the first and 33% per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Manager reserves the right to change the hour and day of any race, except when it becomes necessary to ante-date a race, in which instance the nominators will receive three days notice by mail to address of entry. Right reserved to declare off or postpone any or all races on account of the weather, or other sufficient cause.

The Manager reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Entries not declared out at 5 o'clock p. m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

When there is more than one entry to any stake by any one person, or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.

Trotting and racing colors must be named by 5 o'clock p. m. on the day preceding the race and must be worn on the track. Colors will be registered in the order in which they are received.

Horses barred in trotting races, but will be permitted in pacing races.

Conditional entries will be treated the same as regular entries, and nominators held under the rule.

Any race that may be started and unfinished the last day of the meeting may be declared ended and money divided according to the rank of the horses in the summary.

Stakes are for the amount guaranteed—no more, no less.

All races to be 3 in 5 unless otherwise stated.

Entries by mail must bear postmark of the date of closing or will not be accepted.

Otherwise than as herein specified in these conditions rules of the National Trotting Association (of which this Track is a member) to govern.

Address all communications to

THOS. SMITH, President and Manager,
VALLEJO, CAL.

Eleventh Annual Celebration

GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1904

FEE - - - \$75

Reductions made for two or more mares.

Manager, WALTER SEALY.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jns. Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

Will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the breeding season of 1904, either pacers or trotters. Must be three to start and race to come off on Hollister track, Fair week, 1907. (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905, \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a colt that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 33 1/4 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:13 1/4), by Harry Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almost Light ning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4 Son of Sable Wilkes 2:18 and Fanny Bayswater, Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices. For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:03 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:29 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venns (dam of Adonis 2:11 1/4, Leab 2:24 1/4, Cnpld 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27 1/4; sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,

Supt. Santa Rosa Stock Farm,

Santa Rosa, Cal.

Or IRA PIERCE, 723 Montgomery St., S. F.

2:15 1/2

STAM B.

FOUR-YEAR-OLD
2:11 1/4

A Colt Trotter Himself, and His Produce Perform Early, and the Blood of the Two-Minute Trotters, Futurity and Horse Show Winners can be found in his veins.

WILL MAKE From Feb. 15 to June 1, 1904, at PLEASANTON THE SEASON

AFTER THAT DATE (by request) AT SALEM, OR.

At \$40 the Season, or \$60 to insure.

For further particulars address

SAMUEL GAMBLE, Pleasanton Cal.
Or TUTTLE BROS., Rocklin, Cal.

NEERNUT 19810 Record 2:12 1/4 (Sixth Heat) 2:14

Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09 1/4 to 2:30. Neerut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neerut is by Albert W. 1:13 3/4 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

Record 2:20.

THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:04 1/4, MUCH BETTER 2:07 1/4, DERBY PRINCESS 2:08 1/4, DIABLO 2:09 1/4, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed.

Pasturage, \$5 per month. Hay and grain, \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15 3/4

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 9:4 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.) dam LULANEER (dam of Limonero 2:15 3/4, Bion 2:19 1/4) by Electioneer 1:55. LIMONERO 2:15 3/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent bay horse with no marks, and in breeding class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 3/4 got his record as a three-year-old in the fourth heat of a six-beat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillun, Axinite and Futurity. LIMONERO 2:15 3/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles, Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dnzan Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Spylock 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton on of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree, address

BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09 1/4, champion 4 y. o. of 1903 (half mile 39 1/4), OUR LADY (trial 2:30 1/4), and full brother to JOHN A. McKERRON 2:04 1/4 (the fastest trotter of the Wilkes family).

Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16 1/4, sire of John A. McKerron 2:04 1/4, Who Is It 2:10 1/4, Stanton Wilkes 2:10 1/4, Claudius 2:13 1/4, Georgie B. 2:12 1/4, Bob Ingersoll 2:14 1/4, Tidal Wave 2:13 1/4, and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04 1/4, Nearest 2:22 1/4, and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05 1/4, Direct 2:05 1/4, Direction 2:10 1/4, etc.; second dam Annie Tims (dam of Annie C. 2:25) by Echo 4:03 sire of Eobors 2:23 1/4 (dam of Direct 2:05 1/4) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:23 1/4, sire of Our Dick 2:10 1/4, Homestake 2:14 1/4 and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15 3/4 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season.

Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

Telephone: Red 1431.

T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939

Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Fanny Fidella (dam of Fidette 2:23 1/4, dam of Mary Celeste 2:17 1/4) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lambert, son of McCracken's Blackhawk. **FEE \$50 for the Season, limited to 40 outside mares.**

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08 1/4, James L. 2:09 1/4, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15 1/4) by Ansel 2:30, son of Electioneer; second dam Mayflower 2:30 1/4 (dam of Manzanita 2:16, Wildflower (2) 2:31 and 8 producing daughters) by St. Clair 16675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. **FEE \$30 for the Season.**

The above horses will make the Season at WALNUT GROVE STOCK FARM.

Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

I DIRECT 2:12 1-2

(Officially Timed in Race in 2:08 1/4)

SIRE, DIRECT 2:05 1/4, sire of 54 in the list, including Directly 2:33 1/4, Direct Hal 2:04 1/4, Bonnie Direct 2:05 1/4, Prince Direct 2:07, Directum Kelly 2:08 1/4, Trilby Direct 2:08 1/4, King Direct 2:09 1/4, Rex Direct 2:10, etc., etc.

DAM, FRANCISCA (dam of I Direct 2:12 1/4, Sable Frances 2:15 1/4, Guycesca 2:29 and Earl Medium, sire of May Bud 2:13 1/4, Tom Martin 2:14 1/4, Kanawha Star 2:14 1/4, Lucy Stokes 2:18 1/4, Conard 2:21 1/4, Pearl Medium 2:22, etc.) by Almost 33.

Second dam, Frances Breckenridge (dam of Maximus 5:17, sire of 8 in list) by Sentinel 280; third dam by Bayard 58; fourth dam, Luon by Swigert's Lexington; fifth dam, Eagless by imp. Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E streets, near Agricultural Park, Sacramento.

Fee \$50.

I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

For cards containing tabulated pedigree and full particulars address

Or MABRY McMAHAN, Owner,

207 Sansome St., San Francisco.

PROF. H. B. FREEMAN, Manager,

19th and E Sts., Sacramento, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who Is It, ex-champion three-year-old gelding of the world, reduced his record to 2:10¼. John A. McKerron 2:04¼ (2:12¼ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES will make the Season of 1904 at the
NUTWOOD STOCK FARM, from Feb. 1st to July 1st.
Fee = \$50 Nutwood Wilkes 22116

For the Season
With return privileges if
horse remains my property.
Good pasturage at \$3 per
month. Bills payable be-
fore removal of mare.
Stock well cared for, but
no responsibility assumed
for accidents and escapes.

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTting STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19¼

(Sire of Monta Carlo 2:07¼, Idolita 2:09¼,
etc.); dam CREIDA (3) 2:18¼ by Palo
Alto 2:08¼; second dam Clarabel (dam of
3 in 2:30) by Abdallah Star; third dam
Fairy (dam of 2 in 2:30 list) by Hamble-
tonian 10.

CASSIAN is a high-class young stallion
in every particular and one of the best
bred ones ever foaled at the famous Palo
Alto Farm. He has produced blood on
both sides, and every one of his ancestors
for four generations are producers. He is
a beautiful bay in color, a splendid indi-
vidual, a fast natural trotter and has
every qualification for a sire of extreme and early speed, being good gaited, level headed and game

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best
of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:30)

1st dam BELLE Mc (dam of
Worthwood (1) 2:59 and Silver
Bee (2) 2:27¼) by Ensign
Goldust Jr.

2d dam LITTLE BELLE (gran-
dam of 3 in list) by Belmont
(sire of Nutwood 2:18¼ and
58 more in 2:30).

3d dam Thoroughbred Mare by
Imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1300
pounds. He is a model of symmetry, fine head and neck, short back legs and feet like iron, perfect
disposition and has great intelligence. No more perfectly gaited trotter stands for service and his
record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he
represents the most fashionable strains. His grand-sire Robert McGregor had that wonderful horse
Crescent 1:59½, and on his dam's side he carries the blood of the Goldust family, the most beautiful
of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be
trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial
in 2:32. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no
liability assumed. All bills to be settled before mares are removed. Address communications to
MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel,
Sacramento

Write BAKER & HAMILTON, Pacific Coast Agents, for prices.

MONTESOL

(TRIAL 2:24)

Full Brother to Lady Grannard 2:23 (trial 2:13)

MONTESOL, 6 years old, stands 15½ bands, weighs about 1135 pounds: is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcione. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege

POLE STAR

4 years old, by McKINNEY, dam MOUNTAIN HARE by Young Venture; 2d dam Rose Clark by Nigger Baby; 3d dam by imp. Trustee. Will be permitted to serve 10 approved mares at \$40 for season.

The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address P. FOLEY Race Track, Alameda.

SEYMOUR WILKES

REG. NO. 0232.

Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12½
and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds, stands 16 bands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to TBOB. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

For Three-Year-Old Trotters, owned in the District and Montana, Jan. 1, 1904.....\$350

Two Consolation Purses of \$300

Each, with free entrance will be given to non-winning starters in the Interstate Fair Stake for 2:17 Pacers and the Greater Spokane Stake for 2:20 Trotters, on condition that there are eight or more starters in each of the above stakes. Mile heats, 2 in 3, money divided 70, 20 and 10 per cent of purse.

CONDITIONS.

Entrance fee 5 per cent of stake and 5 per cent additional from money winners, payable 2 per cent May 10th, when horse must be named, and 3 per cent September 1st. Money divided 50, 25, 15 and 10 per cent of stake; no stake to be worth either more or less than sums guaranteed above. Mile heats, best three in five, except the Idaho Stake for three-year-old pacers and the Oregon Stake for three-year-old trotters, which shall be mile heats, best two in three. No race longer than five heats. Money to be paid in accordance with summary at the end of the fifth heat. Right to transfer or substitute entry in all stakes open to August 1st to horses eligible May 10th. The management reserves the right to declare off and return first payment on any stake that does not fill satisfactorily. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 70 per cent to first and 30 per cent to second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case will a horse be entitled to more than one money. Two horses belonging to one stable may be entered in one stake and be held for the entry of the horse that starts. But one entry fee will be required if neither starts. Other than specified, rules of the National Trotting Association, of which this Fair is a member, to govern, except hoppers not barred on pacers over three years old.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

CAMPBELL'S

EMOLLIO
IODOFORM

GALL CURE

FOR GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL FOR BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN. It has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the feet which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

HACKNEYS.

GREEN'S RUFUS.....The Baywood Stud, San Mateo

THE CALIFORNIA CIRCUIT, which a few weeks ago looked like a rather sickly plant, has revived and started growing and now promises to assume quite respectable proportions by the time harness racing actually begins in July. Five weeks are already assured with better and larger purses than for some time past and two additional weeks may be added. This refers only to the main circuit where the purses range from \$500 to \$2000. There will be several minor meetings at which \$300 purses will be given and much good racing held. The line of march which the harness horse owners will take up has been arranged as follows: Pleasanton will open with four days' racing July 27th, during which over \$6000 will be distributed among the winners. The Breeders Association will take the next week, which is the first week in August, and the meeting will be held at the San Jose track. Over \$13,700 is to be contested for at this meeting and among the important events will be the \$2000 stake for 2:24 class trotters, the \$1500 stake for 2:20 class pacers, and the two three-year-old divisions of the Pacific Breeders Futurity No. 1. Over \$2000 is to be contested for by the trotters in this stake and \$1250 by the pacers. Big fields are probable in both contests. The second week in August has been taken by the Vallejo meeting and over \$6000 is offered for three days' racing. Entries to these stakes have not yet closed but there is no doubt but the same generous treatment will be accorded Vallejo as has been given the Pleasanton and the Breeders associations. The week following Vallejo has not been claimed as yet, but is open for either Santa Rosa or Woodland. It is probable that the former town will take this date and ask the Breeders Association to hold a second meeting there. If this is done there will be an additional \$12,000 to distribute among the winning owners of trotters and pacers as the Breeders will duplicate their San Jose program with the exception of the Futurity events, and in their places good purses will be offered for two and three-year-olds. The State Agricultural Society

directors will meet to-day at Sacramento to fix dates for the State Fair and will probably select the two weeks beginning August 22nd, and ending September 3d. The harness horses will be well provided for and purses aggregating about \$15,000 offered them. This will make a total (provided the Santa Rosa meeting is given) of over \$50,000 in purses and stakes to be trotted for on the California circuit this year not counting Salinas, Hollister, Hanford, Tulare, Fresno, or Los Angeles, and the probability is that the usual meetings will be held at all those places. If the State Fair closes September 3d, this will give the horsemen ample time to ship north for the two big meetings in Oregon and Washington which open with the State Fair meeting at Salem, September 12th and continue until along in October with meetings at Seattle, Spokane, North Yakima and other places, winding up at Boise, Idaho, in the latter part of October. There will be considerable over \$100,000 in stakes and purses for trotters and pacers to compete for on the Pacific Coast this year.

A GOOD THING for the breeders and owners of harness horses on this coast would be the organization of a Pacific Coast Circuit of harness racing extending over California, Oregon and Washington. The meetings should be principally for harness horses and no association be a member of the circuit that could not hang up at least \$10,000 in the aggregate for a program of twelve or fifteen races. The circuit should start in at Los Angeles early in July, moving thence through the principal towns in California where mile tracks are kept in shape and ending as far as California is concerned at the State Fair at Sacramento. At the close of this fair a special train could convey the horses, cattle and other exhibits direct to Salem, to the Oregon State Fair, and from there the circuit could take in Portland, Seattle, Spokane and other large towns in the northwest. Such a circuit could be easily and amicably arranged as the climate of California would permit racing to be started early here and eight or ten meetings given before the Oregon racing began. The circuit could be arranged something like this: Los Angeles, Fresno, Stockton, Pleasanton, San Jose, San Francisco, Woodland, California State Fair. Doubtless purses and stakes aggregating \$100,000 could be given at these eight meetings, and as much more would be hung up by the associations in Oregon and Washington. Such a circuit would, if properly conducted, be worth a great deal to the horse breeding interests of this coast.

GRADING WILL BE STARTED immediately on the new speed track and athletic grounds in Golden Gate Park. The surveys are made and the stakes set and all the plans will be complete by tonight so that the work will be begun on Monday. The Park Commissioners have agreed to start the work as soon as \$10,000 is paid into the Park treasury which will doubtless be done to-day, as that amount and more has already been subscribed. Nearly \$10,000 more is yet to be subscribed to complete the necessary \$25,000. Park Commissioner A. B. Spreckels, who is one of the prime movers in the scheme of building the proposed track and grounds will soon leave for a trip East to be absent several weeks and desired to see work begun before he left, so arrangements were made by the Commission to start work as soon as the sum of \$10,000 was paid into the Park treasury by the Amateur Athletic and Driving Association. Every branch of athletics to be benefited by the public pleasure ground now has its members actively at work. Meetings of cyclists, polo men and school athletes have been called for the special purpose of inciting interest and gaining workers to raise the \$10,000 as yet unpledged and the united efforts should soon accomplish that end. Subscriptions can be left at the office of the BREEDER AND SPORTSMAN, and it is hoped that every horseman will contribute to the project.

SALEM AND SPOKANE ENTRIES will close May 10th and all California horses that will race on this Coast and are considered good enough to win in their classes this year, should be entered at these meetings. The California circuit of big purses will and at the Sacramento State Fair in all probability and horsemen who like to race for good sized stakes can then ship to Salem in time to start at the Oregon State Fair and then take in the rest of the Northern Circuit. The Oregon State Fair has offered larger purses than any association on the Coast thus far. There are two of \$2000 each, one for trotters and the other for pacers, besides several of \$1000 and \$500 each, and the Spokane meeting also gives generous purses. Entries to these two meetings will close May 10th. If you expect to race up north this year, don't forget the date.

Death of Daly 5341.

The stallion Daly 2:15 that for many years has been the premier at Rosa Dale Stock Farm, Santa Rosa, died suddenly there on Tuesday last, aged twenty-one years. The old horse seemed in good health, but on being led out from the barn, reared and fell, death being probably due to the bursting of a blood vessel. Daly was bred at Palo Alto Stock Farm by the late Senator Stanford and was by Gen. Banton, out of Dolly (dam of Dolly Dillon 2:06½) by Electioneer, second dam the famous old long distance race mare Lady Dooley 2:31¼ (four mile record 11:05) by Black Hawk 767, third dam the Hedgema whose pedigree is untraced. Daly's record of 2:22½ is recognized by the Register Association, but his mile in 2:15, made at Stockton in 1892 was rejected along with the records made by many others because some of the technical

DALY 2:15

rules of the National Association were not complied with by the Stockton member. That he trotted the mile fairly in 2:15 however, has never been disputed or doubted. Daly has been at the head of the stallions of Rose Dale Stock Farm for many years, and although quite successful in the stud has not left a large list of performers as Rose Dale farm has not regularly trained and raced its stock. Up to the close of 1903, the Year Book gives Daly credit for the following trotters: Bonner N. B. 2:17, Clatawa 2:21, Favor 2:21½, Bertha R. 2:22½, Julia G. 2:23½, Digitalis 2:25½, Daly Moor 2:25½ and Twilight 2:30. His son Bonner N. B. is the sire of Phil N. 2:21, and Oregon Sunshine 2:16½ and his son Clatawa is the sire of Hiac 2:27½. Daly produced many large handsome horses that have been used as road and carriage horses and not trained for track purposes.

Readville Entries.

The New England Trotting Horse Breeders Association has received a big list of entries for its Grand Circuit meeting, among them the California horses being quite numerous.

In the Blue Hill, \$5000 for trotters of the first class, twenty-four horses have been nominated. Those bred in California are Black Thorne, by Hawthorne, and Lita by McKinney, both named by East View Farm; John Caldwell by Strathway, named by John C. Kirkpatrick; Lisonjero by Dexter Prince, named by Thos. Adkins, and Stanley Dillon by Sidney Dillon, nominated by J. H. Brown of Detroit, Michigan.

The \$15,000 stake for 2:10 class trotters, known as The Massachusetts has received sixteen nominations. In this stake the horse need not be named until August 8th. J. R. Albertson has taken a nomination for George G. 2:12½, and East View Farm has one for either Judge Greena 2:10½, Consuela S. 2:12½, or Aristo 2:17½.

The Ponkapog, \$3,000 for trotters of the 2:14 class, received 26 entries. Among them are Aristo by Nushagak, Direct View by Direct, Leonora by Mendocino, and Sweet Marie by McKinney.

The Tyro is a race for three-year-old trotters of the 2:25 class. Twenty-three colts and fillies have been named for this event. Those from California are the fast colt California Cresceus by Mendocino out of a mare by Boodle that is in the Salisbury string. Lucretia by Nazote out of Lucyneer by Electioneer, owned by Col. J. C. Kirkpatrick and the filly Princess Athel by Directum Kelly in the East View Farm string.

Nineteen pacers eligible to the 2:24 class have been named in the Norfolk \$5000 stake. No California stable is represented in this stake. The only California had pacer entered is China Maid by McKinney, and she has been credited with a trial mile in 2:05½. All in all, the California horses show up well in the entries and though the quantity may not be as great as last year, the quality is fully as high if not higher. The horses bred in this State will make a good showing on the Grand Circuit this year.

JOTTINGS.

STAM B. WILL NOT GO TO OREGON on the first of May, as announced in these columns last week, nor will he go on June 1st, as advertised, or on any other date thereafter unless his present owners dispose of him to parties who wish to take him there. Mistakes often occur in newspapers for which no valid excuse can be offered and the announcement that Stam B. would be taken to Oregon in May is one of them. Sam Gamble had advertised that Stam B. would make the season at Pleasanton until June 1st, and the advertisement was printed in the BREEDER AND SPORTSMAN and also in the Portland Rural Spirit. How I got the date moved forward a month is one of those things that cannot be explained, but I did that very thing, in last week's issue of the "Breeder". It was one of those unfortunate occurrences which sometimes happens when one wants to do a person a little favor but works him an injury instead. In a letter to me dated April 24th, after calling my attention to the error and making a mild protest, Mr. Gamble says:

"I would have received a much larger number of mares for Stam B. this season, only I unfortunately spread broadcast the information that Stam B. would serve mares the season of 1904 at Pleasanton, Cal., up to June 1st—after that date he would finish the season or year at Salem, Oregon, and you have it so in your journal in my advertisement. How such an error that I was to depart with Stam B. on May 1st was made is beyond me, and will work a hardship on me financially. Your error will cause many that intended to use Stam B. to change their minds and breed elsewhere. Now, I wish to announce that the idea of taking Stam B. to Oregon this or any other season (unless sold) is abandoned. This you can announce: That Stam B. will remain at Pleasanton until August 1, 1904, and all engagements at Oregon are now cancelled. It is impossible for me to do justice to Stam B.'s patrons by leaving here for Oregon on June 1, 1904."

This announcement that Stam B. will remain in California all the season of 1904 will be good news to many breeders. From the time he made his memorable campaign as a three-year-old in this State in 1895, down to the present, Stam B. has had a warm place in the heart of every man that admires a game race horse and a handsome trotter. As a sire he is just beginning to receive the recognition that is due him, and now that some of the best mares in the State are being mated with him, and his get showing such great speed, his future as one of the great producing sires is assured. The decision of Mr. Gamble to keep him in California the remainder of the season is a gain to this State, but a decided loss to the breeders of Oregon.

The Santa Rosa people have addressed a letter to the Directors of the Pacific Coast Trotting Horse Breeders Association in which they propose to renew their offer to pay the association a bonus of \$1250 to hold a meeting at the Santa Rosa track this year, but they make the proviso that the meeting be held before the Pleasanton meeting. This proposition the Breeders cannot accept as it would necessitate an entire rearrangement of that part of the circuit already fixed. Pleasanton was the first place to announce a meeting and stated that it would open the circuit. This was proper as there are more horses working at the Pleasanton track than at any other place in California, and by opening the circuit there much would be saved in shipping expenses to the horsemen. When the Breeders accepted the offer of the San Jose people to hold their meeting there the announcement was made that it would follow the Pleasanton meeting, the shipment being only about thirty miles and very convenient. Then Vallejo claimed the following week and announced a good list of stakes to close on May 16th. If Santa Rosa would accept the week following Vallejo there would be general satisfaction among the horse owners as the shipment from Vallejo to Santa Rosa is a short and convenient one. To reverse the order and put Santa Rosa first on the circuit would make a very inconvenient circuit. It would necessitate the horsemen making a long trip from Pleasanton, San Jose and all southern points, and then back again to those places. There could not be more than one-half as many entries obtained for a meeting to open the circuit at Santa Rosa as there could be for one to come in after the Vallejo meeting, as the horse owners consider their expenses heavy enough as it is, without paying for traveling twice over a line when a properly arranged circuit will only require shipment but one way. I hope the Santa Rosa people and the Breeders Association can agree upon a meeting there after the Vallejo meeting. There are so many good horses in California this season that the racing is bound to be more interesting and the attendance larger as the circuit progresses. After the State Fair many stables

will go north to Oregon and Washington, and all the California meetings held before the State Fair are certain of big entry lists and good fields of starters. The Breeders have held some good meetings at Santa Rosa, but all their previous efforts can be eclipsed this year if a meeting is held there, and I hope the citizens of the City of Roses will agree to accept the dates that will put that good town on the circuit this year in the most convenient place for all concerned, which is following the Vallejo meeting and before the State Fair.

It would be a good idea for the horsemen who have entered at Pleasanton and San Jose, and who propose to race at Vallejo and other meetings to be given in California this year, to get together at Pleasanton before or during the week of the meeting there and arrange with the railroad company to carry their horses through the circuit. A well known horseman who raced all through the East and in California, but retired some time ago from the racing business, remarked to me the other day: "The horsemen of California have less sense than anybody when it comes to paying freights and fares on railroads. The poorest theatrical company that ever went on a barn storming trip through the country, if it has no more than a half dozen members, gets special rates on the railroads, at the hotels, from the draymen and from everybody to whom they have to pay money. The horsemen on the other hand pay full price for everything. Fifty or sixty trainers start out every year here in California with two or three hundred head of horses and all the necessary appurtenances that go to make up their outfits, and pay full price for everything in every town from the time the circuit opens until it closes. Their cars are attached to passenger, or freight trains just as it suits the pleasure of the company and they are often compelled to lay by for hours in the broiling hot sun at stations waiting to make connections." This is all too true. It behooves the horsemen to get together this year and see what can be done in regard to getting a special rate that will take them through the circuit at a reasonable rate and make the runs between towns giving meetings in quick time. The matter is worth taking up and talking over at least, and I suggest that the horsemen now at Pleasanton effect an organization and send some one to the railroad company to see what can be done in the matter.

A report comes from Cleveland that the Diablo pacer Sir Albert S. 2:03½ is going sound and that "Doc" Tanner believes he will stand the season's preparation. If this report is true, the present condition of this whirlwind pacer is doubtless due more than anything else to the year's rest he has had. It is well known that he had a bowed tendon and was fired for it, but the "rest cure" has evidently done as much or more to restore his leg to a well condition than all the treatment it received. If more horsemen would give their lame horses time to recover from their ailments they could race them longer. The firing iron is intelligently and properly used by many veterinarians, but the work goes for naught in a great many instances, because the trainers expect the iron to do it all and leave nothing to nature. Many horses are discarded and sold out of training stables on account of lameness that come out after a year's rest and race well and sound. Nature will do much to restore soundness and health if given a chance. Since Mr. Billings purchased Sir Albert S. the Diablo gelding has not been asked to put any severe strain upon his tendons, and they have gradually acquired a good, healthy condition. It is to be hoped that the California horse will be able to lower his record, as all competent judges believe that he can pace closer to two minutes when just right.

New Members of Great Broodmare List.

Twelve California bred mares with records were added to the Table of Great Broodmares by the compilers of the Year Book this year and their names appear for the first time in that table in Volume 19, recently issued. A great broodmare is one that has produced (1) two or more trotters with records of 2:30 or better, or two or more pacers with records of 2:25 or better, or one 2:30 trotter and one 2:25 pacer; (2) one 2:30 trotter or one 2:25 pacer and another son or daughter that has sired or produced a 2:30 trotter or a 2:25 pacer. The California bred mares with records whose names were added to this list during the past year are the following:

Economy 2:30, bay mare by Echo 2:37½, dam Lady Berkey by Muldoon. She is the dam of the pacers Capt. Derby 2:18½ and Economizer 2:17½, both by Chas. Derby 2:20, and of the trotter Extravagant 2:28½ by Woodnut 2:16½.

Ellen Mayhew 2:22, black mare by Director 2:17, dam Lady Ernest by Speculation, is the dam of Lord

Harford 2:23½ and Oro Wilkes 2:11. The last named is the sire of seven trotters and three pacers in the list.

Grace Lee 2:29½, bay mare by Electioneer, dam Addie Lee (dam of Adair 2:17½) by Culver's Black Hawk, is the dam of John Hervey 2:29½ and St. Valiant Vincent 2:24½, both by St. Vincent. Grace Lee is also the dam of Lee Vincent, sire of Florine D. 2:23½.

Gracie S. 2:22, chestnut mare by Speculation, dam Jeony (dam of Hulda 2:08½) by Bull Pup, added a new one to her list this year in the pacer Belle Dawson 2:16½ by Cupid 2:18. Gracie S. was already the dam of Dione 2:07½ by Eros.

Helena 2:11½ by Electioneer, dam Lady Ellen 2:29½ (dam of Elleneer 2:28½) by Carr's Mambrino, is the dam of Dobbelt 2:22½ by Wildnut and also of Wild Nutting 2:11½ by Wildnut.

High Tide 2:17½, black mare, pacer, by Albert W. 2:20, dam by Algona, is the dam of Chippewa 2:28½ by Trevelian and Little Tide 2:21 by Alfred G.

Leoa Holly 2:18½, roan mare by Director, dam Steinola (dam of Leta May 2:23½) by Steinway, is the dam of the pacer Dewey 2:16½ and the trotter Leonardo 2:22½, both by Bellioi.

Lilliao Wilkes 2:17½, brown mare by Guy Wilkes 2:15½, dam Flora (dam of Joe Artburton 2:20½) said to be by Laogford, is the dam of Guy Thistle 2:18½, a pacer by Thistle, and of Lilly Straoger 2:22, a trotter by Straoger.

Liska 2:28½, bay mare by Electioneer, dam Lizzie (dam of Ah There 2:18½) by Wildidle, is the dam of Liso 2:23½ by Dexter Prince, and Lunda 2:18½ by Norris, both trotters.

Lulu 2:20½ bay mare by Christmas S., dam Haywards Belle by Geo. M. Patchen Jr. 31, is the dam of Dacy 2:17½ and Lady Direct 2:15½, both pacers by Direct.

Maud W. W. 2:23½, black mare by Gen. Reno, dam said to be by Bidwell's Rattler, is the dam of Maud Patchen 2:19½ by Idaho Patchen and is also the dam of The Silver Belle by Silver Bow, dam of Zombowette 2:18 by Zombro 2:11.

Moonstone 2:28½, bay mare by Sultan 2:24, dam Montana Maid by Geo. Wilkes, is the dam of Coupon 2:29½ by The Bondsman and of San Meto 2:13½ by Simmons, both trotters.

Good Matinee Racing at Los Angeles.

In spite of a cold, raw wind that blew through the stretch and made fast trotting very difficult in the last quarter, there was excellent racing at Agricultural Park, Los Angeles, on Saturday last, when the Driving Club of that city gave a matinee before a good attendance. The program provided for several harness races, a polo pony race, and a match game of polo between picked teams from the Los Angeles Polo Club. The winner of the free-for-all pace was the hay gelding Toughnut by Neernut, and the 2:20 pace went to Cavalier by Welcome. The summaries of the events follow:

First race, free for all pace.
Toughnut, b g.....(Dr. C. W. Bryson) 1 1
Mionight, blk h.....(W. M. Barte) 2 2
Billy K, b g.....(R. V. Cooke) 3 3
Wood B., cb g.....(J. W. Spooner) 4 4
Time—2:16¼, 2:17.

Second race, Polo Pony Handicap, five furlongs.
Chamate, blk g, R. L. Bettner, won; Miss Murphy, br m, M. G. Burmester, second; Crescent, s g, B. N. Smith, Jr., third. Time 1:07½. Sea Foam, gr g, E. L. Hildebrand; Roddy, s g, B. Weiss, and Lady of Quality, s m, H. Weiss, also ran.

Third race, 2:20 pace.
Cavalier, br g.....(R. A. Smith) 1 1
El Mont, b g.....(E. J. Delorey) 3 2
Geo. B, b g.....(Dr. C. W. Bryson) 2 5
Glen, cb g.....(G. A. Pounder) 4 3
Rondow, b g.....(J. H. Snowden) 5 4
Time—2:17, 2:21.

Fourth race, novelty three-minute event, won by W. L. Keller with Clay; Time 2:58. W. H. Berry with Briny K second, 2:57½; Dr. J. A. Edmonds with Bobs third, 2:57½. E. Deffebach, Maudie, 2:54½; Dr. William Dodge, Jimmie D, 2:50; Godfrey Fritz, Gen. Boodle, 2:50½; C. G. Willis, Zenit, 3:13; K. V. Redpath, Lord Lovell, 3:08; William Garland, Black Arrow, 3:13; R. C. McCormick, Klondyke Wonder, 3:14; W. W. R. Glasscock, Grey Bess, 2:56, also drove.

Fifth race, 2:20 pace.
Willie Jib, b g.....(W. H. Berry) 5 1 1
Rive side Wood, blk g.....(E. B. Michel) 1 2 2
Nell, b m.....(J. W. Snowden) 2 4 4
Roy K., b g.....(C. G. Willis) 3 5 3
Robinson, br g.....(Walter Bordwell) 4 3 5
Charlie Dunn, cb g.....(H. J. Myers) 6 6 6
Time—2:25, 2:21½, 2:24.

A match game of polo was played between picked teams from the Los Angeles Polo Club reinforced by Mr. M. E. Flowers of Riverside. Flowers and H. Weiss defeated Dr. Edmonds, Bernie and T. Weiss by 6 goals to 2. The feature of the polo was the splendid black pony ridden by H. Weiss. It was always on top of the play, turned like a shot and was very quick to respond in the scrambles after the ball.

Kenney, the Bikeman, agent for the McMurray sulkies and carts, reports that he sold this week to E. A. Service of Chico a No. 15 and to I. W. Peterson of Santa Rosa a No. 20. He has sold over a dozen McMurray carts within the last week.

Horse Show at Burlingame!

The Horse Show Association of the Pacific Coast held an open air show for the benefit of Armitage Orphanage last Saturday. The show was given under the auspices of the Burlingame Country Club, and was held at Mr. F. J. Carolan's beautiful Crossways Farm, and largely attended. The judges during the day were Lawrence McCreery, W. S. Hobart, E. D. Beylard and Francis T. Underhill. When a judge had a horse entered he did not participate in the judging of that class.

Richard Graham, the veteran ringmaster, was in his accustomed place and assisted materially in making the affair a success.

The polo field proved an ideal spot for the show, although it must have given the players who were among the spectators many pangs to see the turf of which they are so proud cut up. The summary:

Best pair roadsters—A. L. McKendry's Bill Ashe and Tick Benton.

Best mare or gelding over 14.3 hands and under 15.2—J. S. Tobin's Shadow first, E. D. Beylard's Beppo second, Baywood Farm's Echo third.

Best pair not exceeding 15.2 hands—Baywood Farm's Eminence and Excellence first, F. J. Carolan's Prince Charming and Chieftain second, H. T. Scott's Castor and Pollux third.

Best mare or gelding under 14.3 hands—F. J. Carolan's Beau Brummel first, Miss J. Reid's Lallah Rookh second, Paul Clagstone's Sister third.

Best pair over 14.3 hands and under 15.2—F. J. Carolan's Pastime and Pleasure first, E. D. Beylard's Beppo and Jacko second, Baywood Farm's Doricourt and Echo third.

Best pair over 14 hands (ladies to drive)—F. J. Carolan's Pastime and Pleasure, driven by Miss Howard, first; E. D. Beylard's Beppo and Jacko, driven by Miss Reid, second; J. S. Tobin's Shadow and Sunshine, driven by Mrs. J. S. Tobin, third.

Best mare or gelding over 14.3 hands—E. D. Beylard's Tommy Tompkins first, Baywood Farm's Padre second.

Best pony over 13.2 hands and under 14.3—F. J. Carolan's Silver Tips first, Baywood Farm's Pasco second, Miss Whittell's Gaddy third.

Best mare or gelding over 14 hands driven by a lady—Miss J. A. Crocker's Digore, driven by owner, first; F. J. Carolan's Silver Tips, driven by Miss Kirk, second; E. D. Beylard's Jacko, driven by Miss Reid, third.

Ladies' saddle horse—F. J. Carolan's Madrone, ridden by Miss Catherine Barney, first; Miss J. Reid's Lallah Rookh, ridden by owner, second; Paul Clagstone's Sister, ridden by Miss Kirk, third.

Best mare or gelding over 15.2 hands—Henry A. Butters' Commander first, E. D. Beylard's Tommy Tompkins second, F. J. Carolan's Prince Charming third.

Heavyweight polo pony—W. S. Hohart's Quail first, F. J. Carolan's Beau Brummel second, F. J. Carolan's Rascal third.

Lightweight polo pony—W. S. Hobart's Palmyra first, R. M. Tobin's Pet second, P. D. Martin's Jack third.

Ladies' saddle horse over 14 hands—E. D. Beylard's Tommy Tompkins, ridden by Miss Reid, first; F. J. Carolan's Sporting Duchess, ridden by Miss Kirk, second.

Tandems—F. J. Carolan's Silver Tips and Pleasure first, Baywood Farm's Chum and Pasco second.

Hunters shown over five-foot jump—F. J. Carolan's Qui Dado, ridden by Charles Richardson, first; San Mateo County Hunt's The Bell mare, ridden by Huntsman Jerry Keating, second; F. J. Carolan's Scarborough, ridden by Mr. Carolan, third.

Four-in hands shown to park brake—Henry A. Butters' Commander, Edward VII., Captain Jinks and Ginger first, F. J. Carolan's Truth, Treason, Rhyme and Reason second.

A Great Mare to be Sold.

At the next auction sale of harness horses to be held in this city at the Occidental Horse Exchange, by William G. Layng, the mare Maud Fowler 2:21½ by Anteeo, dam Evelyn by Nutwood, is to be offered for sale by her owner, S. B. Wright of Santa Rosa. Maud Fowler is the dam of Sonoma Girl, the fast trotting mare which Mr. J. D. Springer of Pleasanton recently purchased from Ed Mills, and which is expected to be one of the great green ones of 1904, having already trotted a quarter in 30 seconds. Mr. Wright bred Sonoma Girl and sold her to a Mr. Ames of Sebastopol, Sonoma county, who in turn sold her to Judge Dougherty, who had her developed. It has been stated that Judge Dougherty was the breeder of Sonoma Girl, but this is not so as Mr. Wright is the breeder of this very promising mare. Maud Fowler has a foal at her side now by Sidney Dillon,

sire of the champion of all trotters, that will be sold; also a two-year-old full sister to Sonoma Girl by Lynwood W. Mr. Wright will also sell at the same time Hattie, half sister to Robin with a Lynwood W. filly at foot; also a four-year-old filly by the same horse out of Juanita Skinner. This filly is a full sister to the gelding Mart Rollins is training at the Santa Rosa track that is considered a very promising horse.

The mare Maud Fowler with a Sidney Dillon foal should be snapped up at this sale by some enterprising breeder. Sonoma Girl will make a record below 2:10 this year, harring accidents, and Maud Fowler will be recognized as one of the great brood mares. She is by Anteeo, a great son of Electioneer, and her dam Evelyn by Nutwood has produced Rohlet 2:12, Tretam 2:19 and Maud Fowler 2:21½. From such a mare as the dam of Sonoma Girl, Sidney Dillon should get a great one.

Aristo Will Go East.

Monroe Salisbury added another trotter to his string last week when he purchased for East View Stock Farm the handsome big trotter Aristo 2:17½ by Nushagak. Mr. Alex. Brown of Walnut Grove Stock Farm, who bred Aristo, set the price on him at \$10,000, fully intending to race him unless he was sold at that figure, and entered him at Buffalo and other places in the East. Mr. Salisbury and Charles De Ryder have been watching the horse work at Pleasanton, and when Charles Spencer stepped him a mile in 2:12½ a week ago last Saturday, with the last half in 1:03½, according to Mr. De Ryder's watch, negotiations were opened with Mr. Brown and the result is that Aristo is now a member of the Salisbury string and will go East with the others on Monday next.

Aristo is now five years old and one of the best gaited and fastest trotters ever trained at Pleasanton. He was trained as a three-year-old in 1902 and started in two races, the Occident and Stanford stakes, both of which he won as he pleased, although he was such a sick colt three weeks before that Mr. Brown almost despaired of starting him.

He is a grandly bred horse, as the following pedigree will show:

ARISTO 2:17 1-2	Nushagak...	Sable Wilkes.....	George Wilkes
		(Sable by The Moor	
		Director	
	Fidella.....	Mare by Blackbird 402	
2:17 1-2	Langton.....	Alfred 2:25	
		Laura by Electioneer	
	Nosegay.....	Nephew 1230	
2:17 1-2	Wildbud.....	Wildflower by Electioneer	

News From the North.

[Portland Rural Spirit.]

C. N. Fleming is working Alpha W. 2:08, Fleetly 2:11½ and College Maid 2:24½ at Elliston, Mont.

Viola, dam of Giles Noyes 2:05½, will be bred to Lovelace 2:20 this year. She is due to foal to Oro Guy.

C. X. Larrabee was in the city last week, and says he will ship two carloads of drivers to the Chicago horse sale in May.

W. E. Allison has sent Alta Dell 2:16 to the court of Diablo 2:09½. He will also breed Pearl Helen, her half sister, to the same horse.

Horsemen should bear in mind that all the early closing stakes on the North Pacific Circuit close on May 10th. Most all the associations have their entry blanks out and ready for distribution. If you have not received one, write at once to each of the secretaries.

Altacora 2:13, full sister to Chehalis 2:04½, Del Norte 2:08, etc., is safe in foal to Joe Patchen 2:01½, the sire of Dan Patch 1:56½. This will be the first Joe Patchen colt ever foaled on this coast, and its speed inheritance will equal that of any foal anywhere. Altacora, besides having a record of 2:13, is a full sister to seven in the list.

The directors of the Walla Walla Fair Association have made up the program for the spring race meeting, which is to be May 25th, 26th, 27th and 28th. It is as follows:

Free-for-all pace or trot, purse \$200.

Three-year-old trot, purse \$150.

2:30 pace or trot, purse \$200.

Three-year-old pace, purse \$150.

2:15 trot, purse \$200.

The races will be half mile heats, best three in five.

Entries for the harness events will close on May 10th.

In addition to the trots and paces, three running races will occur each day, the purses amounting to \$2000 in the aggregate. Entries for the runs will close each evening preceding the race.

L. C. McCormick has sold his McKinney stallion E. O. McC to Dr. De Witt Connell of Portland, who will control and use him for a driver on the road.

Homer Davenport, the cartoonist, while in Oregon

last week, bought the young stallion Alterego from D. B. McKnight, of Albany, Ore. Alterego was sired by Altago son of Altamont, and out of a mare by Rockwood. It is reported that Mr. Davenport intends to place this Oregon product in the hands of the noted reinsman, Ed Geers, to train.

There are quite a number of horses being jugged at Irvington track preparing for actual training the coming season. While there will be no harness racing at old Irvington this year, there may be sent to the races elsewhere some champion trotters and pacers. Measured by their records Mack Mack 2:13, stand at the head of the list of trotters, and Yukon 2:14 of pacers. Both of these horses are young, sound, and in prime condition, and are likely 2:10 performers. Following is the list in training:

John Sawyer has Yukon 2:14, owned by C. W. Welby; Oregon Bull 2:17½, owned by W. F. Watson, Lonzo, two-year-old by Zombro owned by Cleve Bryan; Zelma Z., two-year-old by Zombro owned by himself. Doc Ward has Torpedo, a green pacer, and Chas. Newman, a green trotter by McKinney owned by Sam Elmore; a two-year-old by Lovelace, and one by Vinmont. Harry Osman has a few youngsters that he is jogging, including a McKinney trotter and a young Diablo. W. H. Bradford has Free love, a three-year-old pacer by Lovelace and a trotter by Vinmont.

Chris Simpson is working his old standby Phil N. 2:19½, and the good green trotter Jasper Sill, a full brother to Phil, and Hazel S., a green pacer by Bonner N. B., that can step to town and back.

H. H. Helman has the largest string on the track and from the following he will select a stable to campaign:

TROTTERS.

Mack Mack, by McKinney, dam Nancy; owned by J. R. Bowles, Portland.

Alma Mc., by McKinney-Mary A. 2:30, by Altamont; Aug. Erickson, Portland.

Zipse, by McKinney-Altamont; Chas. R. Reynolds, Vancouver, Wash.

Lovely Dell (two-year-old 2:38), by Lovelace-Alta Dell 2:16, by Altamont; H. H. Helman, Portland.

Raven Jones, by Capt. Jones-Malheur; J. A. Jones, Springbrook, Ore.

Doc Jones, by Capt. Jones-Mazeppa; J. A. Jones; Springbrook.

Sister Jones, by Capt. Jones-Alexis; J. A. Jones, Springbrook.

Lovelace, by Lovelace-Slanter; A. R. Shreves, Cathlamet, Wash.

Rey Dare, by Monterey 2:09½-Thornette, by Billy Thornhill; H. H. Helman, Portland.

Wild Thorne, by Wild Nutling 2:11½-Thornette H. H. Helman, Portland.

PACERS.

Aldace, by Lovelace-Walleen, by Altao 2:09½; Tongue & Helman, Portland.

Prince Tom 2:16, by Tom V.; C. P. Webb, Portland

Pricemark, by Pricemont-Mollie Vaughn, by Antrim; W. L. Whitmore, Portland.

School Girl, by Alexis-Mattie; W. L. Whitmore, Portland.

Alexis Jumbo, by Alexis-Miss Mann; W. L. Whitmore, Portland.

Lovell, a three-year-old by Lovelace-Roxey, by Rockwood; owned by a business man of Portland.

True Element of Success.

That true merit and public popularity will not take the place of judicious advertising is fully demonstrated by the meager list of nominations received last month in the classic Kentucky Futurity. Every horseman and breeder in the land is a warm supporter and friend of the Kentucky Trotting Horse Breeders Association, and the Kentucky Futurity, but horsemen and breeders have business of their own to look after, and so restricted and "chilly" were the advertising orders on the Futurity sent out this year, and the consequent lack of cordiality on the part of the turf press, that no particular interest was aroused in the matter, and as a consequence, the nominations fell off more than one-third from last year's list, when the advertising was liberal and cordial. Advertising in the daily press is the life of business in the commercial world, and advertising in the turf press is the life of business in the trotting horse world, and that is all there is to it. John Wannamaker's "big stores," renowned as they are, would all close themselves within a year without advertising. There is not a trotting association, classic stake, speed sire, breeding establishment (nor even secretary), that is big enough to live and retain popularity and prosperity without advertising—without the cordial support of the turf press.—*Western Horseman.*

Jackson's Napa Soda untangles the feet.

Riverside Breeders Futurity.

EDITOR BREEDER AND SPORTSMAN:—On Saturday, April 23d, 1904, at eight o'clock P. M. there was a meeting held at the office of H. L. Carnahan, attorney-at-law, for the purpose of organizing what is now known as the Riverside Breeders Futurity Association. The association was formed for the purpose of arranging every year a futurity stake for colts foaled in Riverside county. The first stake is for the foals of 1903, to race in 1906 when they are three-years-old. There will be two classes—trotters and pacers, and they will go mile heats best two in three. The owners of colts that start will have the privilege of driving themselves, or engaging such a driver as they think best. The race will be held at the track offering the best inducements. The stake will consist of payments as follows: \$10 to be paid the first year when foal is nominated; \$10 the second year, and \$20 September 1st, 1906, when name of colt must be given. These payments and all added money given by the association over whose track the race is to be held, will be divided equally between the trotters and pacers. There will be four moeys in each race, fifty per cent to the winner twenty-five per cent to second, fifteen per cent to third and ten per cent to fourth. About twenty foals have already been entered in this first futurity, and the colts are by such sires as Stantoo Wilkes 2:10½, On Stanley 2:17½, Zolock 2:10½ and other good ones.

The Riverside Breeders Futurity Association elected for its officers for the ensuing year the following: President, E. F. Binder, the owner of Fernwood by Silkwood 2:07; Secretary and Treasurer, H. L. Carnahan, attorney-at-law; Managing Committee, Dr. F. A. Ramsey, B. R. Smith, Axel Nelson. Yours,

F. A. RAMSEY.

To Decide Cresceus Case.

May 3d is a marked date on the calendar of every follower of light harness racing. On that date the Board of Appeals of the American Trotting Association will pass on the mile alleged to have been negotiated by Cresceus in 1:59¾ at the Wichita track last fall, and declare whether or not it shall stand as a record.

Two objections have been filed to the alleged record. It is claimed, first, that the trial was not properly advertised; second, that the mile was made in about 2:05 and wrongly announced at 1:59¾, giving the stallion a mark not rightfully his.

The Board has in its possession a quantity of evidence gathered by interested people, bearing on the event. Much of this was obtained by emissaries sent to Wichita with power to make the most thorough investigation possible, at considerable expense.

These emissaries are alleged to have found a considerable number of horsemen who held watches on Cresceus and caught his time all the way from 2:04¾ to 2:06.

Several men were asked to make affidavits to their timing of the horse. Some consented; others, for business reasons, refused.

Those who are making a fight against the allowance of the alleged record claim that all three of the watches which took the horse's time were borrowed watches, and that not one was held by an experienced timer.

They also declare this—a most significant circumstance, if well founded—that each of the timers has declared that all three watches caught each quarter to the same time.

Not among the best and most experienced timers in the United States has there ever been known such a condition of affairs. The best watches, and the best timers, will catch the quarters a fifth or a quarter apart.

As to the advertising of the trial, Ketcham claims that he complied with the regulations prescribed; but opponents say he did not. Both sides have filed their evidence on this point, and the Board will decide.

Among those most vitally interested in the outcome are other owners of fast stallions. Every owner of a stallion with a record under 2:10 feels a personal interest in what Cresceus did, and in what official records are to say he did. —Chicago Inter-Ocean.

The Luxurious Way.

Every Californian should go to the St. Louis World's Fair.

Many will enjoy scenery through plate glass windows, satisfy themselves with sumptuous dining car meals, please their fancy with the latest books from the train library, go to bed by the electric berthlight at night, and exclaim at journey's end:

"I've been the Luxurious Way; I'll always travel Santa Fe."

If interested, as about World's Fair rates at 641 Market street, San Francisco.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Admirable Plans of the New York Club.

NEW YORK, April 19.—Amateur competition under that same plan that supplied such excellent sport last year, but with a new plan for awarding the cups will be in effect at this season's matinees of the New York Driving Club at Empire City track.

When the classification committee meets next week, it will take under consideration a plan of awarding points in each race which shall count for the silver trophies awarded at the end of the season. To the trotter and to the pacer scoring the greatest number of points in the regular matinees will be awarded the President's Cup. Four points will be awarded to the horse that wins a race, two for a second horse and one to a third horse to finish, irrespective of the number of starters in a race. There will be the usual ribbons for each event, but the point system is calculated to properly reward the horses that race consistently throughout the season.

As at present planned, there will be a provision for teams competing at the matinees and in addition a silver trophy to the trotter winning the greatest number of heats; to the pacer winning the greatest number of heats; to the trotter covering the fastest mile, and to the pacer covering the fastest mile. Horses to be eligible for these cups must start in at least five regular matinees.

So successful was last year's racing under the New York plan that President Lloyd and the members of the race committee are in favor of its continuance. The horses are classified in the spring by a committee

but was balked. He could not bluff the man by whom he had been pocketed, and then he tried a new tack.

"Give you \$200 to pull over and let me out!" shouted the worried Hudson.

"Taint enough, Scott. I ain't no piker!" shouted back the driver in reply. By this time they were on the turn and nearing the stretch.

"Give you \$500!" yelled Hudson, and the reply that came was: "I can't hear you, Scott!"

"Give you \$750! Can you hear that?" was the last raise of the now exasperated Hudson.

"You're on. Here's an opening. Hope you win!" was the shout of the man who had Hudson sewed up.

Hudson won the heat. He paid the \$750 out of his winnings. The driver who let him out won third money (\$500) besides. —Exchange.

Proposed Polo Meet at Santa Barbara.

Santa Barbara is preparing for a big polo racing meeting to be held in August. The dates set for the meeting are August 18 to 27, inclusive. Preliminary arrangements for this event were made at a meeting held last week. The meeting will be held under the rules governing the Pacific Coast Polo and Pony Racing Association. The dates named were submitted in San Francisco several days ago to John L. Colby, one of the directors of the association and he conferred with his co-director, Dr. E. J. Boeske, and a proposition was submitted to the Santa Barbara Polo Club. The heartiest approval was given and practice will be begun at once. The Santa Barbara club has

Sweet Marie 2:13 1-2 by McKInney

Will be Raced on the Grand Circuit this Season

of nine members. Records are not taken into consideration, but simply the ability of the horses. There are twelve classes for trotters and the same for pacers from the championship class to the 2:35 class. When a horse wins a race he is advanced to the next class. Upon winning in that class he is advanced again. He remains in a class until he has won a race, unless his owner requests advancement.

How Hudson Won the Race.

They tell some funny stories in the winter about things that occurred last summer and autumn on the trotting tracks. The last one relates to the red topped, skillful Scott Hudson, who is said to have paid a competing driver \$750 to liberate him from "a pocket."

The story runs that last fall at Lexington Hudson decided to win a certain heat in a race, and accordingly hacked his horse heavily. Hudson, it must be remembered, makes few foolish plunges, and his horse was easily the fastest of the field.

After the word "Go!" Hudson got his horse into position trailing the leader, or the pole horse. He was going easy in second position, and Hudson knew he would make a winning rush at the end. At the half-mile pole the usually wary Hudson found another horse lapped on him. He was in a pocket, and to get out was the next thing.

He tried two or three times to crowd his way out,

a fast track for the pony racing. There is a possibility that a non-conflicting golf tourney may be arranged between the dates named. Should this be done other sports will be worked in and a general tournament will result. A tournament along these lines was given last year and proved a great success, both from a financial and a social point of view.

H. E. Coll, one of the newly appointed directors of the 40th District Agricultural Association of Yolo county, recently sold a two-year-old colt by McKInney out of a mare by Falrose for \$525. The Falrose mare has a yearling colt by Diablo 2:09½ and a colt at foot by Searchlight 2:03½.

There will be no racing at the California Jockey Club's track at Emeryville on Monday next, but every day thereafter during the rest of the week until Saturday, May 7th, when the season will close.

The money earning capacity of a good trotter is increasing year after year, and for that reason good trotters bring good money in California and elsewhere.

Hattie B. 2:20½ by Alex Button, owned by Chas. Nelson of Woodland, foaled a very handsome filly by Diablo 2:09½ one day last week.

The State Fair program of harness events will be out next week, in all probability, and the purses will be generous.

Notes and News.

The circuit is forming.

It will be arranged soon.

And will be better than last year.

Vallejo entries will close on Monday, May 16th.

Oregon and Washington entries close May 10th.

The Roman 2:09½ will be raced this season by J. E. Roth of Chillicothe, Ohio.

Work will be begun Monday on the new speedway and athletic grounds in Golden Gate Park.

Many horsemen that intended earlier in the season shipping to Colorado have abandoned the idea.

J. M. Alviso worked his trotter Major Cook by Chas. Derby a mile in 2:20 last week at Pleasanton.

It is said that Senator Bailey will own Nancy Hanks 2:04 after the Boston sale, as he has announced his intention of buying her.

Spooks, the Modesto mare owned by L. C. Gates, is improving fast at Pleasanton. She will be good for a mile in 2:20 before long.

Al McDonald will have Forrest W. 2:14½ in his string this week, and the handsome trotter is to be put in shape to race and to reduce his record this year.

Ben Chahoya has a full sister to Major Cook in his string at Pleasanton that has the making of a fast trotter. She is owned by Mr. Combs of Alameda.

An adjourned meeting of the Board of Review of the National Trotting Association will be held at the Murray Hill Hotel, New York, at 11 A. M., Tuesday, May 3d.

Joe Cuicello now has Mr. J. De La Montanya's good filly Tuna 2:16½ by James Madison in his string at San Jose. Tuna won the Occident and Stanford stakes last year.

May Logan, a yearling full sister to the great pacer Sir Albert S. 2:03½, is offered for sale. She should be a great prospect for some one to take and develop as she is a handsome filly and well made.

The Pleasanton meeting will open the California circuit about the 7th of July. It may be one week earlier or later, however, owing to the number of meetings given prior to the State Fair.

Dan McCarty's sorrel mare by Hart Boswell, that J. Alberson is training at Pleasanton, worked a nice mile in 2:14½ last Saturday. She is a sweet gaited little thing and will pace close to the 2:10 mark some day.

The Ketcham stable this year will not include Cresceus, but will consist of Dorothy Redmond 2:10½, Lady Conway 2:12½, Conscience 2:23½, Sara McLure, five-year-old sister of Crescent Route 2:18½, and several green ones.

Aristo 2:17½ has been sold, but Charley Spencer has several more good ones from Walnut Grove Stock Farm out of which he will get one that is as fast as the Occident Stake winner. The Nushagak colts are trotters from the old home.

Henry Wyatt, the Los Angeles theatrical manager, now owns the very handsome and fast trotting mare Lou 2:14½ by Ira and takes much pleasure in driving her over the Los Angeles roads. She is one of the purest gaited trotters ever seen.

The green trotter Miss Kinney by McKinney 2:11½, dam by Don Cossack, leaves Los Angeles on May 1st for the Cleveland sale. She has been miles in 2:14, halves quite frequently in 1:05 and quarters in 31½. Watch her on show day at Cleveland. A half in 1:04 sure.

Mr. J. B. Iverson, of Salinas, has such a fine two-year-old by Nutwood Wilkes out of his mare Ivaneer, that he has booked her again to that horse, believing the cross an excellent one. Nutwood Wilkes seems to cross well with all sorts of mares and his colts have the speed and the disposition to show it.

The Butchers Board of Trade celebration, to be held at the Emeryville track on Wednesday, May 18th, is much talked about by the local horsemen who will enter their roadsters in the races to be given. Entries will close May 13th with the Secretary, J. M. Gilbert, at 414 Pine street, San Francisco.

A horseman recently from Memphis says one of the greatest pacing prospects in Ed Geers' stable is Glad Bells, owned by A. H. Robinson of Nashville. Glad Bells was bred by Mr. Robinson, and is by Bow Bells 2:19½, dam Gladness (dam of Elfrida 2:13½) by Nutwood 2:18½. Glad Bells paced the Cumberland Park track in 1903 in 2:10. Geers has liberally entered him, and will expect him to give a good account of himself in the Grand Circuit this season.

Sam Gamble has decided to keep Stam B. at Pleasanton during the remainder of the season up to August 1st, and has abandoned the idea of taking him to Oregon, as he cannot do justice to his California patrons by moving Stam B. to another State.

Mr. J. D. Springer worked his pacing mare Miss Idaho, by Nutwood Wilkes dam by Forest Clay Jr., a half mile in 1:02½ at Pleasanton last Wednesday. Mr. Springer, who has an excellent string of green horses will probably race them in California this year.

An Eastern paper states that Geo. H. Ketcham has leased Silver Bow 2:16 to John R. Smith of Jackson, Tennessee, for the season, and the son of Robert McGregor will make the season at the Hunt Stock Farm at Jackson. Silver Bow is still owned by Geo. H. Fox of Clements, Cal.

Dr. H. G. Hewitt of Healdsburg has had bad luck with his brood mare Maud H. by Vasto. She dropped two fillies by Seymour Wilkes recently, one of which was dead when foaled and the other lived but two days. Dr. Hewitt therefore has a nomination in Breeders Futurity No. 4 to dispose of.

Elias Williams, who has a training stable on Eighth avenue, near the entrance to Golden Gate Park, is handling a half dozen horses for different parties. Mr. Williams has a very convenient place for park drivers to stable their speedway horses. He is a careful and reliable trainer, and an excellent man with colts.

Mabel McKinney 2:17, owned by Dr. W. L. Spoor of Redlands, foaled a handsome brown filly, with star and two white feet, on the 8th of this month. The sire of this filly is Nutwood Wilkes and from the way the McKinney-Nutwood Wilkes cross is showing up, is entitled to a place among the very promising foals of this year.

Judge Green 2:10½ was the bright particular star again at Pleasanton last Saturday. He stepped through the last quarter of the Pleasanton track in 29 seconds flat. This is faster than Lou Dillon stepped it last year in April. The horse that beats the Judge in his class this year on the Grand Circuit will have to catch him when he is not feeling right, or step a mile in about 2:05 or better.

James Murray, a hanker and mining man of Butte, Montana, and F. A. Jermyn, a wealthy sportsman of Scranton, Pa., had a discussion in the Palace Hotel, San Francisco, one day this week over the speed possessed by Dan McCarthy's mare Lillian Palmer by Steinway. Mr. Murray offered to wager \$2500 that this mare would trot or pace a mile in 2:10 or better in a race during the season of 1904 and Mr. Jermyn accepted the bet.

James Thompson and Josh Albertson will leave Pleasanton for Cleveland, Ohio, on Thursday of next week with their strings of good ones. Mr. Thompson will take Albuta, three-year-old pacer by Altivo; John Caldwell, green trotter by Strathway; a pacer by Hawthorne; Lucretia, a brown filly by Nazote, and one or two others. Mr. Albertson will take his good trotter George G. 2:12½ and a chestnut pacing mare by Hart Boswell that has shown a mile in 2:14½.

The Tulare Fair Ground Association has decided to reopen its purses and stakes and will not close them until May 23d. By that date it is hoped the circuit in this part of the State will be made up and dates selected, and the Tulare association can then select its dates with regard to the best interest and convenience of the horsemen. It is more than probable that Hanford will also be able to announce a program by that time. Due announcement will be made in the columns of the BREEDER AND SPORTSMAN.

Monroe Salisbury will leave Tuesday of next week with the East View Farm horses for Empire City track, New York. If the horses reach New York in as good shape as they now are they will surprise the Eastern horsemen by their condition. A better lot of horses has never been trained at the Pleasanton track and Mr. Salisbury, and his able assistants Chas. De Ryder and Chas. Edwards, together with his large force of caretakers, are entitled to much credit for the excellent showing the horses have made during the training season in California. They will be back next winter and here's hoping they may have many good races and big stakes to their credit.

An auction sale of Holstein-Friesian bulls, fresh cows and calves from the La Siesta herd of prize winners, will be held at Fred H. Chase & Co.'s salesyard, 1732 Market street, San Francisco, on Monday evening, May 16th. As all our readers know who have attended our State and county fairs during the past ten years, the La Siesta herd is one of the most famous on the Pacific Coast and has furnished the foundation stock for many excellent herds built up in this State during the past few years. The La Siesta cattle are champion gold medal and blue ribbon winners wherever shown. Those wanting high class animals for dairy or breeding purposes should attend this sale. The cattle will be at the yard five days before the sale. Send for catalogues.

During the past week the Kenney Manufacturing Company at 531 Valencia street has sold No. 30 McMurray speed carts to Messrs. W. C. Hammerton, M. Donnelly, Dan Leiginger, Mr. Lafferty and Mr. Jero-teno of this city. Also a No. 15 carmine McMurray sulky to E. A. Servis of Chico, and a No. 20 to R. W. Peterson of Santa Rosa. Three new white McMurray sulkies will arrive next week. Kenney has for sale a second-hand Frazier and a second-hand McMurray. Also a good surrey.

Mr. Thos. Ronan, owner of the Pleasanton track, purchased, this week, the Cash Harlan farm near Dublin, Cal., containing three hundred acres of excellent land and improvements. Mr. Ronan will leave for Dayton, Washington, in a few days and bring down a large number of standard bred horses with which to stock this farm.

The well known starter and turf writer, Frank G. Smith, says: "I saw old Almont Jr. 2:26 at Village Farm recently. He is as fat as a seal, and, although 32 years old, when turned out on the cinder track, he stuck his tail up over his back, trotted a three-minute clip, snorted and took on so that he had to be taken back into the boxstall. It was absolutely funny to watch the old rascal play up colt."

The Board of Directors of the California State Agricultural Society will meet at Sacramento today, when dates for the State Fair of 1904 will doubtless be selected, and a program of harness racing announced. Owing to the fact that the Knights Templar Conclave will open in San Francisco on September 5th, it is more than likely that the State Fair will be held during the two weeks immediately preceding that event, closing Saturday, September 3d.

Alone 2:09½, the fastest four-year-old pacing mare of 1902, never looked as well as she does now. T. W. Barstow, of San Jose, her owner, has had several offers made for her, but will race her himself unless he gets the price he considers her worth. Alone is bound to be a great race mare as she is fast and game as was proven when she raced as a four-year-old. Mr. Barstow's two youngsters, Just It and High Fly by Nearest, are in fine shape and will be record breakers barring accidents.

Scott McKinney, the stallion owned by Mr. Scott of San Jose, will be put in John Phippen's hands at the close of the breeding season and trained for a record. Scott McKinney stepped a mile in 2:30 as a two-year-old and it will not be much trouble to give him a standard record. Mr. Scott's mare Fandango by Boswell Jr. has a foal by Scott McKinney that is a natural trotter and very promising, but the stallions best colt is probably the one owned by horseshoer Carroll of San Jose that is a crackerjack.

James Thompson drove a couple of good miles at Pleasanton last Saturday. He worked Col. Kirkpatrick's trotter John Caldwell by Strathway a mile in 2:14½ very handily and the three-year-old pacer Albuta a mile in 2:13. Both these horses will be entered on the Grand Circuit and should give good accounts of themselves this year. Albuta is by Altivo 2:18½, full brother to Palo Alto 2:08½, and his dam is Adhuta by Advertiser, second dam Bells Beauty by Electricity, and third dam Beautiful Bells.

Joe Cuicello worked a green trotter a mile in 2:16 at the San Jose track one day week before last and the last half was in 1:05½, and last quarter in 32 seconds. This trotter hasn't had his name in the papers much as yet but he will be heard from before the season is over. Joe owns a pacing filly by Billy Thornhill out of a sister to Lago 2:11 that is quite a stepper for one that has been worked but three weeks, as she showed him a quarter in 30 seconds last week. He expects to leave for the Colorado circuit within a day or two with quite a string.

In an account written to the Chicago Horse Review of the horses owned by Mr. F. S. Gorton and being trained by Ab. Fullager at Gretna, Ill., "Marque" says: "Mr. Gorton owns a crack pacer in the four-year-old chestnut Irish, by Monterey 2:09½, dam Julia D. 2:13½, by McKinney 2:11½. Irish was trained at the trot as a two-year-old, but last year was converted to the pace, showing remarkable speed and being gaited like a champion. It was no trick at all for him to do a mile in 2:11 in August, with quarters in 30 seconds. Mr. Gorton will, in all probability, save him for the 1905 stakes.

The clause in the conditions of the Detroit Club which prohibited substitutions being made in the original entry lists of the M. & M. and C. of C. stakes, seems to have met with the approval of the horsemen throughout the country. It has been supposed that the clause permitting substitution, which has been the rule in former years, was a special inducement to owners and brought in a larger list of entries than would otherwise have been received, but this supposition has been a false one, as the new rule abolishing substitutions has more than doubled the list of entries. President Campau and Secretary Snyder must be given credit for having considerable foresight as well as being enterprising and up-to-date.

Mr. William Bouie Veirs of Melbourne, Australia, arrived in San Francisco on the steamer Sierra this week, and after spending a few days visiting Pleasanton and the Rose Dale Stock Farm at Santa Rosa left for New York. Mr. Veirs has long been a resident of Melbourne, but calls his trip to America coming back home, as he is a native of Virginia and grew to manhood in that State. Mr. Veirs says that his colt Dixie Alto by Mendocino, dam by Palo Alto, second dam the dam of Arion 2:07½ that he purchased from Palo Alto Farm when a yearling, has grown into a magnificent three-year-old and gives every prospect of being a fast trotter. Dixie Alto 2:25½ by Daly, that he took to Australia two years ago has proved a very popular stallion and has been bred to a large number of well bred mares. Mr. Veirs' farm was an exhibitor at the last horse show in Melbourne and with eight horses took seven first prizes, one second and a championship. Dixie Alto won first in his class and was much admired. Mr. Veirs will remain six weeks or two months in this country and will visit the St. Louis Exposition while here. He also remarked that he would be at Detroit to see the M. & N. if possible.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

Sterling McKinney, the superbly bred four-year-old son of McKinney, in the stud at Maywood Stock Farm, near Indianapolis, has made a fine growth since Mr. Holt bought him in California last year, and is developing into a remarkably handsome and substantial stallion. He is very fast and will be trained later in the season by J. H. Hazelton.

Klatawah (3) 2:05½, in the stud of A. G. Danforth & Son, Washington, Ill., is just about the most popular public stallion in the Middle West. A lot of very great mares are being bred to him this season.

The famous mare Angeline, dam of Online 2:04, Ontonion 2:07½, etc., by Chester Chief, recently foaled a bay filly by Klatawah 2:05½, at the farm of A. G. Danforth & Son, Washington, Ill. She has been bred back to the same horse.

Mart Demarest will not have Prince Alert 1:59½ this season. The owner of the hopped champion has not at this writing decided as to who will drive the gelding this summer, though the wise ones are guessing that Jack Curry will be the man.

Zelica, the dam of Dan Patch 1:56½, last week foaled an own brother to the light harness champion by Joe Patchen 2:01½, at Parkway Farm, Goshen, N. Y. It is said that Dan A. Messner of Oxford, Ind., who bred Dan and owns the new-born colt, has been offered \$5000 for the foal.

Frank Turner will not campaign a stable this year. With his idleness there comes a break in a chain so well known by New York and Eastern horsemen. For thirty years and more John E. Turner of Philadelphia or his son have been prominent in harness racing, and have never missed a season.

The bay stallion Acolyte was recently sold in Philadelphia for \$400, just one per cent of the price which the famous Jacob S. Coxey bought him for.

With Angle, The Monk, Anzella and Prince of Orange for the fast classes at the Glenville matinees, some contests worth witnessing should take place.

The speed perpetuating ability of stallions differs greatly, even among horses belonging to the same family, says the *Horse Breeder*. Rysdyk's Hambletonian greatly surpassed any other stallion of his day in this respect. He was undoubtedly the most prolific sire that ever did service in America, and probably got a greater number of foals (1333) than any other sire that ever lived.

In the list of champions, Goldsmith Maid 2:14, St. Julian 2:11½, Jay-Eye-See 2:10, Maud S. 2:08½, Sunol 2:08½ and Nancy Hanks 2:04 were the off-spring of Hambletonian's sons, and Nancy Hanks was by a son of Hambletonian and out of a mare that was by a son of Hambletonian.

The colt trotters, or, in other words, the natural trotters that are seen today are almost invariably sired by fast, young and good looking stallions, proving conclusively that the sires of today are superior to those of the past decade, and that the way to breed trotters is by using only those animals that combine breeding, individuality and speed.

A dispatch from Lexington, Ky., says: Senator Joseph W. Bailey, of Texas, has tendered his resignation to President Estill as a member of the Board of Directors of the Kentucky Trotting Horse Breeders Association. The resignation goes into effect at once. The letter containing the resignation and the reasons therefor were received by President Estill today. One week ago Senator Bailey came to Lexington from Washington to attend a called meeting of the board, but a quorum could not be obtained and Bailey returned, disappointed with having made such a long trip for nothing. The reasons given are as follows:

"I received your telegram today stating that no quorum appeared at the Directors' meeting called this morning. I have never believed it a wise policy for the association to elect Directors who could not reasonably expect to attend the meetings of the board and the fact that you have failed to obtain a quorum at the last three meetings which you have called confirms me in that opinion. A Director of any corporation ought to perform the duties which that position devolves upon him, and I am unwilling to continue as a member of the board when I neither have the time to consider the matters coming before it or even to attend its meetings."

Senator Bailey is the largest individual stockholder in the association, and his withdrawal from participation in its management will be regretted by its friends and patrons.

It is announced that Mrs. Mary I. Laskey of Chelsea has sued Alfred P. Vialle, Edward H. Pennell of Medford and Edward D. Vialle of Brockton for \$50,000 damages, on the ground that her husband, who died not long since from glanders, contracted the disease while working for Vialle and Pennell. The action was filed on the 16th inst in the East Cambridge court. Mrs. Laskey is administratrix of her husband's estate. The defendants claim that Mr. Laskey's death was due to other causes than glanders. The result of the trial will be of interest to those who employ men to care for horses.

The Questor 2:11½, by Mambrino-King, is regarded as a 2:08 trotter by the Memphis rail birds.

Billy Buck 2:07½, in his work at Louisville, shows no trace of the lameness which handicapped him the latter part of last season.

The *American Horse Breeder* of Boston says: Eastern horsemen are pleased to know that Ed. Mills, formerly of this city, is doing a good business in California with the stallions Searchlight 2:03½ and Lecco 2:09½. Mr. Mills is an excellent judge of light harness stock. He at one time had charge of the champion pacer, Star Pointer 1:59½, and also of the handsome stallion Guinette 2:05. Report says that Mr. Mills now has in his stable a couple of green trotters that promise to develop into Grand Circuit material. The youngsters by Searchlight 2:03½ are regarded as very promising by California horsemen.

Breeding the heavy harness horse was the topic selected for discussion at a meeting of the New York Farmers recently at the Metropolitan Club, New York City. F. M. Ware, secretary of the Newport Horsheshow, and Henry Fairfax, of Virginia, were the principal speakers. The former made a strong plea for the trotting-bred carriage horse, expressing the opinion, and citing market and show ring records to prove, that no foreign breed could equal the native high steppers for beauty and utility. Mr. Ware drew the attention of the millionaire horse fanciers whom he addressed to the wholesale destruction of trotting-bred stallions of this stamp for market purposes, and said that through failure to appreciate them and also through lack of interest in breeding the most valuable type of heavy harness horse in the world was being rapidly exterminated.

Orange Blossom 2:26½, who has been noted for some time past as the oldest living sire, is dead, having passed away about two weeks ago at the farm of his long time owner, Hart B. Holton, of Powhatan, Baltimore county, Maryland. Orange Blossom was foaled in 1867, hence was 37 years old, or three years older than were Volunteer and Harry Clay at the time of their death, they having attained the greatest age of any prominent trotting progenitors of the past. Orange Blossom was bred by D. B. Irwin, of Middletown, Orange county, N. Y., and was a son of Middletown (one of the well known sons of Hambletonian 10, who himself attained the great age of 31), dam Nelly Post (dam also of Orange Bud 2:21½), by Seely's American Star, making him also, in all probability, the last performer out of a Star mare to die. He was sold to Virginia early and passed the rest of his long life there and in Maryland. Considering the fact that he was never located in what might be termed a trotting region, or where trotting breeding was carried on except in a very circumscribed way, he showed himself an excellent sire, being credited with 13 standard trotters, including two trotters of decided class, Orange Chief 2:12½, and Mike 2:15, with two producing sons and three producing daughters. He sired Orange Chief 2:1½ when 19 and Mike 2:15 when 23. Orange Blossom himself had quite a turf career. "Chester's Records" show that he started in 16 races and won 10, being also second three times. The majority of his starts were over Maryland and Virginia half-mile tracks, but his record 2:26½ was made at Hartford, Conn., in 1875.

There is a green trotter at Jewett's covered track that has been a trial mile in 2:12½, sired by Axtell, dam by Hambletonian Wilkes, that some doctor can afford to experiment upon. The handsome gelding has a cancer in his right eye and may have to be destroyed. He stepped an eighth of a mile two weeks ago in 15½ seconds, and he is sound as a dollar, excepting the cancer. If any person can cure a cancer, here's a \$5000 prospect for practically nothing.

Among the 224 bills passed by the Iowa Legislature which adjourned recently was that forbidding the docking of horses' tails. Fine or imprisonment or both are provided as penalty for infraction of the law.

A Good Test.

There is many a man who goes into the horse breeding business with the idea that he will make a million out of it within a few years. Mr. J. H. Burns, a correspondent of the *Country Gentleman* gives the following rule by which a man can learn whether he is a horseman or not. Mr. Burns divides horsemen into two classes—the genius and the clodhopper. He says:

"Start out in the country some Monday morning with a fairly good horse—an Arab will do—and trade every chance you get. If, along about Saturday afternoon, a solitary horseman on foot can be seen nearing his starting point, having left his horse remnant at some convenient rest cure on the way, then you can make up your mind that you are properly in the clodhopper class and should not attempt to trot outside your record. If, on the other hand, you come prancing down the pike with a better horse than you started with, a lot of boot money in your pocket and perhaps a colt or two tied to the tail-board of your wagon, than you may fairly conclude you have found your true vocation and may at once commence laying the foundations of great wealth."

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Trotting, Gaiting and Balancing.

(Paper read before the members of the Chicago Veterinary Society by O. E. Dyson, M. D. C., Chief Inspector, Bureau of Animal Industry, Union Stock Yards, Chicago.)

My object in presenting the subject of shoeing, and incidentally that of gaiting and balancing fast trotters, pacers and ordinary road horses, is to remind the members of this association that an important branch of the profession has been neglected to such an extent in the past that the owner of a knee-knocking, forging, interfering or scalping horse seldom appeals to the veterinarian for assistance. Lucrative fees are thereby overlooked, and the horse, perhaps a prize, or at least a serviceable animal, is sacrificed, or even worse, allowed to pass from good hands to a cheap owner, whose only object is to pound so much work out of every horse, regardless of the pain and torture endured. From a humanitarian standpoint the veterinarian should at least have a knowledge of the art of shoeing for the purpose of correcting or overcoming faulty gaits, rather than leaving the animal to the tender mercies of the blacksmith, who, nine times out of ten, is only interested to the extent of the price of shoeing.

The natural gaits of a horse are the walk, trot, pace and gallop. Without attempting to describe the acquired or saddle gaits, the running-walk, fox-trot, single-foot and canter may be referred to as accomplishments and the result of education.

Imperfections in the above-mentioned gaits are due to many natural causes, such as lack of education, faulty conformation or abnormalities and from acquired causes, such as improper temperament, excessive or non-development of certain voluntary muscles involved in the act of locomotion, or they may be due to ignorance of the owner or blacksmith as to the adaptability of the animal and the proper method of shoeing for the purpose intended.

While not posing as an authority on shoeing, I have as the result of my observation and experience during the past twenty years associated a few facts in regard to the development of speed, with the art of horseshoeing, or what might more properly be termed the art of shoeing and the phenomena of speed development.

The first principle necessary to observe with the object of having a perfectly gaited horse, is to study the individual and associate such facts as regards conformation and general makeup, with his way of going as ordinarily shod, at a clip which is intended to be utilized. The next step to be considered, and the one which should govern the proper method of shoeing, is the horse's temperament. The horse should always be shod according to the dimensions of his mental caliber.

Shoeing cannot in all instances, however, be made a panacea for correcting faulty gaits of horses. Intelligent biting and driving must not be overlooked, especially if the animal is of a high-strung nervous temperament, and in some instances, owing to a lack of mental co-ordination, the desired result cannot be accomplished by either shoeing or biting. Resort must then be made to mechanical means, by use of hoppers.

Bits and checks may also be included among the mechanical means of gaiting and balancing horses, and frequently take the place of considerable weight which would otherwise be necessary to add to or take from the shoe in order to accomplish the purpose.

A good driver should, through the agency of bit and rein, be able to transmit motor impulses originating in his own brain to the horse. A poor driver, on the other hand, is not only unable to transmit such impulse, but constantly interrupts the natural motor impulses originating in the brain of the horse, thereby frequently causing a good-gaited horse to become addicted to the habit of inco-ordination, with its attending results. You have all no doubt witnessed the disastrous results of placing a good-gaited horse in a poor driver's hands.

Interfering is probably the most constant source of annoyance. In front it is usually due to faulty conformation, involving the chest or forequarter. The thoroughbred type may be cited as confirmed interferers, geldings, owing to early castration, being particularly predisposed. With this type of a horse interfering is usually due directly to the fact that he is narrow chested, and good action is seldom associated with this type, as a large majority are stiff-kneed, owing to a lack of natural muscular development. Contrast the above type with a stag or stallion and note the difference in conformation, style and action.

Calf-kneed horses, unless heavy in the chest, with legs set well apart, are apt to be troublesome. The same may be said of horses with straight pasterns. Low headed and sluggish horses might also be placed in this class. Horses that toe out are notorious, and can invariably be placed in the interfering and knee-knocking class, unless they happen to be of a draft horse type, with legs set well apart. Pacers seem to

he particularly prone to this malformation, and a pair of knee-hoots must accompany every trotter or pacer that possesses a three-minute clip, if he stands toed out. In this connection it may be added that pigeon-toed horses never interfere or hit their knees.

Interfering behind is so common that no class or type of horse can be excepted, as the fault arises from causes too numerous to mention. First of all, narrow, drooping-hipped, low-going trotters are the worst offenders. On the contrary, paces seldom if ever interfere, except in walking or going slow. Green horses are apt to interfere during the first six months of their city life, as it requires at least a period of that length to overcome such predisposing causes as walking in a narrow furrow during the early spring work on the farm, and later in the season perhaps doing more or less travel over country roads, where a wide-gaited horse finds it very tiresome to cover a distance of a few miles with one foot in a rut and the other upon a ridge.

In substantiation of the theories expressed regarding the farm horse, it may be said that trotting-bred colts, notwithstanding manifest predisposition owing to conformation, seldom interfere after a season's work at the track, owing entirely to a uniform development of their muscular system, and an intelligent method of shoeing with an object of overcoming such defects, whether natural or acquired.

Knee-knockers may ordinarily be placed in two distinct classes. First the high-going horse that toes out, the second, the low-going, narrow-chested trotter or pacer with speed. Beware of the latter, as he will also, in all probability, interfere when going slow.

Forging, scalping and shin-hitting are the direct causes of hitching behind, and can usually be associated with trotters, owing to their inability to properly extend themselves in front. This condition applies particularly to a class of horses with extensor flexor muscles equally developed behind, and comparatively high, full action, straight or otherwise, in contrast to a dwelling, forward movement of the fore feet, complicated by a lateral twisting or turning of the foot, or leg, either in or out, due to the non-development of the extensor muscles of the anterior limb. Line-pacers will frequently brush their hind coronet hard enough to cause them to hitch or roll in their efforts to avoid the contact, which seriously interferes with the development of speed.

Horses that carry a high head on account of tender mouths are frequently addicted to the habit of interfering with the coronary band behind, owing to the fact their attention is concentrated on the mouth. Here it is plain to be seen that the reflex motor impulses in excess cause a high free action in front at the expense of their hind action. When proper hitting fails in such cases it is often necessary to use a shoe much heavier behind than in front, in order to overcome or counterbalance the reflected motor impulses. On the other hand pullers and luggers are frequently the result of a lack of requisite amount of weight in the front shoes or an excessive weight in the hind shoes necessary to balance the brain.

Hitting the elbows is due to over-development of the flexor muscles and in order to overcome the fault it has been found necessary to develop the extensors by use of toe-weights. In many instances, however, it will be found necessary to let the heels grow high in order to lessen the tension upon the flexor muscles. This will to some extent retard flexion until momentum has carried the body past the centre of gravity or the point where flexion ceases and extension begins. That is, the object should be to intercept the act of flexion before it is completed and hasten the act of extension. In case the offender has long toes it may be necessary to shorten them or to add a small toe-calk to the shoe, which in many instances will suffice without the addition of the toe-weights.

Anticipating the question, "How is a person to know when the horse is properly gaited and balanced?" I can only answer by saying that it depends entirely upon the judgment of the driver, or the person superintending the shoeing. Mention might be made of a few cardinal points however. For instance, any man, unless he be devoid of sensation, may observe when a horse driven on a level road gives him the sensation of driving on a down grade that horse needs a weight to develop his extensions in front. On the other hand, should he seem to be ascending or climbing a grade, the reverse is true, and the remedy would be to lessen the weight in front and increase it behind. You should always be able to drive a well balanced horse without a check, and not experience the sensations mentioned.

The wonderful speed attained by trotters and pacers during the past few years has, without question, been solely due to the development of brain and nerve, of which an inherited trotting or pacing instinct is a result in the progeny of developed sires and dams. In proof of this fact reference might be made to the thoroughbred, whose development by contrast would

seem insignificant, and may be accounted for by the fact that the system of shoeing and training now in vogue was in use twenty years ago, brain and nerve development having been almost wholly confined to the jockey and trainer and the natural results of heredity.

A normally developed brain and nervous system will invariably reflect the physical condition. On the other hand, the physical condition will reflect an abnormality. Most of the world's records in tests of speed and endurance are held by stallions, by mere force of predominating will power. "Conditioning the brain" should therefore be used in lieu of the familiar term "legging him up," as expressed by horsemen when preparing a horse to carry his speed and go the route.

In shoeing horses to obviate or overcome a faulty conformation or gait it must be remembered that in the beginning of the stride the foot leaves the ground from the point farthest from the median line or center of gravity, and the greatest muscular efforts in flexing the limb from that point are confined to the muscles farthest removed. For example—in a horse that toes out the abductor muscles that assist in the act of flexion are highly developed in comparison with the adductors involved in the act. Consequently the foot, during its elevation, is in such a position as to cause it to describe the arc of a circle during the act of extension, thereby bringing it in contact with the ankle, shin or knee, depending of course upon the height of flexion. The same is true with a pigeon-toed horse, except that the arc of the circle described is that of adduction; consequently there is never any interference with the opposite member. In either case, however, there is apt to be considerable interference with the forward movement of the hind foot or leg while partly extended, and at that time the act of forging, shin hitting, scalping or grabbing the quarter occurs with trotters. With pacers only the act of adduction of the forefoot causes any interference with the forward movement of the opposite hind foot, the usual result of which is grabbing the quarter or brushing the hind coronet.

It would be impossible to form set rules for shoeing in order to overcome defects in gait, either natural, owing to conformation, predisposition and temperament, or acquired, as heretofore mentioned. A safe rule to follow, however, is to ascertain the cause and overcome it by mental balance or physical development.

In this connection I have no hesitancy in saying that too much attention has been given to the foot and apparently no notice taken by the average horse owner or blacksmith of the fact that a horse is possessed of a brain, which controls all voluntary movements, and that too much emphasis cannot be placed upon the fact that the highest nerve centers have been in the ordinary process of mechanical shoeing, habitually subordinated to inferior, or pedal extremities.

A term which fully expressed my theory of horse shoeing is "Shoe for the purpose of balancing the brain," or in other words for the purpose of physical development, the establishment and maintenance of perfect co-ordination between the brain and voluntary muscular system involved in the development of a natural or acquired gait, rather than a purely mechanical standpoint. When you have succeeded in doing this you may depend upon the rest of the animal economy to work in unison, and rapid progress can then be made in the development of an ideal road horse or of prospective speed. It might be well, however, to mention the use of hobbles as the only successful mechanical means of overcoming inco-ordination of motor impulses in trotters or pacers, when physical and mental development go hand in hand, note the scarcity of hobbled horses to-day in comparison with a few years ago, when the system of development and training was simply mechanical.

Motor impulses are always the result of stimuli originating by direct or reflex action upon the sensory nerves, and transmitted to the brain for the purpose of elaboration and direction. Thus we find that voluntary muscles to which motor impulses are directed in excess of other muscles, develop accordingly, or according to their use or disuse. As mental and physical development in all instances is directly responsible for the perfection of the gait of a sound horse, and being directly subject to the will of man, through education, it is plain to be seen that the effect of increasing or diminishing the weight in the shoe, or changing the angle of the foot, and consequently the position of the limb, will be communicated to the brain and transformed into motor impulses, and the desired effect, that of development of the muscles necessary to overcome the original defect, will be accomplished.

The greatest difficulty encountered in shoeing horses for the purpose of galloping or balancing is to be able to convince the owner that instantaneous results

cannot be accomplished. It is impossible to immediately overcome excessive or non-development, either physical or functional, by merely changing the angle of the foot, the weight or shape of the shoes.

The following are a few of the common points to be observed before attempting to direct the shoeing of a horse to prevent interfering, or to overcome a faulty gait:

First note the general conformation and posture of the feet and legs with reference to their anatomical relations, while standing in a natural position. By standing in front of the animal and drawing an imaginary line from the upper portion of the leg to the point of the toe, any abnormality such as toeing out or in can be readily discerned.

Change your position and note the pastern with reference to its straightness or obliquity. A slight springing or tendency toward being calf-kneed may also be noted at this time.

Pick up each foot and carefully note how each shoe has been worn, their approximate weight and length of service, and make a careful inquiry of the driver as regards the horse's disposition and driving qualities. Also observe the kind of hit and check used.

Then have the horse driven over a smooth pavement, directly in front of you for a short distance and returned in the same manner, at a clip ordinarily required or generally utilized. From this position it is easy to note the carriage of the foot or limb during the progress of the stride. After viewing the horse from this position, both at rest and in motion, step back a few paces, have him driven past you several times in order that you may carefully note the height of flexion and the act of extension, either of which may be primary cause of interference or faulty gait, and possibly as easily remedied as seen.

During this exercise every movement of the animal must be noted, and especially that of the offending foot or limb as regards its relation to the rest of the animal economy.

THE DON'TS.

Never examine a harness horse to halter, or one kept for saddling purposes in harness.

Don't pass final judgment on a high-spirited horse fresh from the stable, or one thoroughly tired out.

Don't fail to size up the owner or driver and draw your own deduction from their statements, substantiated by your own observations of the horse.

Directum Kelly 2:08 1-4.

Youngsters by Directum Kelly 2:08½ are showing wonderful speed out in California. It is announced that a three-year-old filly by him, dam a daughter of Baron Wilkes 2:18, has already shown a quarter in 31½ and the last eighth in 14½ seconds. This calls to mind the fact that the pedigree of Directum Kelly shows several quite close crosses of the best of thoroughbred blood.

His sire Direct 2:05½ was by Director 2:17, that inherited a good share of warm blood through old Clara, the dam of his sire, Dictator, and also through Fanny, the dam of old Dolly. Nance, that produced Fanny, the dam of Dolly, was by Saxe Welmer, a thoroughbred son of Sir Archy. The dam of Ben Franklin, sire of Fanny, was also from a mare whose dam was by Saxe Welmer. The second dam of Direct 2:05½, the sire of Directum Kelly 2:08½, was by Jack Hawkins, a thoroughbred son of Boston.

The dam of Directum Kelly 2:08½ was Rose Ludwig by Anteeo 2:16½. The dam of Anteeo was by A. W. Richmond, a son of the registered thoroughbred, Simpson's Blackbird, and his second dam was the thoroughbred Columbia. The second dam of Directum Kelly was by Limerick Boy, a thoroughbred son of Ringgold by Boston.

That is mixing the thoroughbred in pretty strongly, but we like it, and as Directum Kelly is the fastest trotter that Direct 2:05½ has yet got, it evidently did not injure his trotting ability. Judging from the way his youngsters are showing up the copious infusions of thoroughbred blood that he carries is not distracting from the ability of this fast game son of Direct to transmit light harness speed of a very high order.—*American Horse Breeder.*

The Historic Way.

Many see Indian pueblos from the windows of the "California Limited," but few realize that they are centuries old. Through New Mexico, Colorado and Kansas, where now speed the Santa Fe trains, once roamed Kit Carson the Scout, with many another harder hero.

If interested in going to the World's Fair the Historic Way, ask about the Santa Fe at 641 Market street, San Francisco.

There are twenty-two entries in the Juvenile Stake offered by the Oregon State Fair for two-year-olds to trot this year, and eight of them are by Zomhro 2:11.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Colusa Tournament.

Under the auspices of the Colusa Inanimate Target Club the most successful blue rock tournament ever held in northern California took place on the 23d and 24th insts. The entire management of the affair was assumed by Mr. Gion W. Gibson, who received much praise from the participating sportsmen for the clever and hospitable manner in which the shoot was conducted.

The tournament was open to northern California shooters only. A number of visitors were present, who participated for birds only, among those from this city were: M. O. Feudner of Clabrough, Golcher & Co.; E. E. Drake and W. S. Wattles representing the U. M. C. Co.; F. C. Reed, Selby Smeiting and Land Company; W. H. Seaver, Winchester Repeating Arms Co., and others. On Sunday evening the sportsmen were entertained at a banquet tendered by Mr. Gibson at the Golden Eagle Hotel, Colusa.

In the words of one of the visitors, "This tournament was one of the best conducted and arranged tournaments ever given in Northern California and much praise and credit is due Gion Gibson for the manner in which the same was conducted—in a nice, clean, genuine sportsmanlike manner."

The high average for the two days' shoot was made by W. H. Seaver who broke 312 out of a possible 340 targets shot at. Mr. Seaver, being a manufacturer's agent, did not compete for prizes. The high average gold medal donated by Mr. Gion Gibson, was awarded to George Johnson of Chico, who broke 302 targets out of a possible 340. James E. Haugh of Gridley, won second high average prize, a handsome gun case, he broke 295 out of 340. William Ash Jr., of Williams, won the low average by breaking 276 out of the 340. His prize was two and one-half kegs of Ruhstaller's famous Gilt Edge beer—the best on earth.

On the first day 36 shooters participated; on Sunday 56 men faced the traps.

Following is the different events, purses and winners. All events were shot at twenty targets:

First day—Event No. 1, purse \$20; 1st money \$10; 18 breaks; George Johnson, T. Ajax. 2nd money, \$6; 17; C. Frank, Humble, Haugh, Porter. 3rd money, \$4; 16; F. Burgi, George Mellor, Thomas Rutledge.

Event No. 2, purse \$28.50; 1st money, \$14.25; 20; Frank, Humble, Mellor. 2nd money, \$8.50; 19; H. Davis, J. H. Porter. 3rd money, \$5.70; 18; Newbert, Johnson.

Event No. 3, purse \$36; 1st money, \$18; 20; 2nd money, \$10.80; Ajax, Rutledge; 3rd money, \$7.20; 18; Ahlf, Humble, Haugh.

Event No. 4, purse \$35; 1st money, \$17.50; 20; Gion W. Gibson; 2nd money, \$10.50; 19; Frank. 3rd money, \$6; 18; Newbert, Davis, Johnson, Phillips.

Event No. 5, Kimball & Upson medal. This medal was won by Gion W. Gibson with 20 straight breaks. Mr. G. A. Johnson, of Chico, was second with 18. Mr. Johnson won this prize last season. The medal must be won three times by the same person before it becomes his personal property.

Event No. 6, purse \$24; 1st money, \$12; 19; Johnson, Frank, Burgi. 2nd money, \$7.20; 18; Ajax, Davis, Humble, Haugh. 3rd money, \$4.80; 17; Phillips, Ash, Thornbrough, Gibson.

Event No. 7, purse \$39; 1st money, \$19.50; 20; G. A. Johnson. 2nd money, \$11.70; 19; Frank, Haugh. 3rd money, \$7.75; 17; Newbert, Davis, Ash, Burgi, Gibson.

Event No. 8, purse \$30; 1st money, \$15; 19; Davis, Burgi, Ajax, Gibson. 2nd money, \$9; 18; Johnson, Frank, Humble, Haugh. 3rd money, \$6; 17; Newbert, Phillips.

Event No. 9, purse \$27; 1st money, \$13.50; 18; Newbert, Davis, Haugh, Gibson. 2nd money, \$9.10; 17; Johnson, Ash, Thornbrough. 3rd money, \$5.40; 16; Phillips, Frank, Ahlf, Mellor.

Event No. 10, merchandise shoot, class 1—1st prize, F. Ruhstaller; 2nd prize, gun case by Clabrough, Golcher & Company, G. A. Johnson. Class 2—1st prize, William Ash; 2nd prize, 125 loaded shells by California Powder Works, Bolt. Class 3—1st prize, Charley Frank; 2nd prize, 125 shells by California Powder Works, Dutch Humble. Class 4—1st prize, Mr. Guggenheim; 2nd prize, F. Burgi. Class 5—1st prize, M. E. Phillips; 2nd prize, H. Davis. Class 6—1st prize, A. Ahlf; 2nd prize, George Mellor. Class 7—1st prize, Corduroy hunting coat by Kimball & Upson. Grieve; 2nd prize, D. Smith. Class 8—1st prize, Leonhart; 2nd prize, J. H. Porter. Class 9—1st prize, H. M. Albery; 2nd prize, L. E. Moulton. Class 10—1st prize, M. Binder.

Second day—Event No. 1, purse \$41; 1st money, \$20.40; 20; Shaw, Davis, Johnson. 2nd money, \$12.40; 19; Grieve, Ajax, Burgi, Haugh. 3rd money, \$8.20; 18; Fissell, Guggenheim, Frank Gibson.

Event No. 2, purse \$44; 1st money, \$22; 20; F. Ruhstaller. 2nd money, \$13.20; 19; Johnson, Humble. 3rd money, \$8.80; 18; Grieve, Fissell, Newbert, Davis.

Event No. 3, purse \$45; 1st money, \$22.50; 20; F. Newbert; 2nd money, \$13.60; 19; Haugh, Ajax, Humble, Rutledge. 3rd money, \$9; 18; Spellman, Davis, Johnson, Biley, J. C. Giblin.

Event 4, The Gibson cup, donated by Gion W. Gibson; shot for at doubles, 10 pairs; winner to hold cup until next tournament; cup to be won three times to become permanent property. This cup was won by Mr. Frank Ruhstaller of Sacramento, who broke 16 out of 20. 2nd money, \$16.20; 15; Humble, Ash. 3rd money, \$16.80; 14; Newbert, Giblin.

Event No. 5, purse \$54; 1st money, \$27; 19; Haugh, Giblin. 2nd money, \$16.20; 18; Guggenheim, Ruhstaller, Newbert, Entrican. 3rd money, \$10.80; 17; Ash, Humble, Johnson, Davis, Fissell, Grieve.

Event No. 6, purse \$34; medal for championship of Northern California—Won by James E. Haugh of Gridley, who broke 18 out of 20 birds. Dutch Humble was the former champion.

Event No. 7, purse \$37.50; 1st money, \$18.80; 19; Davis, Burgi, Haugh, Bolt. 2nd money, \$11.25; 18; T. Ajax. 3rd money, \$7.50; 17; Ruhstaller, Newbert, Humble, Phillips, Gibson, Thornbrough.

Event No. 8, purse \$28; 1st money, \$14; 20; Davis, Burgi. 2nd money, \$8.40; 18; Ruhstaller, Johnson, Ajax, Brock. 3rd money, \$11.55; 17; Haugh, Ash, Gibson.

Event No. 9, merchandise shoot, class No. 1—1st prize, case Selby loaded shells, G. Johnson; 2nd prize, revolver by Clabrough, Golcher & Co., J. Wehber. Class No. 2—1st prize, F. Newbert; 2nd prize, 125 C. P. W. shells by California Powder Company, Charles Frank. Class 3—1st prize, single barrel shotgun, H. Davis; 2nd prize, 125 C. P. W. shells by California Powder Company, F. Burgi. Class 4—1st prize, J. E. Haugh; 2nd prize, Weis. Class 5—1st prize, one 10-pound drum "Infallible" by G. W. Tibbets, M. E. Phillips; 2nd prize, G. Gibson. Class 6—1st prize, C. Gilmour; 2nd prize, Ash. Class 7—1st prize, Brock; 2nd prize, J. H. Porter. Class 8—1st prize, Charles Burtis; 2nd prize, Messick. Class 9—1st prize, F. Wallace; 2nd prize, Mr. Peacock. Class 10—1st prize, Thomas Rutledge.

Event No. 10, team shoot at 90 targets (15 targets per man) for championship of Northern California—Teams of six men each were entered as follows: Willows, Williams, Gridley and Colusa.

The Colusa team won by breaking 74 out of the 90, as follows: C. R. Gilmour 15, Charles Burtis 13, Phillips 12, Frank 12, Binder 11, Moulton 11. The other teams broke 73 each.

The following gentlemen shot in every event during the entire two days' shoot, and at a total of 340 targets scored as follows: W. H. Seaver 312, G. A. Johnson 302, J. E. Haugh 295, Dutch Humble 293, F. Newbert 287, H. Davis 287, R. C. Reed 287, Thomas Ajax 287, F. Burgi 281, William Ash 276.

AT THE TRAPS.

The California Wing Club shoot for May is the card at Ingleside trap grounds tomorrow.

The College City Gun Club shoot billed for tomorrow has been postponed. The date for the regular club shoot and a 12 men team shoot with the Empire Gun Club will be announced later.

The Hercules Gun Club and visiting shooters shot live birds at Pinole last Sunday. W. J. Golcher was high gun for the day. In each of the regular events distance handicaps prevailed. In the first 6-bird pool the winners were Shields, Haight, Moore, Murdock and Robinson. Following, a 12-bird match, first money was divided by Golcher, Karney and Robinson. Sylvester, Haight, Shields and Moore divided the balance of the purse. In the third event, at 6 birds, Haight, Nauman, Bekeart, Golcher and Moore won first money with straight scores; Karney, Dr. Hutton, Sylvester, Kincannon and Robinson, with 5 birds each, won second moneys. The final event, also at 6 birds, was won by Karney, Moore and Shields for first money. Nauman, Turner, Birmingham, Golcher, Haight and Hansen won second money. Weather conditions were favorable and the birds supplied strong and lively. The scores made follow:

Shields	25 yds—23212-6	Hansen	29 yds—22202-5
Haight	25 " 21212-6	Nauman	32 " 11212-5
Moore	26 " 23212-6	Lewis	30 " 22302-4
Murdock	30 " 12121-6	Smith	26 " 02112-3
Robinson	26 " 22112-6	Huber	26 " 01130-3
B. ysen	26 " 22111-6	Lowry	25 " 19101-3
Birmingham	28 " 12102-5	Tanner	28 " 02200-1
Kincannon	29 " 01212-5	Sylvester	30 " 0000-0

Shields	25 yds—23212-6	Hansen	29 yds—22202-5
Haight	25 " 21212-6	Nauman	32 " 11212-5
Moore	26 " 23212-6	Lewis	30 " 22302-4
Murdock	30 " 12121-6	Smith	26 " 02112-3

is the following: Event 1, 20 targets, cash prize \$20. Event 2, 20 targets, purse \$50. Event 3, 20 targets, added money \$40. Event 4, Merchandise shoot, 10 classes. The shoot will begin at 10:30 A. M. on the picnic grounds at Palermo. Pool shooting, added money, will conclude the shoot after the regular events are over.

At the Oroville Gun Club shoot on the 17th inst. U. M. Damon won the medal in the club shoot at 25 targets. The scores were: Damon 21, King 21, Derby 21, Smith 21, Woodman 20, Roberts 19, Johnson 18, Schneider 17, Godfrey 17, Orr 16, Reece 15, Hansen 14, Sexton 12. Damon won out on the tie shoot off. In a 25 target race the scores were: Damon 24, Hansen 24, Derby 23, King 23, Johnson 23, Roberts 3, Orr 21, Woodman 20, Schneider 19.

The sixteenth semi-annual blue rock tournament of the Los Angeles Gun Club is to be held on the club trap grounds May 6th, 7th and 8th. There will be \$500 in added money and also medals and trophies. The Chick system will rule in money divisions. There will be cash prizes for the two high averages, the longest run and also a "sealed condition" special prize. All events will be at known traps, unknown angles. All regular events, except medal, trophy and Event 12 on the last day, to count on average. Entrance fees, unless otherwise stated, will include price of targets. The shoot is open to all, excepting the medal and trophy events, which are open to residents of Southern California only.

The program for the shoot is the following:

The present holders of the above trophies are: Individual Championship Medal—Guy Lovelace—score 47-50. Tufts Lyon Arms Co. Medal—Guy Lovelace—score 45-50. Two Men Team Championship—Witman & Vaughan—score 44-50. Five Men Team Championship—Lovelace, Breer, Smith, Blanchard, Stephens—score 109-125.

DOINGS IN DOGDOM.

Portland show report and list of awards will appear next week. The exhibition was a fine quality show and a success throughout.

Wallace W. Moore, the well known Fox Terrier fancier, has recently embarked in a new business venture, having previously disposed of his Sutter street interests, and is now located at No. 426 Montgomery street conducting a popular restaurant and coffee house. We are pleased to note that the fancy have not overlooked Mr. Moore's new establishment for there is seen there daily a coterie of the doggy experts enjoying a nice lunch, interspersed the while with "what's doin'" among the fancy.

At a meeting of delegates from Pacific Kennel League clubs held at Seattle on the 16th inst., a new kennel association, national in its scope, was organized. Eleven kennel clubs were represented—Seattle, Portland, Spokane, Vancouver, Victoria, Santa Clara Kennel Club, Sacramento, Los Angeles, Salem, California Collie Club and Pacific Collie and Old English Sheep Dog Club. The officers elected were: Julius Redelsheimer of Seattle, President; T. P. McConnell of Victoria, John J. Tulk of Vancouver, Arthur Letts of Los Angeles, Wm. Goldman of Portland and C. B. Yandell of Seattle, Vice-Presidents; Norman J. Stewart of San Jose, Secretary-Treasurer.

The new organization adopted the name of the Western Kennel League. A constitution, by-laws and rules to govern W. K. L. shows were adopted.

It is stated that the Western Dog Fanciers' Association and three other kennel clubs will also join the W. K. L.

The "Field Stud Book" has been adopted as the official stud book of the league. Among the changes in the rules adopted was the prohibition of entries in puppies classes of dogs under six months old. This is a good move. No wins other than W. K. L. will be recognized. Champions—English, A. K. C., C. K. C., or P. K. L. will be eligible to open class only.

San Jose opened on Thursday with about 200 dogs henchd. A number of entries were sent in from this city. The show has proven a great card in the Garden City.

Mr. Thos. H. Griffiths writes us from Seattle stating that the Glen Tana Collies swept everything.

Tri-colors—puppy and novice dogs Glen Tana Monk first, also second, limit and open and reserve winners. First limit, open and winners, Glen Tana Marquis, also heat Ravenswood for best Collie in the show and won several specials. In hitches—Glen Tana Black Baby (imp. Rippowam Archer—Moreton Vesta) four firsts. Sable dogs—Glen Tana Sentinel, first novice, second limit and open and reserve winners. In hitches—Glen Tana Rippowam's Bo Peep, first limit, open and winners, specials for best. Glen Tana Monk and Glen Tana Baby were sold for \$500 to a Vancouver fancier.

Los Angeles show opens next Wednesday, the 4th inst., for a four day show. The entry is a good one, there being a great revival in doggy affairs at present down South.

During the S. F. K. C. show, W. F. Mahoney's Alta Chevalier (Ch. Alta Bruce—Queen Empress) served M. Coleman's Cuha (St. Leonard—Gladys' Glover), Fately & Matthews' Lady Melba (Ch. Grand Master—Bonnie Doone) and also a bitch called Fairy Lady.

Seattle Show.

The Seattle Kennel Club's ninth annual show was a successful exhibition in every way. The bench show committee consisted of Messrs. L. B. Youngs, F. A. Pontius, C. B. Yandell, J. A. Peebles and T. N. Gilbert. There were three hundred and ninety-six entries. Medals and diplomas were given as prizes instead of cash. The show as a whole was a remarkably good one.

In a review of the show, Judge James Watson writes as follows:

There was at this show one of the best collections of dogs I have seen at any exhibition, composed of the same number of entries, and in many breeds the display was remarkably good. In English Setters there was a locally owned display which cannot be excelled in any city of the entire continent, outside of Philadelphia. Further than that there is a young Setter, bred in Seattle—Sergeant's Dut—which I consider just about, if not actually, the second best American bred bitch now being shown.

There was an Irish Setter from Vancouver which ranks, in my opinion, as the best in the country, and I do not except: St. Cloud III, the dog now being worshipped in the East.

In Pointers Woolton Bang would be "in the money" at even the New York show, while in Pointer movement—the peculiar way a Pointer swings his body—Dan Harold has hardly his equal any where.

The Chesapeake Bay dogs and Irish Water Spaniels beat anything we have East. I have never seen such Chesapeakes before. We have no Irish Water Spaniels being shown East, and there was half a dozen at the Seattle show.

Cocker Spaniels are also remarkably good, the black dog King Pluto and the parti-color puppy Betsheta being exceptionally so. The latter bred here and the former owing Eastern parentage, though born in Seattle. These two can hold their own in any company at any show in the country.

The Collie exhibit is another feature. The winning dog is so like Balmoral Baron, which I placed as best of the breed at the recent Boston show with ninety-three entries in that breed alone, that he might be his litter brother. Rippowam's Bo Peep, the best bitch, is even better than when shown in the East, and the general quality of the classes was high.

As much cannot be said for the St. Bernards, which lacked depth of muzzle, "face" as we call it, to give the necessary dignity of expression, which to some extent may be seen in His Highness and Prince Henry. This breed needs improving.

There is a Fox Terrier named Puget Speedy, bred in Seattle, that if shown under Mr. Belmont, the well known fancier, who judged at the Fox Terrier Club show held at Atlantic City, N. J., two weeks ago, would just about have won. Speedy is his style of dog exactly. Not too large and full of quality. If there was a prize for the best dog in the show Speedy would have been within hail of the cup.

Irish Terriers were more numerous than good, the inclination to run large and oversize with coarseness being possibly due to a generous climate and gener-

ous feeding of the puppies. I much regretted the non-arrival of Hecate, a very typical Irish Terrier when shown a year or two ago in the East.

Another breed which was illustrated is the Airedale Terrier, a most useful dog for such a country. The owners tell me they kill coons with them, but I claim that is Fox or Irish Terrier work; an Airedale can and will face and kill anything his own weight and that means anything up to forty or fifty pounds. They are splendid watch dogs and as well adapted to retrieving as Chesapeakes or Irish Water Spaniels, and ought to be taken hold of on the Coast. The best two dog puppies and the bitch puppies are very good ones.

I was sorry that a very nice Toy Poodle was erroneously entered as a Yorkshire Terrier, and, of course, could not be judged as such.

There was a good Building in King Commands, well worth looking at, for lots of dogs called Bulldogs are only descendants in the third or fourth generations.

These are only a few of the features as I recall them of one of the best quality shows I have had the pleasure of attending throughout my somewhat long connection with dogs and dog shows, which dates from New York, 1880.

AWARDS.

ST. BERNARDS (smooth coats)—Limit dogs—1 Joe Wood's Nero, 2 Geo. Gregory's Meior Salishury. Open dogs—1 W F Hall's His Highness, 3 E H Hayes' Rex. Winners, dogs—1 Rex. Open bitches—1 H Devet's Susie, 2 I W Miller's Judith Bedivere, 3 Mrs C C Cherry's Lady Trux. Winners, hitches—1 Susie, res Judith Bedivere.

ST. BERNARDS (rough coats)—Open dogs and hitches—1 C Hanschildt's Prince Henry, 2 F G Smelton's Chloee. Winners—1 Prince Henry.

GREAT DANES—Limit, open and winners, dogs and hitches—1 J G Morgan's Duchess of York, 2 J G Morgan's Lord Londeshorough II.

AMERICAN FOXHOUNDS—Open dogs and hitches—1 O P Behe's Queen, 2 J O Buzzard's Sing, 3 J O Buzzard's Spot.

COLLIES (tri-colors)—Puppy dogs—1 Thos S Griffith's Glen Tana Monk, 2 J Arnell's Shep, 3 A W Parkhurst's Dan Patch, res Edersen Bros' Boy Ben. Novice dogs—1 Thos S Griffith's Glen Tana Marquis, 3 Dan Patch, res Boy Ben. Limit and open dogs—1 Glen Tana Marquis, 2 Glen Tana Monk, 3 V D Mad-dock's Seattle Charlie. Winners, dogs—1 Glen Tana Marquis, res Glen Tana Monk. Puppy hitches—Thos S Griffith's Glen Tana Black Baby. Limit and winners hitches—1 Glen Tana Black Baby.

COLLIES (other than the tri-color)—Puppy dogs—1 A Murphy's Chief Hall. Novice dogs—1 Thos S Griffith's Glen Tana Sentinel, 2 Chief Hall, 3 D Steph-ney's Seattle Davie, res McIntosh & Murphy's Peace-maker Jr, v h c A Wheeler's Channing Arhusut, h c F Holland's Jack. Limit dogs—1 Arthur Letts' Ravenswood, 2 Thos S Griffith's Glen Tana Sentinel, 3 Chief Hall, res Channing Arhusut, v h c Miss J Robb Tinto's Seattle White Ralph. Open dogs—1 Ravenswood, 2 Glen Tana Sentinel, 3 Chief Hall, res Channing Arhusut. Winners dogs—1 Ravenswood, res Glen Tana Sentinel. Novice hitches—1 T Moore's Seattle Bess, 2 A W Parkhurst's Lady Lelzoe, 3 N J Stewart's Miss Conqueror. Limit bitches—1 Thos S Griffith's Rippowam's Bo Peep, 2 Seattle Bess. Open hitches—1 Rippowam's Bo Peep, 2 McIntosh and Murphy's Kildare Sunshine. Winners, hitches—1 Rippowam's Bo Peep, res Kildare Sunshine.

POINTERS—Puppy dogs—1 T Wilts' Boh, 2 J H Norton's Duke N. Limit dogs—1 C R Harold's Dan Harold, 2 L B Young's Lion's Jingo Rap. Limit dogs (over 55 pounds)—1 R M Palmer's King Sol. Open dogs (under 55 pounds)—1 F J Moore's Wool-ton Bang, 2 Dan Harold. Open dogs (over 55 pounds)—1 H F Ziegler's Minnesota Joe. Winners, dogs—1 Woolton Bang, res Dan Harold. Limit bitches (under 50 pounds)—1 J C Scott's Scott's Dot. Open bitches (under 50 pounds)—1 Scott's Dot, 2 F Prles' Lolo. Winners, bitches—1 Scott's Dot, res Lolo.

ENGLISH SETTERS—Puppy dogs—1 J W Riplinger's Stylish Sergeant II, 2 J A Forchard's Real John's Prince, 3 W H Yorker's Jack, res P Brosted's Real John's Paul. Novice dogs—1 C Donald-son's Field Marshal, 2 De M Simonson's Stylish Reno, 3 J W Riplinger's Sir Bloomfield, res Stylish Sergeant II, v h c Real John's Prince, v h c E C Grigg's Major Quinn, h c Real John's Paul, c M Mulloy's Rod's Berl. Limit dogs—1 Stylish Reno, 2 Sir Bloomfield, 3 M A Voyt's Nick's Tohe. Open dogs—1 Stylish Sergeant, 2 J D Nye's Dude Nye, 3 Nick's Tohe. Winners, dogs—1 Stylish Sergeant, res Field Marshal. Novice hitches—1 C F Young's Sergeant's Dot, 2 J E Huh-hart's Stylish Belle Bonner, 3 J W Riplinger's Premier Belle. Limit hitches—1 J W Riplinger's Ellore, 2 Sergeant's Dot, 3 J W Riplinger's Pera, res E C Grigg's Zip Kingston, v h c Premier Belle. Open hitches—1 Ellore, 2 Pera, 3 J A Peehle's Cole's Lady. Winners, hitches—1 Ellore, res Sergeant's Dot.

FIELD TRIAL CLASS—Dogs—1 A H Nelson's Touss. Bitches—1 A H Nelson's Sport's Destiny. IRISH SETTERS—Puppy dogs—1 J Wilfsohn's Jeannot. Limit dogs—1 Jeannot, 2 E Meadowcroft's Prince, 3 Mrs E E Beckatt's Ireland Doc Jr, res Mrs F W Fuller's Judge, h c O E Maurer's Dan. Open dogs—1 Jeannot, 2 W J Maloy's Kim, 3 E Heycock's Irish. Winners, dogs—1 Jeannot, res Prince. Puppy bitches—2 Miss L Wellington's Bridget Donabue. Limit hitches—1 Mrs D W Alverson's Seattle Lassie. Open hitches—1 Mrs A C Wellington's Queen, 2 Seattle Lassie, 3 H Devet's Queen. Winners, hitches—1 Mrs A C Wellington's Queen, res Seattle Lassie.

CHESAPEAKE BAY DOGS—Puppy dogs—1 P M Henry's Cyclops. Novice dogs—1 L Hanford's Keto. Open dogs—1 M McFee's Jeff, 2 J G McFee's Glendon, 3 Keto, res Mrs C B Atwell's Davie Crockett. Win-ners, dogs—1 Jeff, res Glendon. Open and winners, hitches—1 J G McFee's Peggy Maguire.

IRISH WATER SPANIELS—Novice dogs—1 E A Swift's Brannagan. Limit dogs—1 Brannagan, 2 E E Ellis' Patsey, 3 F A Pontius' Barney Sul. Open dogs—1 Brannagan, 2 Patsey, 3 Burrard Kennels' Our

Chance, res Barney Sul. Winners, dogs—1 Brannagan, res Patsey. Open and winners, bitches—1 Burrard Kennels' Burrard Rowdy Girl.

COCKER SPANIELS (black, not over 26 pounds)—Puppy dogs—1 J W Creighton's Jesmond Wonder. Novice dogs—1 R G Gamwell's Duke Royal, 2 G W Dyke's King Pluto. Open dogs—1 Duke Royal, 2 Portland Kennels' Mepals Saxon, 3 King Pluto. Winners, dogs—1 Duke Royal, res Mepals Saxon. Limit dogs—1 Dr Garesche's Victoria Tiny. Open bitches—1 Portland Kennels' Portland Zaza. Winners, bitches—1 Portland Zaza, res Victoria Tiny.

COCKER SPANIELS (solid color other than black, not over 20 pounds)—Puppy dogs—1 F E Sullivan's Sully's Pat, 2 Mrs P V Davis' Red Nugget. Novice dogs—1 Sully's Pat, 2 Red Nugget. Open dogs—1 J W Creighton's Portland Dick. Winners, dogs—1 Portland Dick, res Sully's Pat. Puppy bitches—1 Mrs C L Dudley's Auntie. Limit bitches—1 Miss M Considine's Lady Nat. Open bitches—1 Portland Kennels' Portland Twinkle, 2 J W Creighton's Jesmond Pearl. Winners, bitches—1 Portland Twinkle, res Auntie.

COCKER SPANIELS (parti-colored). Novice dogs—1 Dr A J Garesche's —, 2 Mrs A H Capwell's Chum. Limit dogs—1 Mrs C W Sharples' Ben Ora, 2 Dr Garesche's —, 3 N Beman's Boh Blackie. Open dogs—1 Portland Kennels' Portland Kid, 2 Mrs C W Sharples' Bud Zunta, 3 Bob Blackie. Winners, dogs—1 Portland Kid, res Ben Ora. Puppy bitches—1 Mrs C W Sharples' Betsheba. Novice bitches—1 Mrs J R Watkin's Muggins. Limit bitches—1 Mrs C W Sharples' Freckles. Winners, bitches—1 Betsheba, res Freckles.

JAPANESE SPANIELS—Open dogs and bitches—1 S Penschower's Medway.

BULLDOGS—Open and winners dogs—1 H M Papst's King Commando, 2 C W Ireland's Rattlin the Referee. Limit, open and winners, bitches—1 N J Stewart's Her Majesty of Charcombe.

BULL TERRIERS—Limit dogs—2 T Wright's Mose. Open and winners, dogs—1 F E Watkins' Bonnybred Silleto. Limit bitches—1 Mrs A M Rosenberg's Silkwood Jeane. Open and winners, bitches—1 F E Watkins' Newmarket Baby, 2 Silkwood Jeane.

BULL TERRIERS (other than white)—Open dogs—1 Miss M Movey's Bump, 2 R Hayter's Patrick II. 3 D W Brown's Trouble, res Virginia L Winans' Rubber, h c J Terry's Canadian Sam, h c Mrs W C Gibson's Patsey. Open bitches—1 Virginia L Winans' Clyto, 2 R Hayter's Zim.

FOX TERRIERS (smooth coated)—Puppy dogs—1 G Florence's Fitz, 3 A E Barber's Dan Patch, h c W Anderson's Earl. Novice dogs—1 Fitz, 2 W B Bailey's Warburton Tartar, 3 Bellow Kennels' Ken. Limit dogs—1 J G Morgan's Puget Speedy, 2 Ken. Open dogs—1 Puget Speedy, 2 J G Morgan's Ch Niola Daddy, 3 F G Dobson's Bar None. Winners, dogs—1 Puget Speedy, res Ch Niola Daddy. Puppy bitches—1 J Bradshaw's Woodlawn Dottie Dimple, 2 J P Saunders' Vex, 3 G Florence's Jewel, res A Murphy's Keepsake. Novice bitches—1 Jewel. Limit bitches—1 O H Smith's Queen, 2 John Bradshaw's Woodlawn Water Lily. Open bitches—1 Vex, 2 J Bradshaw's Millstream, 3 Queen. Winners, bitches—1 Woodlawn Dottie Dimple, res Vex.

FOX TERRIERS (wire-haired)—Puppy and novice dogs—1 Romilly Kennels' Romilly Blacksmith. Limit dogs—1 R Wrightson's Bolton Woods Ben, 2 Romilly Kennels' Aldon Master. Open and winners, dogs—1 Bolton Woods Ben, 2 Aldon Master. Puppy bitches—1 J Bradshaw's Woodlawn Dolly Varden. Novice, limit, open and winners, bitches—1 J G Morgan's Morenga, 2 R Wrightson's Millgate Kitty.

AIREDALE TERRIERS—Puppy dogs—1 Miss K Collins' Buster C, 2 C Bruce's Tiger, 3 L M Lessy's Nautch, res W R Hedley's Doone. Limit dogs—1 Buster C. Puppy bitches—1 B Pelly's Kloutch, 2 E A Haigler's Fanny Paddock, 3 F A Pontius' Dotesil, res Mrs J A Peebles' Mollie Bawn. Limit bitches—1 Dotesil. Open bitches—1 R M Palmer's Lady Marvel, 2 F W Gilbert's Spuds, 3 Dotesil. Winners, dogs and bitches—1 Buster C.

IRISH TERRIERS—Puppy dogs—1 Wm Ollard's Blackthorn Boy, 2 Mrs C P Curtis' Bantry Shan, 3 Mrs C P Curtis' Bantry Sherry, res O B Hess' Irish Bogwood. Limit dogs—1 Wm Ollard's Bolton Woods Despot, 3 E S Olson's Pat Hess, h c C B Smith's Bantry Banaghen. Open dogs—1 Bolton Woods Despot, 2 Mrs W R Whittier's Woodlawn Irish, h c Bantry Banaghen. Winners, dogs—1 Bolton Woods Despot, res Woodlawn Irish. Puppy bitches—1 Alice Turner's Irish Palola. Limit bitches—1 Wm Ollard's Brinscall Droleen, 3 Mrs C P Curtis' Bantry Meg, h c J Lawther's Kate Kearney. Open bitches—1 Brinscall Droleen, 3 F W Gilbert's Norah, h c Kate Kearney. Winners, bitches—1.

SCOTTISH TERRIERS—Puppy, limit and open bitches—1 D McGregor's Saanich Shortcake.

MALTESE TERRIERS—Open dogs—1 T P Dutton's Tobie.

POMERANIANS—Open bitches—3 T P Dutton's Nannie.

BOSTAIL SHEEP DOGS—Limit dogs—1 Mrs Sillitoe's Grey Boy.

MISCELLANEOUS CLASS, under 25 pounds—Open bitches—3 E Carsten's Pinka (French Poodle). Over 25 pounds—Open dogs—1 G W Waller's Bruce (Scotch Staghound).

The Passing of Two Sportsmen.

After a lingering illness, a good fellow and popular sportsman, the late C. W. Debenham passed away in Oakland on the 23d inst. The interment took place on Wednesday under fraternal auspices and was attended by a large number of friends who remembered "Deb," as he was familiarly called, for his many virtues as a man and sportsman. Mr. Debenham was a welcomed participant at many trap shoots in the past fifteen years, was a skillful shooter and had numerous friends among the devotees of rod and gun.

The announcement was made last week, through advices received from Nome, of the demise on the 12th inst. of R. Lloyd Eaton, after an illness of about two months. Lloyd Eaton, as he was usually called, was up to three years ago a popular sportsman, being for a long time a prominent member of the Black Jack Gun Club. He was a son of F. W. Eaton, and prior to embarking in a prosperous business at Nome held a responsible position with the telephone company. He is survived by a widow and ten-year-old daughter, both of whom were with him at the time of their bereavement. The news of his early and unexpected death, he was only 30 years old, was a shock to a large circle of friends, among whom he was extremely well liked for his many sterling qualities and a genial disposition that won him a warm place in the esteem of his associates, both business and social.

Strikel—if they don't give you Jackson's Napoda when you ask for it.

Trade Notes.

At the Union Gun Club shoot at Ingleside, Sunday, April 10th, 43 shooters contesting, out of the 43, 39 shot U. M. C. "Magic," "Acme," "Majestic" or "Monarch" shells. The first class medal was won by D. Daniels, shooting a Remington shotgun and U. M. C. "Magic" shells. The second class medal was won by Mr. J. Scott Leary, using the U. M. C. "Magic" shells.

A feature of the monthly shoot of the Empire Gun Club held at Alameda Point, on Sunday, April 10th, was that all contestants used the Union Metallic Cartridge Company's "Magic" shells.

The fifth annual tournament of the Pastime Gun was held at San Diego, Cal., on Sunday, April 17th, and Saturday, April 16, '04. On the first day there were 32 contestants, 20 of whom used U. M. C. shells. On the second day of the tournament there were 37 contestants, 26 of whom used U. M. C. shells. The Jenks Trophy was won by Mr. C. B. Monaghan, using a Winchester shotgun and U. M. C. "Magic" shells. The Fano Trophy was won by Mr. F. C. Stephens, using a Remington shotgun and Selby Loaded U. M. C. "Magic" shells. The Hoegee Infallible Team Trophy was won as follows: Chas. Julian, M. Chick and F. C. Ecker, all using U. M. C. "Acme" shells. The longest straight run was made by Mr. J. A. Gibson, breaking 34 birds. The first high average was won by Mr. J. E. Vaughn. The second high average was won by Mr. F. C. Stephens, using a Remington shotgun and U. M. C. "Magic" shells, Du Pont powder and 7½ shot.

At the California Schuetzen Rifle Club shoot, held at Schuetzen park on Sunday, April 17th, there were 49 contestants, 33 of whom used U. M. C. primers. Nearly all of the contestants loaded their own shells.

Mr. Robert R. Skinner, writes Parker Bros., gun manufacturers at Meriden, that the Parker gun which he has shot many thousand times in the past few years, is today in as good condition as when it left the factory. Mr. Skinner further demonstrates the superiority of the Parker gun at the recent Ashland Gun Club meeting by scoring at 28 yards rise, in a match with Mr. J. W. Henderson, and also with R. H. Smith, 7 live birds straight, each. In club shoot at 7 live birds, Mr. Skinner made another straight score. In the target shoot Mr. Skinner scored 47 out of 50. Mr. Skinner writes Parker Bros. that the above facts bear him out in his statement that the "Old Reliable" Parker was just about right.

At the Middletown Shooting Association, Middletown, Del., Parker Bros. donated a handsome gun, which was won by Mr. Ed E. Massey, shooting the "Old Reliable" Parker of the same grade and make as the one donated. Dr. W. E. Barnard also made an excellent score, defending the Gold Challenge Medal in his usual style, shooting the "Old Reliable" Parker gun.

At Cincinnati March 26, Arthur Gambell, in the face of a strong wind, was high man, scoring 43 out of 50—an exceptional score under such circumstances. Ralph Trimble at 22 yards scored in same shoot 40 out of 50. Both gentlemen are admirers and users of the Parker gun.

At Crawfordville, Ind., Ralph Trimble also won a high average of 379 out of 430 shot at, shooting the "Old Reliable" Parker.

Again at Cincinnati, April 2, Trimble was high man with 91. In a team race, Gambell also did good shooting, breaking 47 out of 50, all of which demonstrates the reliability and effectiveness of the Parker gun.

The following letter was received by the Laffin & Rand Powder Company from Mr. John C. Hartman, of Waterloo, Iowa:

"Running out of my accustomed load, a bulk powder, I was compelled to use three boxes of shells loaded with 'Infallible' at our club shoot last Wednesday, and was agreeably surprised at the manner in which my score was raised. Have been breaking from 75 to 84% and out of 75 targets shot at with 'Infallible' loads I broke 71, smashing 49 of the last 50 shot at. I have steered clear of dense powders under the supposition that they exerted greater pressure at moment of ignition and were consequently more severe on a gun. I must confess that I have become interested and desire to know more about this powder. I understand that you issue a booklet and will be pleased to receive a copy."

Winchester goods, as usual, carried off the honors at the Colusa Inanimate Target Tournament, which was held at Colusa, Cal., on the 23rd and 24th inst. Of the 71 shooters who faced the traps at this tournament, 51 shot Winchester shells and 20 used Winchester "pump" guns. The high average of the tournament was 91.7-10%, and was made by W. H. Seaver, of San Francisco, shooting a Winchester "pump" gun and Winchester "Leader" shells. The longest straight run of consecutive breaks was made by Chas. Frank, of Colusa, with Winchester "Repeater" shells. Mr. Frank's run was 59 straight. The Northern California Championship medal was won by J. E. Haugh, of Gridley with Winchester "Leader" shells. The Gibson Cup, 10 pairs of doubles, was captured by Frank Rushtaller, of Sacramento, with a Winchester "pump" gun and Winchester "Leader" shells. The Six Man Team Trophy was captured by the Colusa team, composed of Messrs. Phillips, Frank, Moulton, Burtis, Gilmour and Bender. Five of the six men that shot in this team used the Winchester "Repeater" shell. The star squad shooting of the tournament was done by the squad composed of Messrs. Newbert, Seaver, Davis, Reed and Johnson. This squad scored 95 out of the possible 100, three different times during the shoot. Three of the five men in this squad shot Winchester "Leader" shells, and two in connection used Winchester "pump" guns.

Green Bone and Poultry Profits.

[By W. F. Adams.]

My experience with cut bone as a food for fowls extends over two years only with a flock of 100 hens. Prior to that time I had not used cut bone and my article is based on the percentage of gain in the growth, health and eggs of fowls over the two years previous, when I did not use bone; all other conditions for the four years being about the same.

My attention being called to the value of free cut bone as a food for poultry regularly twice a week, I tried to crush some hog bones as best I could and fed it to layers. The result was so satisfactory I bought a small bone cutter and began to feed green cut bone to my poultry regularly twice a week. I tried all sorts of bones and have found the hog and beef bones the best, being easier obtained and containing more of the nutritive value.

I get a soup bone of the butcher, shave off the meat (a little meat won't hurt if you intend feeding as soon as cut) and I feed the same day it is cut.

Some people make the mistake of using bones that have been boiled or lain out and sun-bleached. Some of the most essential feeding value of the bone has thus been lost, especially as feed for growing chicks. The animal, as well as the mineral, qualities of the bone is what makes it valuable. I experimented with cut chicken bone a little and fancied I saw an improvement over the other bone, but I am not sure, and even though there be, it is not convenient to get green chicken bone. Be sure that the bones used are not those of animals that have died of disease, old age or starvation. The former two are dangerous to the health of the fowls, the latter worthless. Bones of young animals are best.

For growing chickens, after two weeks old, I mix the bone meal with corn chow dampened with curd milk (water will do) so that each bird gets from a half to one teaspoonful of the bone meal, according to age.

It is an excellent bone food for the fowl and general invigorator and growth forcer.

Extra large and quick growth bone in fowls means more meat, and more meat means 7 to 10 cents per pound.

For laying hens I feed mixed as above, only that each hen gets one tablespoonful twice or three times a week, according as I think they may need an extra allowance. They need more when they are laying regularly or moulting.

The results of the bone as a feed are seen in a very few days in the renewed vigor, health and appetite, and last, but not least, egg product.

Taking every advantage gained by feeding bone—i. e., general health of flock, quick growth of broilers, increase in amount of eggs, etc., over the two years bone was not fed, I figure it—and I keep close accounts—that the profit derived is 15 per cent over the profits of the two preceding years. This 15 per cent is attributed to the bone feed and the other increase in profits was credited to the source from which they came.

Now don't feed an overdose at first, or at any time for that matter; feed regularly.

Don't expect the hens to lay two eggs daily and the young chicks to spring up in one night like mushrooms, when they are fed bone. Mix well with the other food so that each bird gets its proportionate share.

Don't expect to feed bone only. The bone is only an additional feed, a sort of tonic.

Now I am not going to go into details to explain how the bone assists—couldn't if I wanted to—only to say that the component parts of all meat bones are the

same, and the mineral part of the bone may be found in egg shells. Bone and shells must be supplied from what the fowl eats; hence we feed it to them, directly in the shape of cut bone, instead of indirectly in the shape of corn, oats, etc., etc.

If you once give fresh cut green bone a trial as a food for fowls you will never discontinue it.

Poultry Points.

Tarred paper makes a good lining for nests. Vermin do not like the smell, and stay away.

Bunches of Kafir corn make fine food, and furnish good exercise for chickens, old and young.

Don't hurry the old hen in coming off. Let her stay on the nest as long as she will remain content. It keeps the chickens warm and makes them strong.

In an experiment made by the New York Experiment Station with feeding whole or ground grain to poultry it was found that chickens fed the ground grain proved the more profitable. No difference could be seen in the healthfulness of the chicks, but those fed the ground food grew faster and made the most rapid increase in weight, and also the capons which were in each lot fed.

Mud holes in the chicken yard should be filled. Also all places which are deep enough for young chicks to get into, and not able to get out. Old post holes are death traps for them.

It is the practice of some to sell their fowls as soon as disease appears. This is not right. The merchant may lose, and the consumer may, unknowingly, eat sick chickens. Do unto others as you would be done by.

Geese do not accommodate themselves to each other and to their quarters as readily as chickens; nor do they breed as young. A gander to be effective should be two or three years old. Matings should be made early in the winter.

The Business Farmer.

[Batten's Wedge.]

Most business men fail to realize how rapidly the American farmer is getting ahead in his strife for a higher standard of business principles as applied to farming. The American farmer of to-day is as different from the farmer of twenty years ago as his son, who went to city business life at the same time, is different from the farmer now. There are reasons for the change, and it is important that advertisers using the agricultural press should clearly recognize and understand them. Perhaps the first and most potent reason is his prosperity. He has had what business men would call some good years. He has been paying off old mortgages and has had money left for improvements. Agricultural and other colleges have educated young men back to the farms to introduce new methods, to the education of the elders. In other words, the standard of intelligence of the farmer has been raised higher, proportionately, than probably any other calling.

The farmer sees more of the city, and the city man more of the farmer than formerly. Each learns something for his good, each imbibes something of the characteristics of the other. At the county fairs the big pumpkin gives way to the best pumpkin; the general utility hog to the bacon hog or the lard hog. Good roads have induced him to ride in better carriages and drive better horses. His county institute and farmers' club have done as much for his crops and pocket-book as his fertilizers. He has been imbued with his children's desire for knowledge and the rural mail deliveries have given him the opportunities of getting it, of getting the news that interests him before it is worn out, and in time to use what is useful. He has become a business man. His farm papers are his professional literature and he has them to cover all phases of farming;

whether a specialist in dairying, poultry stock or general farming, there are able papers edited for his specialty. The farmers' wives and daughters, even more progressive, are readers and educators.

Farmers' telephone exchanges are becoming well established, and thousands of our farmers never leave home nowadays with a load of produce without having first inquired by 'phone the selling price. They sell for cash (the days of barter are gone) and as they sell they buy.

How to Judge Beef Cattle.

No knowledge has greater value to the farmer than that which gives him the ability to select profitable feeding animals. The animal is a machine, and as there are great differences in different machines, so are there great differences in the efficiency of different animals. There are some beef animals that will consume corn, hay and grass and produce therefrom an unfinished carcass which will sell for five cents, live weight, on the market. There are other cattle fed on exactly the same kind of food for the same length of time that will bring from five and one-half to six cents per pound live weight. This difference is not altogether a difference of condition or fatness, but depends upon the conformation of the animal. The correct conformation which must be present in the better class of beef animals can be accurately described and can be learned by any farmer of average intelligence. The profitable feeding cattle that bring the high prices on the market all possess certain characteristics. They have a straight top line, with broad, deep bodies and short legs. If the head and legs were cut off, the remaining portion of the animal's body would resemble a box with rounded corners. Especially important evidences of good feeding ability are a clear, bright eye and broad forehead, with moderately short head and short, thick neck, a well-sprung rib, strong loins and a long, level rump. The whole animal should be smooth and evenly covered with thick flesh. A moderately large paunch on a healthy, vigorous steer, should be regarded as a desirable indication. Moderately fine bone is also an indication of a good feeding quality. On the contrary, a coarse bone with long body, large head and general appearance of coarseness is always to be considered an undesirable characteristic. Cattle possessing the desirable characteristics mentioned above will fatten more quickly and will distribute their flesh on those portions of the body where the highest-priced cuts are located. It is impossible here to give all the information one will need in applying these principles—F. B. Mumford.

Calves and Skim Milk.

The Utah Station has recently published the result of some interesting experiments in feeding skim milk to calves and pigs. The results prove that skim milk, when fed in combination with grain, makes a valuable food for hogs at any time, but particularly during the earlier stages. The calves were taken from the cows at 12 hours old. For the first 7 or 10 days they were fed the whole milk from the cow, some being fed twice and some three times a day. The milk was fed warm from the cow, and the amount given was from 16 to 18 pounds per day. When the calves were fed on whole milk it was gradually increased as they got older, till 20 to 22 pounds are fed per day, at a month old, when the calves were disposed of.

Those calves which received skim milk were fed as follows: For the first 7 to 10 days, the calf got the whole milk fresh from the cow; the skim milk was gradually substituted, till at the end of one week the calf got half skim and half whole milk. At the end of the next week the ration was three-fourths skim milk. By the time the calf was 4 to 5½ weeks old, the ration consisted of all skim milk. If

a calf did not do well, the whole milk was continued for another week or two. The amount of the milk fed was gradually increased till the calf got older. The most fed in any one day was 25 to 27 pounds. The skim milk ration was kept up until the calves were five to six months old. As they increased in age, they had what water they could drink, in addition to the milk. It is desirable to make all changes in the food of a calf gradually, so as not to derange the digestion of the calf. Separator skim milk was used, and in every instance it was fed fresh. To prevent it from souring, it was boiled, by having steam turned into it, which diluted it about 8 per cent.

As soon as the calves would eat, a little grain was given to them. Chopped grain was used, and it was fed dry, in a dry box, and not put in the milk. When the calves were 2 or 3 weeks old, a little hay was kept by them and renewed frequently; they soon learned to eat it. If the calves were troubled with the scours, a small handful of flour was stirred into the milk.

"The Principles of Horse Feeding" is a bulletin issued by the agricultural department which has been largely called for in all sections of the country. Another bulletin which has been in demand, necessitating its reprinting four times within the year, is "Breeds of Dairy Cattle." This is about a fifty page pamphlet, prepared under the direction of Major Alvord, chief of the dairy division, who is an expert on dairy cattle. Something like 150,000 of these bulletins have been distributed during the year to farmers in every part of the country. Both of these publications can be procured free by application to senators or members of congress or the secretary of agriculture.

The horse and the cow having come in for special legislative consideration at this session of Congress, the American hog waltzes to the front in a bill introduced by Mr. Scott of Kansas providing for the printing of 100,000 copies of the hog book—64,000 for the House, 32,000 for the Senate and 4,000 for the Department of Agriculture. The bill will be favorably considered. As there are 90 Senators and 333 Representatives, it can be seen how many hog books each statesman will have to help along in the campaign.

Too many forget that because the climate is mild it is necessary to shield from rains. Rainy weather, though mild, is harder on stock of any kind than dry, cold weather.

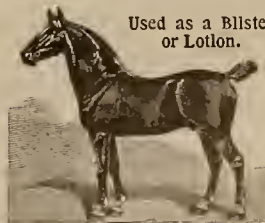

Sober up on Jackson's Napa Soda.

EFFECTUAL

The most effectual remedy in use for the cure of ailments of horses and cattle is

GOMBAULT'S CAUSTIC BALSAM

Used as a Blisters or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Shearing of World's Fair Sheep and Goat Exhibits.

A rule having an important bearing upon the shearing of sheep and goats to be exhibited at the World's Fair at St. Louis has been announced by Chief F. D. Cohurn of the Department of Live Stock, as follows:

"All sheep and goats must have been evenly, closely and properly shorn on or after the first day of April, 1904, and the date of the shearing must be certified on the application for entry. Sheep or goats unevenly or stubble shorn or that have been clipped to conceal defects or to mislead will not be allowed to compete. The judge shall disqualify for competition any sheep or goat deemed by him as having been improperly or stubble shorn or with its fleece otherwise treated for purposes of fraud or deception."

In commenting on this rule the bulletin sent out from the Live Stock Department says:

"The question of shearing in connection with the exhibition of sheep has been a vexed one at fairs and expositions for a long time. Chief Cohurn has gone into its details with a great deal of care and with the determination that the same high standard set elsewhere in the World's Fair prize list should prevail in this regard. A draft of the rule was sent to prominent breeders and authorities with request for suggestions as to the

ping vat, and the opinion is freely expressed that the oil dipping must be more or less injurious owing to the fact that it closes the pores of the skin of the animal.

Opposed, But Not Opposed.

Yes, we are "agin" the hand separator, and we are one of its best friends at one and the same time. The hand separator has been a godsend to the farmers of those districts which are less densely populated than our own Marin county and where it would be impossible for a whole milk creamery to survive. They have been the means of furnishing a commodity which can be shipped to a central churning point, and by thus being furnished a market for their product the farmers have been encouraged to go into the dairy business more or less extensively. Without a market they could not be expected to milk cows, and so could not have enjoyed its benefits. And to the farmer, even in our own county who is remote from a creamery, the hand separator and the cream wagon are most substantial benefits, bringing to his very door the same benefits which his neighbor in the next township enjoys.—E. K. Slater in *Fairmont News*.

Jackson's Napa Soda does not tangle the feet

Dictatress 2:09 1-4
Will Race in the 2:10 Pacing Classes

best form. The customs prevailing in other countries and made legitimate through climatic or other conditions, although perhaps not common with sheep breeders in the United States, have been fully taken into account. The experiences of previous fairs and the necessity of avoiding an unenforceable regulation were considered. The rule determined upon is intended to enforce only such restrictions as will secure deserved awards."

Cattle Dipping in Texas.

Mr. J. B. Goodlett, who is the State agent for the official dip adopted by the State of Texas live stock sanitary commission, speaking of the dipping in crude Texas oil that was done in his home town under federal direction, says it is a conceded fact that oil will kill the fever ticks, but he does not believe that dipping in oil will ever become general. He says while the oil may not injure the cattle, yet for the period of about two weeks it transforms them into the most disreputable looking beast that ever walked the face of the earth. In a fortnight the oil has had time to wear off.

Mr. Goodlett says cattlemen who witnessed the oil dipping at Quanah were not pleased with the appearance of the cattle after they emerged from the dip-

Get a Big Overrun.

Professor G. L. McKay in his address to the Minnesota Dairymen's association brought up anew the vital point of overrun, on which the Iowa dairy school has been placing so much stress for a year or more. It is most important, and we are advised, says *Creamery Journal*, that the so called centralizing plants have a distinct advantage over the ordinary co-operative creamery in that the managers demand daily statements from their buttermakers and require that the overrun be ample. We know that thousands and thousands of dollars are annually being thrown away in Iowa creameries simply because the method of producing a large overrun is not understood by the buttermakers, who alone are usually made responsible for the entire process of buttermaking. Iowa's co-operative creameries must get into the harness and introduce modern ideas and modern methods if they are to be as successful as they have a right to be.

Why Dairying Maintains Fertility.

Professor Curtiss at the recent dairy convention at Cedar Rapids, Ia., told why dairying maintains the fertility of the farm. He said: "In selling \$1000 worth of wheat from an Iowa farm at present prices we sell with it about \$350 worth of fertility. In selling \$1000 worth of corn we sell about \$250 worth of fertility or constituents which would cost the farmer this amount if he were obliged

to buy commercial fertilizers to maintain the fertility of the farm. But we can convert \$1000 worth of corn into beef, pork or mutton and sell it in that form and not remove over \$25 worth of fertility from the farm, or we can convert \$1000 worth of feed into butter and not remove a single dollar's worth of fertility with it. Butter is almost wholly pure fat or carbon, and it adds nothing to the value or productive capacity of the soil."

Dairy Notes.

A well-conducted farm dairy is a profitable fertilizer factory.

The proper ventilation of the dairy barn is quite as important a factor in the chain as feed or care.

Knowledge is light, light is life. Learn how to live, so that each day will have its share of sunshine.

One progressive dairyman says that he has nearly doubled his flow of milk since he began the study of a balanced ration.

Don't think rinsing will keep cans and dairy utensils clean. Add boiling water, washing powder, muscle and sunshine.

Dairying only pays as we make it, and the more intelligence and energy we put into it the larger the success is sure to be.

Learn to love your work. The successful, happy men you know are the workers. Idleness begets mischief and breeds trouble.

To be a successful huttermaker means to be a man far above the average in everything that goes to make up character of the highest order.

The dairy business provides for a profitable employment of 365 days in the year. It educates the young man in the habits of thrift, industry and economy.

By hauling the manure direct from the barn to the field a Pennsylvania farmer found that the amount of bacteria in the soil was increased fourfold.

If the farmer does not make money—that is, get a profit from his labor and his investment—the creamery cannot long succeed, and the huttermaker cannot hope to be long in business.

There is very little gained—in fact, nothing—in patching up old utensils about a home dairy or manufactory. If it is important to keep hutter tools scrupulously clear, how much more important it is to be rigorous in the treatment of milk utensils.

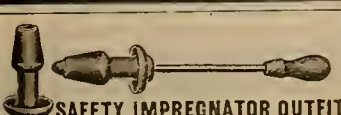

An aggressive dairyman says: "Dairy farming is taxing business. It keeps us at home morning and evening every day, but it makes the farm, and with prices such as they have been of late it will make us if we attend to business intelligently.—Inland Farmer.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

THE VALLEJO RACE MEETING

VALLEJO RACE TRACK

AUGUST 11, 12 and 13, 1904

Entries Close Monday, May 16.

GUARANTEED STAKES:

TROTTING.

1. SOLANO COUNTY STAKES—\$1000 (2:24 CLASS)
2. Waldorf Stakes (2:30 Class)..... 500
3. Board of Trade Stakes (2:16 Class)..... 500
4. Breeders Stakes (2:13 Class)..... 500
5. Three-Year-Olds..... 500

PACING.

6. GRISSIM STAKES (2:20 Class) \$1000
7. Vallejo Stakes (Green Class)..... 500 (Horses without records)
8. Gen. Frisbie Stakes (2:15 Class)..... 500
9. Electric R.R. Stakes (2:10 Class)..... 600
10. Three-Year-Olds..... 500

Races for Two-Year-Olds, Trotting and Pacing, and for District Horses will be Announced Later.

Entrance Due as follows: 3% May 16, 1904, when entry is made; 1% additional if not declared out on or before June 1, 1904; 1% additional if not declared out on or before July 1, 1904.

Declarations (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at time declaration is made.

Substitutions.—Nominators, by the payment of an additional 2% on July 16, 1904, have the right of transferring their entry or substituting another horse eligible to the class in place of the one named in original entry.

The Program will be arranged so that horses entered in several events can start in each.

CONDITIONS.

Entries close Monday, May 16, 1904, when horses are to be named and to be eligible to the class in which they are entered.

Stakes not filling satisfactorily to the Manager may be declared off.

At any time previous to the last payment an owner may sell any of his horses and transfer the entries to the purchaser.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.

Five per cent of the amount of the stake will be deducted from each money won. The Manager reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Manager reserves the right to change the hour and day of any race, except when it becomes necessary to ante-date a race, in which instance the nominators will receive three days notice by mail to address of entry. Right reserved to declare off or postpone any or all races on account of the weather, or other sufficient cause.

The Manager reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Entries not declared out at 5 o'clock p. m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

When there is more than one entry to any stake by any one person, or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.

Trotting and racing colors must be named by 5 o'clock p. m. on the day preceding the race and must be worn on the track. Colors will be registered in the order in which they are received.

Hopple harred in trotting races, but will be permitted in pacing races.

Conditional entries will be treated the same as regular entries, and nominators held under the rule.

Any race that may be started and unfinished the last day of the meeting may be declared ended and money divided according to the rank of the horses in the summary.

Stakes are for the amount guaranteed—no more, no less.

All races to be 3 in 5 unless otherwise stated.

Entries by mail must bear postmark of the date of closing or will not be accepted.

Otherwise than as herein specified in these conditions rules of the National Trotting Association (of which this track is a member) to govern.

Address all communications to

THOS. SMITH, President and Manager,
VALLEJO, CAL.

Eleventh Annual Celebration

BUTCHERS BOARD OF TRADE

AT THE OAKLAND RACE TRACK
WEDNESDAY, MAY 18, 1904.

Horses Competing for Running Races are Those now Racing at Oakland Race Track.

PROGRAMME OF RACES.

RETAIL BUTCHERS CART RACE—(For Retail Butchers only)—For Members of the Board.—Horses must be owned sixty days prior to day of race. The Ideal Route for

The Angler and Outing Trips

One day's ride from San Francisco will take you to some of the finest Trout Streams in the State. Along the line and within easy distance are many of the best Springs and Summer Resorts in the State. The Company maintains a Fish Hatchery and annually stocks the many streams reached by its road. One million Trout Fry were planted last year in these streams. Black Bass Fishing can be enjoyed in Russian River near Guerneville, Guerneville Park and Camp Vacation, in season. The best Striped Bass Fishing waters on the Coast reached by the Thuron Ferry.

VACATION FOR 1904

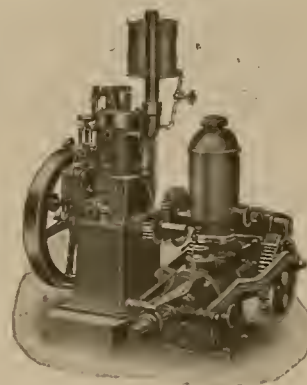

Issued annually by the Company, is now ready. This is the standard publication on the Coast for information regarding Mineral Springs, Resorts, Country Homes and Farms where summer boarders are taken, and Select Camping Spots.

Beautifully illustrated, 150 pp. and can be had in response to mail request or at ticket offices. TICKET OFFICES—650 Market Street (Chronicle Bldg) and Thuron Ferry, foot of Market Street.

GENERAL OFFICE—Mutual Life Ins. Bldg., cor. Sansome and California Sts., San Francisco.

GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1904

FEE - - - \$75

Reductions made for two or more mares.

Manager, WALTER SEALY.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos. Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the breeding season of 1904, either pacers or trotters. Must be three to start and race to come off on Hollister track, Fair week, 1907. (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1230 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Willson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 38 1/4 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightening, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM

SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:10 1/4; dam Venus (dam of Adonis 2:11 1/4, Leah 2:24 1/4, Cupid 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27 1/4, sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

NEERNUT 19810

Record 2:12 1/4 (Sixth Heat) 2:14

Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:00 1/4 to 2:30. Neernut and his colts are of the very best disposition and have good size looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 1:13 3/4 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAF, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

Record 2:20.

THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:34 1/4, MUCH BETTER 2:07 1/4, DERBY PRINCESS 2:08 1/4, DIABLO 2:09 1/4, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed. Pasturage, \$5 per month. Hay and grain, \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL

LIMONERO

RECORD (3) 2:15 1/4

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.); dam LULANEER (dam of Limonero 2:15 1/4, Blon 2:19 1/4) by Electioneer 125.

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse, with no marks and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-horse race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles, Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, to a Limited Number of Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS JUNE 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He led from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shylack 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree, address

BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal., or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09 1/4, champion 4 y.o. of 1903 (half mile 39 1/4), OUR LADY (trial 2:20 1/4) and full brother to JOHN A. McKERRON 2:04 1/4 (the fastest trotter of the Wilkes family).

Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16 1/4, sire of John A. McKerron 2:04 1/4, Who Is It 2:10 1/4, Stanton Wilkes 2:10 1/4, Claudius 2:13 1/4, George B. 2:12 1/4, Bob Ingersoll 2:14 1/4, Tidal Wave 2:13 1/4, and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of Joba A. McKerron 2:04 1/4, Nearest 2:22 1/4 and Thursday 2:34) by the old champion Director 2:17, sire of Directum 2:05 1/4, Direct 2:08 1/4, Direction 2:10 1/4, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 462 sire of Eborra 2:23 1/4, Direct of Direct 2:05 1/4 and 15 others in list; third dam Tiffany mare (dam of Gibraltar 2:22 1/4, sire of Our Dick 2:10 1/4, Homestake 2:14 1/4 and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15.3 bands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season.

Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

Telephone: Red 1431.

T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17 1/4, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years) Black Jack 2:28 1/4 (trial 2:22); The Boquet (4 y.o. trial 2:17 1/4); Majella 2:29 (4 y.o. trial 2:13 1/4).

Sired by Sable Wilkes 2:18, sire of 33 in 2:30. Dam, Fidelia (dam of Fildette 2:28 1/4, dam of Mary Celeste 2:17 1/4) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancelot, son of McCracken's Blackhawk. **FEE \$50 for the Season, limited to 40 outside mares.**

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08 1/4, James L. 2:09 1/4, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15 1/4) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30 1/4 (dam of Manzanita 2:16, Wildflower (2) 2:21 and 8 producing daughters) by St. Clair 16675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. **FEE \$30 for the Season.**

The above horses will make the Season at WALNUT GROVE STOCK FARM. Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

I DIRECT 2:12 1-2

(Officially Timed in Race in 2:08 1/4)

SIRE, DIRECT 2:05 1/4, sire of 54 in the list, including Directly 2:03 1/4, Direct Bal 2:04 1/4, Bonnie Direct 2:05 1/4, Prince Direct 2:07, Directum Kelly 2:08 1/4, Trilby Direct 2:08 1/4, King Direct 2:09 1/4, Ray Direct 2:10, etc., etc.

He has producing blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast trotter and has

every qualification for a sire of extreme and early speed, being good galter, level headed and game

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1300 pounds. He is a model of symmetry, fine head and neck, short hack, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly galter trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crescens 1:59¼, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

Take It In Time
If you have the remedy on hand, and are ready to
set promptly, you will find that there is nothing in
the form of Spavins, Splints, Curbs, Windpuffs and
Bunches which will not yield promptly and perma-
nently to
Quinn's Ointment
It has saved thousands of good horses from the peddler's
cart and the broken-down horse market. Mr. C. H. Dick-
ens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest,
writes as follows: "I have been using Quinn's Ointment for some time and with the greatest
success. I take pleasure in recommending it to my friends. No horseman should be with-
out it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal."
Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars,
testimonials, etc. Sent
free for the asking.
W. B. Eddy & Co., Whitehall, N. Y.

MONTESOL
(TRIAL 2:24)
Full Brother to Lady Grannard 2:23 (trial 2:13)
MONTESOL, 6 years old, stands 15½ hands, weighs about 1125 pounds; is the best bred young
McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the
greatest son of the great Alycane. He is in every respect a splendid individual and should be seen
by every owner of a good mare in this State before booking elsewhere.
\$40 for the Season, with return privilege
POLE STAR
4 years old, by McKINNEY, dam MOUNTAIN
HARE by Young Venture; 2d dam Rose Clark by
Nigger Baby; 3d dam by imp. Trustee. Will be per-
mitted to serve 10 approved mares at \$40 for season.
The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address **P. FOLEY Race Track, Alameda.**

SEYMOUR WILKES REG. NO. 0232.
The Fastest Son of Guy Wilkes
And Sire of the Sensational Trotter Monroe 2:12½
and Joe Eviston (3) 2:22
Will make the Season of 1904 at
Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought
race and was a game racehorse. No horse in California can show
a greater proportion of large, handsome, strongly built and well-
boned colts. They all look alike, and in nearly every instance are
square trotters.
SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird
by Playmate; second dam by Odd Fellow, third dam by a son of
Williamson's Belmont, fourth dam by Blackhawk 787. He weighs 1200 pounds, stands 16 hands high
and is one of the most symmetrical horses in California. Several of his get are in San Francisco and
will be shown to prospective breeders with pleasure.
Terms for the Season \$30. via steamer Gold. Pasturage \$3 per month. For further
particulars apply to **THOS. ROCHE**, Lakeville, Sonoma Co., or J. W. GREGORY, St. George
Stables, 408 Busb street San Francisco.

(Winners of 1st or 2d money in either Stanford or Occident Stakes barred)

The above Stakes Close Wednesday, June 1, 1904, when horses must be named and eligible.

Entrance due as follows: 3% June 1, 1904; 1% additional if not declared out before July 1, 1904; 1% additional if not declared out before July 20, 1904.

Declarations (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at the time the declaration is made.

NOTICE—Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee.

N. B.—The program will be arranged as far as possible so that horses entered in several events will have an opportunity to start in each.

THE STANFORD-OCCIDENT PACE.

For three-year old pacers that were originally entered in either the Stanford or Occident Stakes.

\$50 entrance and \$100 added by the State Agricultural Society for each starter over three and up to six.

Colts must be named June 1, 1904, and entrance money due and must be paid August 12th, as follows:

\$40 from those having made first payment, \$25 from those having made first and second payments, nothing from those having made first, second and third payments.

Only pacing colts having been originally entered in the Occident and Stanford Stakes of 1904 are eligible to this Stake.

SPECIAL CONDITIONS.

Five per cent of the amount of the stakes closing June 1st (except the Stanford-Occident Pace) will be deducted from money winners.

All races mile heats, three in five, except otherwise stated.

Moneys to be divided 50, 25, 15 and 10 per cent, unless otherwise specified in conditions.

All races to be satisfactory to the Board of Directors or they may be declared off.

Distance in all heats 80 yards, but if the field is more than eight, 120 yards. A horse not winning, or making a dead heat in three, to be ruled out, but will retain his position in summary, except otherwise stated.

If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance money only paid in, to be divided 80, 30 and 10 per cent.

Stakes are for the amount guaranteed—no more, no less.

When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second.

A horse distancing the field will only be entitled to first and fourth moneys.

Hoppies barred in trots, but allowed in pacing races, except where otherwise stated.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

The Board of Directors reserve the right to change the hour and day of any race, except when it becomes necessary to antedate a race in which instance the nominators will receive three days' notice by mail to address of entry. The right reserved to declare off or postpone any or all races on account of weather or other sufficient cause.

Racing colors should be claimed with entries, must be named by 5 P. M. on the day preceding the race, and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary.

Drivers must weigh in by 12 o'clock noon day of race they are to drive.

The Board reserves the right to inflict penalties for non-compliance with the above conditions.

Otherwise than as herein specified, National Trotting Association (of which this Society is a member) rules to govern.

GEO. W. TUTHILL, Sec'y. B. F. RUSH, President

NOTICE TO OWNERS AND TRAINERS.

SPECIAL.—Owing to the demand for stabling, the Society will only provide stalls for horses entered in races. Special stalls for horses shown for premiums.

It is not intended to give any specials. If you want to start your horses or secure stalls, enter in advertised races

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

HACKNEYS.

GREEN'S RUFUS.....The Baywood Stud, San Mateo

AN AUSTRALIAN TOTALISATOR has been brought to this city by its inventor, Mr. T. E. Ward of Sydney, and the Ward Totalisator Company formed to manufacture and sell these machines. The company has an office at 306 Parrott Building, where the machine is on exhibition. It is a very neat looking and well built machine, and would be an ornament on any race track. This system of wagering on the results of races is in use in Australia, New Zealand, France, Austria, Russia and other countries and is the only perfect betting system. The old pari mutual machines in use in this country are generally so small that but a half dozen horses can be played in them, necessitating the bunching of several horses in a "field" when there are more than that number of starters. In this machine of Mr. Ward's fifteen horses can be played, and larger machines can be constructed so that any number of horses can be provided for. We should like to see this machine given a trial in California this year. Patrons can see at a glance the number of tickets sold on each horse and the total amount of tickets sold. It is the only fair system of betting as the public makes the odds and anyone can back his favorite horse. It is such a success in the countries where it is used that it seems strange that here in the United States we should retain the old auction pool system on the trotting tracks, and use exclusively the pernicious English booking system on the running tracks. We suggest to Secretaries and managers of race meetings that they call and see this machine and have Mr. Ward explain its workings to them.

THE STATE FAIR to be held at Sacramento this year gives promise of being much better, so far as harness racing is concerned than any fair held there in years. A \$2000 stake is offered for 2:24 class trotters, a \$1000 stake for 2:17 class pacers and there is a long program of purses ranging from \$500 to \$1000 for other classes. Added money is offered for a race for three-year-olds that were originally entered in the Occident and Stanford Stakes, but that took to the pacing gait. The entrance fee is \$50, and owners need pay only the difference between this amount, and the amount they have already paid into either of the other stakes. All three-year-olds originally entered in either the Occident or the Stanford Stakes to be trotted this year, are eligible. It does not make

any difference whether their payments were kept up or not, the entrance money they will have to pay for this pacing event being the amount over and above all former payments made, that is necessary to make up the sum of \$50. The added money will be \$100 for each starter over three up to six. Thus if there are four starts the added money will be \$100 and if there are six or more starters it will be \$300, which will make the stake quite valuable. The program of purses and stakes offered will be found in our advertising columns. Entries close June 1st.

THE AUCTION SALE of Holstein Friesian cattle from La Siesta Herd, which is to be held at 1732 Market street in this city on Monday evening, May 16th, is attracting much attention. The tabulated pedigrees of the animals to be sold and which appear in a neat catalogue just issued, show that they represent the very acme of Holstein Friesian breeding. In his introduction to the catalogue Mr. Frank H. Burke, proprietor of the La Siesta herd, says in part: "Since 1884 I have been a close student of the development of the breed, importing from the East the best sons and daughters obtainable from new families as rapidly as they came into prominence as truly great types that would breed on. The results I can point to with pride, as for seventeen years the La Siesta herd of Holstein Friesians has led all dairy breeds at State and county fairs in California, in the show ring, at the pen, and in official contests. Many of the animals here offered are prize winners, and others are by, or out of, great winning champions. La Siesta herd has won 90% of prizes offered for Holsteins at the State Fair for the past seventeen years. They hold all prizes for milk in public competition. They hold every first prize for butter in public contests in 1895, 1896, 1897, 1898 and 1899, Jerseys and Durhams from the best herds on the Coast competing. Since 1899 no butter contests have taken place at the California State Fair. La Siesta herd was not exhibited at the State Fair of 1903, but animals of my breeding; or from animals bred by me won every first prize except one, and that was won by Mechthilde La Siesta, a bull imported by me from the East. La Siesta herd has won more medals, first prizes and sweepstakes than any herd of any breed on the Pacific Coast, and during the past seventeen years have won more prizes than all the dairy breeds in California combined. These animals are thoroughly acclimated, and have been officially tested and passed for tuberculosis." We advise those who are interested in dairy cattle to send to Fred H. Chase & Co., 17.2 Market street, San Francisco for copies of the catalogues of this sale, and can assure prospective buyers that this is an opportunity to secure highly bred stock that should be taken advantage of.

IN RESPONSE TO A COMMUNICATION, the President of the Woodland Association writes that it is quite probable a race meeting will be given on the Woodland track the week before the State Fair, which is the week that has always been claimed by Woodland, and that a meeting of the directors of the Woodland Association will probably be held this week to decide the matter. A proposition is before the Breeders Association from Santa Rosa for a race meeting to be held on the same week which is the only vacant week in the circuit. A meeting of the board of directors of the Breeders Association has been called for Tuesday afternoon next and representatives of the Woodland Association and committee at Santa Rosa have been asked to attend, so that arrangements may be made to prevent a conflict of dates and when it will positively be decided which place is to have the meeting preceding the State Fair.

GEO. TUTHILL of San Francisco was elected Secretary of the California State Agricultural Society at the meeting of the Board of Directors held at Sacramento last Saturday. Mr. Tuthill was manager of the Burns & Waterhouse stables for a number of years, and has lately been in the employ of the California Jockey Club. He is a genial gentleman thoroughly competent to discharge the duties of the important office to which he has been elected. May his incumbency of the position be successful in every way is the earnest wish of all interested in the State Fair.

HANFORD has decided to give a race meeting this year with the same purses offered by Tulare. There is a \$1000 purse for the 2:17 class pacers, and \$1000 for 2:24 class trotters. \$500 each for 2:18 trotters, 2:13 trotters, 2:28 pacers and 2:10 pacers. There are stakes for two and three-year-old trotters and pacers with added money. These meetings will be held in the fall. Entries will close May 23d. See next week's BREEDER AND SPORTSMAN for full particulars.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Cresceus' Wichita Performance Thrown Out.

CHICAGO, May 3.—The board of appeals of the American Trotting Association at a meeting here today refused to recognize the record of 1:59½ claimed to have been made by the trotter Cresceus on the grounds of the Wichita Fair last fall. The finding of the association follows:

"From the evidence submitted by the Southern Kansas Fair Association, Wichita, Kans., and George Ketcham, Toledo, we find that the performance of Cresceus on the grounds of the Wichita Fair Association on the 19th of October, 1903, was not conducted in accordance with the rules of the American Trotting Association governing performances against time, and that the time of 1:59½ then and there claimed to have been made by said horse is neither a record nor a har under the said rules.

"It is therefore ordered and determined that the application to establish such record be and the same is hereby denied.

W. P. Ijams of Indianapolis presided at to-day's meeting. The board finished its work to-night and adjourned subject to call.

Two objections were filed to the alleged record. It was claimed, first, that the trial was not properly advertised; second, that the mile was made in about 2:05 and wrongly announced at 1:59½, giving the stallion a mark not rightfully his. A considerable number of horsemen who held watches on Cresceus are alleged to have caught his time all the way from 2:04½ to 2:06.

Those who made the fight against the allowance of the alleged record claimed that all three of the watches which took the horse's time were borrowed watches, and that not one was held by an experienced timer. They also declare this—a most significant circumstance, if well founded—that each of the timers has declared that all three watches caught each quarter in the same time. Not among the best and most experienced timers in the United States has there ever been known such a condition of affairs. The best watches and the best timers will catch the quarters a fifth or a quarter of a second apart.

News From the North.

[Portland Rural Spirit.]

Geo. W. Opp of Butte, Mont., owns and is standing the stallion Merrick Driver, a full brother to John R. Century 2:00½.

There is \$30,000 hung up in early closing stakes on the North Pacific Circuit for harness horses. Don't overlook this circuit. Entries close May 10th.

A. T. Van de Vanter's pacer, Frank West by Westfield out of An Alene, is working easy miles in 2:24 at Los Angeles and is looked upon as the real thing.

Prof. Eaton has bought the royally bred pacer Oregon Bull 2:17½ by Roy Wilkes from W. F. Watson. This is the third time this horse has changed hands in so many weeks. Next.

J. R. Kennedy is located at the State Fair grounds near Boise with a stable of harness horses which he is preparing for the circuit. He will have an entry for the L. & C. \$2000 stake at Salem for 2:17 trotters.

One of the handsomest and best mannered roadsters to be seen on the streets is the bay mare Pearl by Lemont, owned by Mr. Allard of Irvington Park. This mare is in the pink of condition, having been jogged all winter and has speed enough to show 2:16 gait any time.

The boys over at Irvington track are beginning to move up some these fine mornings and the speed throttle is gradually being opened, on the bright prospects that has caused many a pipe dream during the rainy season. The gathering of the rail birds, too, indicates there is something in the air, and before the noble trotter is compelled to give way to the hang tails on this track, some fast quarters, halves and three-quarters and maybe four quarters will be stepped as a parting tribute to old Irvington.

W. F. Watson has bought from L. Jennings the well bred mare Carrie Jennings by Caution 2:25½, out of Ada Rock, dam of Altas 2:15½, second dam Mimmie M., dam of Trumont 2:21½, third dam Sally M., dam of Pathmont 2:09½, Altas 2:09½. This mare is a very promising trotter, a splendid individual, and one of the best bred ones in the state.

There is nearly \$30,000 hung up in the early closing stakes on the North Pacific circuit for harness horses. These stakes will be supplemented with liberal purse events, so that every horse on the coast will have a chance to start. Entries to the early closing stakes will close May 10th, but conditions regulating these events vary. The two large stakes at Salem and Seattle admit of no substitutes and horsemen should bear this fact in mind in making their entries. Substitutes are allowed in all other stakes. Read over the conditions carefully of each meeting, in order to prevent mistakes.

JOTTINGS.

DIRECTOR IS DEAD. The grand old stallion, hero of many a hard fought turf battle, and founder of one of the most famous of money winning families, died at the Locust Grove Stock Farm, New Castle, Pa., April 23d, at the ripe old age of twenty-seven. His death was very sudden, as he had been led from his stable a few minutes before seemingly in perfect health. Director was brought to California by Monroe Salisbury and founded here a family of horses that has brought much wealth to this State and given to the world many champion trotters and pacers. Director was bred in Kentucky by Col. Richard West and was foaled in 1877. He was sired by Dictator, brother to the famous Dexter, and his dam was Dolly, the great mare by Mambrino Chief that has given to the world Czarina 2:21, and the great producing stallion Onward 2:25½, sire of 178 standard performers, and Thorndale 2:22½, sire of ten in the list. George Brasfield purchased Director from Col. West as a yearling and when the colt was two years old Col. John W. Conley of Chicago visited Kentucky and happening to be offered a ride behind him, asked for a price on him and paid without hesitation. The sum asked which was \$2500. Col. Conley gave Director to Dr. Herr to train and in 1880 the colt won two three-year-old events taking a record of 2:30. The Colonel then sold him to Monroe Salisbury for \$3000. Mr. Salisbury raced him in California in 1882, winning four races with him, and losing one. The losing race was the first one at Santa Rosa, but Director won at Oakland, Sacramento, Stockton and San Jose. The next year Salisbury took him east, with the late John Goldsmith as trainer and driver, and the black stallion won race after race, including the free for all stallion race at Chicago, and was beaten but three times that year out of twelve starts up to the time he started in the Chater Oak \$10,000 purse. This was the great trotting event of that year and an immense crowd went to Hartford to see it. The big race was the first on the program, and the eight starters drew positions in the following order: Adele Gould pole, Fanny Witherspoon, Phallas, J. B. Thomas, Director, Wilson, Overman, and Clemmie G. Wilson was a strong favorite, selling at \$175, with Phallas \$86; Director \$57; Clemmie G. \$21; Fanny Witherspoon \$20 and the field \$60. It took five heats to decide the winner and at the end Director had come out victorious. The summary of the race was as follows:

Chater Oak Park, Sept. 5.—Purse \$10,000, for 2:19 class.				
J. H. Goldsmith's blk. h. Director, by Dictator.....	3	4	1	1
J. Splan's ch. m. Fanny Witherspoon, by Belmont.....	2	1	5	2
D. Mace's h. g. Wilson, by George Wilkes.....	1	6	4	3
Geo. Saunders' ch. m. Clemmie G., by Magd.....	5	2	8	2
Ed. Bither's h. h. Phallas, by Dictator.....	7	5	2	4
Wm. Week's h. g. J. B. Thomas, by Sterling.....	6	2	3	7
H. S. Conover's ch. m. Adele Gould, by Jay Gould.....	4	7	6	6
O. A. Hickok's cb. g. Overman, by Elmo.....	8	8	7	5
TIME.				
First heat.....	0:35	1:09½	2:17½	
Second heat.....	0:34½	1:09½	2:17	
Third heat.....	0:35¾	1:10½	2:20	
Fourth heat.....	0:35	1:10	2:18	
Fifth heat.....	0:35¾	1:11	2:19½	

In 1885 Director was advertised to stand for public service at \$150 the season at the Oakland track. He was kept in California until 1892, when Mr. Salisbury sold the great horse to A. H. Moore of the Cloverdale Farm, Pa., for \$75,000 the third largest sum ever paid for a trotting horse.

Up to the day of his death Director had produced the following with records better than 2:15: Directum 2:05½, Dorothy Redmond 2:10½, Evangeline 2:11½, Margaret S. 2:12½, all trotters, and the pacers Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½, Delphi 2:12½ and Rokehy 2:13½. Of his get 58 have standard records. Twenty-nine of his sons have produced 74 trotters and 60 pacers in the list and twenty-eight of his daughters are producing dams, having 28 trotters and 13 pacers to their credit. Several of his sons have sired 2:10 performers, one of them Direct 2:05½, being the sire of eight in this exclusive list. His daughters are also producers of 2:10 speed one of them having produced John A. McKerron 2:04½, another Ozanam 2:08, and still another the pacer Little Thorne 2:07½. While Director has left a large number of sons, Direct 2:05½ and Directum 2:05½ are the ones that have achieved the greatest fame both on the track and in the stud and both are founding race winning families.

Director was a black horse, standing a little over 15 hands and an inch high, well coupled, with clean head and neck, good legs and a very resolute bearing. He had rapid strong action, the determination and the power to fight out the race to the very end, no matter how long drawn out, and his disposition was excellent. Mr. Salisbury has won many races with the old horse, and many with his sons and daughters, and this year will have grandsons and great grandsons of his

favorite on the Grand Circuit, that will prove to the world that the blood breeds on, and as an Eastern writer has well said, "has the winning habit." Judge Greene 2:10½, grandson of Director, and Princess Athel a three-year-old great granddaughter have shown two minute speed in their work at Pleasanton this spring, and week before last Judge Greene trotted the last quarter of the Pleasanton track in 29 seconds, which is faster than any other trotter ever showed there, not even excepting Lou Dillon.

Director was a great horse, and has left his impress upon the horse world. He has added value and worth to the standard bred stock of California.

The following account of the \$10,000 Charter Oak Stake won by Director is taken from the *Turf, Field and Farm* of September 14, 1883, and will be read with interest at this time:

Mr. Loomis acted as starting judge, with President Bulkeley upon his right, and he found the task not very agreeable. The purse was \$10,000, and as every driver wanted a part of it, he was disposed to give more trouble than on an ordinary occasion. In the first heat the horses were sent off fairly well, and Phallas disappointed his friends by going into the air before he had rounded the first turn. Along the backstretch Fannie Witherspoon moved up into first place, but on the upper turn Wilson worked his way to her flank and out-trotted her to the wire. The time of the mile was 2:17½. Dan Mace looked as blooming as a sunflower, and Mr. Eph Simmone was in doubt as to whether he should send immediate notice to the treasurer as to the manner in which first money should be paid to him, or to defer action until the formality of three heats had been gone through with. Splan had ridden home behind Witherspoon in a badly shattered sulky, Adele Gould having gone into him, and Director had finished dangerously near the chestnut mare, still the talent saw no warning finger cloud in the sky. Wilson was a stronger favorite than before. The word was given for the second heat with Overman behind and on a break, and with Wilson and Director well up. The son of Wilkes and the son of Director went at each other as if much depended upon getting to the half mile post first, and those who had seen the horses at Cleveland predicted that something would soon give way. Wilson bobbed, caught, then waived, and went into the air, and then the exclamation was heard, "He's beaten." He did not relish the pinching. Splan recognized the danger of Mace, and when he got into the home stretch he sent Fannie Witherspoon along in beautiful style and captured the heat in 2:17, with Clemmie G. second and Thomas third.

The excitement in the grand stand was great, and the chin music of Dan Mace and John Goldsmith filled the quarter stretch. Dan claimed that Goldsmith had broken Wilson by cracking his whip, and the driver of Director denied the charge, but shouted, as if Daniel were as deaf as a stone wall, "I'll break up your combination." The judges placed the horse even before the white wrath of Hickok over the start had cooled, and then bedlam broke out around the pool stand. The holdiest were scared and anxious to hedge.

In the third heat the black stallion pointed to the daylight which was breaking in the East for him. He got off well and was never headed. Fanny Witherspoon made a break on the first turn and Splan laid her up, and Wilson indulged in several hobbles but finished fast. The heat was won by Director in 2:20, with Phallas second, Thomas third and Wilson fourth. The situation was now full of interest and perplexity. More cotton was stuffed into the ears of Fanny Witherspoon, as she was inclined to be wild in such turbulent company, and it was felt that she would go to the front. Her owner, although saying very little, was closely watching the race, and Splan never had a stronger incentive to do his best. It is not the value of the purse but the glory of victory which keeps the gallant old Commodore on the turf. Director was very industrious after the word was given, trotting everything which tackled him in the air, and Fanny Witherspoon broke so badly that she barely escaped the disgrace of being behind the flag. The son of Dictator and Dolly, representatives of two great trotting lights, Dexter and Thorndale, came down the homestretch wonderfully fresh, and won the heat in 2:18, with Clemmie G. second and Wilson third. "Desolation is mine!" wailed the uncompromising hater of Wilson, and "Desolation is mine!" echoed the supporter of Fanny Witherspoon. "Greater than Phallas! Greater than his sire! Greatest of all stallions!" was the jubilant cry of those that found sunshine in the more than half-horn day of Director. The story ends with the fifth heat. Director showed the way from start to finish, but Witherspoon came at him with the resolution of a high-bred mare, and finished a close second to him in 2:19½. It was a grand race, thrilling the vast crowd to the very centre, and after it everything seemed tame. First money was taken by Director, second money by Fanny Witherspoon, third money by Wilson, fourth money Clemmie G. and fifth money, \$500, by Phallas.

California will be advertised to a very large extent and very effectively by the harness horses that have left this week to race on the Eastern tracks. I doubt if the California Promotion Committee has ever given much thought to the fact that our harness horses which go East every year attract much attention to our climate and soil and induce many people to come here to invest. The success of California bred horses on the Grand Circuit has led to many thousands of dollars of Eastern capital being invested here. At least a hundred wealthy men from different States east of the Mississippi river have been in California

this winter and spring for the express purpose of looking at the trotters and pacers working at Pleasanton and Los Angeles. Of course Pleasanton has been the main attraction, and at least one of New York's millionaires has been greatly pleased with the conditions here, as he has purchased a fine farm near Pleasanton and will devote it to the breeding and training of trotters. I refer to Mr. James Butler, New York's millionaire grocer. There has been talk of a fine tourist's hotel to be erected near the Pleasanton track by eastern capital and it would not only be a good investment but a great thing for Pleasanton and vicinity.

Our State has never had a better lot of horses to represent it on the Eastern tracks than departed this week to meet on the Grand Circuit the best the entire East can produce. Mr. Salisbury's string is the one that occupies the position right under the lime light of course, and they filled two palace horse cars. The stars of the string are Judge Greene 2:10½ by Directum that trotted a quarter in 29 seconds in April this year, something no other horse ever accomplished as early in the season. Aristo 2:17½, as a three-year-old that worked a mile in 2:12½, and a quarter in 30 seconds; he is by Nushagak. Consuelo S. 2:12½ by Directum; she trotted two weeks ago in 2:11½. Hopper 2:17½ by McKinney that worked his mile in 2:12½. Blackthorne by Hawthorne, a green trotter that showed a mile in 2:12½ in April. Monroe 2:12½ by Seymour Wilkes that is expected to be better than 2:10 this year. Lita by McKinney showed a mile in 2:14. Princess Athel by Directum Kelly, a three-year-old that will enter the 2:10 list this year if no ill luck is met with. Ben F. 2:10, a horse that can pace to his record in every heat of a long race. There are many more in the string that will be heard from before the summer is over. Mr. Salisbury shipped direct to Empire City track, New York. The majority of his horses are owned by James Butler, proprietor of the East View Farm, and the others are under lease to that gentleman.

James Thompson left for Cleveland with Col. J. C. Kirkpatrick's string that he will race on the Grand Circuit and four others that are to be sold at the Blue ribbon sale. He has John Caldwell by Strathway, a trotter that has no record, but will probably be in the 2:10 list when he returns. He also has the three-year-old pacer Alhuta that worked a handy mile in 2:13 last week, a remarkable performance for this early in the year.

Ted Hayes went to Denver with the string belonging to W. A. Clark, Jr. He has the McKinney mare Miss Georgie 2:25 pacing, that can turn the track in better than 2:10 and has done it. Just before leaving Mr. Hayes purchased for Mr. Clark the good green trotter Pathway by Strathway that W. W. Mendenhall discovered and purchased last fall. Fred Chadbourne has been training this horse and stepped him a mile in 2:14½ on Tuesday of this week, which led to his sale to Mr. Clark. Hayes has several others in his string. He will race them at Denver and may return to California with them, but the probability is that he will continue East after the Denver meeting.

Joe Cuicello went on the same train with Hayes. Joe has several good horses this year and has a chance to win some of the money. He has Mr. Montanya's green trotter Bane by Steinway, James Coffin's mare Welladay, full sister to Klatawah 2:14½ that is a fast pacer, and several others.

Josh Albertson took George G. 2:12½ and the mare Mary Marie by Hart Boswell. George G. is entered in about forty thousand dollars worth of stakes and will be raced through the Grand Circuit.

Dr. Boucher takes East the little favorite Bert Logan, by Colbert 2:07½, dam Miss Logan 2:06½. He has shown two-minute speed, but the Doctor gave him no miles at his limit before he left.

About thirty trotters and pacers are in training at Fresno. Charles Clark has the largest string, having about twelve green ones in training. Trainer Walton, who had the good pacer Jonesa Basler out last year, is training seven or eight, and trainer Middleton has about the same number.

Somebody has been telling why the Cleveland track is so popular, and here is what he said: "No dividends are declared, and if the association makes both ends meet they are happy. The grass on the inner field is never allowed to grow like at other places, and mown a day or so before a meeting, but is kept like a lawn all the time. Landscape gardeners are employed to keep the walks, flower beds, shrubbery and lawns neat and attractive to the eye from May until November. During the past winter over 1500 loads of cinders have been placed on the roads and every conceivable improvement made to beautify this historic racing resort where kings and queens of the light-harness world meet annually."

Pleasanton Track.

Pathway, the green trotter by Strathway that Fred Chadbourne is training for W. W. Mendenhall, stepped a mile last week in 2:18, with the last quarter a shade slower than 32 seconds. Pathway is improving all the time. He is a smooth-going trotter, with little or no high action, and gets over the ground with little effort. Chadbourne had his unbeaten pacer of last year, Ben F. 2:10, looking fit and expected to race him this season, but Monroe Salishury bought the Brentwood gelding this week and shipped him to New York with his string on Tuesday.

The old stallion Altamont, that died last year, has always held the reputation of siring horses with good looks. Whenever he was mated with a mare that had any breeding, the result was a handsome foal. It is not surprising, therefore, that an Altamont mare

should produce a heavy when bred to Bonnie Direct 2:05½, whose progeny are getting a reputation for handsome conformation. Mr. C. L. Griffith, who owns Bonnie Direct, bred him three years ago to Alta Nola by Altamont and the result was a colt now a two-year-old, whose picture is produced herewith. He is a coal black and as perfect a young stallion as one will find in many a day's travel. He is certainly a credit to his sire, and visitors to the Pleasanton track are always enthusiastic in his praise when he is led out.

Tony Bernal is greatly pleased with the way his Chas. Derby trotter, Captain Cook, is working in Colonel Alviso's hands. The horse stepped a mile in 2:18 last week, the last half being in 1:05½. Mr. Bernal has received several very flattering offers for this gelding, but considers him worth a little more than any of the sums offered.

Dr. Boucher was sampling the little favorite Bert Logan, last week, and was able to drive him a nice mile in 2:15 with the last quarter at a much faster gait. Bert looks as fat as a seal, and fast work does not seem to have any effect on his appetite.

Trainer Zihhle is expected to arrive in Pleasanton this week from Santa Rosa, where he has been working his horses on the new inside track at Santa Rosa Stock Farm. The outside track there has not been worked any during the winter, but the cultivators and harrows will be put to work in a few days, it is reported, and the track will be faster than ever, owing to the rest it had. Mr. Zihhle will bring over about twenty head, and has some good ones among them.

Farmer Bunch gave Hattie by Bay Bird four good heats last Saturday. They were in 2:22, 2:19, 2:15½ and 2:19. She finished the third and fastest heat in good shape and looks like a good prospect in her class this year.

Ted Hayes gave Miss Georgie by Nutwood Wilkes some slow miles last Saturday. The mare was looking extra good and had no trouble heating almost anything through the stretch that she tackled. Dad Treffy with Tom Carneal made the best showing against her, and got to the wire first in one brush. They finished the last eighth at close to a two-minute gait. Mr. Hayes has not asked Miss Georgie to step any fast miles yet, but she took him to the half in 1:05 the first time he worked her.

William Brown saw his good trotter Golden Gate from the ground for the first time last Saturday, having asked Ted Hayes to drive the long gaited son of Bay Bird. Hayes liked the way Golden Gate stepped and Mr. Brown was much pleased with him from a spectator's point of view. Golden Gate trotted a mile in 2:15, last half in 1:06 during the week.

Henry Dunlap was among those who refused good offers for their horses last week. He declined \$1500 for his sweet going pacer Harold D. by Dexter Prince as he considers him worth more money. As the gelding has worked a mile in 2:15 and acts like a winner, Mr. Dunlap thinks he can win that much money with him even on the California circuit this year.

Josh Albertson refused more money for George G. 2:12½ two weeks ago, than has been offered for a

horse in California for a long time. It is told around the track that \$17,500 was the sum tendered for the son of Homeward, but Albertson declined the offer. There has never a better conditioned or sounder horse left the Pleasanton track for the East than this gelding. Mr. Albertson has worked him very carefully and seldom in company. I believe a mile in 2:12½ is the fastest he has been speeded, but he has trotted a quarter in 14½ seconds two or three times during the past few weeks. He hasn't a bad spot or a pimple on him.

One of the handsomest foals ever seen in the sugar beet and hops district is a filly by Stam B. 2:11½ out of Marguerite by Dom Pedro. The mare and foal are the property of Chas. F. Kapp of San Francisco. Marguerite has a yearling foal by I Direct 2:12½ that is a nice looker.

James Thompson, who leaves for Cleveland with seven or eight head this week, purchased from Mr. Kirkpatrick a day or so ago the four-year-old mare Emma Lou that took a three-year-old trotting record of 2:25 last year at Petaluma. Emma Lou is by Welcome 2:10½, and her dam is by Director 2:17. She will be shipped East with the others.

Mr. F. A. Jermyn of Scranton, Pa., who has been spending several weeks in California, purchased from Oakwood Park Stock Farm this week the two-year-old bay gelding by Owyhee 2:11, dam Ituna by Steinway, dam of Tuna 2:16½ and Confenza 2:21½. Both these fillies made their records as three-year-olds and the Owyhee gelding is as promising as either of them.

Little Dictatress 2:09½ was driven a fast half by Ed. Parker last Saturday. The little mare had to face a regular gale of wind nearly the entire distance, but she stepped it in 1:02½ with the best quarter in thirty seconds flat.

James Thompson has been handling Tim Judge's stallion by Silver Bow, dam Grace by Buccaneer, and has put him in the finest possible condition. The horse is a good looking trotter and Thompson said he turned him over to Mr. Judge absolutely sound this week and able to go a mile better than 2:20. He worked him a mile in 2:21, last half in 1:09 last week.

Dan Lawrence is getting along well with his two charges, a big trotter by James Madison that can show a mile in 2:20 and a pacing filly by the same horse that has stepped a mile in 2:19 within the past week.

Farmer Bunch has a stake candidate for the three-year-old events this year in the filly Still Better, owned by Mr. W. J. Leet of San Jose. This is without doubt one of the best bred ones entitled to registration in the trotting register. Her sire is that handsome and game race horse Iran Alto 2:12½, son of Palo Alto 2:08½ and Elaine 2:20 by Messenger Duroc, second dam Green Mountain Maid, the dam of Electioneer. The dam of Still Better is Much Better 2:07½ by Charles Derby 2:20, grandam None Better

2:23½ (dam of Little Better 2:11½ and Much Better 2:07½) by Allendorf 2:19½, great grandam Bashaw Belle (dam of Strong Boy 2:11½ and three more in the list) by Bashaw 50, next dam the thoroughbred mare Grey Mary by St. Louis. I doubt if anyone can find a filly better bred in producing lines than this one. She looks like a thoroughbred and acts like a trotter. She was bred by Jas. W. Rea of San Jose and presented by him to his friend Mr. Leet. She is working nicely for the "Farmer" and is headed for first money in some of the three-year-old events.

The departure of the Salishury string for Empire City track on Tuesday of this week left a void that cannot be filled as he took about thirty head of the crackerjacks that have been showing in several instances two minute speed for the entertainment of visitors from the East and elsewhere. Mr. Salishury is certainly the grand old man of the harness horse business in this State and is entitled to the name King Maker which has been bestowed upon him by the turf writers. His presence and his undaunted spirit and indefatigable energy are worth everything to the industry in California in general and Pleasanton in par-

ticular. He has bought at good figures several fast trotters and pacers for Eastern owners, and is not a cheap buyer. He is one of those who believe that a good horse is worth a good figure, and his judgment is a little better than most men when it comes to picking one. May he live long and prosper more, and may his string lead the money winners on the Grand Circuit this season.

Geo. A. Kelley's roan colt Birdman by Autrim is growing into one of the handsomest young stallions in California. His dam Birdie is by Jay Bird and his breeding issue that he should be a very valuable stallion for California breeders next year. He is in the Stanford Stake and the Breeders Futurity to be trotted this year.

The half tone engraving which is given here of a bay mare by Altamont does not flatter one of the handsomest individuals that Ed Mills has in his string

of good lookers. She is a late addition to his stable, but is attracting much attention. Her dam is by Roy Wilkes 2:06½. She is owned by Mr. E. A. Gammon of Courtland.

Tom Bonner picked up a roadster for Monroe Salishury a few days ago that is quite a trotter. He is a big dark bay gelding by Dawn out of a Guy Wilkes mare, and although eight years old was never speeded on a track and never hitched to a bike until last Saturday. Charley De Ryder drove him two quarters, the first in 34½ seconds and the next in 33½. Mr. Salishury was much pleased and said he would not have to hitch up one of his race horses now when he wanted to keep out of other people's dust when driving on the road.

Two or three parties who are looking for "good ones" have made offers for the gelding Bert Arandale in Geo. Ramage's string, but he has not changed hands. George worked him a mile in 2:20 last week, last half in 1:06 and last quarter in 32 seconds. This trotter is very much liked by the experts and they all speak well of him.

The Rose Hotel, which is horsemen's headquarters at the horse centre, has had many improvements made on it during the last few months; but in spite of the big addition that was put up, adding about twenty rooms to its capacity, there are often times when the proprietors, Olney & Son, have to skirmish around and secure rooms on the outside for their transient guests. The Rose is deservedly popular with the public.

Lou Dillon 1:58½ promises to come back to the racing season of 1904 the same peerless queen of the trotting turf she was when she went into retirement last year. C. K. G. Billings recently had word from Millard Sanders, who has had the great mare in his care at Memphis through the cold months, and he reports that the champion is looking better than at any time in her career. Sanders has pursued a novel method in giving the mare her light tasks, and much of the conditioning work has been done under saddle. She has been jogged along in this fashion for five or six miles daily, and it is followed up with two or three miles in harness. While no speed questions have yet been asked, the mare has improved physically in her long rest, and her trainer expresses no fear of bringing her back to the races even better than in her phenomenal year, when she earned the proud place of queen of the trotting turf. Many good judges have predicted that she is not yet through with the surprises of speed exhibitions, and that the coming season will see her even more of a marvel than ever before.

It will be one of the sights of a lifetime to see Splan and Curry reefing Dan R. and Prince Alert home in a whirlwind finish, and if this pair of drivers and horses do not become the most noted figures of the present season it will not be the fault of either men or horses.

Jackson's Napa Soda untangles the feet.

State Board of Agriculture.

The Board of State Agricultural Directors held a meeting last Saturday at the Pavilion in Sacramento with the following directors present: B. F. Rush, Tom Fox, William Land, C. W. Paine, E. W. Howard, James Whitaker, George Kingsbury, F. H. Burke, L. J. Rose and J. W. Wilson. The morning session was taken up in revising the premium list on live stock exhibits, allowing hills for repairing the fences at the park and in discussing the purses to be offered for the pacing and trotting races at the coming State Fair.

After a brief discussion the following list of purses for the various events were submitted and adopted:

TROTTING.		PACING.	
2:24 Class.....	\$2000	2:20 Class.....	\$1500
Free-for-all.....	1000	Green Class.....	500
2:30 Class.....	500	2:25 Class.....	500
2:27 Class.....	500	2:17 Class.....	600
2:19 Class.....	700	2:14 Class.....	600
2:16 Class.....	600	2:10 Class.....	750
2:13 Class.....	700	Free-for-all.....	750
Two-year-olds.....	500	Three-year olds.....	500
Three-year-olds.....	500	Two-year-olds.....	400

(Winner of 1st or 2d money in either Stanford or Occident Stakes barred)

The above stakes will close June 1st.

It being announced that there was over \$2000 in the treasury, an attempt was made to pay up the old indebtedness due the horsemen, but Director Land promptly combatted this, claiming that the money should be held to meet salaries and necessary expenses in repairing the pavilion, etc.

A spirited discussion followed and the matter was laid over.

It was resolved, after considerable discussion, to hold the State Fair from August 22d to September 3d inclusive.

The following officers were elected: B. F. Rush of Suisun, President; James Whitaker of Galt, Vice-President; George W. Tutbill of San Francisco, Secretary; C. W. Paine of Sacramento, Superintendent of the Track; William Land, Superintendent of the Pavilion, and C. F. Dillman, Treasurer.

Director Kingsbury was nominated as superintendent of track, but declined, and Director Fox took the same course when nominated for superintendent of the pavilion. Director Land attempted to decline on the ground of personal business, but was promptly overruled and unanimously elected superintendent of the pavilion.

Arthur Miller and James McGillivray appeared before the board and presented a proposition for new grounds for the park. They offered eighty-two acres of ground located three blocks east of the city and \$15,000, or sixty acres in the same locality and \$24,000, or a net sum of \$60,000 cash for the present park grounds. On motion Thomas Fox was appointed chairman of a site committee and the proposition was submitted to his committee to arrange a mode of procedure for disposing of the present site and procuring another, they to report back to the board on their finding.

P. C. Drescher and D. A. Lindley made a flat cash offer of \$60,000 for the present park.

Director Burke stated that the display of poultry at the last fair had cost the society \$1200, and the only return had been \$24. He said that this year there would be no room for a similar show, and it was decided to cut out this feature entirely.

Director Wilson stated that he thought it would be a good plan to have a horse show in the pavilion, and on his motion a committee consisting of Directors Wilson, Burke and Paine was appointed to inquire into the matter and ascertain feasibility and cost of the scheme.

The subject of a bond for the new secretary was discussed, and it was agreed that he should furnish a bond in the sum of \$5000, the bond to be satisfactory to the finance committee of the board. The new finance committee was then appointed by the chair, to consist of Directors Land, Johnston and Wilson. The president was, on motion, allowed two weeks to appoint all other committees.

The following bids for repairs to the State pavilion, as per specifications, were received: C. B. Lightfoot, \$7225; J. M. Stahl, \$7825, and Jenkins & Wells, \$3765. As these figures were larger than the finances of the society would allow it was agreed to reject all bids, and Director Land was instructed to prepare other specifications for the repairs.

Grove L. Johnson and Frederick Cox appeared before the board and requested that the present directors assume the responsibility of the note that had been given for the two and a half lots of land that are included in the present Agricultural Park inclosure that were purchased for \$7100. This note had been signed by former directors, and they as ex-directors wanted to shift the responsibility of the note to the new directors, as had been done for successive years since 1888, when the debt was con-

tracted. They stated that the property was worth the price.

Director Land said that personally he was averse to signing any such note, and wanted to know if the ex-directors would not retain the property in lieu of the note and lease the property to the society.

Grove L. Johnson said they certainly would not enter into any such agreement. It was one of two things—either the present directors must assume the note and retain the property, or else they would pay the note, take the lots and sell them to reimburse themselves.

The matter was referred to the finance committee which was requested to report at the next meeting of the board, and the ex-directors agreed to wait until that time. The meeting adjourned until May 14th.

A Pacific Coast Circuit.

The circuit of harness racing on this coast is gradually working itself into shape, and a little work next year will see one arranged on the lines suggested. There is a pretty fair circuit for this year that has formed itself as it were. The meetings on mile tracks where good purses will be given are as follows:

CALIFORNIA.

Pleasanton.....	July 27 to 30
San Jose (Breeder's).....	Aug. 3 to 6
Vallejo.....	Aug. 11 to 13
Santa Rosa or Woodland.....	Aug. 17 to 20
Cal. State Fair, Sacramento.....	Aug. 22 to Sept. 3

OREGON, WASHINGTON AND IDAHO.

Oregon State Fair, Salem.....	Sept. 12 to 17
Seattle, Wash.....	Sept. 26 to Oct. 1
Spokane, Wash.....	Oct. 3 to 9
Walla Walla, Wash.....	Oct. 10 to 15
Boise City, Idaho.....	Oct. 17 to 22

Horsemen will notice that there is about three months' racing on the above circuit, and that \$1000 purses will be given at each and every place, some of the stakes being as high as \$2000. The Oregon State Fair does not open until a week after the California State Fair closes, giving horsemen ample time to ship their horses to Salem and rest them up several days before racing begins there. Entries to the northern meetings close on Tuesday next, May 10th. M. J. Robert Leighton, Secretary of the North Pacific Circuit, is now in California soliciting entries for these meetings and has visited San Jose, Pleasanton and other points during the week, meeting with much encouragement from horsemen.

Reports Progress.

BREEDER AND SPORTSMAN:—The Professional Drivers' Beneficial Association of America held a meeting at the Philadelphia Turf Club on April 21st. W. K. Smith of Tiffin, O., was elected a director to fill the vacancy caused by the resignation of Benj. White. Mr. Smith has been active in advancing the interests of the association and we are glad to have him associated with us as a director.

C. E. Titman of Philadelphia and S. W. Davis of Camden, both well known amateur drivers, expressed their good wishes by generously increasing the amount in the treasury.

The Association has gained many friends and each one seems to vie with the other to do it a good turn.

Mr. Hugh McNaney offered the use of Point Breeze track, and Mr. Dan Williams put the Eagle track at our disposal at any time it was wanted.

Inquiries are coming in from drivers in foreign countries to know if they can join. The following were admitted: A. E. Lingo, John Case, Fred Shreeves, A. J. Keeley, W. P. Biggs, C. L. DeRyder, F. E. Hyde, F. P. Doble, G. M. Macpherson, D. H. Keltz, G. W. Roxberry, F. L. Brewster, A. Rathbun, J. Kerwick, W. B. McDonald, J. Kinney, M. Moody.

Respectfully yours,

J. B. MILLER, Secy.

From Far South Africa.

NATAL, SOUTH AFRICA, March 21, 1904.

EDITOR BREEDER AND SPORTSMAN:—Dear Sir: I happened to come across your paper the other day and was rather pleased with the sporting news, especially about trotting horses. I should be pleased if you will send me your paper regularly, and if you let me know what the annual subscription is I will post it to you by return.

I have been the instigator of a trotting association in this country; but it is very uphill work, as few people know anything about it and horses are scarce that can trot fast. Faithfully yours,

JOHN STONE.

Best in the World for Cuts, Ringbone, Spavins,

Cobbs, W. Va., February 18, 1904.

Gentlemen:—I have used about four bottles of your Kendall's Spavin Cure for Cuts, Ringbone and Bog Spavin, and I cannot recommend it high enough to my friends, for it is the best medicine in the world. Yours truly,

WM. C. BARKER.

Eastern Auctions.

The horse market in the East will soon be tested by a number of sales. H. T. White the expert writer on harness horse matters, says:

"The first important spring sale of horses in Chicago will be that of the Chicago Horse Sale company at the stockyards May 9 to 14. From the present outlook it will be an occasion on which a large number of well bred animals, some of them with fast records, will change hands.

A consignment which will interest horsemen is that of about forty head from the Larrabee ranch in Montana. Mr. Larrabee, like a good many other well to do men, takes his pleasure in the breeding of harness horses, and at one time and another has had at his place some of the best bred stallions in America. Most of the stock to be offered is by Alfonso, son of Baron Wilkes, or Alcone, son of Alcyone. As all the members of the band are out of good mares, and none of them has been given any training for speed development, there is a chance that there may be some real trotters in the lot. The western ranch bred horses that have heretofore been offered as light harness stock were as a rule out of inferior dams, and most of them were broken about as much as the average broncho is.

The big Cleveland sale and that of the Forbes and Lawson horses at Boston within the next month are strong counter attractions, and for that reason it is possible that some of the horses to be offered at Chicago will bring less than would otherwise be the case. Mr. Lawson, by the way, has decided not to offer Ponce de Leon, but his other horses catalogued will go to the best bidder.

There will be a big crowd of buyers at Boston, and already there is gossip as to who will secure Nancy Hanks and her daughters. Senator Bailey of Texas, who owns Prodigal and a lot of good broodmares, will, it is said, be a bidder on the old mare, and there seems to be no doubt that the ex-queen will bring a long price as broodmares go, although it is not probable the high water mark for that class of stock will be reached, as the old time boom in horses of value only for breeding has gone for good."

The management of the grand circuit trotting meetings in August at Empire City and Brighton Beach tracks, contemplate offering \$30,000 for a stake race for 2:15 trotters at each track, which is the largest twin stake ever offered for trotters in this country. Horsemen throughout the country have been notified of the plan and the New York trotting promoters only await assurances that enough good horses are in training to guarantee a contest commensurate with the stakes offered. Since the publication of the big list of early closing entries received for the meetings at the Brighton Beach and Empire City tracks, several prominent horsemen have expressed the wish that instead of the regular \$5000 purses, some bigger stakes had been offered. President Butler and his associates have so much faith in trotting in New York, that both the Empire City Trotting Club and the New York Trotting Association are going to give the big purse, provided a sufficient number of 2:15 trotters are in training to make a race. Racing stables have been requested to write to Alfred Reeves, the secretary, stating whether they prefer a \$10,000 purse or a \$15,000 purse at each place, and the matter will be decided when these replies are received. Two stakes for 2:15 trotters at \$15,000 each, would add \$30,000 to the present offering of \$43,000, made by the tracks and with the additional purse races that close two weeks before the August meetings, would make at least \$100,000 in prize money for light harness competition in the metropolis.

One Bottle Cured Ringbone.

Schilling, W. Va., Jan. 23, 1903.

The Lawrence-Williams Co., Cleveland, O.: I used Goubaud's Caustic Balm on a mare for ringbone. I cured her with one bottle. She is well and works all the time. I have ordered several bottles since for my neighbors. They have used it with good results. Two cases of ringbone I know of have been cured with it. I believe it the best liniment on the market to-day.—H. S. McCULTY.

Owner Derveux has announced that John A. McKerron (2:04½) will not be raced till late in the fall, and hence would be unable to appear against Major Delmar and Lou Dillon were a gold cup to be offered for such a race by the State Fair Association at Syracuse, as was proposed.

Empire City received 24 nominations for the 2:10 trotting class. Ten years ago the total number of 2:10 trotters was only 33, including Stamboul 2:07½ and Guy 2:09½. The same number of nominations was secured in the slow trot.

Dr. S. A. Tuttle, Dear Sir:—I received the last order from you in good time. Find enclosed \$1 and send me two bottles of your horse Elixir without delay, as I need it to-day right away. I am all out of it and can't do without it a day. Never seen anything like it. You will hear from some friends of mine in a few days, as they are trying some of your Worm Powders with great success. I am working my horse every day now that was laid up all winter with quittor, but don't know how soon it might break out again. I have recommended your medicine very highly in this part of the country. They are surprised to see me working my horse. Please send as soon as you can and oblige.

JOHN H. FLAHERTY, Cropseyville, N. Y.

Abbie Strathmore 2:07½ will be mated with McKinney 2:11½ this season.

Notes and News.

State Fair Program is out.

Oregon and Washington entries close Tuesday next, May 10th.

The Cassidy stables on Point Lohos road are for rent. See advertisements.

Don't fail to enter at the Vallejo meeting. Entries close one week from next Monday.

The State Fair program of harness races is a liberal one this year and should attract a big list of entries.

Pleasanton advertises a large number of additional entries to close June 1st. See the advertisement in this issue.

Ben F. 2:10 was purchased by Monroe Salishury for an Eastern party and was shipped with his horses on Tuesday last.

Hanford will give a meeting this fall. There will be two purses of \$1000 each, and four purses of \$500 each, besides colt stakes.

A special pacing race between Prince Alert 1:59½ and Dan 1. 2:01½ has been arranged to take place at Lima, O., July 4th next.

Stanford Stake of 1906 closes June 1st. It is for foals of 1904. Read the conditions in the advertisement. This is getting to be a rich stake.

A Pacific Coast circuit, as suggested in the BREEDER AND SPORTSMAN last week, has met the general approval of the horsemen. Next season should see the organization of such a circuit.

Monday, May 16th, is the date for closing entries for the Vallejo races. Let every horseman in California join in and give Manager Tom Smith a big list of entries. Help those who help you is a good motto.

Some Salt Lake racing men have secured an option on sixty acres of ground near that city and are making preparations to establish a first class track. An association will be formed capitalized at \$100,000.

The athletic amphitheatre and speedway at Golden Gate Park may be increased in size. The cost will not be much greater to make a three-quarter mile track instead of a half mile, and the change in the plans may be made.

Lieutenant William Price, who resides at 516 San Jose avenue in this city, considered himself lucky on May 1st when his mare Palo Belle by Palo Alto, foaled a big, strong chestnut filly by Sidney Dillon, sire of the champion trotter of the world. The filly is said by those who have seen it to be a most perfectly formed and stout made youngster.

A sucking colt by John A. McKerron 2:04½ excited the admiration of a crowd of gentlemen who were looking over the horses in Doo Tanner's stable Saturday. The colt and its dam was running in a paddock and the way the little fellow trotted around the paddock showed his rich trotting inheritance. His dam has a record of 2:39½ and is by Brown Wilkes.

The Sacramento Union says: It is worth noting that the experiment of using automobiles for delivery wagons was tried in this city and the chug wagons were abandoned. Sacramento, with its streets as level as a parlor floor, ought to be an ideal place for the automobile delivery wagon, yet the reliable horse seems to have driven it from the field of industry.

Robert Leighton, the genial secretary of the North Pacific Circuit is in California this week soliciting entries to the races up north. Horsemen can race there after the California State Fair is over, and Mr. Leighton should get a good list. He will be pleased to give horsemen information about cost of shipping, etc. He has visited several of the principal training tracks.

Mr. R. P. M. Greeley of Oakland writes us under date of May 4th: "My mare Winnie Wilkes 2:17½ foaled a fine bay stud colt by Searchlight 2:03½ this morning, for which I claim the name 'Dandy Search.' You may say to Mr. T. J. Crowley and others that they would save money by looking at my colt before making further payments in that \$6000 stake for foals of this year."

An Eastern paper says: It is a queer state of affairs when farmers from all sections of the country are visiting the big cities, trying to purchase horses for farm work and the prices they are compelled to pay is astonishing. When the farmers realize that the automobile will not destroy the demand for horses they will recover from their scare and pay attention to breeding horses again.

The American Sportsman's Memphis correspondent says that Millard Sanders is very much disturbed over the fact that the owner of Rohizola 2:12½ has decided to send her to the Cleveland sale. Millard has staked her in the Grand Circuit, and counts her a 2:07 trotter. Judging from her recent work, he believes she will be able to step a half in 1:02 or thereabouts by the time she reaches Cleveland.

Among the California horsemen who have made entries at the Denver, Colorado, meeting are W. G. Durfee, Los Angeles; A. W. Boucher, Pleasanton; J. De La Montanya, San Francisco; J. G. Cuicello, San Francisco, and W. A. Clark, Jr., San Mateo.

The eleventh annual celebration of the Butchers' Board of Trade will be held at Oakland race track on the 15th inst. There will be eleven races on the card, including running, trotting and novelty events. Entries close with Secretary Gilbert, at 424 Pine street on the 13th inst. The committee in charge consists of R. Consani, J. Nowlan, W. H. Noy, A. Clayburgh and Bart Fisher. See the program of races in our advertising columns.

That May Logan, the yearling full sister to Sir Albert S. 2:03½, is a handsome little miss is evidenced by the accompanying half-tone reproduction from a photograph of her taken a month or two ago at

Carey Montgomery's place near Davisville, Yolo county. The picture was taken before the spring had fairly opened and Miss May had not shed her winter coat. She was foaled July 8, 1903, so will not be a year old for two months yet.

A handsome and stylish team of coal black mares is offered for sale by Mr. Adolph Dohrzensky, proprietor of the Vendome stables at Newman, Cal. These mares are well bred, being by St. Nicholas, son of Sidney, and out of own sisters by Charles Derby. They are well broke, and not afraid of steam cars or automobiles. They are square trotters and can beat three minutes to pole. Either mare can trot a mile singly in 2:40. They stand 15.3 and weigh 1200 pounds. Write to Mr. Dohrzensky for price and further particulars.

Chris Anderson of Arcata, Humboldt county, writes that his gray pacing mare Maud Haywards, a standard bred mare, dropped a fine filly by Waldstein on the 17th of April. It is a natural pacer and never makes a step at the trot. She is a bright bay in color with two white hind feet. This is four foals by Waldstein that Mr. Anderson has from this mare and he naturally feels very proud of them as they are considered the best bred quartet in Humboldt county.

Mr. Alex Brown, proprietor of the Walnut Grove Stock Farm, writes: "Have just received three very fine mares from Oakwood Park Stock Farm to be bred to Nushagak. They are Eleotway (sister to Klatawah 2:05½) by Steinway-Katie G by Eleotioneer; Nazoma by McKinney-Amazons by Chas. Derby; Brilliantshine by Chas. Derby-Lydia Bright by Trimover 2:54½. We are having a fine lot of foals this last month by Nushagak and Prince Ansel. Are in hopes to have several Aristos among them."

Ed Lafferty left yesterday for Denver, and will be seen in the sulky on the Colorado circuit. There are few better race drivers than Mr. Lafferty and no better judge of pace or the capabilities of trotters and pacers. Daedalion 2:11 and a young stallion by Mendocino that Lafferty has been training at Pleasanton, he turned over to Mr. Trefry. Daedalion is owned by A. Ottinger and the Mendocino horse is the property of Mr. E. J. Molero. Every horseman in California will wish Lafferty all kinds of good luck and that he may drive some of the big winners during the year.

Consumption of horseflesh in Germany is on the increase. In 1901 12,000 horses were slaughtered for food in Berlin and 79,000 were consumed in Prussia during the same year. Horse meat is used because there are not enough cattle to fill the demand. Horses are slaughtered only after they have spent a lifetime in the harness, and no one will deny the fact that the food obtained from this source is of very poor quality. It is horse meat or nothing, however, with a majority of the inhabitants because the government chooses to keep out good American meat to suit the agrarians who own most of the land on which cattle are raised.

W. W. Mendenhall sold his horse Pathway to Ted Hayes for W. A. Clark, Jr., this week, and the horse was shipped to Denver with the Clark string. The price paid was a good one and Mr. Mendenhall has made an excellent turn on the deal. He bought Pathway last year at a low figure and sold him for about ten times as much as he gave for him. Pathway trotted a mile over the Pleasanton track in 2:14½ the day Mendenhall sold him, and did it very handily. He is by Strathway, first dam by Alexander Patchen and second dam by Geo. Moore, he by Northumberland, he by Lexington. He is a trotter that has the smooth stealing gait and promises to be a 2:10 performer this year.

To detect a spavin, large or small, the following test is said to be almost infallible: Have an assistant lead the horse out to halter and prepare to trot him instantly at the word "go." Now lift up the foot of the suspected hind leg and hold it as close to the horse's belly as possible for a few minutes. Suddenly drop it and immediately trot the horse, when he will, for the first few steps or even rods, go intensely lame, but soon recover.

A large crowd witnessed three good races at Agricultural Park, Sacramento, on Sunday last, given under the auspices of the Sacramento Driving Club. The races were all two best heats in three. The first race brought out John Norton's Lighthouse, Thomas Norton's Daken D, Frank Wright's Royal Dame and Thomas Clark's Star Bitters. Daken D. took the first heat in 2:22½, but Royal Dame took the next two in 2:21 and 2:25. Ruhstaller's Hans, McMullen's Elrose and Williams' Flossie started in the second race. Flossie took both heats, Hans second. Best time 2:31. The third race called out McMullen's Rosa Gold, Bower's Glide and Silva's Queen S. Glide took both heats.

Alex H. Davidson, of Phoenix, Arizona, has purchased from Mr. J. C. Adams also of that place a black filly by Zolock 2:10½, son of McKinney, first dam Lillian Welborn by St. Vincent 2:13½, second dam Wake Bell by Bell Boy, third dam by Baron Wilkes, fourth dam by Alcantara, fifth dam by Stockbridge Chief and sixth dam by Mambrino Paymaster. Mr. Davidson says she is a fine looker and she ought to be from that rich breeding. She is black with no white, is just broken and has a nice disposition. Mr. Adams was to leave for Denver on the fourth of May with his two fast pacers Sally Pointer and Maydello. The latter has worked a mile in 2:13 on the Phoenix half mile track and did it easily. She is expected to take a low mark this year and is entered in the Chamber of Commerce stake at Detroit.

Mr. John W. Gardner, of Los Angeles, has lost by death his royally bred mare Miracle (own sister to Coney 2:02½) by McKinney, dam Grace Kaiser (dam of McZeus 2:13, Stipulator 2:11½, Coney 2:02 and Grace McKinney 2:21½) by Kaiser. Miracle was the dam of that fast colt Tidal Wave by Nutwood Wilkes that took a pacing record of 2:14½ last year up north. Bred as she was, by the great sire McKinney and out of a great broodmare like Grace Kaiser, Miracle was thought to have a great future before her in the broodmare ranks. We believe Tidal Wave was her first foal to be trained. She was bred last year to Direcho, and was due to foal in about a week. Her death is not only a loss to Mr. Gardner but to the breeding interests of the State.

Among the horses taken to Denver yesterday by Joe Cuicello was the handsome pacer whose picture is here presented. This gelding is by Seymour Wilkes 2:08½ and is phenomenally fast. Last week at San Jose Cuicello worked him a full mile in 2:18, the last

quarter of which was stepped in 30 seconds flat. Joe will race him on the Colorado circuit and if the gelding takes kindly to the high altitude he will get a low mark opposite his name before he gets back to California. Few horses present a handsomer appearance in or out of harness than this pacer.

At the meeting of the Amateur Driving and Athletic Association in the Palace Hotel Thursday evening, a committee was appointed to wait upon the Park Commission at its monthly meeting Friday for the purpose of reaching an understanding regarding the commencement of work on the proposed circular track and athletic grounds in Golden Gate Park. Superintendent McLaren has said to the association that if it will turn over \$10,000 of the money already secured he will begin work immediately, but at the meeting Thursday evening the association decided that before turning over any money it might be wise to have an understanding with the Park Commissioners, whereby, in the event of the association's failure to raise the stipulated amount of \$25,000, the work would not be left unfinished. The work of raising funds is progressing in a manner that is decidedly encouraging. According to reports made Thursday evening, the Association has \$10,000 that could be turned over to the Park Commissioners immediately, and from present prospects it will have \$5000 additional within a week. Among recent subscriptions are those of the cyclists, aggregating \$650, a donation of the Olympic Club in the amount of \$500, and a check from Colonel John C. Kirkpatrick for \$250. Following is the committee selected to wait on the Park Commissioners: President W. J. Simpson, E. R. Pease, I. L. Borden, F. G. O'Kane, John Elliott, T. J. Crowley and A. W. Morgenstern.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

Senator Bailey has reconsidered his resignation as a director of the Kentucky Trotting Horse Breeders Association and will continue to serve.

Miss Previous, the \$10,000 yearling of the Marcus Daly dispersal, has been sent home by Ed Avery after three seasons of training and no start.

At the Fort Worth, Texas, matinee, April 1, Stipulator in the free-for-all stepped a half in 1:03.

Scott Hudson has to his credit ten trotters and pacers that he has marked in 2:08 or better, and in addition has driven to their record twenty-four in or below 2:10.

Dart 2:08½ lately stepped an eighth of a mile over the Jewett covered track in 14 seconds.

Gus Macey is now fully satisfied that the "jack" which has put Country Jay 2:10½ out of commission the past two years is entirely cured and expects the "red horse" to be better than ever this season.

Geers has some big horses in his stable this year, as Stanley Dillon is full 16 hands high and Alexander is 16½ hands, while Travelesso is a trifle over 16 hands high.

One of the fastest of the two-year-old trotters at the Idle Hour Stock Farm, Macon, Ga., is May Moko by Moko, dam May Day 2:18½, the dam of Directum Miller 2:08½.

Empire City Farm last week shipped three high-class mares to Ketcham Farm to be bred to Cresceus. They are Derby Princess 2:08½, by Cbas. Derby 2:20; Bay Star 2:08, by Kentucky Star p. 2:08½, and Quality 2:13½ by Electioneer.

Three two-year-olds at the Two-Minute Stock Farm, Cleveland, are showing phenomenal speed at the pace. They are all by Star Pointer and their dams are Javelin 2:08½, Minnetto 2:10½, and Daisy M., the dam of Red Seal 2:10.

Most of the pacing stars of ten years ago are living. Star Pointer 1:59½, is in the stud at Rockport, Ohio, while John R. Gentry 2:00½, and Joe Patchen 2:01½, are heading breeding establishments in Tennessee and New York, respectively. Robert J. 2:01½, is living in retirement in New Jersey, while Flying Jib 2:04, still shows much of his former speed on the roads at Pleasanton, Cal.

George McPibson, the Canadian reinsman, has entered Angus Pointer by Sidney Pointer 2:08½, in the Chamber of Commerce stake at Detroit. The dam of this wiggler was a thoroughbred mare, and if he should win there will be a chance for the advocates of thoroughbred blood close up in the trotter to do a little bragging. They say it will take three heats in 2:08 to heat the grandson of Star Pointer.

The life of a nine-day-old trotting bred filly by Jay McGregor, dam Olga by Lumps, was saved at a veterinary hospital at Lexington, Ky., last week, the second case on record. The filly belonged to Edward Smith, a Scott county breeder, and having locked bowels, Dr. Platt and two surgeons opened the body and set the entrails right. The filly has recovered. She is engaged in all the big futurities.

"Doc" Tanner has received a letter from Millard Sanders stating that the latter would arrive in Cleveland from Memphis May 1st. He has twenty-five head, about ten of which will go to the May sale. A recent addition to his stable is the pacing mare China Maid by McKinney 2:11½, entered in the Chamber of Commerce Stake. This mare was trained at Cleveland all of last summer by J. M. Nelson, and is charged with having shown a mile in 2:05½ last October.

One of the recent foals at the farm of A. G. Danforth & Son, Washington, Ill., is a chestnut colt by Mendocino, sire of Monte Carlo 2:07½, Idolita 2:09½, etc., out of Palita, two-year-old record 2:16, by Palo Alto 2:08½; second dam Elsie, dam of five, by Gen. Benton; third dam Elaine 2:20, dam of the ex-champion yearling Norlaine, Iran Alto 2:12½, Palatine 2:18, and two others, by Messenger Duroc; fourth dam Green Mountain Maid, dam of nine.

Horsemen are guessing what the great pair of Mr. McE. Sturgis, Prince Direct 2:07 and Baron de Shay 2:08½, will bring at the Blue Ribbon sale.

Eddie Mitchell, formerly caretaker and then trainer of Cresceus, now in England, started the pacers Charlie B. 2:07½ and Bobbie Hal 2:18½ to best the British team record over the Aintree course last month. They won by 8 3-5 seconds, finishing in 2:22 1-5. This pair holds the world's record for a pacing team on a half-mile track, 2:13, made in a race at London, Ont., Canada, in 1900. They are now owned by Louis Winans, Brighton, England.

W. P. Murray's mare Italia, 3, 2:23½ by Zombro 2:11, a candidate for M. & M. honors, is in splendid physical condition and being worked by "Doc" Tanner. This mare took her record as a three-year-old, winning the Occident Stake at Sacramento, Cal. Last season, in her five-year-old form, she won five races at the local matinees, taking a wagon record of 2:11½ and trotting eight winning heats faster than 2:16. She defeated among others, Charley Mac 2:07½, Darwin 2:13, Alberta D. 2:13, Joymaker 2:10½, Jurash 2:15½ and Marie C. 2:16½.

The bay gelding Shamrock, winner of the blue ribbon in class 9 for roadsters at the late Boston Horse Show, in which event he defeated among others the crack show mare Rhea W., is six years old and was bought by Dr. A. H. Fitch of this city, from Lookout Stock Farm, South Natick, Mass., last fall. Ten months ago the gelding was unbroken. He is by Edgemark 2:16, dam by Shamrock 2:25, second dam by California Belmont.

Harry McKerron grows steadily to look more and more like his famous sire John A. McKerron. He is now three years old, and shows so urgent a trotting instinct that railbirds are even now counting him in as a money winner in both the Hartford and the Kentucky Futurities. His owner is F. M. Camp of Homersville, Ohio.

It is noted that E. F. Geers is entering Robert Mc. (4) 2:10½, by the Dakota sire, McRoberts, in the 2:10 trots through the Grand Circuit. Those in close touch with Robert Mc. look to see him prove one of the sensational trotters of 1904. Mr. McClung, his owner, has a five-year-old daughter of McRoberts, dam by Smuggler, that promises to be a 2:10 trotter.

At the recent seven-day meeting in Vienna, Austria, there was an average attendance of 20,000 people daily. The betting was evidently very lively, as a total of \$300,000 was bet in the "mutuals." Of this amount 5 per cent was paid the racing association, 5 per cent to the city and 2 per cent to the poor fund. Americans who wager on horse races would kick lustily if 12 per cent was taken out. But even this is better than "the hooks" who take out on an average of forty per cent.

A paper announces the death of "Uncle John" Porter of Ticonderoga, N. Y., at the age of 91. Mr. Porter was a born horseman, and a great admirer of the Morgans. He became prominent by bringing out the king of Morgan stallions, Daniel Lambert, at first named Hippomenes. Mr. Porter knew both Ethan Allen and Fanny Cook, the sire and dam of Daniel Lambert, and when Fanny Cook was mated with Ethan Allen he made up his mind that if the produce should prove to be a colt he would buy it if possible. As soon as he learned that Fanny Cook had dropped a colt he drove to the place where she was owned, inspected the youngster and was so well pleased with him that he bought the colt for \$300, to be delivered at weaning time. He had him trained and raced him some as a three-year-old, giving him a record of 2:42 that season. Two years later R. S. Denney bought the horse, through A. C. Harris, for \$3000.

J. Floyd McKee, the trotting horseman of Weston, O., has notified Trainer Ed Allen that he will ship Crescent Route 2:08½ to Lexington as soon as that stallion's stud season is over in the Buckeye State. Allen will then endeavor to fit the son of the former champion trotter to reduce his record, though the horse may also be raced to some extent late in the fall. Public interest centers to a great extent in Crescent Route, chiefly because he is the fastest horse yet sired by the mighty Cresceus.

Ben Kenney, the famous driver, who was all but fatally injured in the 2:06 pace at Providence last September, when Prince Direct, the horse he was driving, caught his foot in the sulky of Nervolo, piloted by Scott Hudson, has made known his plans for the coming season. Though he has in the last two weeks had several offers to train the strings of individual owners, he has turned them all down, and will leave Lexington for Cleveland the first of May and open a public stable in his old barn at the Glenville track. Kenney fears no further trouble from his accident, and laughs at the suggestion of the remem-

brance of that occurrence making him any ways timid in the future. He says he would drive Prince Direct at any time in any sort of a race with as much confidence of no accident befalling him as any horse he ever sat behind. "We all, once in a while, take a fall in a race, and it is just luck when we escape serious injury," said the noted driver. "I had a horse to go clear over me in Montana, and I escaped without a scratch, and another time I was put over the fence into the inner field. A driver is more or less in danger in any hotly contested race, where a field of great horses are evenly matched, and, bar my Providence mishap, I figure that I have had more than average good luck, considering I have been doing stunts in the sulky for a shade over twenty years."

In physical appearance the man who developed Nancy Hanks looks the perfect picture of health, and with all his powers intact bids fair to again assume his place in 1904 with the best ribbon holders in the Grand Circuit.

The entry lists to all the Grand Circuit tracks are big, all of which insure good sport with the harness racers.

Governor Herrick vetoed the Pool bill and it is doubtful if Cleveland will give its Grand Circuit meeting this season.

Secretary H. W. Wilson of the Kentucky Trotting Horse Breeders Association, who has been dangerously ill of grippe for several weeks, has so far recovered as to be able to attend to the duties of his office.

In the future all of Lou Dillon's efforts against time will be made even without a dirt shield. This season Lou Dillon will beat the record to high wheel sulky without the ball-bearing axles, and also attempt to beat her wagon record of 2:00, made at Memphis October 28th last, and her record of 1:58½ made to sulky on the same track.

Reports from Cleveland agree that there are more horses at present eating oats at the Glenville track than in any previous year at this time. Many high-class horses will be trained at this track this season. The track has stood the winter well, and will be in good shape as soon as the rains cease.

H. K. Devereux and F. L. Chamberlin were re-elected president and secretary-treasurer respectively of the Cleveland Gentlemen's Driving Club, at its annual meeting held last week at the Roadside Club, Glenville. The dates of the inter-city meeting will probably be August 29th to September 3d, which occur during the Grand Circuit meeting at Providence, and will not conflict with any western meeting.

One of the interesting papers read at the recent meeting of the National Academy of Sciences, in Washington, was a description of researches made by exploring parties sent out by the American Museum of New York, as a result of a gift of \$15,000 made by the late William C. Whitney, for the purpose of learning the prehistoric story of the horse on the American continent. The paper was read by Prof. Henry F. Osborn, of Columbia University. The explorations have been carried on for three years and have resulted in a number of discoveries of great interest and value to zoologists and paleontologists. It is clearly demonstrated that the horse was not, as claimed by horse historian Wallace, a native of Arabia, but was on the American continent before the birth of history as the companion of the prehistoric man.

The trainers at the Empire City are going slow with the horses, as it is early yet and the covering has just been removed from the track. Charlie Thompson, Tommy Murphy, Jack Curry, Rue Clark, "Romey" Whelpley, John Daly, Thomas Nolan, Billy Maloney, are all to train there, and several already have their strings quartered on the hilltop. By June it should be a lively place.

For its annual Speedway Day parade, to be held on Saturday, May 14th, a far greater number of entries are being received by the Road Drivers' Association of New York than for any similar event of previous years. Scores of horsemen are naming their trotters to parade and also compete in the brushes that will wind up the day's sport. At least 600 rigs will be in line when the bugle sounds for the start from 110th street and Seventh avenue.

"Is that your mule?" asked the man who was going fishing.

"Yassir," said the colored man, who was sitting on a log by the road.

"Does he kick?"

"Deed, mistuh, he ain't got no cause to kick. He's gittin' his own way right along. I'm de one dat's havin' de worry an' difficulty."

Year Book Statistics.

The Year Book on examination presents much food for thought and the statistics which it presents are of incalculable assistance to the student of the breeding problem. The breeder of to-day wants more than a pedigree and prospects; he wants to breed in the bright light of results. There was a time when the first question asked was "how is he bred?" and later "what has he done?" Now the first question is "What has he done?" and the next is "how is he bred?" The twelve leading sires of last year show the preponderance of the blood of George Wilkes. Gambetta Wilkes, twenty-three years of age, is decidedly on top with twenty-four new performers, which bring his total up to the one hundred and forty one, placing him sixth in the great list of sires. He has thirty-five sons, who have produced sixty-five trotters and eighty-nine pacers, and twenty-four daughters who have produced fifteen trotters and the same number of pacers. In this result they resemble their sire, whose one hundred and forty-one are divided seventy-two trotters and sixty-nine pacers.

That great ex-champion, Allerton 2:09½, comes second on the list and here the Wilkes blood is a most predominating factor as he is by Jay Bird, while his dam, Gussie Wilkes, is by Mambrino Boy, and his second dam is Nora Wilkes, by George Wilkes. Allerton is now eighteen years old and last year he added that number to his list. His grand total is one hundred and seventeen of which eighty-nine are trotters and twenty-eight pacers. He has eight sons who have produced seven trotters and seven pacers and six daughters who have to their credit four trotters and two pacers. Allerton is ninth in the great list of producing sires.

Third in last year's list comes that little black equine tornado, Direct 2:05½, now nineteen years old, who placed eleven to his credit, bringing his total up to fifty-four, twenty-six trotters and twenty-eight pacers. He is the leading representative of the Dictator family, being by Director out of Echora 2:23½ by Echo. With a great trotting sire and trotting dam and a game trotter himself before he began to pace, it is remarkable that he averages more pacers than trotters. Bellini, Brown Hal and Kremlin are all close together with ten each. Bellini 2:13½ was a good campaigner, but was lost sight of when retired from the track to the stud and his reappearance as a sire of speed was like a resurrection. He is bred in old-fashioned lines, being by Artillery, dam Merry Clay, by Harry Clay, second dam Ethelberta by Harold. Artillery 2:21½ was by Hambletonian 10, dam Wells Star by American Star 14. That was blue blood twenty years ago, but can hardly be called fashionable today. Bellini is seventeen years old and has thirteen trotters and two pacers to his credit.

The peerless Brown Hal, a champion and a sire of champions, is still to the fore. The great representative of a pure pacing family and opportunities considered one of the greatest sires that ever lived. He has ten new ones, all pacers. His total is fifty-nine pacers and fourteen trotters, but the speed average is very high. The ex-champion stallion, Kremlin 2:07½, also did well and has yet plenty of time to rapidly increase his list. Kremlin is royally bred, being by Lord Russell, dam Eventide by Woodford Mambrino. He has to his credit twenty-five trotters and eight pacers. Simmons, Bohy Burns, McKinney, Onward, Axtell and Online make up the total of the twelve leading sires of the year.

Passing from the sires of the year to the leading sires of the great list there are thirteen with one hundred or more to their credit and eight of these belong to the regal house of Wilkes. For a long time the contest was keen between those two great sons of a mighty sire, Onward and Red Wilkes, but with one hundred and seventy-eight to his credit the former heads the list as the premier of all sires. The wonderful Nutwood is a close second with one hundred and sixty-nine, while Red Wilkes is a good third with one hundred and sixty-six. Electioneer with one hundred and sixty is fourth, but when it is borne in mind that these were all produced during his stud service of twelve years at Palo Alto it is really the greatest showing of the list. Alcantara with one hundred and fifty-four and Gambetta Wilkes with one hundred and forty-one give additional strength to the Wilkes column. Then comes that remarkable horse, Pilot Medium, who with anything but favorable opportunities rolled up a total of one hundred and twenty-two. He is the champion son of Happy Medium. The next four in the order of merit are Simmons with one hundred and nineteen, Allerton and Wilton with one hundred and seventeen, each line up strong for the Wilkes family. The great Robert McGregor is the twelfth with one hundred and one and that phenomenal sire, Sidney, is the last of the baker's dozen with one hundred.

If we go to the next generation the preponderance

of the Wilkes family is still as marked. His sons have 2645 to their credit, Electioneer follows with 1129, while Nutwood has only 885. In passing on these voluminous statistics, however, the intelligent student must bear in mind that quality and extreme speed are greater than numbers and that from now on it is the high speed average which will determine the intrinsic quality of the sires. The 2:30 list as a test is practically a thing of the past. It is the 2:10 list which will elect the great stallions of the future.—*Sports of the Times.*

Horse Items from Vancouver, B. C.

Mr. J. A. Fullerton has resigned the presidency and management of the Vancouver Jockey Club. Mr. Fullerton has been the Director General of the Vancouver Jockey Club for thirteen years and his retirement is heartily regretted by horsemen and the public in general. He has always been an exemplary, painstaking official, one that the public and the horseman has respected at all times. His word is his bond. His knowledge of both harness and running horse affairs is second to no man's.

The position formerly held by Mr. Fullerton has been tendered to and accepted by Mr. J. G. Woods. A young man of ability, it is to be hoped that Mr. Wood will have as good success as his able predecessor, Judge Fullerton.

The program for this year's meeting is an attractive one. The Vancouver Jockey Club always pays one hundred cents on the dollar.

I visited the Hastings track today and saw a number of very promising horses. The first horseled out was King Patchen, a beautiful son of Mambrino King. King Patchen is a product of the Village Farm and one of the most beautiful horses on the Pacific Coast. He is a sire of size, color, good looks and speed. A big, handsome chestnut mare, named Josephine Patchen, sired by him was led out. She is fully sixteen hands high and with her good looks and bold trotting gait would attract attention in any country. She is entered in several slow classes and should render a good accounting. All the other sons and daughters of King Patchen that I saw were handsome with bold strong action. Glengarry Patchen 2:24 pacing is a very fine horse and will make a fast pacer. His present record is no gauge of his speed.

Dan Ross bought a very handsome filly by Erect, full brother to Direct, dam Viola, dam of Giles Noyes 2:05½, at the McCarthy Portland sale. This filly looks and acts like a high class one. Harry Grocutt is training her and is quite sweet on her.

Arketa, grey mare, 2:14½ by McKinney, dam by Larcho, son of A. W. Richmond is owned here. Arketa is about the best looking McKinney I ever saw. She shows the A. W. Richmond finish, has a beautiful hood-like head and neck. All in all she is a high class mare and if given to a first class trainer and taken to good tracks I would be willing to predict that she will outclass any McKinney trotter, living or dead.

The Primo, brown horse by the dead sire Primero, dam Kitty by son of Blackhawk, is a very pretty horse and can pace fast. The colt is much touted and I guess it is all a fact. He looks the part. Carrie S. pacer, 2:17 by Altamont, is owned here by Mr. M. S. Rose. She will appear on the North West Circuit this season.

Colliquay, a magnificently formed son of Bay Bird, is owned here and is the premier sire of the country. All his get are of commanding appearance, solid colors, and endowed with plenty of speed and knee action. Colliquay is a prize winner every year. The writer saw him take first premium at Tacoma, Washington, some years ago from such a good horse as Touchet 2:15, the good son of Altamont and Tecora. Mr. Wilkinson, his owner, has a band of choice standard bred mares at his Chilliwack stock farm, and has a good one-half mile track.

This will be a lively year amongst horsemen in Canada. Winnipeg offers \$10,000 in purses and guarantees expense of freight and free stalls to all horses shipped from Vancouver and Victoria. I presume your paper has the Winnipeg program in your advertising columns. Just as soon as a good acting, young horse appears in Vancouver a buyer is at hand. They are being shipped to England and Australia quite frequently. Well bred mares are scarce here; I refer to Standard bred ones. Still what few there are here are of a good class and every farmer is a raiser of good horses and all go in for the light harness horse.

Nellie C., two-year-old, by Coeur d'Alene, dam Hazel Kirke by Altamont, is a natural pacer and a beauty. Trainer Grocutt says she has a lot of speed and good sense.

Mr. J. C. Woodrow owns the handsomest filly in this province. Her name is Zombelle by Zombro 2:11, first dam Noonday Belle, by Noonday, second dam

Belle H. by Belmont, dam of Coeur d'Alene 2:19½ and Stamboul Belle 2:21. This filly is the only exact counterpart of Zombro that I ever saw, besides she is good mannered, good gaited and fast. She is entered in the Breeders Futurity for 1905, and barring accident should make a good showing. Mr. Woodrow is an enthusiastic horseman and amply able to indulge in a few good ones.

That veteran trotter Conde by Abbotsford is at Kamloops, B. C., and was a good second last fall to Mink in a hard fought race. Mink is a twenty-year-old colt. Conde must be twenty-five or close to it.

Mr. McLauren, the owner of Larabie the Great, is here on a visit. He is a very enthusiastic horseman and has done a lot for Canada by bringing such a grand horse as Larabie the Great to the country.

Yours truly,
C. A. HARRISON.

Denver Stake Subscriptions.

Following are the subscriptions to stakes of the Denver Overland Racing Association, which closed April 1st:

Stake 13, 2:13 Pace—Robt. S. Gutshall, Denver, Colo.; S. A. Martin, Denver; Joe Barnett, Albuquerque, N. M.; J. H. Thatcher, Pueblo, Colo.; J. A. Richardson, Boise, Idaho; Frank L. Smith, Denver; Edwin Gaylord, Denver; J. C. Adams, Phoenix, Ariz.; J. W. Miller, Colorado Springs; Walter Cummings, Denver; E. A. Colburn, Denver; Sam Bush, Denver; Eclipse Livery Co., Pueblo.

Stake 1, 2:20 Pace—Geo. H. Estabrook, Denver; W. G. Durfee, Los Angeles, Cal.; J. C. Adams, Phoenix, Ariz.; E. A. Colburn, Denver; Sam Bush, Denver; W. A. Clark, Jr., Butte, Mont.; E. F. Woodworth, Denver; A. W. Boucher, Pleasanton, Cal.; Geo. S. Newman, Aspen, Colo.; J. W. Coffey, Colorado Springs; C. S. King, Colorado Springs; Bowen & O'Brien, Pueblo; Ed Connelly, Denver; Frank L. Smith, Denver; D. D. Sullivan, Denver.

Stake 2, 2:20 Trot—W. A. Clark, Jr., Butte, Mont.; B. F. A. Fleming, Denver; A. S. Donaldson, Denver; Bowen & O'Brien, Pueblo; Geo. H. Estabrook, Denver; J. A. Richardson, Boise; Eclipse Livery Co., Pueblo; Edwin Gaylord, Denver; W. G. Durfee, Los Angeles; J. De La Montanya, San Francisco, Cal.; Ivy Enloe, Trinidad, Colo.; E. A. Colburn, Denver; Sam Bush, Denver.

Stake 20, Two-Year-Old Trot—W. A. Clark, Jr., Butte; Walter Cummings, Denver; Frank Mann, Denver; Thos. Stark, Colorado Springs; W. G. Durfee, Los Angeles; J. G. Cuicello, San Francisco; E. A. Colburn, Denver.

Stake 14, 2:24 Trot—D. D. Streeter, Denver; Ivy Enloe, Trinidad; J. De La Montanya, San Francisco; J. W. Miller, Colorado Springs; J. A. Richardson, Boise; Geo. H. Estabrook, Denver; Sam Bush, Denver; E. A. Colburn, Denver; E. G. Davis, Colorado Springs; Joe Gavin, Denver; Bowen & O'Brien, Pueblo; S. S. Bernard, Colorado Springs; W. A. Clark, Jr., Butte; B. F. A. Fleming, Denver; A. S. Donaldson, Denver; W. Cummings, Denver.

Will This Rule Be Enforced?

One of the several rules passed at the winter meeting of the National Trotting Association was in regard to entries, and, if it is enforced, it will do much good. Nowadays, or, rather, in the past, entries were made in a slipshod manner, in many instances the name of the horse and the trainer only being given. The new rule reads as follows:

"All entries must be made in writing and within the time appointed for closing, signed by the owner or authorized agent; they must be addressed or forwarded according to conditions published or deposited with the secretary or other person's authorized to receive them. The entry shall give the name and address of the said agent; also the name and color of the horse, whether a stallion, mare or gelding; the name of the sire and dam, if known." A fine of not less than \$5 nor more than \$50 is the penalty not complying with the rule. This rule will also do away with telephone and verbal entries. The question is, will the rule be enforced?—*Rider and Driver.*

One of the most improved horses in form over last year is the trotter Jack Wilkes 2:21½, by Guy Wilkes 2:15½, in Doc Tanner's stable at Cleveland. He has grown, filled out and looks in prime condition. At the early meetings around Cleveland last year he was one of the contending horses against Creoline 2:16½, The General 2:18½, Caspian 2:07½ and Dan 2:19½. All of the above horses taking their records last year. He had but little work before his first start. Taking it all together he showed the quality of a big class horse. He is owned by W. P. Murray, who bred and raised him.

Strike!—If they don't give you Jackson's Naps o'da when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
 April 1-Nov. 1—Trout season open.
 April 23—Saturday Contest No. . . Classification Series, Stow Lake, 2:30 P. M.
 April 24—Sunday Contest No. 5. Classification Series, Stow Lake, 10 A. M.
 July 1-Jan. 1—Open season for black bass.
 Aug. 15-April 1—Open season for lobsters and crawfish.
 Nov. 1-Sept. 1—Open season for crabs.
 Sept. 1-May 1—Open season for eelrump.
 Sept. 10-Oct. 15—Close season in tidewater for steelhead.
 Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

May—Capital City Blue Rock Club. Agricultural Park Sacramento.
 May 6, 7, 8—Los Angeles Gun Club. 16th semi-annual blue rock tournament.
 May 8—Union Gun Club. Blue rocks. Ingleside.
 May 8—Empire Gun Club. Blue rocks. Alameda Point.
 May 19—Golden Gate Gun Club. Blue rocks. Ingleside.
 May 22—Millwood Gun Club. Blue rocks. Mill Valley.
 May 29, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.
 June 1—California Wing Club. Live birds. Ingleside.
 June 1—College City Gun Club. Blue rocks. North Berkeley.
 July 1-Feb. 15—Dove season open.
 Nov. 1-July 15—Deer season closed.
 Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
 Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

May 4, 7—Southwestern Kennel Club. Los Angeles. P. K. L.
 Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas. Mortimer, Superintendent.
 Oct. 5, 8—Spokane Kennel Club. Spokane, Wash. W. K. L.
 Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.

AT THE TRAPS.

The Union Gun Club regular monthly shoot is the program for to-morrow at Ingleside.

The Empire Gun Club shot for April will take place to-morrow at Alameda Point.

A feature of the Golden Gate Gun Club shoot at Ingleside will be a big merchandise prize event.

The three-day blue rock tournament of the Los Angeles Gun Club which commenced yesterday is attended by a large number of shooters. Hip Justine, a well-known local sportsman, and W. H. Seaver, another local devotee of the sport, are present at the shoot.

A big blue rock tournament will take place at Sacramento about the end of the present month.

Sixteen shooters attended the May shoot of the California Wing Club on the 1st inst. In the regular club race at twelve pigeons M. O. Feudner, P. J. Walsh and C. D. Lang each scored straight and divided the first three moneys of the \$75 club purse, the balance was split between the men in the eleven hole—Nauman whose eighth bird, a dark colored ground skimmer, got away; E. Klevesahl's third bird had the very bad taste to drop on the wrong side of the fence. Dr. McConnell also had the bad luck to lose a bird, the seventh, over the fence. W. J. Golcher, who had a string of thirty-nine straight for the day, saw his hard hit ninth bird go over the boundary line. Lester Wood, Clarence Sylvester and Clarence A. Haight closed up the roll of shooters who each lost one bird.

Six bird pools as usual followed the club event, among the winning guns on straight scores were: W. J. Golcher, M. O. Feudner, C. D. Lang, Dr. E. G. McConnell, Dr. A. T. Derby, Mr. Schockley and Frank Turner in one match. A. M. Shields, C. C. Nauman, Lang, Golcher, and P. J. Walsh in another race. Nauman and Derby were high guns in the third pool. In the closing pool for the day Shields, Turner, Golcher, Haight and "Billy" Hansen of Pinole scored straight. The same handicaps prevailed in the pool shooting as were imposed in the club shoot.

A summary of scores and handicaps follows:

Club race, 12 pigeons, \$75 added, distance handicap—M. O. Feudner 32 yards, 12; C. C. Nauman 33 yards, 11; E. Klevesahl 27 yards, 11; P. J. Walsh 29 yards, 12; A. M. Shields 27 yards, 10; Dr. A. T. Derby 30 yards, 11; "Slade" 30 yards, 11; Edward Donohoe 31 yards, 10; E. G. McConnell 30 yards, 11; W. J. Golcher 28 yards, 11; W. E. Muddock 29 yards, 10; Lester Wood 29 yards, 11; C. A. Haight 28 yards, 11; C. D. Lang 26 yards, 12; W. Hanson 28 yards, 8; C. Sylvester 31 yards, 11.

Six bird pool, \$2.50 entrance, distance handicap—P. J. Walsh 4, C. A. Haight 4, W. J. Golcher 6, M. O. Feudner 6, Edward Donohoe 3, Lang 6, Dr. E. G. McConnell 6, "Slade" 5, Derby 6, E. Turner 6, Hanson 5, Schockley 6.

Six bird pool—F. Turner 3, C. Nauman 6, McConnell 5, Derby 4, Shields 6, Lang 6, Golcher 6, Donohoe 4, Haight 5, Walsh 6, Hanson 5.

Six bird pool—Donohoe 3, Hanson 5, Derby 6, McConnell 5, Haight 5, Shields 6, Turner 4, Nauman 6.

Six bird pool—E. Donohoe 3, A. M. Shields 6, M. O. Feudner 5, Frank Turner 6, P. J. Walsh 5, Dr. McConnell 5, W. J. Golcher 6, C. A. Haight 6, Schockley 5, Lang 4, Hanson 6, C. Nauman 5.

At the Washington Gun Club shoot at Sacramento last Sunday, O. Herold was high gun. The following scores were made:

Ten targets—Peek 7, 7, 5, 6, 4; Weldon 5, 3, 6; F. Brown 3; Adams 8, 6; Reichert 7, 5; Trumpler 3; Herold 7, 7, 9; G. Smith 2; Johnston 6, 5; Hughes 7, 5; Kuchler, 5, 4; Hagerty 7; F. Gray 4, 6; A. Gray 3, 1.

Fifteen targets—Peek 10; Adams 12; Ruhstaller 14; Hughes 10, 10, 9; J. E. Brown 4, 8; Johnston 6; B. Brown 6; Kuchler 8; Trumpler 11; Herold 10, 11; Just 7, 10; Ludden 5; Weldon 6; G. Smith 9.

Twenty-five targets—Peek 17; Reichert 14; Hughes 17; Johnston 13; Weldon 14; Adams 16; Peek 17; Reichert 16; Kuchler 8; Just 16; Ruhstaller 16; Herold 21; Hagerty 16; Trumpler 12; G. Smith 20; Hughes 17; Perkins 14; B. Brown 8, F. Brown 16; Just 12.

At the Colusa shoot recently, Mr. C. Baird, an armless shooter, gave a truly wonderful exhibition of shooting, breaking both singles and doubles with a skill equal to that of some of the best shooters who had two arms. He broke 21 out of 25 singles—22 it was claimed by several.

His left arm is off at the elbow and but the stump of the right is left; notwithstanding, with the aid of a harness about his shoulders, neck and body and with an auxiliary device attached to his "pump gun" he can do some very good shooting. He holds the gun at the left breast, works the lever with the left arm and pulls the trigger by a string attached to the movable stump of his right arm. His work with a gun should be seen to be appreciated, for it is indeed a clever performance under such an unfortunate handicap.

DOINGS IN DOGDOM.

In our notes on the 'Frisco show we inadvertently mentioned Newmarket Queen, instead of Mr. F. E. Watkins' (of Portland) Newmarket Beatrice as first novice Bull Terrier bitches. The correct notation, however, was listed in the regular awards.

The Gordon Setter McKinley, owned by J. H. W. Muller, was, it is claimed by Mr. Muller, the dog Dick, entered by Mrs. A. A. Roi in the late Frisco show. The dog was purchased for \$50 by Mr. Roi of Mr. E. Attridge, for Col. Park Henshaw of Chico. Mr. Muller claimed the dog at the show and instituted legal proceedings for the recovery of his dog. No blame whatever has been imputed to either Mr. or Mrs. Roi in the transaction.

A. K. C. Stud Book, Volume 20, 1903 is now ready and is a much larger book than any other in the series. There are nearly 7000 pedigrees, besides the official records of winnings at recognized A. K. C. shows, kennel names and prefixes, etc.

The American Kennel Club will hold a regular meeting of delegates, in New York, on May 20th.

Portland held the initial Western Kennel League show.

W. K. L. shows, we believe, are making a mistake in having classes for "pit" Bull Terriers, which are neither one thing nor another and could not be developed into a breed of standard and type.

The practice of receiving bitches with litters of puppies should be discouraged. No sensible fancier with valuable puppies would think of risking such a sure chance for loss.

We are inclined to guess that the genius who compiled the Portland catalogue might be an excellent baker for he is an adept in mixing things.

The marked edition was an original gem in its way, the winning numbers being noted in a four page insert at the back of the first edition. Letter awards were ignored entirely, the breeds noted under captions, the winners listed by class, the order taken seriatim by number and followed by a jumble of any old way awards.

Los Angeles show opened on Wednesday with a record entry for a southern California show. The show has a strong following and will be a success. Thursday night was a society function, "patronesses' night." The attendance was large and enthusiastic and enlivened by a brass band.

But few dogs were sent down from this city. A number of Santa Clara fanciers, however, are present with a fair string of dogs.

Ravenswood will probably be the Collie winner, for the Glen Tana string were sent north this week.

The marked resemblance of Edgecote Peer to Ch. Woodcote Wonder is the bit of gossip going the rounds of the Bull Terrier circles. If there ever was a more typical looking Woodcote Wonder puppy among the number to be seen on the Coast now it is doubtful. "Very odd, that Bloomsbury Baron could get, out of all of his puppies here, only one such a Wonder looking puppy." Peer's age is not given in the catalogue (it was stated "variously" to different inquiries)—he looks like a 14 or 18 months old one. Another strong reminder of "Ben" is Peer's voice—its resemblance to that of the old champion is so strong that if one were looking in another direction, not knowing that Peer was tuning up, he would almost swear that Ben was barking. This, by the way, is a noticeable trait the old dog has left with many of his progeny.

A subscriber, from the northern part of this State writes us:

"We are informed that there are some Bloodhounds on the Pacific Coast somewhere—the old-fashioned trailing Bloodhounds, such as were used in the South to trail negroes and criminals. We are in the market for one or two of these dogs, but do not know where to find them. Any information in this line will be highly appreciated."

Yes, several years ago there were a few good specimens of the breed bred here, but we have lost track of the breeders. We believe they were not encouraged. The type of "Bloodhound," as he usually goes on the Coast, is generally a non-descript crossbred—many of these dogs are said to be good game and varmint trailers, but as for their man-trailing qualities they have invariably proven merely useless impediments to a sheriff's posse or whenever put down on a human trail, for the trail had invariably to be pointed out to these "man trailers."

We saw two "Bloodhounds" at the last 'Frisco show. They were so good that the judge withheld all awards. As neither a negro or a criminal were available to try out their trailing abilities we can not say what they were good for. One was owned by a sheriff and has a great reputation for "trailing" in its own town, the other dog was listed for sale at \$200. What he is worth now we do not know.

It is now up to the Coast Bloodhound owners to give us a little information as to what they can offer, before we place an order with an Eastern or English breeder.

San Jose Show.

The Garden City show last week was a very successful small show; for its 157 entries it was the best we have ever attended, quality was there to a degree. Quite a number of dogs from this city were entered and the attendance of local lights of dogdom was strong. Frank L. Turner's decisions were satisfactory, without possibly a single exception. J. Bradshaw's work with the Fox Terriers was cut out for him for it was Wandee Kennels all the way through, and Lomas put his dogs down in unexceptional condition—Coastguard taking special for best against half a dozen or more that were toppers in their breed—Glen Tana Marquis, Cole's Black Prince, Oregon's Jessie, Mason's King, Ch. Ellore, Portland Kid, etc.

Among the holy ones Alta Chevalier led a small but good entry. In Great Danes Ruy Blass was put over Rupert by a shade; Princess Harlequin would have taken the tri-color in a far larger class. Greyhounds were few but good. Pointers were a nice lot, Mason's King is a dog full of character and substance, a Pointer from the ground up and as stylish and merry an actor as one could wish to see. He won the most valuable cup in the show, the Game Protective Association's trophy. King will give any Pointer on the Coast a good run. Oregon's Jessie smothered the bitch competition, although Sister Glenheigh G., Glen Ada and Pony G. can go a bit too. Punch is a cracking good puppy, just a trifle coarse in head.

English Setters were a quality lot. Black Prince over Count Rego by a small margin was proper, Rego was out of gear and show worn, Prince can beat him at his best however. Both are high class dogs. Wad, good as he is, had no chance in this company. Buck is a good puppy that will improve. Ch. Ellore and Ch. Pera winners are well known henchers. Feathers and Belle-Mark are two excellent young hitches full of quality.

Cockers were good throughout. Jeff, black, winners, is a well set, strong boned, beautifully coated dog with the right head and ears. Nig, reserve, good now and will be better. Duke Roy was easily disposed of. Brownie, Portland Twinkle and Maxine, a trio of familiar reds. Portland Kid and Bud Zuns followed in circuit position. Pattern was alone. These three make up a line of nine Cockers that would be a credit to any show.

Glen Tana Marquis would probably have ranked Old Hall Admiral had they come together. He is a handsome tri-color with a royal coat, clean, strong head and proper ears. In bone he is strong and compact, well rounded ribs and a set up that is right. He is a larger dog than usually seen here and has undoubtedly set up a type standard for the breed out here. Bo Peep is a bitch that is better boned than most good dogs. In head, ears and front she is a sweet bitch, she too is a bit on the larger but preferable size. Ravenswood was sadly out of coat and somewhat circuit worn, but good a dog as he is, he is never within reach of Marquis. Hanover Monarch looking well could not get higher in his company. He was entitled to his special, for best in county however. The Collie showing, tho' small, was one of the best we have seen for years. The puppy classes were very good.

Bull Terriers were few and a rather good lot. Cole's Pansy Blossom is a neat all round bitch. Woodcote Imp and Englewood were the quality of the dog entries.

In other breeds, several good Bulldogs, an Irish Terrier bitch Rose of Killarney, two good Bostons and a number of small dogs filled out a show that crowded the hall to its capacity.

The benching was under the supervision of Spratts representative, Mr. Thomas Banks, and was, as usual, very satisfactory. The show officials made hosts of friends and ran things smoothly and pleasantly.

AWARDS.

ST BERNARDS (rough coats)—Novice dogs—1

Mrs A S Olney's Teddy Roosevelt, 2 Mrs A Lueck's Argan, 3 R C Smler's Rex I, res Oakland St Baroed Kennels' King Lion. Limit dogs—1 Mrs Teresa M Malonsy's Alta Chevalier, 2 Miss Clara Moffat's Gothard. Open dogs—1 Alta Chevalier, 2 Tsasseldown Kennels' Ralph's Nim. Winners, dogs—1 Alta Chevalier, res Teddy Roosevelt. Limit bitches—1 Oakland St Bernard Kennels' Queen Bess B, 2 Mrs A Lueck's Cascade. Open bitches—1 Oakland St Bernard Kennels' Lady Melba. Winners, bitches—1 Queen Bess B, res Lady Melba.

ST BERNARDS (smooth coats)—Open dogs—1 Col A K Whittan's Oak Glen Rex.

GREAT DANES—Limit dogs—1 John L Cunningham's Cunningham's Ruy Blas. Open dogs—1 Belvedere Kennels' Rupert of Hentzau. Winners, dogs—1 Cunningham's Ruy Blas, res Rupert of Hentzau. Novice bitches—1 Belvedere Kennels' Fanny. Limit bitches—1 Belvedere Kennels' Princess Harlequin. Winners, bitches—1 Princess Harlequin, res Fanny.

GREYHOUNDS—Open dogs—1 S E Portal's Oberon. Winners, dogs—Oberon. Limit bitches—1 W H Carmichael's Hesper. Open bitches—1 S E Portal's Rainier. Winners, bitches—1 Rainier, res Hesper.

POINTERS—Puppy dogs—1 Dr A M Barker's Punch. Novice dogs—1 Griffith & McDougall's Tick, 2 Alfred C Eaton's Moon. Limit dogs (under 55 pounds)—1 E B Wastie's Brassy Mack, 2 Moon. Open dogs (under 55 pounds)—1 Brassy Mack, 2 Wm Gall's Gall's Star. Open dogs (55 pounds and over)—1 H M Pabst's Mason's King, 2 A E Sbumate's Vic, 3 Dr Irvin N Frasse's Jos D. Winners, dogs—1 Mason's King, res Tick. Puppy bitches—1 Frank Monroe's Nell, 2 Dr A M Barker's Judy. Limit bitches (under 50 pounds)—1 J Daniels' Oregon's Jessie, 2 Wm Gall's Pony Gae. Open bitches (under 50 pounds)—1 Oregon's Jessie, 2 Wm Gall's Glen Ada. Open bitches (50 pounds and over)—1 Wm Gall's Sister Glenbeigh G. Winners, bitches—1 Oregon's Jessie, res Glen Ada.

ENGLISH SETTERS—Puppy dogs—1 C L Griffith's Buck, 2 A L Haskell's Rodrigo, 3 Dr C H Hervey's Duke of Kent. Novice dogs—1 James Cole's Cole's Black Prince, 2 C D Carman's Wad. Limit dogs—1 L G Wilson's King Cole, 2 Wad. Open bitches—1 F P McConnell's Count Rego, 2 Wad, 3 Geo Oswalde's Iroquois Boy. Winners, dogs—1 Cole's Black Prince, res Count Rego. Puppy bitches—1 C L Griffith's Belle Mark, 2 Same owner's Feathers. Open bitches—1 John W Riplinger's Ch Ellore, 2 Same owner's Ch Pera, 3 T P McConnell's Tirphsils Judith. Winners, bitches—1 Ch Ellore, res Ch Pera.

IRISH SETTERS—Novice dogs—1 Eghert C Georges' Stelway Jack. Limit dogs—1 Stelway Jack. Open dogs—1 B W Lorigan's Emerald, 2 Stelway Jack. Winners, dogs—1 Emerald, res Stelway Jack.

CLUMBER SPANIELS—Open dogs—1 George D Boyd's Beach Grove Dick.

DALMATIANS—Open dogs and bitches—3 Lick Livery and Hack Co's Nellie.

FIELD SPANIELS—Limit dogs and bitches—1 J C Berret's Van, 2 Mrs Jack W Matthews' Rastus. Open dogs and bitches—1 S B Bogart's Bob. Winners, dogs and bitches—1 Van, res Bob.

COCKER SPANIELS (black)—Puppy dogs—1 Miss Iz-z-M Martin's Nig. Novice dogs—2 Donald Mackenzie's Dhu, 3 F A Bogart's Bob Joe. Limit dogs—1 R G Gamwell's Duke Royal. Open dogs—1 Mrs C M Barker's Jeff, 2 Duke Royal. Winners, dogs—1 Jeff, res Nig. Novice bitches—3 Mrs C L Southgate's Belle Creole. Limit bitches—1 Teaseldown Kennels' Mill Girl. Winners, bitches—1 Mill Girl, res Hazel Barton.

COCKER SPANIELS (parti-color)—Open dogs—1 Portland Cocker Kennels' Portland Kid, 2 Mrs C W Sharples' Bud Zantz. Winners, dogs—1 Portland Kid, res Bud Zantz. Open bitches—1 Mrs C W Sharples' Pattern.

COCKER SPANIELS (red)—Novice dogs—A Wolfen's Brownie. Winners, dogs—1 Brownie. Novice bitches—3 Donald Mackenzie's Dainty. Open bitches—1 Portland Cocker Kennels' Portland Twinkle, 2 Mrs C M Barker's Maxine. Winners, bitches—1 Portland Twinkle, res Maxine.

COLLIES—Puppy dogs—1 Mrs D J Mercer's Mountain Duke, 2 Mrs A K Whittan's Oak Glen Teddy. Novice dogs—1 Mountain Duke. Limit dogs—1 Arthur Lett's Ravenswood, 2 O J Albee's Ormskirk Surprise. Open dogs—1 Ravenswood, 2 Miss Della Beach's Ch Hanover Monarch, 3 O J Albee's Imp Cheviot Construction. Winners, dogs—1 Ravenswood, res Ch Hanover Monarch. Local dogs—1 Mrs O J Albee's Brookmere Charlie, 2 J A Moreland's Don M III, 3 J C Berret's Sir Norman. Novice bitches—1 Miss Della Beach's Tranwyn Tip Top. Limit bitches—1 Thos Griffith's Rippowam's Bo Peep, 2 O J Albee's Ormskirk Duchess. Winners, bitches—1 Rippowam's Bo Peep, res Tranwyn Tip Top. Local bitches—1 O J Albee's Ormskirk Ora, 2 Miss E. Buck's Ursula, 3 Miss E. Buck's Maxine.

COLLIES (tri-color)—Novice dogs—1 Mrs O J Albee's Brookmere Charlie, 2 J A Moreland's Don III. Limit dogs—1 Thos Griffith's Glen Tana Marquis, 2 Don M III. Open dogs—1 Glen Tana Marquis, 2 Don M III. Winners, dogs—1 Glen Tana Marquis, res Brookmere Charlie. Puppy bitches—1 O J Albee's Astrologer Live Oak. Novice bitches—1 Astrologer Live Oak. Winners, bitches—1 Astrologer Live Oak.

BULLDOGS—Open dogs—1 Mrs Chas Harley's Ivel Damon. Winners, dogs—1 Ivel Damon. Limit bitches—1 Charlescomb Kennels' Her Majesty. Open bitches—1 Chas Harker's Madam Chaddy. Winners, bitches—1 Charlescomb Kennels' Her Majesty, res Madam Chaddy.

BOSTON TERRIERS—Limit dogs—1 Richard Jones's Boston Jack. Open dogs—1 Boston Jack. Winners, dogs—1 Boston Jack. Novice bitches—1 James Cole's Biddy. Open bitches, withheld. Winners, bitches—1 Biddy.

FOX TERRIERS (smooth coated)—Puppy dogs—1 Chas K Harley's Wandee Smasher, 3 Miss F Hinks'

Teddy. Novice dogs—1 Wandee Smasher, 3 Mr Nash's Sharkey. Limit dogs—1 Chas K Harley's Wandee Result. Open dogs—1 Wandee Result, 3 Sharkey. Winners, dogs—1 Wandee Result, res Wandee Smasher. Local dogs—1 Dr Nash's Sharkey. Puppy bitches—1 Chas K Harley's Wandee Snow Girl. Novice bitches—1 Chas K Harley's Wandee Sprite, 2 E S Smith's Queen. Limit bitches—1 Wandee Sprite. Winners, bitches—1 Wandee Sprite, res Wandee Snow Girl.

FOX TERRIERS (wire hairs)—Puppy dogs—1 H M Pabst's Cosmos Bristles. Novice dogs—1 Chas H Harley's Wandee Buck Up. Limit dogs—1 Wandee Buck Up. Open dogs—1 Wandee Buck Up. Winners, dogs—1 Wandee Buck Up, res Cosmos Bristles. Novice bitches—1 Chas K Harley's Wandee Worry. Limit bitches—1 Wandee Worry, 2 J Redelsheimer's Cold Stuff. Open bitches—1 Wandee Worry, 2 Cold Stuff. Winners, bitches—1 Wandee Worry, res Cold Stuff.

BULL TERRIERS—Novice dogs—Mrs Chas Jackson's Woodcote Imp, 2 H Reed's Ludwig. Limit dogs—1 W C Bogen's Englewood, 2 Ray Starbird's Sport. Winners, dogs—1 Woodcote Imp, res Englewood. Novice bitches—1 W C Bogen's Silkwood Venus, 2 Geo Broderick's Luna, 2 F Griffing's St Louis Princess. Limit bitches (30 pounds and under)—1 Jas Cole's Pansy Blossom, 1 J S Eastland's Naughty Nan. Limit bitches (under 30 pounds)—1 Jas Cole's Fanny Davenport. Open bitches (30 pounds and under)—1 Naughty Nan. Open bitches (over 30 pounds)—1 Silkwood Venus, 2 F E Watkins' Newmarket Baby. Winners, bitches—1 Pansy Blossom, res Silkwood Venus.

FRENCH BULL DOGS—Open dogs and bitches—1 L Guglielmoni's Boulette.

DACHSHUNDES—Limit dogs—1 Mrs C Spencer's Dude.

PUGS—Open dogs and bitches—1 Miss Constance Hoag's Muggins, 2 Dr Freeman's Duks. Winners, dogs and bitches—1 Muggins, res Duke.

SPITZ—Open dogs and bitches—1 Harry Miller's Doc.

IRISH TERRIERS—Novice bitches—1 J C Barret's Tyrone Lass. Limit bitches—1 Dresser & Simpson's Lady Powers. Open bitches—1 H M Pabst's Rose of Killarney. Winners, dogs and bitches—1 Rose of Killarney, res Tyrone Lass.

SPECIAL AWARDS.

St Bernards—Best (R C or S C) in show, Mrs Teresa M Malonsy's Alta Chevalier, res Oakland St Bernard Kennels' Queen Bess B. Best from Santa Clara county Col A K Whittan's Oak Glen Rex, res R C Smler's Rex I.

Great Danes—Best in show, Belvedere Kennels' Princess Harlequin, res John L Cunningham's Ruy Blas. Best of opposite sex, Ruy Blas. Best pair, Belvedere Kennels' Rupert of Hentzau and Princess Harlequin.

Greyhounds—Best in show, S B Portal's Oberon. Same owner's Rainier. Best of opposite sex, S E Portal's Rainier.

Pointers—Best in show, H M Pabst's Mason's King, res J Daniel's Oregon's Jessie. Best of opposite sex, Oregon's Jessie. Best puppy, Dr A M Barker's Punch, res Frank Monroe's Nell.

English Setters—Best in show, James Cole's Cole's Black Prince, res John W Riplinger's Ch Ellore. Best of opposite sex, Ch Ellore. Best in puppy classes, C L Griffith's Belle Mark, res Same owner's Buck.

Irish Setters—Best in show, B W Lorigan's Emerald. Best from Santa Clara county, Emerald.

Field Spaniels—Best in show, J C Berret's Van, res S B Bogart's Bot. Best from Santa Clara county, Van. Best in limit, Van.

Cocker Spaniels—Best in show, Portland Kennels' Portland Kid, res Mrs Bar er's Jeff. Best of opposite sex Portland Kennels' Portland Twinkle. Best in novice classes A Wolfen's Brownie, res Donald Mackenzie's Dainty. Best parti-color, Portland Kennels' Portland Kid. Best in local classes, W F Hamby's Toto, res Peter E Col's Tip. Best owned by a lady, Mrs C M Barker's Jeff, res Mrs Sharples' Pattern. Best in puppy classes, Miss Inez Martin's Nig.

Collie specials—Best in show, Thos S Griffith's Glen Tana Marquis, res Arthur Lett's Ravenswood. Best of opposite sex, Thos S Griffith's Rippowam's Bo Peep. Best bred on Pacific Coast, Mrs O J Albee's Brookmere Charlie, res O J Albee's Ormskirk Duchess. Best in novice, Brookmere Charlie, res Mrs Mercer's Mountain Duke. Best owned by a lady, Miss Beach's Ch. Hanover Monarch, res Mrs Albee's Brookmere Charlie. Best tri-color, Thos S Griffith's Glen Tana Marquis, res 1 J Albee's Astrologer Live Oak. Best local dog, Mrs Albee's Brookmere Charlie. Best local bitch, Ormskirk Ora.

Bulldogs—Best Bulldog in show, Mrs Charles K Harley's Ivel Damon. Best of opposite sex, Charlescomb Kennels' Her Majesty of Charlescomb.

Bull Terriers—Best Bull Terrier in show, Jas Cole's Pansy Blossom. Best of opposite sex, Mrs Chas Jackson's Woodcote Imp. Best local, W C Bogen's Silkwood Venus. Best in novice class, Silkwood Venus.

Boston Terriers—Best in show, Richard Jones's Boston Jack.

French Bulldogs—Best in show, L Guglielmoni's Boulette.

Fox Terriers—Best in show, Chas K Harley's Wandee Coastguard. Best of opposite sex, Wandee Sprite. Best from Santa Clara county, J C Barret's Corrine.

Dachshunds—Best in show, Mrs Spencer's Dude.

Pugs—Best in show, Miss Constance Hoag's Muggins, res Dr Freeman's Duke.

Spitz—Best in show, Henry Miller's Doc.

Irish Terriers—Best in show, H M Pabst's Rose of Killarney. Best from Santa Clara county, Tyrone Lass.

Best dog or bitch owned in Santa Clara county, Mss Della Beach's Ch. Hanover Monarch, res W C Bogen's Englewood.

Best, of any breed, in the show, Wandee Kennels' Wandee Coastguard, res H M Pabst's Mason's King.

Portland Show.

The Oregon show was a well patronized affair despite inclement weather. Nearly 250 entries were on the card for Mr. Mortimer, who went through the classes in a well received style. Pointers seem to have been the quality breed of the show. Fox Terriers were also good—both northern dogs and visitors including the Wandee string. Glen Tana Kennels carried everything in Collies. Bonnybred Stiletto leading the Bull Terriers. The Terrier breeds were all well represented.

AWARDS.

ST. BERNARDS (rough coats)—Puppy dogs—1 Mrs L D Henderson's Colonel. Limit dogs—1 Mrs E A Baldwin's King Harold, 2 A Mathews' Sampson, 3 Colonel, v h c C B Myers' Jack. Open dogs—1 S Siebels' Colonel, 2 King Harold, 3 Jack. Winners, dogs—1 S Siebels' Colonel, res King Harold.

Sig Sichel cup for best Dachsund, dog or bitch, Wanda Van Jaegerhaus, Jeanie Williams Kerr.

L Q Sweetland cup for best Deerhound, dog or bitch, Nellie, S L Elliott.

Trade Notes.

At the blue rock shoot of the Golden Gate Gun Club, held at Ingleside on Sunday, April 17th, out of 34 contestants, 30 used Union Metallic Cartridge Company's shells, 3 Winchester and one Peters' make.

At the recent shoot of the Washington Gun Club of the 23 shooters participating, 12 used U. M. C. "Monarch" shells, 2 used U. M. C. "Majestic" shells, 1 (the medal winner) used U. M. C. "Magic" shells, 5 used Winchester "Leader" shells and 3 used Winchester and U. M. C. shells.

Over at Paducah, Ky., where there is located one of the finest gun clubs in this whole great country of ours, W. A. Davis killed 20 birds straight on April 7th, winning first place. Mr. Kennedy, however, took the club medal, killing 25 out of 26. Both shooters used U. M. C. shot shells.

T. E. Hubby has been winning a string of high averages in Indian Territory, Oklahoma and Texas. At Nocona on the 6th he broke 97%, at McLoud, Ok., on the 9th he broke 90%, at Ardmore on the 12th he broke 95%, and at Paris on the 14th he broke 94%. He is shooting the U. M. C. shells.

C. B. Adams, better known as "Pat" to his friends, stopped over in Bristol on his way to Iowa to shoot at the Interstate Shoot there on April 6th and 7th. He succeeded in breaking 366 out of 400 targets. Mr. Adams used the U. M. C. shells.

M. E. Hensler broke 94 out of 100 at Demopolis, Ala., April 5th, and 93 out of 100 at Tuscaloosa, Ala., April 6th. These scores were also made with the U. M. C. shells.

Winchester goods made their usual good showing at the fifth annual blue rock tournament of the Pastime Gun Club, which was held at San Diego, Cal., on the 16th and 17th inst. Mr. J. E. Vaughan, of Los Angeles, shooting Winchester "Leader" shells made the high average of the tournament. Mr. J. A. Gibson, of Nordhoff, shooting Winchester "Leader" shells captured the prize for the longest run of consecutive breaks, while Mr. C. B. Monaghan, of Santa Ana, shooting a Winchester "pump" gun, won the handsome "Jenks" trophy.

The rifle target presented in this issue of the BREEDER AND SPORTSMAN, which, of course, is reduced from the original size, was made at 100 yards with a Savage 22-caliber repeating rifle, using the long rifle cartridge. The target is an excellent one, not only demonstrating steady holding of the rifle by the shooter, but also the good qualities of the rifle and ammunition. The Savage-22 is a good sporting arm to use on small game, for, as shown by this target, it shoots accurately when pointed right.

Mr. C. O. Le Compte, of Eminence, Ky., will on May 1st become a shooting representative of the Laflin & Rand Powder Co. Mr. Le Compte has been known as one of the most prominent amateurs in this country, and will unquestionably make hosts of friends in his new capacity.

At Lexington, Ky., Mr. Robt. R. Skinner broke 49 out of his first 50, and then broke 71 out of 75. Mr. Skinner is loud in his praises of the Parker Gun, and is a shooter of considerable ability.

At the Hercules Gun Club live bird shoot at Pinole, April 24th, 22 out of 23 shooters used the Union Metallic Cartridge Company's shells, "Magic," "Monarch," and 8 used Remington shot guns.

The longest run on live birds was made with the U. M. C. "Magic" shells by Mr. F. J. Moore, of Pinole, Cal., who killed straight up to his 33rd bird, W. J. Golcher of San Francisco killed straight up to his 24th bird. Mr. F. J. Moore shot the "Pattern" load of the California Powder Works. W. J. Golcher shot the California Powder Works' "Peerless."

At the Millwood Gun Club shoot at Mill Valley, April 24th, out of 16 contestants 12 used the U. M. C. "Magic" and "Majestic" shells. The best score of the day was made by Mr. R. H. Van Norden with a score of 19 out of 20, using the U. M. C. "Majestic" shells.

Another shooter who has been demonstrating the reliability of Winchester "Leader" shells is Mr. J. M. Hawkins of Baltimore. At Durham, N. C., April 15th, he broke 99 out of 100 and 147 out of 150 targets. At Raleigh, April 17th, he scored 97 out of 100, and at Wilson, N. C., April 23d, he reached the climax by breaking 100 targets straight. To drop but six targets out of 350 at but in three different tournaments is surely shooting some.

THE FARM.

A Good Judge of Milk and Cream.

A buttermaker should be a good judge of milk and cream, not only being acquainted with the different flavors contained therein, but he should also be thoroughly informed as to the causes responsible for the production of these flavors. Thus he is enabled to talk intelligently with his patrons and instruct them in caring for the raw material and will also be able to gain their confidence to a marked degree. A buttermaker cannot well afford to neglect the selection of his milk and cream at the weigh room door.

With all classes of stock defective points are more easy of reproduction than more desirable qualities.

The object to be reached in raising early lambs is to mature a fine animal of good size as early as possible.

In nearly all cases, in starting a dairy, it is best to commence on a small scale and gradually increase.

There is no excuse for making poor, strong or white butter, as all conditions are under the control of the dairyman.

A thoroughly docile animal, it matters not what it is, is more easily managed than one that is wild or fractious, and is also more profitable, for it will prove a better grower on the same amount of food and a better producer than the fractious one.

With all classes of stock a variety of food will aid materially to keep them more contented and therefore more thrifty.

Fattening animals should never be allowed to become hungry; nor, on the other hand, should they be fed too heavily.

With all products of the farm one of the best ways of increasing the profits is by lessening the cost of production, keeping in view the fact, however, that this should never be done at the expense of the quality.

Foundered horses are not uncommon. A quart of castor oil will usually relieve the trouble. The dose may be repeated if the howels do not move within a few hours. If he is not foundered the oil will do him no harm.

When giving the horses rest, give them the full benefit of it by having comfortable quarters for them, in which to spend their leisure moments.

No one but the farmer who is forehanded with his work can get the crops in in time. Plan out the work in advance.

When a man so manages that he loses a cow, or a horse, or a pig, occasionally, it is just as much a loss as though he had lost the same amount in money.

A little wood ashes in the salt, or where horses can get at it, is often relished by them. It has a tendency to keep the stomach sweet and in good working order.

Pigs are quite a little trouble, but it pays for farmers to keep them. What they eat is scarcely missed, but it keeps them in good condition, and soon you have a good hog.

Careful horsemen groom their teams as carefully after the day's work is over as before they put the harness on. It removes the dirt and loosens the hair and stimulates the skin.

A mule is a better truck animal than a horse. He will turn in less space, break down less of the crop and step on fewer plants than a horse. He will do better on rough treatment, or rather neglect, than a horse.

Hogs have the largest adaptation of any animal. They will live under almost any conditions, but they will not thrive and grow. Make the conditions congenial and they will more than pay for the extra trouble.

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

The practice of sticking a knife into the paunch in case of bloat is an effective remedy and when carefully and properly done seldom leaves any had results. We have known cases, however, where the wound became infected and left a running sore. Many farmers have learned by experience that loss is frequently incurred by lack of attention when cattle are first turned out to pasture. Young alfalfa is tender and juicy and has too much succulent and water in it; a cow must eat large quantities before the required solid matter is taken. Baking soda is a good remedy, as it combines with gas, thus reducing the pressure. Carbonate of ammonia in doses of three or five drachms is one of the best medicines to give, as it has the same effect as soda, besides being a stimulant to the action of the heart. We know one old fellow who gives two ounces of gunpowder dissolved in water, but this is his remedy. It is necessary to give prompt treatment, as bloat is quick in its results if the animal is not relieved.

As the richness of milk increases the percentage of casein also increases somewhat. The gain is not exactly in the same proportion as the increase in butter-fat, but it is near enough in normal milk to affect the weight of cheese made from it. This has been proved by making a cheese from the same weights of milk testing from one to five per cent fat. Two hundred pounds of six different lots of milk were made into six cheese. Skim milk testing 0.1 per cent fat gave eleven pounds of cheese; 1 per cent 13.4 pounds, 2 per cent sixteen pounds, 3 per cent 18.3 pounds, 4 per cent 21.6 pounds, and 5 per cent 24.8 pounds of cheese.

The churn overrun in a certain creamery for a year is given at 13.14 per cent. This matter of overrun has not been given the amount of attention among creamery men that it really deserved. The standard generally established for butter is about sixteen per cent of water and when butter contains less a creamery is not getting as much as it should for its product. Butter can contain eighteen per cent moisture without apparent injury to its commercial quality, but such goods are not likely to be made in this dry climate.

The early spring chicken makes the good winter layer. The first hens that want to sit may be a little too early, but they will raise the hens that will make the best layers for next winter.

Iowa leads all the States in egg-production, furnishing 100,000,000 dozen a year; Ohio is next with 91,000,000 dozen; Illinois 86,000,000 dozen, and Missouri fourth with 80,000,000 dozen.

The hen that lays the most eggs under good conditions is probably the one, owing to her high strung sensitive condition, who will get on a strike if the conditions are unfavorable.

Poultry to become the largest and fattest should be fed more than three times a day. Their coop should be full most of the time. They should never become very hungry.

When a man so manages that he loses a cow, or a horse, or a pig, occasionally, it is just as much a loss as though he had lost the same amount in money.

An authority on the goat claims that the milk tastes better than cow's milk, is richer and is the ideal milk for invalids and infants.

Let the hens stay on the nest as long as they will while hatching, and do not take the chickens away.

A company with \$1,000,000 capital has been organized in Louisiana to manufacture feed for cattle and horses. It will be composed of low-grade molasses mixed with corn.

Pure bred flocks, kept pure, give the best results. When crossing begins the flock degenerates. The cross seems to breed down rather than up.

The Youngstown, Ohio, Cattle company has bought 10,000 acres of land in the province of Santiago, Cuba, and will establish a ranch there.

When hens are fed too highly, as is often the case when we are anxious for eggs, they will not lay. Try reducing the feed for a while.

The natural food of hens is largely mixed with meat. Unless she has a free range she should have meat or millet.

It has been demonstrated that little or no difference can be made in the flavor of eggs by food given poultry.

Few remedies, if any, are better than coal oil for cleaning the perches and other parts of a hen house.

For Rent. THE STABLES FORMERLY occupied by the late John Cassidy at Point Lobos and 20th avenues; 23 stalls with conveniences. For further particulars call or address. MRS. J. CASSIDY, 3104 Pt. Lobos Av.

BELMONT STABLE SUPPLY CO.
Brooklyn, N. Y.

More than 1,800 head of cattle were killed by hailstones in the storm which swept through the Las Cruces district in the State of San Luis Potosi, Mexico, a few days ago. The corn crop was destroyed.

At a sale of pure-bred polled Durham cattle at Kanona, Iowa, a large number were sold to a South American syndicate for shipment to that country at an average of \$250 each.

We have seen the swill barrel as sour as vinegar, and the hogs seem to enjoy it. It makes them grow. Some think that it is not as good as if the feed is made fresh and sweet every time it is fed.

When there is not an increase in eggs at the time there should be, a slight change in diet, or a dose or two of poultry food may make a difference.

Sober up on Jackson's Napa Soda.

STATE AGRICULTURAL SOCIETY.

STANFORD STAKE OF 1906

TROTTING STAKE FOR FOALS OF 1904.

To be Trotted at the CALIFORNIA STATE FAIR of 1906.

Entries to Close Wednesday, June 1, 1904,

With Geo. W. Tuthill, Sec., at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1903; \$5 November 1, 1903; \$10 June 1, 1905; \$10 June 1, 1906, and \$20 on the tenth day before the first day of the State Fair of 1906. \$300 added by the Society. Mile heats, three in five, to harness. The stakes and added money to be divided 10, 25, 15, and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 65% per cent to the winner, and 35% per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money. Nominatees are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out. The stake is growing in value each year; every breeder should enter in it; it will enhance the value of his colt in case he desires to sell. Your colt entered in the *Occident Stake for 1906* is eligible for entry in this stake.

Remember the date of closing is Wednesday, June 1, 1904.

GEO. W. TUTHILL, Secretary.

SINGMASTER & SONS, OF KEOTA IOWA,
BREEDERS AND IMPORTERS OF
PERCHERONS, SHIRES, BELGIAN AND FRENCH COACH HORSES

Have a Branch Barn at
63 North San Pedro Street, San Jose, Cal.
High-class stock always on hand. It will pay to call and inspect stock if you are in need of a good stallion.
C. O. STANTON, San Jose Manager.

Bad luck usually comes to the stock which are poorly taken care of. Still accidents and misfortunes come to the most careful guarded flocks. Let none find fault with themselves who have done their best.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

A Body Wash

that will take out and prevent colds, pneumonia, etc., is absolutely essential to the race horse owner.

Tuttle's Elixir

will do all of these things better and more surely than any like preparation ever known. As a Leg Wash it keeps the speed of a horse always in perfect tune. Apply to legs and bandage lightly. Sponge the body with it and throw on light blanket.

Tuttle's American Condition Powder—A specific for impure blood and all diseases arising therefrom.

Tuttle's Family Elixir is unrivaled as a remedy in the home.

We send a sample free for 6c in stamps, merely to pay postage.

Send at once for our 100-page book, "Veterinary Experience," which we mail free.

Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal.

Beware of so-called Elixirs—none genuine but Tuttle's.

Avoid all blisters, they offer only temporary relief, if any.

P. O. Box 272, SEATTLE, WASH.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE FOR CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS A TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CURE FOR THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quart, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. F. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c. W. B. Eddy & Co., Whitehall, N. Y.

SPRINGTIME

is the trying period on horses. That's the time when horses suffer most from coughs, colds, tempers, influenza, pinkie, catarrhal fever and all infectious germ diseases. Crafts' Distemper & Cough Cure is the only remedy sold on a cash refund guarantee to cure all these ailments. One bottle, \$1.50 per dozen. Large or breeder's size \$1 per bottle. Booklet "The Horse" free on request. At druggists, or prepaid direct from

(Property of JOHN PARROTT, Esq.)
Imp. Hackney Stallion
GREEN'S RUFUS 63 (4291)
Will serve a limited number of Approved Mares, Season 1904
FEE - - - \$75
Reductions made for two or more mares.
Manager, WALTER SEALY.

PETIGRU 2:10¹/₂ Son of Kingward by Onward (sire of 11 in 2:10) and Lemonade (dam of Bessie Wilton 2:09³/₄, Petigru 2:10¹/₂, Lady Wilton 2:11³/₄ and Lemonee 2:18³/₄). PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities, he cannot be surpassed. FEE \$50.
CORONADO 2:18¹/₄ By the great McKinley 2:11¹/₄ (sire of 8 in 2:10 and 27 in 2:15); dam Jobanna Treat (three-year-old trial 2:17) by Thos. Rysdyk; second dam by Venture, sire of dams of Directum 2:05³/₄ and Sidney Dillon (sire of Lon Dillon 1:58³/₄, world's champion trotter). CORONADO is one of the bandonment of the sons of McKinley. He won five races out of seven starts. FEE \$40.
SILVER COIN 2:11¹/₄ (Record made as a four-year-old in a winning race of five heats against aged horses. Sired by the great Steinway (sire of 4 in 2:10); dam, the fast mare Jenny Mac 2:09 by McKinley 2:11¹/₄. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual. FEE \$40.
Send for card containing tabulated pedigrees and full particulars of above Stallions. Address
W. G. DUFFEE,
Box 96, University P. O., Los Angeles, Cal.

BAYSWATER WILKES 2:25¹/₄ Son of Sable Wilkes 2:18 and Fanny Bayswater, Dam of 2 in 2:30
Sire of KELLY BRIGGS 2:10³/₄
WILL MAKE THE SEASON OF 1904 AT
WOODLAND, CAL. Fee \$40.
BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.
Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.
For cards containing full Pedigree and all particulars address
S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157
Sire of LOU DILLON 1:58³/₄ (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06³/₄ (the fastest mare of 1901), B. S. Dillon 2:16³/₄ and Captivity 2:23³/₄.
SANTA ROSA STOCK FARM
SANTA ROSA, CAL.
SIDNEY DILLON was sired by Sidney 2:19³/₄; dam Venus (dam of Adonis 2:11³/₄, Leah 2:24³/₄, Cypid 2:18 and Juno, the dam of Mercury 2:31 and Ida 2:30) by Venture 2:27³/₄, sire of dam of Directum 2:05³/₄. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.
Terms for the Season, \$100.
Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding equipment of mares, etc., address
FRANK TURNER,
Supt. Santa Rosa Stock Farm,
Santa Rosa, Cal.
Or IRA PIERCE, 728 Montgomery St., S. F.

No. 23444
STAM B.

A Colt Trotter Himself, and His Progeny Perform Early, and the Blood of the Two-Minute Trotters, Futurity and Horse Show Winners can be found in his Veins.
WILL MAKE THE SEASON From Feb. 15 to June 1, 1904, at PLEASANTON
AFTER THAT DATE (by request) AT SALEM, OR.
At \$40 the Season, or \$60 to insure.
For further particulars address
SAMUEL GAMBLE, Pleasanton Cal.
Or TUTTLE BROS., Rocklin, Cal.

NEERNUT 19810 Record 2:12¹/₄ (Sixth Heat 2:14)
Sire of Neeretta 2:09 1-4
NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09³/₄ to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 11333 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana
Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address
GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907
Record 2:20. THE LEADING SIRE ON THE COAST.
Sire of DON DERBY 2:04¹/₄, MUCH BETTER 2:07¹/₄, DERBY PRINCESS 2:08¹/₄, DIABLO 2:09¹/₄, OWVHEE 2:11, etc.
\$50 the Season. Terms: Cash at the time of service. All bills to be paid before the animal is removed.
Pasturage, \$5 per month. Hay and grain, \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. F. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to
OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL

LIMONERO RECORD (3) 2:15³/₄
REG. No. 33389
(A Great Sire of Beauty and Early Speed)
By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10³/₄, Alta Vela 2:11¹/₄, etc., etc.); dam LULANEER (dam of Limonero 2:15³/₄, Blon 2:19³/₄) by Electioneer 125.
LIMONERO 2:15³/₄, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race track. LIMONERO 2:15³/₄ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15³/₄ will make the Season of 1904 at the
AGRICULTURAL PARK, LOS ANGELES.
Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Cal., in care of
HARRISON G. ARMS, J. H. WILLIAMS,
Owner. University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney
KINNEY LOU 2:07³/₄
(Winner of \$11,450 in 1903) Will Make the Season of 1904, to a Limited Number of Approved Mares, at
AGRICULTURAL PARK, SAN JOSE. Service Fee, \$100.
SEASON ENDS JUNE 1, 1904.
KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Stryker 2:15³/₄ and Ned Winslow 2:12³/₄. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.
For further particulars and card containing tabulated pedigree, address
BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION
NEAREST Reg. No. 35562. Record 2:22 1-2.
Sire of ALONE 2:09³/₄, champion 4 y. o. of 1903 (half mile 59³/₄), OUR LADY (trial 2:20³/₄), and full brother to JOHN A. McKERRON 2:04³/₄ (the fastest trotter of the Wilkes family).
Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.
By NUTWOOD WILKES 2:16³/₄, sire of John A. McKerron 2:04³/₄, Who Is It 2:10³/₄, Stanton Wilkes 2:10³/₄, Claudius 2:13³/₄, George B. 2:12³/₄, Bob Ingersoll 2:14³/₄, Tidal Wave 2:13³/₄, and 21 other standard performers.
Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04³/₄, Nearest 2:22¹/₂ and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05³/₄, Direct 2:05³/₄, Direction 2:10³/₄, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 462 sire of Echora 2:23³/₄, (dam of Direct 2:05³/₄) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:23³/₄, sire of Our Dick 2:10³/₄, best stake 2:14³/₄ and others) by Owen Dale, son of Williamson's Belmont.
NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds, well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.
Terms, \$40 for the Season. Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address
Telephone: Red 1431. T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939
Sire of Aristo (3) 2:17³/₄, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years) Black Jack 2:28³/₄ (trial 2:23); The Boquet (4 y. o. trial 2:17³/₄); Mijella 2:29 (4 y. o. trial 2:13³/₄).
Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Fidelita (dam of Fidelite 2:28³/₄, dam of Mary Celeste 2:17³/₄) by Director 2:17; second dam by Reavie Blackbird 2:24; third dam by Lancel, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.
PRINCE ANSEL 2-year-old record 2:20 1-2
Sired by Dexter Prince (sire of Eleata 2:08³/₄, James L. 2:09³/₄, Edith 2:10, etc.); dam Woodflower (dam of Seyler 2:15³/₄) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30³/₄ (dam of Manzanita 2:16, Wildflower (3) 2:21 and 3 producing daughters) by St. Clair 1695. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.
The above horses will make the Season at WALNUT GROVE STOCK FARM.
Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.
ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

I DIRECT 2:12 1-2
(Officially Timed in Race in 2:08³/₄)
SIRE, DIRECT 2:05³/₄, sire of 54 in the list, including Directly 2:34³/₄, Direct Bal 2:04³/₄, Boanle Direct 2:05³/₄, Prince Direct 2:07, Directly Kelly 2:08³/₄, Tribby Direct 2:08³/₄, King Direct 2:09³/₄, Roy Direct 2:10, etc., etc.
DAM, FRANCISCA (dam of I Direct 2:12³/₄, Sable Frances 2:15³/₄, Guyceosa 2:26 and Earl Medium, sire of May Bud 2:13³/₄, Tom Martin 2:14³/₄, Kaaawah Star 2:14³/₄, Lucy Stokes 2:18³/₄, Goneri 2:24³/₄, Pearl Medium 2:29, etc.) by Almont 33.
Second Dam, Frances Breckenridge (dam of Madam Ansel's sire of 3 in list) by Sentinel 2:20; third dam by Bayard 58; fourth dam, Luna by Swigert's Lexington; fifth dam, Eagles by Imp. Glencoe.

THE STANDARD BRED YOUNG STALLION

HIGHLAND

(TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

Apply to or address

BONNIE DIRECT 2:05 1-4

Will serve a limited number of approved mares during the season of 1904. Fee \$100 for the season. The owners of BONNIE DIRECT have at the Pleasanton Track three two-year-olds from his first crop of colts, and three yearlings. These can be seen at any time.

BONNIE STEINWAY, 4 Y.O.

By STEINWAY 2:25½, dam BON BON 2:26 (dam of Bonnie Direct 2:05½, etc.), will serve a few mares during the season of 1904 at \$25 for the season.

Mares bred to either horse not proving to be with foal can be returned in 1905 free of charge, or service fee refunded, at option of owner of mare. Best of care taken of mares, but no responsibility assumed.

Full pedigree of either or both Stallions mailed on application.

C. L. GRIFFITH, Pleasanton, Cal.

FERNDALE STOCK FARM
Stallions at Stud.

Longworth, \$25.

Sable Czar, \$25

Ringwood, \$25.

Mahomet, \$20

LONGWORTH 2:19 (Reg. No. 1452), sired by Sidney, grandsire of the champion Lou Dillon 1:58¼. Dam Grey Dale by American Boy Jr., he by American Boy, sire of Williamson's Belmont; second dam by Winfield Scott; third dam, So rei Pol by Sir Henry. LONGWORTH is a very high-class horse in form and disposition; is a very dark bay or brown. He has sired Alfred D. 2:12¼, El Moro 2:13¼, A. C. 2:15¼, Esmeralda 2:18, etc.

RINGWOOD by Sidney; dam, Alma by Dashaway, he by Belmont, son of American Boy. RINGWOOD is a dark bay.

SABLE CZAR by Sable Wilkes, he by Guy Wilkes; dam, Olivette by Whipple's Hambletonian, he by Guy Miller, he by Hambletonian 10; second dam, Belle by Easton's David Hill, he by Blackhawk; third dam, Lady Almack by Almack, he by Monmouth Eclipse, son of American Eclipse. SABLE CZAR is a black horse.

MAHOMET, color white, with bay and blue spots. His sire is Longworth, dam Sonoma Maid, said to be by Arabian horse; second dam by Whipple's Hambletonian.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$2.50 per month. No responsibility assumed for accidents or escapes. For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

SILVER BEE 2:27 3-4

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEES: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1300 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grand-sire Robert McGrazor sired that wonderful horse Crescen 1:59¼, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to McKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

Terms for the Season, \$40. Usual return privileges. Good pasturage at \$4 per month. Best of care taken of mares, but no liability for escapes or accidents. No wire fences Address

R. I. MOORHEAD, SANTA CLARA, CAL.

SEYMOUR WILKES REG. NO. 0232.

Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12¼ and Joe Eriston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

Alta Vela 22449

RECORD 2:11¼

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (t) 2:03¼, Sunol 2:05¼, Palo Alto 2:06¼, Alta Vela 2:11¼, and 9 more in the 2:15 list, etc.) Dam ORITA 2:18¼, by Fiedmont 804; second dam, Lady Lowell (dam of Ladywell 2:16¼, Lorita 2:16¼, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16¼.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

SAVAGE RIFLES

THE 22-caliber Savage Repeating Rifle was officially adopted at the St. Louis World's Fair. The important fact is that the Rifle deserves this. It is a clean out little gun, shooting the best of the 22-caliber ammunition—the short, long and long rifle cartridges. In a word, it is "Savage Quality" all through, and that means it is honestly made. Any good dealer will sell you a Savage under a trustworthy guarantee. May we not send you our illustrated catalogue No. 10? Write to-day.

SAY!

When you have a gun in mind.
Be sure you get the proper kind;
Don't take the other "Just as good,"
But call for PARKER as you should.

There is NO gun just as good as the PARKER; we have had over forty years' experience making Shotguns, and have never made any other than "THE PARKER GUN," and it stands today as THE BEST GUN in the WORLD, where it has always stood. Ask your Grandfather what he thinks. If you want a gun to shoot, to wear, to fit, to handle gracefully, and to be a source of satisfaction, buy the PARKER and NO OTHER. Send for catalogue.

9. 3-Year-Olds, 2-30 Class..... 500	18. 2-Year-Olds (Mile Heats 2 in 3)..... 400

The above Stakes Close Wednesday, June 1, 1904, when horses must be named and eligible.

Entrance due as follows: 3% June 1, 1904; 1% additional if not declared out before July 1, 1904; 1% additional if not declared out before July 20, 1904.

Declarations (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at the time the declaration is made.

NOTICE—Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee.

N. B.—The program will be arranged as far as possible so that horses entered in several events will have an opportunity to start in each.

THE STANFORD-OCCIDENT PACE.

For three-year old pacers that were originally entered in either the Stanford or Occident Stakes.

\$50 entrance and \$100 added by the State Agricultural Society for each starter over three and up to six.

Colts must be named June 1, 1904, and entrance money due and must be paid August 12th, as follows:

\$40 from those having made first payment, \$25 from those having made first and second payments, nothing from those having made first, second and third payments in the Occident Stake. \$45 from those having made first payment, \$40 from those having made first and second payments, \$30 from those having made first, second and third payments in the Stanford Stakes

Only pacing colts having been entered in the Occident and Stanford Stakes of 1904 are eligible to this Stake.

SPECIAL CONDITIONS.

Five per cent of the amount of the stakes closing June 1st (except the Stanford-Occident Pace) will be deducted from money winners.

All races mile heats, three in five, except otherwise stated.

Moneys to be divided 50, 25, 15 and 10 per cent, unless otherwise specified in conditions.

All races to fill satisfactory to the Board of Directors or they may be declared off.

Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning, or making a dead heat in three, to be ruled out, but will retain his position in summary, except otherwise stated.

If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance moneys only paid in, to be divided 60, 30 and 10 per cent.

Stakes are for the amount guaranteed—no more, no less.

When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the first and 33% per cent to the second.

A horse distancing the field will only be entitled to first and fourth moneys.

Hopples barred in trots, but allowed in pacing races, except where otherwise stated.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

The Board of Directors reserve the right to change the hour and day of any race, except when it becomes necessary to antedate a race. In which instance the nominators will receive three days' notice by mail to address of entry. The right reserved to declare off or postpone any or all races on account of weather or other sufficient cause.

Racing colors should be claimed with entries, must be named by 5 P. M. on the day preceding the race, and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary.

Drivers must weigh in by 12 o'clock noon day of race they are to drive.

The Board reserves the right to inflict penalties for non-compliance with the above conditions. Otherwise than as herein specified, National Trotting Association (of which this Society is a member) rules to govern.

Other than as herein specified, National Trotting Association (of which this Society is a member) rules to govern.

THE VALLEJO RACE MEETING

VALLEJO RACE TRACK

AUGUST 11, 12 and 13, 1904

Entries Close Monday, May 16.

GUARANTEED STAKES:

TROTTING.	PACING.
1. SOLANO COUNTY STAKES \$1000 (2:24 CLASS)	6. GRISSIM STAKES (2:20 Class) \$1000
2. Waldorf Stakes (2:30 Class)..... 500	7. Vallejo Stakes (Green Class)..... 500 (Horses without records)
3. Board of Trade Stakes (2:16 Class)..... 500	8. Gen. Frisbie Stakes (2:15 Class)..... 500
4. Breeders Stakes (2:13 Class)..... 500	9. Electric R.R. Stakes (2:10 Class)..... 600
5. Three-Year-Olds..... 500	10. Three-Year-Olds..... 500

Races for Two-Year-Olds, Trotting and Pacing, and for District Horses will be Announced Later.

Entrance Due as follows: 3% May 16, 1904, when entry is made; 1% additional if not declared out on or before June 1, 1904; 1% additional if not declared out on or before July 1, 1904.

Declarations (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at time declaration is made.

Substitutions.—Nominators, by the payment of an additional 2% on July 16, 1904, have the right of transferring their entry or substituting another horse eligible to the class in place of the one named in original entry.

The Program will be arranged so that horses entered in several events can start in each.

CONDITIONS.

Entries close Monday, May 16, 1904, when horses are to be named and to be eligible to the class in which they are entered.

Stakes not filling satisfactorily to the Manager may be declared off.

At any time previous to the last payment an owner may sell any of his horses and transfer the entries to the purchaser.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.

Five per cent of the amount of the stake will be deducted from each money won.

The Manager reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the first and 33% per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Manager reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days notice by mail to address of entry. Right reserved to declare off or postpone any or all races on account of the weather, or other sufficient cause.

The Manager reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Entries not declared out at 5 o'clock p.m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

When there is more than one entry to any stake by any one person, or in one interest, the horse to be started must be named by 5 o'clock p.m. on the day preceding the race.

Trotting and racing colors must be named by 5 o'clock p.m. on the day preceding the race and must be worn on the track. Colors will be registered in the order in which they are received.

Hopples barred in trotting races, but will be permitted in pacing races.

Conditional entries will be treated the same as regular entries, and nominators held under the rule.

Any race that may be started and unfinished the last day of the meeting may be declared ended and money divided according to the rank of the horses in the summary.

Stakes are for the amount guaranteed—no more, no less.

All races to be 3 in 5 unless otherwise stated.

Entries by mail must bear postmark of the date of closing or will not be accepted.

Otherwise than as herein specified in these conditions rules of the National Trotting Association (of which this Track is a member) to govern.

STATE AGRICULTURAL SOCIETY.

STANFORD STAKE of 1906

TROTTING STAKE FOR FOALS OF 1903.

To be Trotted at the CALIFORNIA STATE FAIR of 1906.

Entries to Close Wednesday, June 1, 1904,

With Geo. W. Tuthill, Sec., at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1904; \$5 November 1, 1904; \$10 June 1, 1906; and \$20 on the tenth day before the first day of the State Fair of 1906. \$300 added by the Society. Mile heats, three in five, to harness.

The stakes and added money to be divided 50, 25, 15, and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the winner, and 33% per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will enhance the value of his colt in case he desires to sell.

Your colt entered in the Occident Stake for 1906 is eligible for entry in this stake.

Remember the date of closing is Wednesday, June 1, 1904.

GEO. W. TUTHILL, Secretary.

ENTRIES CLOSE MONDAY NEXT for over \$6000 worth of stakes for trotters and pacers offered by the Vallejo Race Meeting, of which Thos. Smith is manager. There should be a record breaking entry list as Mr. Smith has come out single banded and done more than any one person to make the California circuit a possibility this year. Had he not announced this meeting it is probable there would have been no Breeders meeting at Santa Rosa, but his action has resulted in a circuit of racing in which seven associations will give racing extending over eight weeks. Horsemen who would like to see a good harness racing circuit arranged for California that will be a permanent thing, and not depend upon the district fairs should enter this year at every meeting advertised. By dint of hard work by a few people we have a circuit this year of independent meetings which offer a total of \$58,000 for trotters and pacers. This is not a small circuit by any means, and horsemen who imagine that there will not be a good circuit this year in California are mistaken. Several stables have gone all the way to Colorado to race over a circuit that will not distribute half that amount among them. This is the year when Californians should stand together and race at home. The purses are larger and the terms more liberal here than in any State of the same population in the entire country, and good entry lists this year will encourage the associations to increase the purses, and lead to others joining in and giving additional meetings next year. There is over \$6000 to compete for at Vallejo. The track there is in fine shape, the country is prosperous, and Mr. Smith, who is a pioneer horseman himself and a liberal one, will spare no pains to make the stay of the horsemen pleasant while they are at Vallejo. Entries close Monday next, May 16th.

ANOTHER MEETING is to be given by the Pacific Coast Trotting Horse Breeders Association. The Directors of this organization met last Tuesday and accepted the offer made by Mr. W. H. Lumsden,

acting for a committee of Santa Rosa citizens who invited the Breeders to come to Santa Rosa and offered them a nice bonus to give a four days' meeting. The program, which provides for nearly ten thousand dollars in purses and stakes, will be found among our advertisements this week. The 2:19 class trotters are given a stake of \$1500, and races are offered for the 2:24, 2:16, 2:13 and two and three-year-old trotters. The leading stake for pacers is \$1500 for the 2:20 class, and the 2:10, 2:14, 2:25 and free for all classes of pacers are provided for, as well as the two and three year-old pacers. There are also special races for local horses. The entire program is made up, so that horsemen can see at a glance just when the races will come off and can make their entries accordingly. The circuit is now complete. There will be six weeks of racing up to and including the State Fair at Sacramento, which will close September 3d. In October meetings are to be held at Hanford and Tulare, purses for which are already announced, and in all probability there will be meetings where smaller purses are given at a half dozen other places. The arranging of dates so that six weeks of good racing for generous purses can be had in California before the horses go north pleases the horsemen greatly and if a Pacific Coast circuit is organized next year it will be along these lines. Entries to the Breeders Santa Rosa races will close June 1st.

THE GAITED SADDLE HORSE is distinctly an American production, but there have been very few breeders on the Pacific Coast who have ever attempted to either breed or train this class of horses. We note with pleasure that the American Saddle Horse Breeding Farm has gone extensively into the business of breeding and training gaited saddle horses. California is singularly weak in the saddle horse classes, and we believe that the farm which Mr. A. G. Spalding has started at San Diego will do much to remedy this condition. About a year ago Mr. Spalding purchased the Pacific Beach race track, a few miles out of San Diego, and has greatly improved the track, added stables, and made many other changes, so that the farm will soon become one of the handomest stock farms in the west. The name of the track and farm has been changed to American Park. The breeding stock now at the farm consists of about twenty mares of the best Kentucky blood, several of which came from the farm of Gen. John B. Castleman, of Louisville, Ky., and the handsome black stallion Rex Montgomery 2011, American Saddle Horse Register, sired by Rex Denmark, and a brother of the famous Rex McDonald of Mexico, Mo. Rex Montgomery stands 16½ hands high, is five years old, and a coal black. It is the intention of Mr. Spalding to take several of these horses to Los Angeles, to be shown at the Horse Show parade of the Los Angeles Driving Club on May 21st, after which they will be brought to San Francisco to be shown. As will be seen by the photo-engravings on our front page of horses now at Mr. Spalding's farm, he has selected some very handsome specimens of the equine tribe and when he brings a consignment to San Francisco on the 25th inst., they will doubtless attract much attention.

E. P. HEALD, President of the Pacific Coast Trotting Horse Breeders Association, has been re-elected a member of the Pacific District Board of Appeals of the National Trotting Association, a position he has held for many years with honor to himself and satisfaction to all connected with harness horse affairs on the Coast. At the meeting of the Board of Review held in New York last February, at which time new Boards of Appeals were elected, Prof. Heald's name was dropped from the Pacific District Board and Mr. John A. McKerron's substituted. Mr. McKerron, however, has declined to serve and at the Board of Review meeting held in New York on the 3d instant, Mr. Heald was again elected to the position. Our readers are doubtless well acquainted with the facts which led to the state of affairs above recounted, and will be pleased to know that the designs of a person who in no way represented the harness horse interests of the people of this district, have been frustrated. By declining to serve, Mr. McKerron has done the right thing, which is just what those who know him expected he would do. This closes the incident.

THE BLUE RIBBON SALE which opens on Monday next at Cleveland, has over 400 horses consigned to it by 136 owners. Among the Californians that have sent horses to this sale are Geo. T. Beckers, J. W. Clark, Geo. W. Ford, Chas. S. Frost, J. C. Kirkpatrick, Palo Alto Farm, Dr. C. E. Smith, Millard Sanders, A. G. Shippee, W. A. Shippee and Dr. Le Moyne Willis. The Palo Alto horses are a couple of three-year-olds that were consigned to the last Blue Ribbon Sale, but were not in condition at that time, and were not offered.

HANFORD AND TULARE, two lively towns in the southern end of the San Joaquin valley, will give meetings this year. Their programs are the same and will be found in our advertising columns. Both are good harness racing towns, and the people turn out in large numbers to see the races. Each association will give a stake of \$1000 for trotters and one of the same amount for pacers. The other purses will be \$500 each. These meetings will be held just prior to the meeting at Los Angeles, which will bring the first meeting, which is to be at Hanford, during the early part of October. The main California circuit will end at Sacramento, September 3d, and many of the horses will ship from there directly to Salem, Oregon, where a big meeting is to be held in connection with the Oregon State Fair. All horsemen who are not entered on the northern circuit should enter at Hanford and Tulare. They will be given the best of treatment and will find good tracks to race over. Entries to both these meetings will close May 23d.

AN AUCTION SALE of choice standard bred horses will be held at the Occidental Horse Exchange on Thursday evening, May 26, at which time will be offered to the highest bidder a number of high-class roadsters, carriage horses, brood mares and several ponies. Among the horses is Maud Fowler 2:21½ by Anteeo 2:16½ and of Eveline, dam of Roblet 2:12 and Tietain 2:19 by Nutwood. Maud Fowler is the dam of Sonoma Girl, the handsome and fast trotting mare which Mr. J. D. Springer of Pleasanton recently paid a long price for. There are several other royally bred mares consigned to this sale. Owners of well bred horses who desire to dispose of them will find this a good opportunity and should communicate with Mr. Layng immediately as the catalogue will be made up in a few days.

Some of the Mares Bred to Monterey.

Monterey is getting some choice mares this year. Among others he has been mated with Lottie Parks 2:16½ by Cupid, owned by T. J. Crowley of San Francisco; has fine Monterey foal at side. Bay mare by Guy Wilkes 2:15½, owned by T. D. Witherly of Irvington; a mare by Gossiper and a granddaughter of Guy Wilkes, owned by Fred Hellwig of Alvarado; black mare by Hambletonian Wilkes, dam by Anteeo, owned by Sam Parks of Milpitas; chestnut mare by Silver Bow, owned by John Geddiss of San Jose; seal brown mare by Stelnway, owned by F. H. Buteau of Oakland, has grand foal at foot by Stam B.; Dollexa 2:21 by Alexis, dam Dolly Withers 2:29½ by Aberdeen, second dam by Geo. Wilkes, owned by C. F. White, Cosmopolis, Wash.; Bessie McKinney and Marion McKinney, both by McKinney 2:11½, owned by David Young of Stockton; bay mare by California Nutwood, owned by J. C. Peters of Warm Springs; bay mare by Electioneer, dam by Gen. Benton, owned by E. C. Chase of San Francisco; chestnut mare by Gossiper 2:14½, dam by Vasto 2:16½, second dam by Robert McGregor 2:17½, third dam by Mambrino Patchen 58, and a bay mare by Wyoming Chief, dam by George Wilkes, owned by Pacific Land Investment Co. of Newark; La Belle Altamont, owned by I. L. Borden of San Francisco; Sadie M. by Naubuc, owned by J. B. Mendonca of San Leandro; mare by Diablo 2:09½, dam by Prince Bismark, owned by Fritz Stenzel of San Lorenzo. From the above mares there should be some fast steppers. Monterey will be raced in California this year if there are any classes for him. He is looking fine and Mr. Williams is ready to meet any and all trotters in the 2:10 or free for all classes.

No Meeting at Woodland.

The following letter received by Secretary F. W. Kelley of the Pacific Coast Trotting Horse Breeders Association from President Reith of the Woodland Fair Association explains itself. Horsemen and all others who enjoy attending the high class meetings which Woodland has the reputation of giving, will regret exceedingly that it cannot see its way clear to holding a race meeting this year:

May 10, 1904.

MR. F. W. KELLEY, San Francisco, Cal., Dear Sir:—As agreed, we held a meeting of the Directors of Agricultural District No. 40 with reference to holding a fair. The unanimous expression after considering everything was that we had better not give any kind of a meeting until after the session of the legislature, which, by the way, we hope will allow appropriations for this purpose. It is too much of an undertaking to give a meeting such as we would like to give, without the co-operation of all who are generally interested and this year many of our strong supporters of former years will be in the East during the week and some time before and after the time we usually have our meetings.

I wish you the greatest success at your meeting in Santa Rosa and am sorry we are not to have a meeting here.
Yours very truly,
J. REITH, JR.

NOTINGS.

SANTA ROSA, where the fastest track in California is located, is to have a big harness meeting this year. The Directors of the Pacific Coast Trotting Horse Breeders Association, held a meeting last Tuesday and agreed to accept the proposition of the Santa Rosa people to hold a four days meeting at the track where Dione set the trotting record at 2:07½ and Clipper the pacing record at 2:06. The dates set for the meeting were August 17th to 20th, inclusive, and as a message was received from President Reith of the Woodland association that no meeting would be held by the Yolo county organization this year, there will be no conflict of dates. The main California circuit is now made up. It will open at Pleasanton, and close at Sacramento and there will be five weeks of good racing for good purses. The Breeders will give two meetings, and the State Fair holds for two weeks. Pleasanton and Vallejo will be in the circuit, thus giving six weeks of harness racing where the purses are from \$500 to \$2000. At the close of the State Fair on September 3d, many of the horses will be shipped to Salem, where the Oregon State Fair opens September 12th with a big program, in which are two stakes of \$2000 each. Seattle, Spokane and many other Northern points will also be visited by the California horses and the Pacific Coast circuit will have considerable class to it, with nearly four months of racing.

The decision of the Breeders Association to hold a meeting at Santa Rosa this year will be hailed with delight by the horsemen, as Santa Rosa track is a great favorite with them, and the attendance there is always large. Work on the mile track was begun this week and it will be in fine condition for training on within a few days. The Santa Rosa Stock Farm spent nearly three thousand dollars on the track last year, giving it a coating of new soil over its entire length and breadth, putting on about eight inches of new loam of the same sort that has made the track famous as the fastest track on the Pacific Coast. I believe Dione's record of 2:07½ made there in 1900 is the fastest record ever made by a trotter in California, while the 2:06 of Clipper made the same year is the fastest heat ever paced in California in an actual race, except in the races paced by John R. Gentry and Joe Patchen at Los Angeles. In addition to having a safe and fast track, Santa Rosa Stock Farm is well fitted with excellent stalls, all in first-class condition, and horsemen all look forward with pleasure to meetings held at Santa Rosa, where the fine climate and red oat hay seem to get speed out of horses if they have any to show. Santa Rosa may yet become one of the most important of the winter training places in California, as the three-quarter mile track which was built inside the mile oval last year by Mr. Pierce was made especially for winter training, and is said by the trainers who tried it last winter to be just about perfect. With both a winter and summer track Santa Rosa has accommodations for harness horses that are equal to any place in the United States.

An Australian Totalisator, the first, I believe ever set up in this country, will be used at the races to be given Butchers' Day at Emeryville. This is the Ward machine, to which reference was made in the BREEDER AND SPORTSMAN last week. It has the capacity for a fifteen horse race, but it is unlikely that any of the races to come off next Wednesday will have fields that large. There are many who do not understand just what the totalisator is and to explain I will say that it is just like a pari mutuel box, with the exception that it is made large enough so that every horse can be played, and bunching two or more in a field is not necessary. Tickets are sold at a uniform rate, which will probably be \$1 each at Emeryville next week. Every ticket purchased on a horse is registered by the machine automatically and the sum shown in plain figures below the name of that horse on the board. The total number of tickets sold is also recorded. Any person that can read figures can tell at a glance at any time just how many tickets have been sold on each horse, as well as the total on all horses in the race. The total amount of money received is divided between those holding tickets on the winner. The public make their own odds and every person has a chance to play. It is the fairest and best system of betting ever devised, and is the only system permitted on race tracks in Australia and New Zealand, as well as in France and Austria. In Australia ten per cent commission is taken by the racing clubs as their percentage of the money played in the machine, and in France twelve per cent is taken. In those countries the machines are owned by the racing associations and operated by

clerks employed by them, a Government representative also being employed to inspect the machines and see that everything is run fairly. The revenues derived are large and aid the associations in giving larger purses for their races than would otherwise be the case. If the Ward machine proves popular with the bettors at Emeryville next Wednesday it should rapidly grow in favor and may be adopted by some of the associations that give trotting meetings.

There is a foal pretty near due at Pleasanton that should be "the pick of the basket" when it arrives. This is the one that Dr. Boucher's mare Miss Logan 2:06½ is expected to produce soon by Bonnie Direct 2:05½. The foal has already been sold to Chas. L. Griffith and Dr. F. C. McConnell, and Miss Logan has already been booked again to Bonnie Direct. Miss Logan has been mated with four stallions up to date. The first was Harry Gear 25,382, a horse that has no other representatives in the list, and the produce was Harry Logan 2:12½, record made as a four-year-old. When campaigning in the East five years ago Miss Logan was mated with that fast son of Onward, Colbert 2:07½, and the produce was a chestnut colt that is now four years old and known to every horseman that has visited Pleasanton track as Bert Logan. He is a regular little butter-ball of a pacer, and has two minutes speed. He will be raced at Denver and East this year and is expected to get a low record. Two years ago Miss Logan was bred to Barondale 2:11½, but unfortunately lost her foal, which was born prematurely. Last year she was mated with Bonnie Direct 2:05½ and the foal that she is expected to drop will to my mind be, as I said before, "the pick of the basket." Bonnie Direct is one of the best bred horses that has yet been produced in America. His sire is the greatest speed producing stallion, having eight 2:10 performers out of 54 of his get that have standard records. The dam of Bonnie Direct is Bon Bon by Simmons and she is the dam also of Bonsilene 2:14½ trotting. Simmons is one of the greatest of the sons of George Wilkes, being the sire of 95 trotters and 24 pacers with standard records, of which 26 have records better than 2:15. Simmons is the sire of the dams of eight 2:15 performers, and among these is that great mare Fereno 2:05½ that is expected to trot close to two minutes this year. The second dam of Bonnie Direct was Bonnie Wilkes, a daughter of the great George Wilkes, that has produced three standard trotters, and the third dam was the thoroughbred mare Betty Viley by Bob Johnson, a son of Boston. Miss Logan was by Gen. Logan, a well bred son of Alexander Button, and her second dam by the thoroughbred horse Firetail. She will doubtless, before the close of the year, be a member of that select list of broodmares that have produced two with records of 2:15 or better and I predict that every foal she drops will get a standard record if it is trained.

Answers to Correspondents.

C. G. SIGURD, San Jose, Cal.—Will you please be so kind as to tell me who was the owner of Junio during the year 1899? He was down in Fresno county somewhere. If you can give me the address you will greatly oblige.

Answer—Junio 14957 by Electioneer was owned by Mr. F. P. Wickersham (now deceased). He consigned him to the Blue Ribbon sale at Cleveland in May of that year and the stallion was purchased by a resident of Berlin, Germany, and shipped to that country.

J. A. MILTON, Reedley, Cal.—Kindly publish the breeding of a mare (said to be registered) name Alice G.

Answer—There are six or seven mares by that name that are registered. Give more definite information as to the identity of this mare whose pedigree you desire.

READER—I have a mare in whose pedigree is Lady Dudley by Tom Dudley. Please inform me how Tom Dudley is bred, if registered and if living and who owns him?

Answer—Lady Dudley, a sorrel mare by Tom Dudley, was foaled in 1869. Her dam was by Bertrand Jr., second dam by Pacolet, third dam by Sir Solomon, he by Sir Archy. Tom Dudley was by Blacknose, son of Medoc. His dam was Kate Clarkson by Moore's Whipster, and his second dam a daughter of Orphan Boy, son of Sir Archy. Lady Dudley was very nearly, if not quite, thoroughbred. Tom Dudley died many years ago, but we have no record of the time, or of his owner.

T. W. BARSTOW, San Jose.—Will you please give me the full breeding of Maximilian, a son of Echo? Also breeding of Shamrock.

Answer—We cannot find any mention of such a horse in our records. There was a son of Echo called Max that was out of a mare by Ben Lippencott, son of Williamson's Belmont. He was owned by C. A.

Paige of Los Angeles, twenty years ago, and was trained by C. A. Durfee. Shamrock 2:25 was by Buccaneer 2656, dam Fern Leaf (dam of Gold Leaf 2:11½, Sidmont 2:10½, Thistle 2:13½, and Ferndale 2:16½) by Flaxtail 8132, grandam Fanny Fern by Irwin's Tuckahoe.

J. C. HESS, Chico.—Will you kindly inform me through your valuable paper if George Wapple is registered? If not, can he be?

Answer—He is not registered and is not eligible.

A. J. HARRINGTON, Napa, Cal.—Would you please let me know the pedigree of the stallion Monroe S?

Answer—Monroe S. 17180 record 2:20 is a pacer, foaled 1885. He is by Monroe Chief 875, dam Lurline by Bell Alta, grandam by Langford.

SOL SHOCKLEY, Merced, Cal.—Please give me breeding of Lodi, running horse.

Answer—Lodi was by imp. Yorkshire, dam Topez by imp. Glencoe, second dam Emerald by imp. Levathan, third dam imp. Eliza by Rubens, fourth dam Little Holly by Highland Fling, fifth dam Harriet by Volunteer.

JOS. F. HUNTER, Walla Walla.—Would you be kind enough to give me the dates of the deaths of the thoroughbred stallions Norfolk and Joe Hooker?

Answer—Norfolk died November 25, 1890; Joe Hooker died October 2, 1895.

E. B. HENRY, Klamath Falls.—Will you kindly inform me through your paper the sire and dam of Sir Hercules, and give me the time he ran a mile in England? Also give complete pedigree of Oakwood, registered in volume 6, page 140, American Stud Book.

Answer—Sir Hercules, chestnut colt by Alarm, dam Susan Beane by Lexington, second dam Sally Lewis by imp. Glencoe, third dam Motto by imp. Barefoot, fourth dam Lady Thompkins by American Eclipse, fifth dam Katy Ann by Ogle's Oscar, sixth dam Maid of Oaks by imp. Expedition. He died as a two-year-old. Oakwood is by Fellowcharm, dam Agnes B. by imp. Glengarry, second dam Enue by Enquirer, third dam Sue Walton by Jack Malone, fourth dam Wenonah by Capt. Elgee, fifth dam by imp. Albion.

G. A. WILLETT, Murphys, Calaveras Co.—You have the breeding of Contention by Director correct. We do not think he ever raced. His dam was the dam of Lena N. 2:05½.

Net 2:34 1-4 by Magic, a Great Brood Mare.

In the BREEDER AND SPORTSMAN two weeks ago was printed a list of twelve California mares with standard records whose names appeared for the first time in the Great Brood Mare Table in Volume 19 of the Year Book. Mrs. C. H. Williams of Palo Alto writes to ask if her mare Net by Magic is not entitled to a place in the list. The list of twelve mares printed in the BREEDER AND SPORTSMAN was confined to those having records of 2:30 or better trotting, or 2:25 or better pacing, and for that reason the name of Net did not appear in it, as her record is 2:34½. She is one of the new comers to the Great Brood Mare Table however, the performance of her son Del Oro at Sacramento last September when he was given a time record of 2:23½, pacing, giving him dam two in the list, as she was already the dam of Leoneel 2:17½. Net's name appears in the table of Great Brood Mares in Volume 19 of the Year Book, just issued.

The Deadly Distemper.

Death is not cheerfully contemplated in all cases. Death to distemper and kindred germs is always desirable. For a quarter of a century Craft's Distemper Cure has played sad havoc with the contagious blood diseases, slaughtering the germs so that all the varieties of influenza, including pinkeye, catarrhal fever, grippe, pneumonia, etc., as well as coughs and throat troubles, were scattered to the four winds, being first completely annihilated. It is a good treatment for horses of all ages from the new born colt up. This liquid distemper cure is advertised in our columns and may be procured of druggists or direct from the manufacturer, Wells Medicine Co., 13 Third street, Lafayette, Ind.

Not every truly great broodmare is found in the "table of great broodmares" appearing in the several volumes of the Year Book, says the *Western Horseman*. Take the case of Blandina, daughter of Mambrino Chief 11. Blandina's name does not appear in the list referred to, owing to the fact that none of her produce acquired standard records, yet eight of her sons are sires of standard performers, a record not possessed by many broodmares. Blandina is the great grandam of Diablo 2:09½.

Ten Years Experience.

Mr. A. Jones, veterinary surgeon at Lamont, Iowa, writes as follows: "I desire to inform you that I have been using Quinn's Ointment for the last ten years with the greatest success. For removing curbs, splints, spavins and other blemishes am more than pleased with its work." This is the general verdict of leading horsemen everywhere. For curbs, splints, spavins, windpuffs and all enlargements try Quinn's Ointment. Price one dollar per bottle. Satisfaction guaranteed. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain it from druggist.

Jackson's Napa Soda does not tangle the feet.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

The Nancy Hanks blood is still in evidence. Red Will by Red Wilkes, from Nancy Lee, Nancy Hanks' dam, is said to be very fast and will be raced this season.

There are more applicants for the position of presiding judge down the Grand Circuit than there were entries in the M. & M.

It is said that John Bradburn, superintendent at Village Farm, will shortly issue his forthcoming book on the trotting horse, which has been promised for some time.

It has been announced that Prince Alert 1:59½ and Dan R. 2:01½ will pace a match race over the Lima, O. half mile track on July 4th, and if both horses are in condition this race will prove one of the greatest events of the early portion of the racing season. Dan R. is now in charge of the veteran horseman, John Splan, and reports from Providence, R. I., say that Prince Alert will be teamed this year by Jack Curry, and with these two famous drivers behind them the two crack pacers should pace a great mile at Lima.

Memphis railbirds think The Roman 2:09½ will make the 2:10 trotters all step some this summer.

Vance Nuckols thinks well of the hopped pacer Direct L. by Direct 2:05½ and is staking him liberally.

Ed Geers rises to remark that Mr. Smathers has not taken an option on Walter Direct by Direct Hal 2:04½, and further states that the horse is not for sale at any price.

The fast Canadian pacer Sidney Pointer 2:07½ was seriously injured at Picton, Ont., a few days ago by being kicked in the head by another horse. It is feared that the injuries may prove fatal.

In their effort to prove the exact conditions under which Maud S. 2:08½ established her world's record for trotting to high wheel sulky, the sons of the late Robert Bonner, owner of Maud S. at the time of the performance, have located W. W. Bair, the veteran trainer and driver, who drove the famous trotting queen in her memorable trial nineteen years ago. Bair was found in Philadelphia, where he made an affidavit stating the conditions under which the trial was made. Bair states that the sulky used by Maud S. was plain axle, with no hall bearings of any kind. Bair also denies that two runners were used in the trial against time.

A recent arrival at Forbes' farm is a brown filly by Bingen 2:06½ out of Princess of Monaco, the daughter of imp. Modder and Nancy Hanks 2:04. This mare was a solid bay until a comparatively short time ago, when grey hairs commenced to appear in her coat. She is now a dirty grey roan and is whitening out so fast that it seems probable that she will eventually be white. A peculiar thing is that white streaks have commenced to make their appearance in hoofs which were formerly free from white markings. Her foal is a very dark brown, almost black, and but for the tan shadings about her eyes and muzzle it might almost be thought that she would eventually become grey in color.

One of the features of the New York State Fair at Syracuse will be a \$5000 stake for three-year-old trotters bred in New York.

Members of the fair sex will be strongly in evidence in the trotting game this year, both from a racing and from a show point of view. An entry was received last week for the annual parade of the Road Drivers Association, to be held May 14, from Miss Nina Phelps of West Troy, N. Y., the champion lady driver of trotting horses. She will pilot the trotter, Nellie Patchen, who is sired by the great Joe Patchen 2:01½. As Miss Phelps will use a light speed wagon, she is expected to furnish some interesting sport in the hushes that follow the parade. Another lady who is taking a decided interest in trotters, is Miss K. L. Wilks, who now owns the famous Cruickson Park Stock Farm at Galt, Canada. She has entered the trotter Emma Hoyt in the Empire Stake for the Grand Circuit at Empire track and also for the same stake at Brighton Beach. The mare has been named all down the line of the big circuit, together with Mary Leonard, a three-year-old candidate for trotting honors. Miss Wilks is a lady who loves good horses and delights in possessing the best that money and breeding can purchase. It is her ambition to own a racing stable second to none on the Grand Circuit.

A very useful poster has been gotten out by the International Stock Food Co., of Minneapolis, Minn., which is recommended to horse breeders. It contains two tables, the first of which gives the average duration of pregnancy of a mare. Dates, in duplicate, from Jan. 1 to Dec. 31, enables the breeder to immediately check off when the mare is due to foal. From 340 to 350 days is the average duration of pregnancy, and the table is compiled on that basis. The second table gives the dates on which mares should be returned to the stallion after being bred, also taking in the whole year. These tables are invaluable as time savers, and may be had free from the publishers.

Trainers who are experts in balancing their horses, who know the weight and shape of shoes best suited to them, are the ones whose horses generally win the most money.

Joseph Battell, Middlebury, Va., will be an extensive exhibitor in the horse department of the St. Louis Exposition. He will send out fifteen head of young Morgans, headed by the handsome stallion Gen. Gates.

Never turn a horse into an enclosure of any kind where there is a foot of barbed wire. It takes but a small piece of that cruel stuff and a few minutes' time to ruin a valuable colt or full grown horse.

Village Farm has a two-year-old trotting filly by Dare Devil 2:09 out of Fantasy 2:06, that is considered to be the best thing at the Jewett covered track.

Jack Curry will have the champion hopped pacer Prince Alert 1:59½ this season, arrangements having been completed the first of last week. Jack drove Alert when he paced his sensational mile last September at the Empire track in 1:57, when the first real wind shield came into such prominence. Prince Alert will probably be specially prepared for a trip against the record, now held by the Ch. Dan Patch 1:56½, and though Curry says it is a high mark to shoot at, he expects to lower it during the season of 1904. Alert is still at Providence, but will join Curry's stable at the Empire track in a short time.

Word comes from the Village Farm that The Corker, always a fast horse, by Rex Americus, is going sound, so far, in his work and is very fast. Ed Geers said a year or so ago that The Corker would beat 2:10 the very first time he took the word.

Grand Circuit secretaries seem to be enforcing the rule requiring full payment on every horse named in any purse or stake.

Scott Hudson believes Hawthorne 2:06½ will be returned to the stable in the fall with a trotting record of 2:04.

Give both the yearlings and the two-year-olds a few lessons to cart before turning them away to pasture for the summer. These lessons will be of great advantage to them when they come back to the barn next fall.

Have a small soft leather head-halter and halter break the foals gently in the stable before they are a week old. The man in charge should caress them softly and teach them that he is their friend.

The venerable Sidney 2:19½, now 22, who has done service in six States, is now at Springvale Farm, Oregon, Ill.

At Mason City, Ia., May 2d, was foaled a colt with the fastest speed inheritance of any yet produced. Its dam is the pacing mare Casonda 2:05½, owned by Robert Carr, of Mason City. Its sire is the light harness champion Dan Patch 1:56½. The average speed inheritance of the colt is, therefore, exactly 2:01, which exceeds, by a considerable, that of any yet foaled. Mr. Carr certainly has "an only" and one to be proud of.

A seven heat pace and a nine heat trot were decided at the Wheeling, West Virginia track on September 10th last year. There were eleven starters in the pace and the heats were all in 2:13½ to 2:15½, the three last heats being in 2:14½. The nine heats of the trot were from 2:18½, the time of the first heat, to 2:20½, time of the last heat. There were twelve starters in this race. Not a horse was distanced in either event.

It is said that James Butler will try for the team record for trotters with Judge Green 2:10½ and Consuelo S. 2:12½.

Harry Devereux recently worked the black trotting gelding Charley Mac 2:07½ a jogging mile under the saddle in 2:44. If he warms up good and steady to saddle education he will probably be sent to beat the saddle record of Great Eastern 2:15, which was made 27 years ago, and still stands as the world's trotting record to saddle.

The pacing gelding Dart 2:08½, the fastest son of John R. Gentry 2:00½, by the record will be raced this season by Billy Andrews, the reinsman who gave Gentry his record.

Rhythmic 2:06½, Elastic Pointer 2:06½, New Richmond 2:08½ and Pinchem Wilkes 2:07½, all blind stallions, will be seen on the Grand Circuit this year.

Among the promising trotters in the stable of M. S. King at Cleveland is the trotting mare Reydlette by Rey Direct 2:10, dam Sidlette 2:22 by Sidney. She is a very handsome mare and will make a fast trotter. She was a mile in 2:20 last fall, and this spring is in really much better condition.

Dave McClary has had wonderful success in selling green pacers for long prices and then having them made good. He sold Elastic Pointer 2:06½ to Nick Huhner, and Joe Pointer 2:05½ to A. C. Bostwick. His last arrival, Morning Star, looks to be the best thing he ever handled, harring Star Pointer.

Nancy Hanks 2:04 may have the fastest record of any mare ever consigned to a public auction, but we can't forget that Lou Dillon 1:58½ was once there herself.

The Kentucky Stock Farm picks Jolly Bachelor to win the M. & M.

An importation of 21 Shetland ponies arrived in Boston last week on the steamship Winifred from Scotland. In the lot were the stallion Vesper, credited with winning no less than 52 first prizes in his native land, also the mare Butterfly, said to be but 29½ inches high and the smallest prize-winning pony ever exported from Scotland. These two are broken to harness. The ponies were consigned to J. W. Hayden of Massachusetts.

A movement is on foot to induce the American and National Trotting Associations to order trotting and pacing records taken in fifths of a second. The new chronographs are made so that they record the time in fifths instead of fourths, as was the fashion years ago, and therefore in order to get a watch to time harness races nowadays a man must either have one made to order or depend on an antiquated timer.

Action Against the Wichita Association.

When the Board of Appeals of the American Trotting Association met at Chicago on the 3d instant and refused to recognize the record of 1:59½ claimed to have been made by Cresceus at Wichita, Kansas, last fall, it also decided to commence action against the Wichita Association for fraud. The findings of the Board in the case are as follows:

"From the evidence submitted by the Southern Kansas Fair Association, Wichita, Kan., and George H. Ketcham, Toledo O., we find that the performance of Cresceus on the grounds of the Wichita Fair Association, at Wichita, Kan., on the 19th of October, 1903, was not conducted in accordance with the rules of the American Trotting Association governing performances against time, and that the time of 1:59½ then and there claimed to have been made by said horse is neither a record nor a bar under the said rules.

"It is therefore ordered and determined that the application to establish such record be and the same is hereby denied.

"The sworn evidence presented to the board covering all the circumstances surrounding the affair shows irregularity and indicates that gross fraud was attempted, not only upon this association, but against the entire public, and under the rules of this association it becomes our duty to nullify the effects thereof so far as possible.

"It is therefore further ordered that the secretary be, and he is hereby directed to institute an action under our rules against the said Wichita Fair Association, its officers, attorneys, agents and all parties participating in said performance, to the end that they show cause before this board at its next regular meeting in December, 1904, why said Wichita Fair Association and its officers, agents, attorneys and all such persons should not be penalized."

Hidebound.

Every horse owner knows what this means and many worry, thinking how to cure it. I had two cases lately that baffled me for quite a while, no matter what I tried. It all proved to no purpose, until I procured a sack of Manhattan Food Red Ball Brand. I fed this according to directions, and in six weeks it made such a change for the better that I bought a second, and continued feeding it as the first. It is ten weeks since I began, and my two horses are now in the peak of condition. They are sleek and fat, and are pleasant to look at. I am very well pleased with the results, and shall keep on feeding it to all my horses. I recommend it to all my friends as the best remedy for hidebound horses I have ever tried. Yours very truly,

SAM MEYER,
San Francisco, Feb. 10, 1904.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Notes and News.

ENTRIES CLOSE.

Vallejo Meeting.....	May 16
Hanford Meeting.....	May 23
Tulare Meeting.....	May 23
California State Fair Meeting.....	June 1
Pleasanton.....	June 1
Breeders Meeting Santa Rosa.....	June 1
Stanford Stake.....	June 1

See advertisements of all of above meetings in this paper.

Vallejo entries close Monday.

Santa Rosa gets a Breeders meeting.

Hanford and Tulare are both in line.

Eight wks of good racing so far for the California circuit.

Every California meeting thus far announced will give two or more \$1000 stakes.

Ituna, dam of Tuna 2:16½ and Confianza 2:21½, has a nice horse colt by Bonnie Direct 2:05½.

Dr. C. W. Dowling of San Jose sold his pair of handsome mares by Rinaldo last week for \$1000.

Andy Welch is quite proud of a colt by Mendocino out of a mare by Dexter Prince, that was recently foaled at Charter Oak Park.

Santa Rosa track is being put in fine shape for training. It will be ready to work on next week and will be lightning fast for the meeting in August.

If you want a cart or hike for Butchers Day, and don't own one, see Kenney, the bikeman, at 531 Valencia street and engage one at once as the supply is limited.

Manette, dam of Arion 2:07½ and Oro Fino 2:18, foaled a horse colt by Mendocino 2:19½ on the first of last month and will be bred back to the same horse. Manette is now 26 years old.

Next Wednesday is Butcher's day and the biggest program of racing ever seen in one day in California will be pulled off at Emeryville track under the auspices of the knights of the cleaver.

The four-year-old mare by Don Derby 2:04½, dam by Guide 2:16½, son of Director, is stepping like a coming winner in George Ramage's hands at Pleasanton. She is owned by Mr. M. A. Nunes of Haywards.

Miss Logan 2:06½ will again be bred to Bonnie Direct 2:05½ this year. Chas. L. Griffith and Dr. McConnell, owners of Bonnie Direct have already purchased Miss Logan's foal by Bonnie which she is now carrying.

The Vancouver Jockey Club will hold two days' racing on May 21st and 24th. There will be one harness race and four running events each day. T. G. Farron, Esq., of Vancouver, is the Secretary of the association.

Robert Elwert of Alvarado, and James Berryman of Pleasanton have purchased from Mr. Ed Newlands of Oakland the mare Dot McKinney in foal to Monterey 2:09½ and nominated in the Breeders Futurity for foals of 1904.

Mr. F. E. Abbott, of Riverside, Cal., has a very fine filly of which he is quite proud. It is by On Stanley 2:17½ (son of Direct 2:05½) and Lily Stanley 2:17½ its dam Lady Doris by Oakland. The filly looks like the Directs and is very handsome.

Thomas Ronan, owner of the Pleasanton track property, left last Monday for Dayton, Washington, and will ship several carloads of horses from his farm there to the three hundred acre farm he recently purchased near Pleasanton.

If a trotter eligible to the slow classes can win the leading trotting event advertised for that class at each of the seven meetings already advertised on the California circuit he can earn \$4750. Many a 2:10 horse goes through the Grand Circuit and wins less than that.

"Senator Helman claims this name of Chuintien-cheng for his green pacer by Lovelace."—*Rural Spirit*. Best a dollar the Senator will wish four-fifths of that name was in the first syllable of his own before he fills out a half dozen entry blanks with the pacer's name on them.

Mr. Wadham of San Diego has sent his stallion Coronado and Delwin, a two-year-old filly by Neerut, dam Johanna Treat, (dam of Coronado) to W. G. Durfee at Los Angeles, to be handled this season. Coronado has wintered well and should reduce his record this season. The filly is very promising.

The following order was adopted by the Board of Review of the National Trotting Association at its meeting held in New York May 3 and 4, 1904: "The facts submitted by Joseph Cairn Simpson in his appeal from the action of the Pacific District Board in relation to him, do not under our rules constitute a case that this Board can undertake to adjudicate."

Mr. Noy of Alameda, who owns a colt that Doc Williams is training, has just purchased a No. 30 McMurray speed cart which is a beauty and Doc says is one of the best he has ever seen.

The Kenney Manufacturing Company received from the McMurray factory this week nine sulkies and carts, two of which are enameled white with gold stripes. They are very handsome.

James Butler of New York has bred his black mare, full sister to Directum Kelly 2:08½, to Stam B. 2:11½ this year. Stam B. has been mated with some of the best bred mares on the Pacific Coast this season.

If you want to win any of that good money amounting to over \$6000 which Tom Smith has offered for trotters and pacers to contest for at the Vallejo meeting, enter your horses not later than Monday next, which is the date set for closing entries.

A rumor is in circulation that Geo. Tuthill, recently elected Secretary of the California State Board of Agriculture, will decline to accept the place as he has been offered another position at a larger salary. At the meeting of the Directors this month the resignation, if tendered, will be acted upon.

Next Monday, May 16th, is the date set for closing the entries for the good list of purses offered by the Vallejo Race Meeting. Don't miss making your entries as this will be one of the best meetings of the year. It will be held during the week immediately following the Breeders meeting at San Jose, and just before the Santa Rosa meeting. A special train will take the horses from San Jose to Vallejo. Read the advertisement of the purses in our advertising columns.

A special meeting of the directors of the Kentucky Horse Breeders Association was held at Lexington, Ky., on May 2d, when the resignation of Senator J. W. Bailey as a director was accepted. R. C. Stoll, a son of the late president, was elected to the vacant place. The board also bought from Senator Bailey the Brook Curry place adjoining the association's grounds, which the Senator bought a few months ago. Senator Bailey also sold his large holdings of the stock of the association.

A pacer eligible to the 2:20 class that can go through the California circuit of seven meetings this year and win the big purses offered for horses of that class, will earn enough to buy his owner a nice home. There are seven races in which a 2:20 pacer can start where the stake is from \$1000 to \$1500. First money in each of these seven races will aggregate \$4250 to the winner, second money will amount to \$2125, and third money to \$1275. Of course, the fellow that can win fourth money all the way through only saves his entrance, but think of the fun he will have trying to beat the fifth horse every time.

Hi Hogoboom, who has won 91 races with horses of his own training, a record that many older drivers cannot boast of, was down from Woodland last week. He has a string of half a dozen at the Woodland track that are all in good shape. He recently had sent to him from College City, two Diawood fillies owned by Mr. King of that place, who also owns their sire. These fillies are both two-year-olds, one being a trotter, the other a pacer, and are quite promising youngsters. From what he has seen of Diawood's colts Mr. Hogoboom thinks the son of Diablo will sire speed as well as good looks with great uniformity.

The gray two-year-old colt Dingee by Nutwood Wilkes, owned by Judge W. E. Greene and W. J. Dingee, was put in Fred Chadbourne's hands when the Salisbury string was shipped East, and is showing considerable improvement. Last Tuesday Chadbourne drove him a half in 1:11½, last quarter in 35 seconds. This colt is undoubtedly one of the best gaited and most promising young trotters in California. Chadbourne is also training Judge Greene's five-year old black stallion The Wizard by Directum, dam Little Witch by Director, and has him going very nicely. The Wizard is an inbred Director. He looks and moves much like his famous sire.

The Golden Gate Park Driving Club and the San Francisco Driving Club will hold a joint annual Decoration Day meeting this year at Ingleside and the outlook is for one of the best programs ever given by these popular associations. There will be five events on the card and each race will be best two in three heats. About twenty-five entries have been received already and it is expected a large number will come in before the list closes on the 20th inst. The following officials have been asked to take charge of the racing: Starter, T. J. Crowley; marshal, T. F. Bannon; judges, John Lawlor, J. Windrow, Dr. Williams; secretary, T. J. Douglas; timers, Fred Vetter and L. E. Clawson.

The Stanford-Occident Pace, which is the name of a new race inaugurated by the California Agriculture Society this year is among the events for which entries will close June 1st. All three-year-olds originally entered in either the Stanford or the Occident Stake, that have developed a pacing gait are eligible to this race. The entrance fee is \$50, and those making entries are only required to pay the difference between this sum and the amount they have already paid in. For instance, if an owner only made first payment of \$10 in the Occident, he can start in this pacing event by paying \$40 additional. If he has paid \$20, the entrance fee will be only \$30. The State Agricultural Society is to add \$100 to these stakes, for each starter over three and up to six. See the particulars of this stake in our advertising columns.

There are two \$1000 purses in the Hanford program and two in the Tulare program. Several \$500 purses are offered by both associations. The meetings will be held before the Los Angeles fall meeting. Entries close May 23d. See advertisement in this issue.

Mr. W. H. Lumsden of Santa Rosa, who attended the meeting of the Board of Directors of the P. C. T. H. B. A. held in this city last Tuesday, and succeeded in getting the Board to accept the proposition of the Santa Rosa people in regard to holding a meeting there in August, states that work is now being done on the track at the Santa Rosa Stock Farm, which will, in his opinion, make it better and faster than ever this year. Mr. Lumsden states that the people of Santa Rosa are very enthusiastic over harness horse matters and there will be a large attendance at the races in August.

The Decker Sulky and the Miller Cart are becoming very popular in this State, although but few are in use here as they are "a new thing." Budd Doble brought one of each home with him last fall after he had gone through the Grand Circuit with Kinney Lou 2:07½ and whenever a horseman or trainer clapped his eye on either vehicle he immediately wanted it. The result is that several were ordered and are now in use on California tracks and there will be more coming. The seats are low on both cart and sulky, and they are strong, light and rigid vehicles. If you will drop a postal card to H. J. Miller Cart Co., Goshen, New York, you will receive a very handsome catalogue giving all the particulars about these carts and sulkies.

When Ted Hayes left Pleasanton for Denver with the string of horses owned by Mr. W. A. Clark, Jr., he sent the handsome big trotting stallion Highland down to the Clark farm at San Mateo, where the son of Expresso will make the season of 1904. Highland has worked a mile in 2:12 and is one of the boldest going, strong trotters ever seen on the Pleasanton track. He is a royally bred horse, as can be seen by referring to his pedigree given in the advertisement printed in another part of this paper, and should be a sire of colts with size, style and speed. He is a young horse and will be raced next year. His service fee has been placed at \$25 the season, which is the lowest price a stallion of his breeding and speed is standing for in California. Mr. Clark put the fee at that low figure as he wants Highland to have some colts coming on to race as soon as possible and he has but few brood mares of his own.

An interesting letter was recently received by Mr. James Butler from the Philippine Islands, showing among other things that the fame of Direct 2:05½, circles the globe. The writer, Mr. George P. Ahern, is connected with the Forestry Bureau at Manila, and a friend of the trotter. "We have some horses here," he writes, "that are not surpassed in the world for grit, endurance and speed, considering their size. A 50-inch pony will pack 150 pounds for a mile and a quarter and race in surprisingly fast time. What would such mares produce if they were three or four inches taller and bred to such a stallion as Direct? I have a number of fine native pony mares, and have bred them to my stallion Director H. by Director 2:17, dam Esmeralda by Brigadier. But I have a weakness for your horse Direct, and believe him to be the greatest sire of fast pacers and trotters that the United States has produced. I want his blood and no other, and will visit the States next July, principally to look at him and his colts. Keep that two-year-old out of Genevieve 2:13½, for me."

A chance to get good ones at your own price is offered by the Rancho del Paso, which will hold an auction sale of 150 head of trotting bred horses at Agricultural Park, Sacramento on Tuesday, May 24th. By reference to the advertisement which appears in this issue of the BREEDER AND SPORTSMAN, it will be seen that these horses are mostly young, three and four year olds, and are by such stallions as Knight, sire of Anaconda 2:01½, Bay Bird, sire of nine in the list, James Madison, sire of eleven in 2:30, Silver Bow, sire of eight, etc., and buyers are certain to get some good ones out of the bunch. The Haggin ranch horses are noted for size, soundness and good breeding, and had Mr. Haggin given the breeding of trotters the same attention that he has devoted to the runners he would undoubtedly been the leading breeder of harness horses in the country as he never purchased any but the best for breeding purposes. Superintendent John Mackey writes that the ranch wants to get out of the trotting horse trade as they have enough other matters to keep them awake at night without bothering with them. The sale will open Tuesday morning, May 24th at 10:30 P. M.

The fact that a bookmaking firm has given \$1705 for the exclusive privilege of making books on the races to be held at Emeryville track next Wednesday under the auspices of the Butchers, who that day give their annual picnic and race meeting, has led a contemporary to remark that "it is a question whether the California Jockey Club could command as high a figure for one day's bookmaking." At the California Jockey Club meetings there are seldom less than 20 bookmakers doing business and often as high as twenty-five. Each bookmaker pays that club \$20 per race, or \$120 per day for a program of six races. This makes a total of not less than \$2400 per day when they are twenty books doing business. On the Butchers Day program there are eleven races, four of which are regular running events and four regular trotting and pacing races. When it is taken into consideration that at least twenty thousand people attend on this day against not over eight thousand as the biggest crowd the California Jockey Club can draw, the sum of \$1705 is a very moderate sum to pay for the privilege of running a syndicate book.

News From the North.

[Portland Rural Spirit.]

The Oregon state fair grounds are taking on a busy appearance these warm spring days. The track has been plowed, and is being put into condition for fast work and in a few more days we will have the best track on the Coast to work over. Horses are beginning to arrive from the outside and we expect quite a number here this summer to take their "prep" for the campaign. Mr. Zahner, of Pleasanton, Cal., is the first to arrive from the Golden State. He has the five-mile champion trotter Waldstein 2:22½ by Director 2:17, out of an Electioneer mare; Derbertha, a green pacer and full sister to Diablo 2:09½; Lady Waldstein, a three-year-old filly, Goldstein and Maud W., both by Waldstein. Derbertha has worked miles in 2:17 over the Pleasanton track. Other horsemen to arrive from California will be John Pender with Lady Jones 2:26½, and Cresceus Jones, a green trotter. Sam Casto is jogging quite a string of youngsters and doing a good business with his stallion Red Seal 2:10. Albert Prattis is also dividing himself up into two equal parts between the young Alfonso stallion Nocturno, and the great sire Diablo 2:09½. The young horse is a great favorite on account of his style and finish. Diablo is doing a great business in the stud, and no doubt will get all the mares he can serve during the season. The big stakes offered by the fair association this year are expected to draw the usual number of high-class horses together this fall, which will insure a grand race meeting. Every one is beginning to talk state fair already, and from present indication so early in the season there will be more "tenting on the old camp grounds" than ever.

A Walla Walla correspondent writes as follows: The Walla Walla County Fair Association is preparing for a big fair and race meeting this fall. All the stalls and out buildings and fences have been whitewashed and the grand stand painted white, which with the green hills for a back ground, makes one of nature's most beautiful pictures. The center field, too, is now under cultivation and fully two hundred shade trees have been planted throughout the grounds, which will tend to cool the ardor of some of the enthusiasts that are beginning to congregate here with the incoming of warm spring days. The association will build from 50 to 100 new stalls this summer to accommodate horses and other live stock at the fair this fall. Fully seventy-five horses were wintered here this winter and the track is considered one of the very best of winter tracks, which no doubt will bring many more horses here next winter. The prospects for the spring meeting, May 25th to 28th, is very flattering. The railroad company has made special rates from all points, which will add many more to the already large number of horses here.

Wm. Hogoboom is training about 20 head of trotters and pacers, from which he expects some equally as fast as those we hear about up in the high altitude country.

James Erwin has a good stable, but he will never let anyone know it so early in the season. Ollie M. 2:14½ will carry a heavy wad of Walla Walla coin when she starts this year in the Greater Salem stake.

Homer Ruthford is happy with his Belli's and Ladi's and if he don't win the admiration of some of the fair sex with this combination of names, his general conformation and good looks, dashing colors and charming ways, we miss our guess. But there are others, and Chas. Laroux is one of the others. He has the first and only Francisco 2:11, that looks like first money in the 2:11 class this year. A. W. Ellis is here with his Wilkes horse, so is L. D. Lott and he will have the Last Chance to win. But the boy who has already spent first money in the two-year-old stake is W. H. Franklin, a relative of old Ben, who first learned to hottle up lightning, and it is said our Mr. Franklin has learned the art of hottling up speed in his good two-year-old Carlyle.

L. B. L. writes the following interesting gossip from Spokane:

"Lew Childs has Roy Benton, Gyr. Falcon, Merry Monarch and Jack Wilmont, all good for either first or second money in any class, except the last named (Jack Wilmont), that can sweep the board from the 20th class down to nothing. Mr. Thompson has Dr. Luhn, Starkey and several others that have stable names, but when their names appear in the entry lists, they will either have a Dan or a Lou attachment to their names, so you will know what that means and can govern yourselves accordingly. Take your 'little old' fourth money and look pleasant."

Mr. McKownen has Alcounter and two or three good green ones being trained by Dr. Mike Moffit, and they can go some too. Mr. John Dock is here from Moscow with Encounter and some good colts by him. If you had seen Encounter leading Dr. Luhn and two or three other fast ones around the track this morn-

ing, you would have agreed with me in thinking he might make a good argument with the heat of them for first money. I have Le Roi, King Altamont, Queen Bee and two or three green ones, and if I shut any of the Wehfoot boys out they must not blame me for it, for I will be driven to it by some of these Spokane fellows.

It looks pretty good here now for the harness horse interest. They are getting up a driving club with the view to having matinee races every week or two, and very likely give a three or four days' meeting the latter part of June, with purses large enough to draw all the fastest horses in the Northwest.

Colville, a small town 60 or 80 miles from here, has advertised a meeting that takes in the 4th of July. They give one purse of \$500, free for all pacers and trotters, one-half mile heats, three in five, and several other fair purses.

I am surprised that Walla Walla is giving so few and so small purses for harness races at their spring meeting. I thought when they built their new track it would be the mecca of the harness horse. And still we are in hopes that such will be the case, for there are a number of finely bred stallions in that section reaping a good harvest, and they should and no doubt will lend their influence to make this a harness horse centre and not run after false gods as in olden times.

The BREEDER AND SPORTSMAN would like to secure for reproduction in its columns, photographs of two and three year olds that are now in training to start in any of the stakes to be trotted or paced in California this year. Owners who have colts or fillies which they are getting ready for the Breeders Futurities or for the Stanford or Occident Stakes this year will confer a favor on us if they will send in photographs of them, giving name and breeding, together with description as to color, etc. The stakes to be trotted and paced in California this year are attracting much attention and these photographs will be interesting to all our readers.

Matinee and Horse Show.

Notices have been sent out to members of the Los Angeles Driving Club, calling attention to the last matinee of the season, which is to be given at Agricultural park, Saturday, May 21. The matinee promises to be the most noteworthy of the year and will be a double event. The races will be preceded by a horse show parade, similar to the one of last year, although on a much more elaborate scale. In this there will be included horses shown to every style of vehicle, as well as to saddle and halter. All members desiring to enter may secure blanks on application to Dr. J. A. Edmonds, marshal of the parade, or at the office of the secretary, Mrs. F. E. Chandler, 507 Broadway block. The entries will close to-day. The classes in which the horses and vehicles are to be placed are as follows:

Women's saddle horse, men's saddle horse; polo pony under saddle; six-in-hands, coach, break or tallyho; four-in-hands, coach, break or tallyho; pairs, Landau, Brougham, Victorias, Stanhope Cahriole, traps, T carts, surreys, spider phaetons, tandems, road wagons; single, Victorias, traps or surreys, spiders or Stanhope dog carts, polo carts, single breaks, runabouts. Then come single trotters, harnessed to hike or cart; ponies to carts or buggy, ponies under saddle; pairs, ponies harnessed to trap, surrey or buggy; stallions, mares or geldings, colts and fillies to be shown in hand.

Since the show of last year many highly bred horses have been purchased by members of the Driving club, and these will all be entered in this year's parade. These alone will make an attractive display. Entries have been received from Riverside, Pasadena, Redlands, San Bernardino and Santa Barbara, as well as from Los Angeles. In making awards the judges not only will take into consideration the animal, but the vehicle as well, and the display made by those riding in the vehicle.—Los Angeles Express.

Pacific Coast Trotting Horse Breeders Association RACE MEETING

Santa Rosa

AUGUST 17, 18, 19 and 20, 1904.

WEEK BEFORE THE STATE FAIR.

GUARANTEED STAKES

ENTRIES TO CLOSE WEDNESDAY, JUNE 1st

PROGRAMME:

Horses to be Named with Entry.

WEDNESDAY—First Day.

SANTA ROSA DAY.

- | | |
|--|--------|
| 1. 2:24 Class Trotting..... | \$ 500 |
| 2. Santa Rosa Stakes, (2:20 Class Pacing)..... | 1500 |
| 3. 2:10 Class Pacing..... | 600 |

THURSDAY—Second Day.

- | | |
|--|--------|
| 4. Two-Year-Olds, Pacing..... | \$ 300 |
| 5. 2:16 Class Trotting..... | 500 |
| 6. 2:25 Class Pacing..... | 500 |
| 7. Three-Year-Old Trotting (2:30 Class)..... | 400 |

Nominators in any race that should fail to fill may, on June 15th, transfer their Entry in such Race to any other of the above Classes that filled in which their horse was eligible on June 1, 1904.

N. B.—It is not the intention of the management to give any special races (except for local horses) at this meeting, and if you want to start your horses they must be entered in the regular advertised events.

CONDITIONS.

Entries to close Wednesday, June 1, 1904, when horses are to be named and to be eligible to the class in which they are entered.

Stakes not filling satisfactorily to the Board of Directors may be declared off.

Stakes will be divided into four moneys: 50, 25, 15 and 10 percent, except for 2 and 3 year olds, which will be divided 60, 30 and 10 percent.

Five percent of the amount of the Stake will be deducted from each money won.

The Board of Directors reserve the right to declare two starters a walkover. When only two start they may contest for the entire money paid in, to be divided 60½ percent to the first and 39½ percent to the second.

A horse distancing the field shall be entitled to first and fourth moneys (in colt stakes first and third moneys); but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to change the hour or date of any race, except when it becomes necessary to ante-date a race, in which instance the nominators will receive three days notice by mail to address of entry. Right reserved to declare off or postpone any or all races on account of the weather, or other sufficient cause.

The Board of Directors reserve the right to start any heat after

FRIDAY—Third Day.

- | | |
|---------------------------------|--------|
| 8. Three-Year-Olds, Pacing..... | \$ 400 |
| 9. 2:13 Class Trotting..... | 600 |
| 10. 2:14 Class Pacing..... | 500 |

SATURDAY—Fourth Day.

EXCURSION DAY.

- | | |
|--|--------|
| 11. Two-Year-Olds, Trotting..... | \$ 300 |
| 12. Sonoma County Stakes (2:19 Class Trotting)..... | 1500 |
| 13. Free-for-All Pacing..... | 600 |
| 14. Special for Local Horses (Entries to this Race to close August 17th) | |

horses was eligible on June 1, 1904.

give any special races (except for local horses) at this meeting, and if you want to start your horses they must be entered in the regular advertised events.

the fourth score, regardless of the position of the horses. Stakes are for the amount guaranteed only.

Entries not declared out at 5 o'clock p. m. on the day preceding the race shall be required to start, and declarations must be in writing and made at the office of the Secretary at the track.

When there is more than one entry to any Stake by any one person or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.

Trotting and racing colors must be named by 5 o'clock p. m. on the day preceding the race and must be worn upon the track. Colors will be registered in the order in which they are received. Where colors are not named, or conflict, drivers will be required to wear the colors furnished by the Association.

Hopplee harnes in trotting races, but will be permitted in pacing races.

Conditional entries will be treated the same as regular entries, and nominators held under the rules.

Any race that may be started and unfinished on the last day of the meeting may be declared ended and money divided according to the rank of horses in the summary.

Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member) to govern.

APPLICATIONS FOR MEMBERSHIP.

Persons desirous of making entries in these Stakes, and who have not as yet joined the P. C. T. H. B. A., should make application for membership to the Secretary by June 1, 1904.

Send all communications to the Secretary.

E. P. HEALD, President.

F. W. KELLEY, Secretary,
36 GEARY STREET, SAN FRANCISCO.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
April 23—Saturday Contest No. 1. Classification Series, Stow Lake, 2:30 P. M.
April 24—Sunday Contest No. 5. Classification Series, Stow Lake, 10 A. M.
July 1-Jan. 1—Open season for black bass.
Aug. 15-April 1—Open season for lobsters and crawfish.
Nov. 1-Sept. 1—Open season for crabs.
Sept. 1-May 1—Open season for shrimps.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

May—Capital City Blue Rock Club. Agricultural Park Sacramento.
May 15—Golden Gate Gun Club. Blue rocks. Ingleside.
May 22—Millwood Gun Club. Blue rocks. Mill Valley.
May 23, 29, 30—Northern California Blue Rock Tournament. Kimball and Upson grounds. Sacramento.
May 23, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.
June 5—California Wing Club. Live birds. Ingleside.
June 5—College City Gun Club. Blue rocks. North Berkeley.
June 12—Union Gun Club. Blue rocks. Ingleside.
June 12—Empire Gun Club. Blue rocks. Alameda Point.
July 1-Feb. 15—Dove season open.
Nov. 1-July 15—Deer season closed.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas Mortimer, Superintendent.
Oct. 5, 8—Spokane Kennel Club. Spokane, Wash. W. K. L.
Oct. 12, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.

Los Angeles Show.

From all accounts the show of the Southwestern Kennel Club of Los Angeles last week was a successful initial venture for the new club. The entries were more numerous than at any previous southern show—235 all told. Public interest in the show was strong enough to lead to the belief that in future a bench show in Los Angeles will be "a go."

The gentlemen whose efforts, officially, were instrumental in making everything run smooth were:

Bench show committee—W. A. Rutherford, Charles W. Malnwarding, T. H. Broadhead, Mrs. Broadhead and Dr. H. D. Fennimore; the last named also is the club's official veterinary surgeon. Arthur Letts, Dr. F. W. Steddom and F. H. Kirby were the committee on prizes. James Cole of Kansas City judged all breeds, C. P. Schreiner superintendent, and W. J. Morris ring steward.

The quality of the show was fairly good. Collie entries were most numerous, Pointers, English Setters and Cocker were next and Fox Terriers and Bull Terriers followed.

California Kennels and Stockdale Kennels annexed the principal Pointer honors. Dr. Daniels being first winner, open, limit and novice, Gen Joe Wheeler reserve winners, second open and limit. In hitches Stockdale Kennels' entries evened up the win of Dr. Daniels.

In English Setters Ch. Elloree and Ch. Pera won the matron honors. In dogs, California Kennels' two entries Klamath and Mariposa left the Northern dog Count Rego with only the blue in open. The Setter classes were full of quality.

In Collies, as was expected, Arthur Letts' Ravenswood had it all his own way for specials and ribbons. The large breeds were not many nor, with only a few exceptions, over the ordinary. A couple of Grand Master puppies were promising young ones.

Irish Setters were few but good. Fox Terriers were only ordinary. In Bull Terriers Ch. Banjo easily topped the procession. Bostons and Japs, especially the latter, were a good averaging showing. The small breeds, in fact, were better than usual. Five Bulldogs were benched and were a more than fair bunch.

Spratts Patent looked after the benching and feeding under the supervision of Mr. Thos. Banks.

AWARDS.

ST. BERNARDS (rough coats)—Puppy dogs—1 Dr O P Roller's Dorian, 2 Dr Roller's Major. Novice dogs—1 M F George's Prince Lee, 2 T C Wirsching's Bernardo. Limit dogs—1 Prince Royal. Open dogs—1 Prince Royal, 2 S F Smiley's Keno, 3 M F George's Prince Leo, res F V Harrow's Prince. Winners, dogs—1 Prince Royal, res Keno. Puppy bitches—1 Dr O P Roller's Beauty. Novice bitches—1 Dr Roller's Lady Lucille. Winners, bitches—1 Lady Lucille, res Beauty.

ST. BERNARDS (smooth coats)—Puppy dogs—1 Helen L. Bullington's Major. Open dogs—1 Mrs C E McStay's Duke Russell, 2 T W Watson's Don Caesar. Winners, dogs—1 Duke Russell, res Don Caesar.
GREAT DANES—Puppy dogs—1 F R Valk's Major. Open dogs—1 Mrs H M Borden's King. Winners, dogs—1 King, res Major. Novice bitches—1 F R Valk's Princess Fan, 2 C L Sweeney's Queen. Winners, bitches—1 Princess Fan, res Queen.

POINTERS—Novice dogs—1 California Kennels' Dr. J. Daniels, 2 W S Toyls' Glenwood, 3 J R Kreger's Doctor Morgan, res A E Jackson's Dandy, v h c H T

Englebrecht's Mike, v h c J R Kreger's Daisy Dot. Limit dogs—1 Doctor Daniels, 2 Stockdale Kennels' General Joe Wheeler, 3 Stockdale Kennels' Glenwood res Dandy, v h c Mike. Open dogs—1 Doctor Daniels, 2 General Joe Wheeler, 3 Glenwood, res P Morris' Teddy Kent. Winners, dogs—1 Doctor Daniels, res General Joe Wheeler. Puppy bitches—1 Stockdale Kennels' Cuba's Dinah. Novice bitches—1 William J Morris' Faith, 2 California Kennels' Gamma, 3 Stockdale Kennels' Fly's Pearl, res J W Vance's Black Diamond. Limit bitches—1 Cuba's Dinah, 2 California Kennels' Senorita. Open bitches—1 Faith, 2 Cuba's Dinah, 3 William J Morris' Seekong Flirt, res G Lawson's Phoebe. Winners, bitches—1 Faith, res Cuba's Dinah.

ENGLISH SETTERS—Puppy dogs—1 California Kennels' Mariposa, 2 K E Preuss' Pancho, 3 S Mather's Stylish Duke, res Charles P Schreiner's Echo Nick. Novice dogs—1 California Kennels' Kalamath, 2 J M Donley's Monterey, 3 K E Preuss' Pancho, res Stylish Duke. Limit dogs—1 California Kennels' California Bell Boy. Open dogs—1 T P McConnell's Count Rego, 2 California Kennels' Jay M. Winners, dogs—1 Kalamath, res Mariposa. Puppy bitches—1 California Kennels' Santa Rita, 2 C L Ferry's Stylish Duchess, 3 K E Preuss' Lady May, res O W Harris' Lou Dillon. Novice bitches—1 Dr C A Kuhns' Queen, 2 Stylish Duchess, 3 Lady May, res E A Parsons' Lady Parsons, v h c E A Parsons' Parsons' Fad. Limit bitches—1 K C Preuss' Dolly Gray, 2 T P McConnell's Tirphils Judith, 3 Queen, res Lady Parsons. Open bitches—1 John W Riplinger's Pera, 2 John W Riplinger's Elloree, 3 C A Kuhns' Dolly Gray, res Tirphils Judith, v h c Lady Parsons, Queen. Winners, bitches—1 Ch Pera, res Ch Elloree.

IRISH SETTERS—Novice dogs—1 Paul Peiper's Royal Dan, 2 Mrs Paul Hutchinson's Finglass, 3 Flora Cummings' Killarney Cummins. Limit dogs—1 Royal Dan, 2 Killarney Cummins. Open dogs—1 Royal Dan, 2 Killarney Cummins. Winners, dogs—1 Royal Dan, res Finglass. Puppy bitches—1 Theodore Phelps' Nance O'Neil. Novice bitches—1 H Varley's Lismore Belle. Open bitches—1 C O McDowell's Queen Mac Mac, res Lismore Belle.

GORDON SETTERS—Open bitches—1 R D Baly's Lady Jennie.

IRISH WATER SPANIELS—3 Charles Bogen-schnieders' Chocolate Belle.

COCKER SPANIELS (black)—Puppy dogs—1 William L. Tyler's Oak Glen Darcy, 2 L C Carr's Nigger. Novice dogs—1 Grace W. Bates' Rex Ray. Limit dogs—1 R G Gamwell's Duke Royal, 2 Edwin Ralph's Count Echo. Open dogs—1 Duke Royal, 2 Grace W. Bates' Rex Ray, 3 Count Echo, res K A Steven's Duke. Winners, dogs—1 Duke Royal, res Rex Ray. Puppy bitches—1 C Dalgren's Trilxie. Novice bitches—1 Mrs L Tyler's Oak Glen Chloe, 2 Charles P Schreiner's Gamma. Limit bitches—1 Gamma. Open bitches—1 Gamma, 2 Trilxie. Winners bitches—1 Oak Glen Chloe, res Gamma.

COCKER SPANIELS (parti-color)—Puppy dogs—1 Chas P Schreiner's Echo Chubb. Novice dogs—1 Charles P Schreiner's Naird Tyke. Limit dogs—1 Naird Tyke. Open dogs—1 Portland Kid, 2 Mrs C W Sharples' Budd Zunts. Novice dogs—1 Portland Kid, res Budd Zunts. Open bitches—1 Mrs C W Sharples' Pattern. Winners, dogs—1 Portland Kid, res Budd Zunts.

COCKERS (solid colors, other than black)—Puppy dogs—1 Fred G Gillespie's Hamilton Carnival. Novice dogs—1 Mrs J V Littig's Red Ford Cavalier, 2 John Bradbury's Obo, 3 Mrs L Tyler's Oak Glens Rufus. Limit dogs—1 Mrs J V Littig's Red Ford Cavalier, 2 Obo. Open dogs—1 Red Ford Cavalier, 2 Obo. Winner dogs—1 Red Ford Cavalier, res Obo. Novice bitches—1 Charles P Schreiner's Echo Floss, 2 T H Broadhead's Red Satin, 3 Mrs L Tyler's Oak Glen Ruby. Open bitches—1 Portland Cocker Kennels' Portland Twinkle. Winners bitches—1 Portland Twinkle, res Echo Floss.

COLLIES (sable and white)—Puppy dogs—1 Mrs C W Manwaring's Donald Ellyn, 2 William Kennedy's Mae Bon. Novice dogs—1 Mrs N J Stewart's Tinto, 2 William Kennedy's Sir J D Bruce, 3 Dr G A Scroggs' Boy, res Dr W Hitt's Dr Don. Limit dogs—1 Arthur Letts' Ravenswood, 2 Tinto, 3 Dr Hitt's Dr Don. Open dogs—1 Ravenswood, 2 Tinto, 3 Boy, res Dr Don. Winners—1 Ravenswood, res Tinto. Puppy bitches—1 Mrs John A McDonald's Countess Mono III. Novice bitches—1 James Adams' Lady May III, 2 Charles P Schreiner's Countess Mono; 3 Stella Kennedy's Lady Peggy, res Mrs C L Douglass' Mona. Limit bitches—1 Lady May III, 2 Arthur Letts' California Ivy, 3 Mona. Open bitches—1 Lady May III, 2 California Ivy. Winners—1 Lady May III, res California Ivy.

COLLIES (tri-color)—Puppy dogs—1 Mrs O J Albee's Brookmere Charlie. Novice dogs—1 Mrs O J Albee's Brookmere Charlie, 2 Miss Martha White's Cheviot Chieftain. Winners, dogs—1 Brookmere Charlie, res Cheviot Chieftain. Puppy bitches—1 O J Albee's Astrologer Live Oak, 2 Chas P Schreiner's Echo Dollie, 3 Echo Kennels' Scottish Maid. Novice bitches—1 Echo Kennels' Echo Dollie. Limit bitches—1 Echo Kennels' Mt Pico Maid. Winners—1 Astrologer Live Oak, res Echo Dollie.

FOX TERRIERS (smooth coated)—Puppy dogs—1 Geo S Waring's Safety. Open dogs—1 H V Hamilton's Garston Rally, 2 Gus Moser's Warren Driver, 3 Robert Armstrong's Vagabond, res W W Howard's Vent, v h c F H Dudley's Algy, v h c Marie Campbell's Dauntless Cavalier. Winners, dogs—1 Garston Rally, res Warren Driver. Puppy bitches—1 J R Huddleston's Ramona Beauty, 2 W W Howard's Vera.

Novice bitches—1 J R Huddleston's Ramona Brownie, 2 J R Huddleston's Ramona Princess. Limit bitches—1 Ramona Princess. Open bitches—1 Ramona Princess, 2 Mrs Steve Dorsey's Lorrta Rosina Lucy. Winners, bitches—1 Ramona Brownie, res Princess.
FOX TERRIERS (wire haired)—Novice, limit and open dogs—1 G E Babcock's Whiskey. Novice, limit and open bitches—1 Julius Redelsheimer's Cold Stuff.

BULL TERRIERS—Puppy dogs—1 A R Thomas' Little Lord Fountleroy, 2 Mrs A M Lovelace's Doc Norton, 3 Mrs N Osgoodby's Buster Brown. Novice dogs—1 J R White's Deacon, 2 J G Franciscus' King's Brother. Limit dogs—1 King's Brother. Open dogs—1 Athole McBean's Ch Banjo, 2 King's Brother. Winners, dogs—1 Ch Banjo, res Deacon. Puppy bitches—1 A H Thomas' Princess Trebizonde, 2 E Greenfield's Lady Boston, 3 Mrs Norah Osgoodby's Miss Patsy. Novice bitches—1 A C Cleveland's Fannie, 2 Lady Boston, 3 F E Scott's Nellie Lass, res William D Greenough's Bessie. Open bitches—1 Lady Boston. Winners, bitches—1 Fannie, res Princess of Trebizonde.

PIT BULL TERRIERS—Limit dogs—1 Walstein Root's Mutt. Novice dogs—1 T J Pfleger's Bob. Open dogs—1 Mabel S Long's Don Nicholas, 2 Norah Osgoodby's Prince Gyp, 3 Mutt. Limit bitches—1 Miss S A Thomas' Queen.

BOSTON TERRIERS—Limit dogs—1 Mrs Charles Mackay's Prince of Pilsen, 2 W H Strawbridge's Heavy Jimmy Strawbridge. Open dogs—1 Prince of Pilsen, 2 Heavy Jimmy Strawbridge. Winners, dogs—1 Prince of Pilsen, res Heavy Jimmy Strawbridge. Puppy bitches—2 W H Lombard's Betty. Novice bitches—2 Betty, 3 H D Lombard's Pet. Limit bitches—2 Betty, 3 Pet.

BULLDOGS—Novice dogs—1 James Ewins' Ivel Rustic, 2 D W Heron's Adonis. Novice bitcher—1 James Ewins' Wedding Bell, 2 James Ewins' Little Girl. Open bitches—1 James Ewins' Wedding Bell, 2 Charles R Harker's Madam Chaddy. Winners, bitches—1 Wedding Bell, res Madam Chaddy.

AIREDALE TERRIERS—Open and winners, dogs—1 M R Morris' Yeoman Robert. Open bitches—1 M R Morris' Widome Dutchess.

KING CHARLES SPANIELS—Puppy dogs—1 Mrs S Sweeney's Goodies Bobby. Puppy bitches—1 Inglenook Kennels' Toodles Baby. Novice bitches—1 William Greenough's Nellie. Open bitcher—1 Mrs S Tyler's Nona. Winners, bitches—1 Nona.

JAPANESE SPANIELS—Novice dogs—1 Tbos W Buley's Inglenook Pooh Bah. Open and winners, dogs—1 Mrs Leila Wallace's Koko. Limit bitches—1 Mrs Sada Sweeney's Pitti Sing. Open and winners, bitches—1 Mrs S Sweeney's Pitti Sing.

GREYHOUNDS—Puppy bitches—1 Louis Dodd's Irma Hotfoot.

BLACK AND TAN TERRIERS—Open dogs—1 E P Smith's Black Prince.

MALTESE TERRIERS—Open dogs—1 Mrs Covey-Benedict's Buzzzy.

CHIHUAHUA—Puppy bitches—1 Paul Mueller's Vorina, 2 Paul Mueller's Jackie, 3 Mrs T N Persee's Midgy.

AUSTRALIAN MAORI—Open dogs—1 J G Hale's Maori.

POODLES—Novice dogs—1 Mrs V H Tisdale's Toy, 2 S P Staat's Jim Jeffries, 3 Mrs Fred Carter's Teddy Roosevelt. Limit—1 Mrs C W Horner's Lady, 2 Mrs Crawford-Lytton's Babe. Winners—1 Lady.

IRISH TERRIERS—Novice bitches—1 W R Murphy's Rag Tag.

BEAGLES—Novice dogs—1 Dr L Weber's Bingo, 2 John B Weiss' His Royal Nibs, 3 John B Weiss' Carlo. Novice bitches—1 Dr L Weber's Smitb's Goldie.

DACHSHUNDS—Novice, limit and open, dogs—G E Babcock's Bennie. Novice, limit and open, bitches—G E Babcock's Pretzel.

DOINGS IN DOGDOM.

The Gordon Setter, Dock or McKinley, which it was claimed was a stolen dog and over the possession of which a suit had been instituted, was poisoned by strychnine last week. The dog was left alone in a yard by Mr. and Mrs. Rol for several hours, and on a return to their home was found dead. The killing of the dog puts out of existence the necessary evidence to convict the thief.

Mr. E. S. Hall, who learned his business in England, has started a boarding and training kennels at Woodstock, which is near Portland, and will do well, as a number of fanciers have already placed their dogs with him and several others who are going into the fancy are making arrangements to do so.

There will be another Cocker kennel started with him in opposition to the Portland Cocker Kennels, and he will also have many good terriers of the larger breeds.

Next year the Portland Club will hold a show in connection with the fair held there and will try to make it a record breaker as a Coast show.

Cupid L., a black and white Cocker Spaniel owned by Mrs. C. H. Lutyk of Oakland disappeared, within an hour, about a month ago and despite every effort made to recover the dog all trace of Cupid has been lost.

The loss of this dog is only one of numerous cases that have been recently called to our attention. In certain districts the mysterious and systematic loss of pet and valuable dogs has created no end of comment. In some instances, dogs would be recovered, a reward paid and a short time afterwards they would be "annexed" again. At the last Frisco show two dogs were claimed from exhibitors, the claimants maintaining stoutly that their dogs were stolen.

Indications point to the existence of an organization and a cunning system for the business, for that it apparently is, of stealing dogs. Most of the good dogs, however, are never heard of again and it is

believed they are shipped away either north or south, far enough anyhow for the owner to completely lose track of the dog.

Certain individuals are under suspicion; what may result from the little evidence which has been gathered is problematical.

Arthur Letts, vice-president of the Southwestern Kennel Club, entertained the members of that association at dinner Saturday night in Los Angeles after the show closed, during which there was a general talk regarding the future of the club and the dog shows to be given hereafter. Congratulations were extended by Mr. Letts to the members of the association on the success of the show and, in return, toasts were offered to the host, the press for its work in helping out the show, and to others present. Those attending were Arthur Letts, Judge James Cole, Count Jaro Von Schmidt, Dr. G. A. Scroggs, N. J. Stewart, Charles W. Harker, O. J. Albee, E. C. Laux, H. T. Payne, William Kennedy, C. W. Manwaring, C. P. Schremer, John T. Parkerson, D. W. Ferguson, Kingsley W. Stevens, F. W. Steddom, G. R. Albers, W. W. Sweeney, T. H. Brodhead, L. C. Straus, Frank T. Searight, W. A. Alderson, F. H. Kirby, W. J. Morris and J. Ames Ewins.

John Lucas last week sent J. W. Considine's English Setter Policy Girl to Fargo, North Dakota. She will be served by Dan Theirs. Some good puppies should result from this breeding.

Hick's Lad and Hick's Bah (Doc Hick-Woodcraft) will be sent to J. W. Askins, who will handle them on the big circuit this year. These two young English Setters are owned by J. W. Considine and are probably the only two of the great Doc Hick's progeny left to-day.

F. E. Watkins, who is a promising young business man of Portland, Or., and has a strong liking for a good B. T. writes us this week and among other things says:

"I am a reader regularly of your weekly paper and enjoy the kennel part of it.

"I have a few good Bull Terriers and have been successful with them on the Northern circuit this spring, having taken open and winners with my dog Bonnyhred Stiletto and my bitch Newmarket Baby at Vancouver and Victoria, B. C., and Seattle and Portland and also took the novice class at the late Frisco show with Newmarket Beatrice.

"My bitch Newmarket Baby was shown at San Jose and was beaten by Silkwood Jean. The latter was

San Francisco Fly-Casting Club.

A glance at Saturday's re-entry scores will show some notable work, particularly in the bait-casting event, where every score was over 90%. The long-distance casting also shows a good average percentage. In accuracy, out of eight scores, there is but one below 84%. The same may be said of the delicacy casting.

SATURDAY RE-ENTRY CONTEST. Stow Lake, May 7, 1904.

The fractions in lure casting are 15ths.

sent to his brother the handsome gold medal which must be won three times during one season to become the permanent property of the winner. This medal has been competed for three times, being won first by Fred O'Brien, next by J. R. Hughes, and is now held by Judge J. W. Hughes, who succeeded in making the highest club score of the season. He will now join F. M. Newbert and F. O'Brien at the 18-yard mark.

Besides the club regular program a 25-hrld race from the 18-yard mark was one of the principal events, Upson being high man with 22 out of 25.

Between 3000 and 4000 targets were shot at during the day, and in the different events Newbert succeeded in making the best average.

Much interest was taken in the two men team shoots, of which there was a goodly number. Hugh McWilliams was very successful with his team, who divided honors with Captain Ruhstaller, Jr. Following is the club match score:

J. W. Hughes 23, Skinner 22, Vetter 21, Shore 21, F. B. Adams 21, F. J. Ruhstaller, Jr., 21, C. Cotter 20, E. D. Adams 19, C. De Merritt 19, Morgan 18, O. L. Stevens 18, C. Englehart 17, L. S. Upson 17, H. McWilliams 17, R. J. Hughes 17, J. Guisto 17, F. M. Newbert 16, Dr. Weldon 15, A. Just 15, B. Brown 14, O. Herald 14, J. F. Brown 13, Kerr 13, F. O'Brien 13, Dr. Smith 13, J. Blair 11, Ludden 6.

At the Union Gun Club shoot at Ingleside on the 8th inst. the scores made in the regular events were as follows:

Club shoot, 25 targets, \$26 added, class shooting, 8 classes: First class—H. Klevesahl 24, first money.
